Subject: PSC Docket No. 20200176 - Say No to Duke CEC

Dear Chairman Gary F. Clark,

In this time of considerable hardship of many who have lost their jobs or earning capacity due to COVID, we believe corporations can handle their burdens much easier than the working population

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

james johnson

Dear Chairman Gary F. Clark,

If energy companies want to go green they should do so on their own dime, not on ours. We chose to do what's right for the planet Duke should too. They should not just get to pretend they have because their customers have made responsible choices.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Chairman Gary F. Clark,

I just received a survey from Duke which asked my opinion on literature offering a whole house surge protector for a monthly fee. Secondly a fixed rate monthly electric service including a monthly management fee. Duke tied this into claims of an offset of energy from their solar field. No where did it say this offset would benefit me as a consumer. I was puzzled by Duke's lack of clarity regarding their use of their solar fields. Now I understand. What a scam on the consumer.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Dear Chairman Gary F. Clark,

The reality is that the corporations can afford to install their own solar panels and arrays. They will save money by using solar energy. It doesn't make any sense for anyone else to be involved in the transaction. You as the Public Service Commission should be doing service to the public as your name states. Do the right thing and have some ethics.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. I am encouraging the collective Public Service Commission to not approve Duke's Clean Energy Connection program. Big Corporations are more than capable of paying for their own solar installations. DO NOT place this burden on the vulnerable and low-income communities. They are already struggling to pay their bills. You have been given the authority to do right by the citizen. Corporations already receive sufficient benefits from the State of Florida.

To: Office of Chairman Clark
Subject: PSC Docket No. 20200176 - Say No to Duke CEC

Dear Chairman Gary F. Clark,

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy?s request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Beverly Malley
