Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

We have made a significant investment in Solar power on our home. Without net metering our investment in our Solar System is not paying for itself as has been calculated when we purchased the system. It would take many more years for this payback.

If the net metering is now taken away, we have been "cheated" when we purchased the system as it has been advertised that with net metering we would save and recoup our investment much quicker.

Home Solar power is the best tool for extending the life o the power gird and make it more reliable, especially during hot summer days when everyone uses their air conditioner. Solar powered houses reduce the load on the grid as they "power themselves" during those high usage times.

It would be a huge step back in encouraging more houses to use Solar Power, especially in Florida, the Sunshine State!

Sincerely,  
Reinhard Hussel
