Subject: Docket No. 20200181; Modernize Florida's outdated efficiency practices

Dear Commissioner Gary Clark,

We all know that energy efficiency means using energy smarter. It is the quickest, cleanest, and cheapest way to meet our energy needs while helping Floridians cut energy waste and manage power bills. Helping hard-working families make their homes more efficient, safer, and secure also keeps energy dollars in local communities.

Yet the practices you rely upon in setting goals for the state's largest utilities haven't been modernized in almost 30 years – and that has led to Florida's largest power companies badly trailing leading utilities in the Southeast and across the nation in delivering energy savings to families and businesses. Most recently, this outdated approach led to power companies proposing goals of zero. We can do better.

As you set out to revisit the energy efficiency goal setting rules, please update the economic screening practices so they no longer penalize efficiency measures that meaningfully reduce energy waste for homes or businesses. Isn't the whole idea of an efficiency program, to reduce energy use to meet demand and help customers lower power bills?

It's time to use the rulemaking process to modernize your decades-old practices and consider ways to get utilities to do more on efficiency, in particular for low-income customers. The rule is outdated, we must get it right.

Sincerely,
Gail Pearsall

Subject: Docket No. 20200181; Modernize Florida's outdated efficiency practices

Dear Commissioner Gary Clark,

I have been a volunteer "energy coach" for low-income homes in my community for more than 10 years. Floridians are quite literally throwing tremendous amounts of money out their windows day after day in the Sunshine State. And what's worse, since so little of FL's energy is produced in the state, we are sending those \$\$ across state lines and weakening our own state's economy. Efficiency makes great sense for our state on many levels--economy, ecology, and equity.

We all know that energy efficiency means using energy smarter. It is the quickest, cleanest, and cheapest way to meet our energy needs while helping Floridians cut energy waste and manage power bills. Helping hard-working families make their homes more efficient, safer, and secure also keeps energy dollars in local communities.
