**Subject:** Application for certificate to provide wastewater service in Charlotte County, RE.  
Docket #20200226-SU  
**Attachments:** OPC issues with LGWU.pdf

Dear Commission members,

I am a resident of Don Pedro Island residing at 43 Bayshore Circle. I have been following the application for certificate referenced above for the last year. I am requesting that you deny Environmental Utility's (EU) application to provide wastewater based on the following information:

In filings provided by EU, Jack Boyer sites his technical expertise comes from his experience as owner and operator of Little Gasparilla Water Utilities. Being a fairly new resident to the island and not being familiar with this utility since we live on Don Pedro Island, I looked into LGWU. In 2014, the utility requested and was granted a rate increase to replace the Utility's aging reverse osmosis water treatment plant (WTP) and begin purchasing bulk water from Charlotte County Utilities (CCU); (2) an extension of the Utility's service lines to the north end of the island to provide water service to 67 additional lots; (3) construction of a new building on the site of the retired reverse osmosis treatment plant, to serve as a workshop, storage facility, and office; and (4) a meter replacement program to replace the Utility's aging water meters with remote-read meters. I was astonished to find the issues that have occurred when this utility did the construction project. **The only project that could be looked at for his expertise is not what I would consider a success. The project had significant cost overruns and significant delays. Jack Boyer, the owner, was cited for not having the proper contractor permits, illegal hookup to home by not having a plumbing license, failure to issue boil notices, and delinquent property taxes when applying for additional rate increases. Please see attachment for documentation. The amount of debt that LGWU has incurred since 2013 also shows the failure of the operator to have the fiscal responsibility needed to operate a utility.** From 2013 to 2020 the long term debt on LGWU has increased by 259% . Loans from his related companies are secured at exceptionally high interest rates that increased from 2019 to 2020 to 10%. Other loans he has secured have interest rates as high as 11.99%. Overleveraging LGWU to get approved rate increases is something of a norm for the operator.

EU's does not have the financial ability to undergo such a large construction projector the utility which. In response to the Commission's request, EU provided its balance sheet and income statement as of October 19, 2021. These financial statements show that EU does not have any current revenue stream. In addition, the Company's liabilities exceed its assets by 14 times, as of October 19, 2021. **EU's ability to get a loan secured for this project would rely on working capital, which they do not have, or the ability to get a bank loan based on the future revenue projections which falls short by over \$4 million dollars.**

I was in attendance when Jack Boyer presented information to the Palm Island Estates meeting. He said he believed the hook up cost to be around \$20K but he would look into getting federal grants to lower the hook up fees. When questioned further he could not give any further information on grants available. He frankly told the group the more we objected the more we would have to pay in legal fees. EU's estimated \$13K hookup fees are simply estimates. EU has not demonstrated actual costs to homeowners. What has been presented is an estimated cost from Giffels-Webster based on other projects they have done. Given the unique nature of this barrier island, an extensive engineering study should have been submitted with specific recommendations on which system would work the best and what is the best system to transport the wastewater back to the mainland and what the actual cost would be to each homeowner, and this has not occurred. I have no idea how you as a commission could determine if the proposed rates are fair and

equitable. The information EU has provided does not allow for any pay overtime plan and this will be a hardship for many when you also considered the additional costs the homeowners will be responsible for such as electrical hook up, additional electrical panel if needed and costs associated with fences, hardscapes or landscape that will need to be removed for easements.

In looking through the docket I could not find where EU has done any testing to substantiate a need for service in this area. It appears he refers to the Charlotte County Master Plan to substantiate a need for service. I question what is the standard for need for service that is applied in this case. From my understanding, the role of the Florida Public Service Commission is to ensure that consumers receive essential services in a safe, affordable and reliable manner. Homeowners on this island are receiving wastewater services through the installation of septic systems which have not been found to be harming the environment. If EU were granted a certificate of service, it would not be affordable, nor based on his demonstrated past experience, would it be reliable.

Based on the information provided above, I respectfully request you deny Environmental Utilities request for application to provide waste water service. Thank you for your time and your service on the Commission.

Sincerely,

Lynne Petersen

Re: Docket 130265 -- Application for staff-assisted rate case in Charlotte County by Little Gasparilla Water Utility, Inc.

Dear Ms. Stauffer:

Attached is a list of issues that the Office of Public Counsel has prepared to identify concerns we have with information discovered about Little Gasparilla Water Utility, Inc. We believe that these are critical issues that should be reviewed and addressed by staff before Phase II rates are implemented. If you should have any questions, please feel free to call or e-mail me.

