Subject: I support Solar Choice in Florida - Docket: 2020-0000

Dear Commissioner Julie Imanuel Brown,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Nicholas Luthy

Dear Commissioner Julie Imanuel Brown,

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Don't let the greed of those who have a monopoly on electricity to prevent us as a state from moving forward in protecting our planet.

Getting rid of net metering will hurt the solar industry, make it harder for home owners to independently move toward greener solutions, and allow continued pollution of our planet.

Sincerely,
Kevin Heinsimer

Dear Commissioner Julie Imanuel Brown,

We must do everything we can to encourage use of renewable energy. Fossil fuel companies are doing everything they can to avoid the inevitable takeover. If they were smart they would invest in renewables themselves, but they are staying their own course, speeding us off the climate change cliff.

Net metering seems banal but is critical to our children's future.

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. Subject: Don't take a backwards step on solar in Florida - Docket: 2020-0000

Dear Commissioner Julie Imanuel Brown,

Simply put, without Net metering my family would not have been able to financially justify installing solar on my home in Winter Garden, FL a few months ago and I think many other Floridians would find themselves in a similar situation. Solar is the future of energy in our state and removing or restricting net metering would be taking a large step backwards. Please help Florida move forward into the future by continuing to support net metering.

Sincerely,
Jeff Sanders

{BULK} Net-Metering Works for Floridians
Subject:
Importance: Low

Dear Commissioners,

Florida homeowners needs a permit-less path for DIY rooftop PV solar. Unreasonable permit requirements double the cost of solar. One inspection by the electric utility if it's grid tied is all that should be required.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,

Dennis Hawkins
