**Subject:** PSC Docket No. 20200176 - Say No to Duke CEC

Dear Commissioner Andrew Giles Fay,

The planet is literally burning and these types of corporate shenanigans are hampering our chances to save human civilization before it's too late.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Alex Peaks

Dear Commissioner Andrew Giles Fay,

Let the crocked corporations pay their own way.

How much funds they need, how happy they are when they over profit from the consumers?

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy?s request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Norberto Siniawski

Dear Commissioner Andrew Giles Fay,

This is a form of corporate graft. Allowing it would motivate voters to support laws preventing PSC employees from working in the industry they regulate, and endanger those cushy jobs you expect to get after leaving the PSC.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

Corporations should not be allowed to push their operating expenses off on consumers, especially consumers who are not even their customers. I do not shop at Walmart, and I do not want to pay for their solar installations. Furthermore, it is time that Duke Energy lived up to their name and truly became an "energy" company and not a fossil fuel company. How about they start producing and selling energy from solar and wind instead of fossil fuels.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Dear Commissioner Andrew Giles Fay,

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Barb Wells

Dear Commissioner Andrew Giles Fay,

I agree that large companies including power suppliers and big box stores would not have their solar installations subsidized by their customers. They are in business for a profit and have funds to support their own solar installations. They too will enjoy an eventual savings, but not at the expense of their customers.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

I find it totally appalling that residents and small businesses are going to have to pay fees for something that should be a normal transition that all utilities should be doing. They are, after all, a for-profit corporation. They should be absorbing the cost of solar farms.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

Enough is enough I can't afford to pay more money to Duke energy company .

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Bassam Musa

Dear Commissioner Andrew Giles Fay,

As a Florida homeowner, I have enjoyed the benefits of my own solar energy plant since early in 2014. It has yet to be fully amortized, but the cost of solar installation is substantially less now than it was nearly seven years ago. Large corporations will reap the energy savings soon enough without Duke customers paying subsidies to them.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Dear Commissioner Andrew Giles Fay,

This proposed legislative action is absolutely unconscionable! This is nothing more than a thinly veiled attempt to have the overburdened average individual consumers absorb and pay for ecological improvements that can and should be borne by the corporations in question. The cost of arresting global warming and the attendant effects of rapid climate change must be shared by all of us, but not so brazenly in favor of Duke Energy and corporate gaslighting sweetheart deals. My entire household strongly objects to the stated language and end goals of this proposal by Duke Energy and affiliates. Thank you for your time and consideration of us, the citizens.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. **Subject:** PSC Docket No. 20200176 - Say No to Duke CEC

Dear Commissioner Andrew Giles Fay,

Duke Energy's proposal is yet another bald face robbery. Just say NO.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

John Brockman

Dear Commissioner Andrew Giles Fay,

Simply put... corporate entities rake in grotesque profits and can afford to pay for their own solar. Conversely, I have to scrape by, paycheck to paycheck, just to exist. For once, just do the right thing. This is ridiculous.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

Clean energy is essential!

However, I do NOT want to pay for large corporations to change-over over their equipment, just as I would not expect them to pay for that transition at my house.

For large corporations, and even other businesses, this is part of the cost of doing business as a responsible business owner.

It is especially important that we don't put this burden on working families, many of whom are already struggling to pay their utility bills.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves.

Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Dear Commissioner Andrew Giles Fay,

We cannot afford solar and I don't want to subsidize corporations like Walmart who collect billions in profits every year. Let them pay for their own solar or better yet, let them pay for my solar panels.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Judy Polk

Dear Commissioner Andrew Giles Fay,

If energy companies want to go green they should do so on their own dime, not on ours. We chose to do what's right for the planet Duke should too. They should not just get to pretend they have because their customers have made responsible choices.

I'm a Duke Energy customer and a member of the Sierra Club.

