**Subject:** LGI sewer project

I have been an owner on the island since 1984 and the island is old FL.

My concerns are:

The lack of information provided to us. The type of system ( from what I understand) low pressure will not improve the situation on the island.

The cost (which has not been provided)will be prohibited for a lot of people.

My question is: why can't the current septic systems that are the issues be replaced. My septic is fine. I have it pumped every 5 years and it's ok.

Instead big government and jack boyer is attacking everyone on the island.

I will be one of the owners the will be forced to sell. Way to go jack!
