Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

There should be one price for a watt coming from the generator. The power company knows exactly what it costs to produce it. The problem I see is that Lockheed Martin pays 4 cents a KWhr and I pay 15 cents. This solves the dilemma about how to price the residential watts. I also like the idea of realtime pricing, but youd need to rig the meters to timestamp the load. A whole load management industry would evolve to shed load as gen load increased.

Sincerely,
Bob Gardner
513 Mary Jess Rd Orlando, FL 32839-2929