Dear Commissioner Andrew Giles Fay,

I just received a survey from Duke which asked my opinion on literature offering a whole house surge protector for a monthly fee. Secondly a fixed rate monthly electric service including a monthly management fee. Duke tied this into claims of an offset of energy from their solar field. No where did it say this offset would benefit me as a consumer. I was puzzled by Duke's lack of clarity regarding their use of their solar fields. Now I understand. What a scam on the consumer.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

I have neighbors with solar and I'm looking into it. No way anybody's paying for ours outside the companies receiving subsidies - but that applies to big corporations as well. So why should the public pay for Walmart's or any large corporation?

Darrell Cass

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Dear Commissioner Andrew Giles Fay,

the Public Service Commission to disapprove Duke's Clean Energy Connection program and to let Big Corporations pay for their own solar installations - not vulnerable and low-income communities that are already struggling to pay their bills.

I am encouraging the collective Public Service Commission to not approve Duke's Clean Energy Connection program. Big Corporations are more than capable of paying for their own solar installations. DO NOT place this burden on the vulnerable and low-income communities. They are already struggling to pay their bills. You have been given the authority to do right by the citizen. Corporations already receive sufficient benefits from the State of Florida.

Dear Commissioner Andrew Giles Fay,

The reality is that the corporations can afford to install their own solar panels and arrays. They will save money by using solar energy. It doesn't make any sense for anyone else to be involved in the transaction. You as the Public Service Commission should be doing service to the public as your name states. Do the right thing and have some ethics.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

Power providers are ALWAYS looking for ways to stick it to the consumer, by the pocket book or by rebating solar providers with below market rates when buying back excess production. It's a rigged system that benefits only the stockholders of the fossil fuel industry and its large consumers. It should be stopped because it is unfair and damaging to the environment.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. **Subject:** PSC Docket No. 20200176 - Say No to Duke CEC

Dear Commissioner Andrew Giles Fay,

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy?s request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Art Shaul

Dear Commissioner Andrew Giles Fay,

First, you allowed them to 'Break the Crystal River Reactor', and THEN make us pay for their incompetence, NOW you expect us to pay for them to BRIBE big customers to keep buying power?  
I think it MAY be TIME for a new set of PSC members.

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

It's obvious that significant numbers of people have lost their jobs and health insurance during these terrible times. People are working sick and healthcare workers are driven into the ground. This is not the time to be robbing the citizenry.

I will also add that since the smart meter was installed, which I have researched to YEARS and refused to have until I realized that I would be charged if I didn't connect with the smart meter, and that BESIDES, ALL THE SURROUNDING HOUSES HAVE IT SO there is no remedy.

COMMISSION, do the right thing to serve the people first and foremost.

Sincerely,  
Sheree Amar(((

!!!

Dear Commissioner Andrew Giles Fay,

I am 85 years old, a retired teacher, caring for a brother with cancer. Each month I see my energy bill increase in unexplainable amounts as I struggle to pay these bills. No, I emphatically do not support Duke's Clean Energy Connection program that lets Big Corporations off the hook.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Dear Commissioner Andrew Giles Fay,

Why don't we rethink the power grid, give customers realistic sustainable options.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Dear Commissioner Andrew Giles Fay,

I am incensed you are considering GIVING MY TAX DOLLARS to giant corporations who can well afford it to install their own solar. I strenuously object to Duke's Clean Energy Connection program. No matter how they want to scam the public with the name. Stop subsidizing billion dollar corporations on residents' backs.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Andrew Giles Fay,

I find this really disgusting-Duke Energy makes ALOT of money and while I respect their right to earn that money because they are doing a service by providing power for MANY myself included but to team up with Walmart and having customers like myself that relies on disability so I can live, and wanting us to pay what Walmart can surely afford without us! This is really something no one should have to do for a company that is so big they could probably pay our electric bills without it harming them but how many Duke customers will be harmed through a program like this? Please say NO to Walmart and Duke Energy and others with like ideas. Thankyou.

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves.
