Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

I have lived in Florida my entire life. That means over 60 years of hurricanes and power outages. I finally have solar with a battery backup to add resilience to my home and neighborhood as neighbors share around here.

Why, in a state like Florida, with an abundance of free power, would you, a PUBLIC service commission, do anything to inhibit the growth in that industry?

Like it or not we will get away from fossil fuels so I suggested doing it in a way that helps the people of Florida and sends a message to the power industry that we are ready to make that switch and they need to get on board by investing in and encouraging the people of this state to invest in anything that is not fossil fuel-based.

Sincerely,
Carmen Merriam
319 Braden Ave Sarasota, FL 34243-2021
