Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Ms Nonie Maines

Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable!!!!!!! The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. My bill has doubled every single month I have been using them for power. I am lucky enough to be able to cut out other luxuries in my life but what about my community and friends that are already living at bare minimum?????? WORKING CLASS MEMBERS ARE HAVING TO CHOOSE BETWEEN GROCERIES ANS POWER. Stop the problem at the root. FPL is already damaging to our community and the money hungry pigs behind it are going to ruin our lives.

Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,
Ms. Alex Horne
