Subject: Utilities Inc Docket #20200139-WS

Again, as has been happening every few months for years now, the despicable water monopoly Utilities Inc is gouging us customers with another rate increase. Over and over and over - with our "Public Service" Commission doing absolutely nothing for us captive consumers but bestowing blessings on this out-of-control utility. Us Utilities Inc customers have no choice but to keep paying whatever they demand, we are not able to change from them and buy our water elsewhere. Why are we not being protected?

Why are they allowed to continuously up the price of water - a commodity necessary for life? I am a senior citizen on a fixed income - will this end up being a situation where I have to choose water or electricity but not be able to afford both?

Why do you of the PSC rubber stamp your approval of every single ridiculous rate hike? After they were able to more than double their price a few years back in one huge increase? And still continue raising prices every few months since then? Obviously us tax paying property owner residents of Fla. are just cash cows and no one will stand up for us.

There is going to be a petition hundreds of us Wekiva Community home owning residents plan to sign, and media is being contacted in hopes they will expose and question this Outrage.

Please for a change do your jobs and deny this latest attack on us Utility Inc customers.
