Dear Commissioner

Florida has among the highest average residential electric bills. Florida also saw among the largest increases in bills (20%) according to a report issued July 2021.

Consumer groups believe rates can and should be lowered, not increased.

FPL continues to be the only major utility with no absolute carbon emissions reduction goals.

If the PSC agrees with the settlement, it will allow FPL to avoid going on the record with answers to questions about its clean energy goals and its commitment to keeping its rates affordable.

This should not be allowed.

Thank you,

Mario Corazon