Respectfully submitted,

s/ *Danielle M. Roth*

OPC Issues and Concerns  
Little Gasparilla Water Utility, Inc.  
130265-WU

Unlicensed Plumbing

1. The Charlotte County Community Development Department was notified of a possible licensing violation by Mr. John (Jack) Redmond Boyer at 3 homes on Little Gasparilla Island:

8854 Bay Street  
8808 Grand Avenue  
8814 Grand Avenue

Mr. Boyer was said to be connecting meters to the houses without a plumbing license. Compliance officers inspected the homes and observed a newly installed water meter box and meter at each location. After inspecting the homes, Mr. Boyer was contacted and confirmed that he had connected the meters to the houses without a plumbing license.

On October 12, 2015, Mr. Boyer was served in person with the following citations for violation of Florida Statute 489.127(1)(f), for acting in the capacity of a contractor without being duly registered or certified. Mr. Boyer was fined \$1,000.00 for each said violation.

#4004 (Attachment A)  
#4006 (Attachment B)  
#4008 (Attachment C)

Non Permitted Water Connection

2. The Charlotte County Community Development Department was notified of a possible permit violation by Mr. John (Jack) Redmond Boyer at 3 homes on Little Gasparilla Island:

8854 Bay Street  
8808 Grand Avenue  
8814 Grand Avenue

Mr. Boyer was said to be connecting meters to the houses without obtaining a building permit as required by Charlotte County Code 3-2-27(A). Compliance officers inspected the homes and observed a newly installed water meter box and meter at each location. After inspecting the homes, Mr. Boyer was contacted and confirmed that he had connected the meters to the houses without a building permit.

On October 12, 2015, Mr. Boyer was served in person with the following citations for violation of Florida Statute 489.127(1)(h), for performing work for which a building permit is required without such building permit being in effect. Mr. Boyer was fined \$1,000.00 for each said violation.

#4005 (Attachment D)  
#4007 (Attachment E)  
#4009 (Attachment F)

OPC Issues and Concerns  
Little Gasparilla Water Utility, Inc.  
130265-WU

Water Tariff

3. The Rules and Regulations portion of the Utility's Water tariff approved by the Public Service Commission provides:

All Customer's water service installations or changes shall be inspected upon completion by a competent authority to ensure that the Customer's piping, equipment, and devices have been installed in accordance with accepted standard practice and local laws and governmental regulations. Where municipal or other governmental inspection is required by local rules and ordinances, the Company cannot render water service until such inspection has been made and a formal notice of approval from the inspecting authority has been received by the Company.

As evidenced by the Charlotte County citations, we believe the utility is in violation of its tariff. While Charlotte County has cited the utility on three counts, we believe the Commission should investigate all new connections that have been completed since the PAA Order was issued to determine compliance with and adherence to the utility's tariff and other applicable laws and regulations. The Commission should require the utility to provide sufficient proof that it connected the new customers only after the service connections were inspected and a formal notice of approval was provided to the utility as required by the tariff.

Tangible Property Taxes

4. As of February 5, 2016, Little Gasparilla Water Utility, Inc. owes a total of \$23,212.68 in tangible property taxes to the Charlotte County Tax Collector (Attachment G). The utility owes \$9,254.94 from the 2013 tax year, \$11,017.93 from the 2014 tax year, and \$2,939.81 from the 2015 tax year.

Boil Water Notices

5. On or about January 26, 2016, Little Gasparilla Water Utility, Inc. shut off the water on the Island to repair a water break. According to the Department of Environmental Protection, total pressure loss should always result in a precautionary boil water notice to the utility's customers. However, we do not believe that a boil water notice was issued to the customers before or after the January 26, 2016 water shut off. In addition, we cannot find evidence that the utility provided notice to Charlotte County or the Florida Department of Environmental Protection.

**To:** Records Clerk; Office of Commissioner La Rosa; Office of Commissioner Clark; Office of Commissioner Passidomo  
**Subject:** Docket #20200226-SU

To the clerk and commissioners:

My name is Mark Weinstein. My wife Laurie and I are owners on Don Pedro Island, There is a sewer system being proposed for our area. We are not opposed to a sewer system as environmentally it makes sense. We are opposed to a system being implemented by EU. The project as proposed by them has many concerns to us on the island as you are aware not to mention there is no prior track record of this company to implement and maintain this system. The financial stability of this company to withstand any unforeseen expenses is questionable and would potentially impact us all greatly. We respectfully ask that you deny EU's request for wastewater service on the island.

Thank you for your time and consideration in this matter.

Mark and Laurie Weinstein  
301 South Gulf Blvd.
