Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Ms. Savana Roach

2350 Phillips Rd Apt 9302 Tallahassee, FL 32308-5455 savana@fcvoters.org

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr Harold Bullock

Saturday 11 June 2022 1730 hours

Florida Public Service Commission

To whom it may concern,

I am writing to express my ongoing deepest disappointment that the electrical utility industrial sector continues to mismanage the electrical infrastructure throughout the State of Florida despite given unfettered access to elected and appointed government officials and agencies in the furtherance of policies and agendas in pursuing poorly thought out sourcing of energy resources and a decidedly anti-consumer stance with the rate-paying public across the board. Ongoing investigations continue undercover the long-standing practices by these captains of industry to extract ever larger fees and electrical rates to aggrandize their oversized ambitions by direct and indirect political arrangements in backrooms.

The attached documentation clearly indicates the lengths that the electrical utility industrial sector continues to pursue to ensure their monolithic position in the electricity sector in the State of Florida.

Please place these observations and articles in the appropriate docket to underscore the overwhelmingly calculated cold-hearted manner that these captains seem to influence the very elected/appointed representatives that should, instead, be seeking to comfort their constituents day-to-day hardships to pay for the aggrandizement of these out sized economic sectors.

Thank you for your time in these matters and hope to hear from you soon.

Sincerely,
Beatrice Balboa

We are on a fixed income being retired. Never thought this would happen in our lifetime having such monopolies in the electric & fossil fuel industries and crippling America. Just wanted to travel some & eat out a few times a week, now prisoners in our own home due to these economic disasters! We don't even want an EV due to prices for one and the added expense it incurs to own one and cost of & lost time charging it. Worked 55 years to enjoy retirement, sure as heck haven't yet.

God Bless America!

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mr Albert Marra

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

FPL wants to spend nearly \$500 million on new electrical lines and make more investments in gas power plants – all this to prepare for a cold snap that experts testified has less than a one-in-a-million chance of causing a loss of power. Florida's utility policy allows FPL to pass the full costs for these projects onto ratepayers and earn a guaranteed profit while they're doing it. This unfair incentive makes it more attractive for FPL to build projects they don't really need, while we literally pay the price.

I would rather see FPL invest in renewable and efficient energy to reduce monthly bills. Energy efficiency offers proven solutions to help the utility meet its needs while saving all of us money, especially low-income households who are the most energy-burdened. But, FPL ranks a dismal 51st out of 52 utilities nationwide on energy efficiency. We need the PSC to protect us from FPL's endless quest for profits at the expense of ratepayers.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,
Ms. Patricia Rowe
