Subject: Support Solar Choice in Florida - Docket: 2020-0000

Dear Florida PSC Commissioners,

Its time to move forward with renewable energy projects and production in Florida. We should be a leader among the states in utilizing solar power at the residential level.

The current net metering rule was good policy when it came into play and remains so now. Let's not mess this up. Let's grow this segment of the solar market by allowing citizens to choose to power their homes and businesses with Florida's number one natural resource, sunshine.

There is a reason that the ballot initiative in 2016 was broadly supported. Florida citizens support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,

Douglas de Stwolinska
