Good Morning, Kim Johnson.

We will be placing your comments below in consumer correspondence in Docket No. 20220000, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Clerk Of PSC,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase even more. I cannot afford my bills now! I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months. Do away with the over 1000 kWh structure and the accelerated meters that are in accurate and charging more. Save our households!!!

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. However, we are already struggling customers. They are already raising our bills higher than I've ever seen as a Florida resident. I have never had to sacrifice like this for electricity. In the time that I have lived in Pensacola, I have never used as many kWh per day or have had to go without heat or lights. I've never had to worry and check my account several times a day. You need to get FP&L out of the lowest paying area in Florida. Stand with us: reject FPL's proposed site plan and urge them to stop hurting NWFL and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Ms. Kim Johnson
