Good Morning, Linda Burkhardt.

We will be placing the comments below in consumer correspondence in Docket No. 20200226, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Subject: RE. Docket #20200226-SU

My husband and I own a home at 120 Bocilla Drive on Palm Island and I am writing this email to request that the PSC deny Environmental Utility's (EU) application for wastewater service for our community.

My main concern is whether any real need for this service has been established by those of us who live in this community. If our homeowners' association or a group of concerned property owners had established a need for wastewater service, I would support moving forward with a solution. I cannot understand how a privately held company like EU could be allowed to force their wastewater treatment plan on residents without their input. It seems to me that if a need was actually established, the property owners in our community should have the opportunity to evaluate the plans and rates of multiple service providers. Every neighbor I have spoken to is opposed to the plans and tactics of EU. Our community is also concerned by the lack of EU's experience in this field and who is overseeing either their planning, construction and costs to the homeowners.

Thank you for you time and again, please deny EU's application for wastewater service.
