**Subject:** Docket No. 20200181; Modernize Florida's outdated energy savings practices

Dear Chairman Gary Clark,

As a person who has had solar panels for 10 years, I am very interested in doing all we can to produce and use energy efficiently. We know that energy efficiency is the quickest, cleanest, and cheapest way to meet our energy needs while also helping Floridians to cut energy waste and save money on power bills. Helping hard-working families and businesses use energy smarter employs over 100,000 Floridians, driving economic growth by keeping energy dollars in local communities.

Yet the practices the Commission relies upon in setting goals for the state's largest utilities haven't been modernized in almost 30 years – and that has led to Florida's largest power companies badly trailing leading utilities in the Southeast and across the nation in delivering energy savings to families and businesses.

Most recently, Florida's use of outdated economic screens – like the two-year payback screen and the Rate Impact Measure (RIM) test, both of which penalize saving energy – led to power companies proposing goals of zero. Hardworking Floridians deserve access to programs that will help them lower their power bills – especially today.

It's time to move beyond practices that take real efficiency off the table.

You have a unique opportunity through this rulemaking process to reform practices so they reflect modern industry standards. Let's level the playing field so energy savings programs compete on a fair basis with costly new power plants. Let's capture technological innovation and put it to work for a smarter grid, and let's protect our most vulnerable customers by aiming to reduce the energy burden faced by so many hard-working families.

A lot has changed in 30 years. Let's modernize our practices to put efficiency to work for all in unlocking savings for Florida's families, businesses, and the state.

Sincerely,  
Robin Krivanek

**Subject:** Docket No. 20200181; Modernize Florida's outdated energy savings practices

Dear Chairman Gary Clark,

As a concerned 75 year old Florida citizen, I am appalled by the Commission's archaic economic screening practices. We need to make energy more efficient than less given the influx of new residents each day. No other state is using our protocols. Please wake up and address these issues not only for us but our children and their offspring.

Sincerely,  
Joyce Palmer
