Good Morning,

We will be placing your comments below in consumer correspondence in Docket No. 20200000-OT and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz
Commission Deputy Clerk II
Florida Public Service Commission

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Clerk Of PSC,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

FPL wants to spend nearly \$500 million on new electrical lines and make more investments in gas power plants – all this to prepare for a cold snap that experts testified has less than a one-in-a-million chance of causing a loss of power. Florida's utility policy allows FPL to pass the full costs for these projects onto ratepayers and earn a guaranteed profit while they're doing it. This unfair incentive makes it more attractive for FPL to build projects they don't really need, while we literally pay the price.

I would rather see FPL invest in renewable and efficient energy to reduce monthly bills. Energy efficiency offers proven solutions to help the utility meet its needs while saving all of us money, especially low-income households who are the

most energy-burdened. But, FPL ranks a dismal 51st out of 52 utilities nationwide on energy efficiency. We need the PSC to protect us from FPL's endless quest for profits at the expense of ratepayers.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Ms. Patricia Rowe
