Subject: RE: Docket No. 20200181; Modernize Florida's outdated efficiency practices

Good Afternoon, Jenny Duffey

We will be placing your comments below in consumer correspondence in Docket No. 20200181-EU and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz
Commission Deputy Clerk II
Florida Public Service Commission

Subject: Docket No. 20200181; Modernize Florida's outdated efficiency practices

Dear Florida PSC Commissioners,

I have a home in Florida and a home in Maine and my energy costs are much more expensive in the "sunshine state." Why is that?

The practices you rely upon in setting goals for the state's largest utilities haven't been modernized in almost 30 years – and that has led to Florida's largest power companies badly trailing leading utilities in the Southeast and across the nation in delivering energy savings to families and businesses. Most recently, this outdated approach led to power companies proposing goals of zero. THIS IS COSTING ME MONEY EVERY MONTH!!

As you set out to revisit the energy efficiency goal setting rules, please update the economic screening practices so they no longer penalize efficiency measures that meaningfully reduce energy waste for homes or businesses. Isn't the whole idea of an efficiency program, to reduce energy use to meet demand and help customers lower power bills?

It's time to use the rulemaking process to modernize your decades-old practices and consider ways to get utilities to do more on efficiency, in particular for low-income customers. The rule is outdated, CHANGE IT.

Sincerely,
Jenny Duffey
