Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399
Docket No. 20210015-EI

This rate increase will include nearly \$20 million in industry association dues paid by customers with no requirement for FPL to prove how the dues are used to benefit customers. Why did the the PSC approve a \$233 million storm hardening surcharge (rate increase) for FPL. when in 2020 and 2021 these costs were removed from the base rates and transitioned to the Storm Protection Plan Cost Recovery Clause (SPPCRC) that is now an annual reoccurring increase. These additions would not account for any increases also approved for storm recovery, rising fuel costs or grid maintenance that regulators routinely allow. Florida also saw among the largest increases in bills (20%). I believe rates can and should be lowered, not increased.

It is not right for FPL to continue to be the only major utility with no absolute carbon emissions reduction goals, instead committing only to a reduction of carbon “intensity.” Ironically, NextEra (FPL’s parent) invests in clean energy projects around the country.

If the PSC agrees with the settlement, it will allow FPL to avoid going on the record with answers to questions about its clean energy goals and its commitment to keeping its rates affordable.

Thank You,
Martin Hali
