Subject: I feel that this is the best option:

"telecommunications industry is proposing what is known as an "all-services overlay" that would only impact areas in Miami-Dade and the Keys covered by the 305 and 786 area codes.

“One reason this was proposed by the industry is due to the projected life of the all-services distributed overlay, as well as the ability to implement it more quickly than the other alternatives,” McCabe said during an online workshop hosted by the Public Service Commission.

Under the recommended alternative, the new area code would be given to new phone customers or people getting additional lines in the 305 and 786 areas. Current customers would keep their phone numbers.”
