**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

We are in a huge public health and economic crisis. Florida's electric utilities need to really promote rooftop solar! Solar creates jobs that we so desperately need NOW.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
Charles Behrens  
1500 Mount Vernon St Orlando, FL 32803-5422

Dear Commissioner Donald J. Polmann,

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Florida should catch up to some northern states. We do have lots of sunny days! Why is there not more encouragement for businesses and homeowners. I do not have my own home, but am questioning our management about going solar.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. **Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

Supporting net-metering guarantees lower rates for consumers in the coming future. With the transition to a smart grid in the near future all utilities will benefit heavily with preexisting solar in place.

I would like to propose a plan to allow people with exceptional roofs or large roofs to be allowed any size of a system they would like and receive a credit for all excess energy produced at a discounted rate. Home homes and business have the ability to produce over 5-10 times the solar they need but are currently limited to the amount of energy can be sent back to the grid.

This could provide stable cash flow for some solar owners and offer cheap and reliable energy for utilities.

Regards,  
Thomas Cusick
