Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

The Lowdown? We Solar installed residents COUNTED ON the long term plan for payback through the Solar Utility payback system ...as it is, the utilities only give .04 cents per KWH and then they sell it for over 12 cents. We should, in fact, be getting even more like .07 cents. That's fair, we make half, and they make half. We take all the risks with leaky roofs that WE pay for. And to think the Utilities want to destroy our contract with them and the Solar Companies ...that we would buy in ..in exchange for the credit. That would violate and impair our Constitutional right to contract. Don't take it away dear Commissioners because then we'll come after you and sue you. And we'll win.

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the

Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,
Francis Knize
