Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

As a customer of FPL, I wish to have my voice heard:

1) A Return on Equity of 10.6% is in excess of the national average of 9.5% is an excessive burden on FPL's customers.

2) Where is the intervenor representing the residential customers in this process?

3) What is the need for and basis of the new solar base rate adjustment mechanism?

4) The settlement includes investments in solar and electric vehicle infrastructure. Such subsidies are not needed as EV chargers can be installed by competitive providers.

While Florida's per KWH rate may be competitive, it has among the highest average residential electric bills. Florida also saw among the largest increases in bills (20%).

If the PSC agrees with the settlement, it will allow FPL to avoid going on the record with answers to questions about its clean energy goals and its commitment to keeping its rates affordable.

Please keep the residential customer in mind when trying to reconcile the needs and possibilities that are not included, nor warranted, in this settlement agreement.

Thank you,

John Breaud
