Florida Public Service Commission Clerk,

The message below is one from Opportunity for all Floridians and I agree with it. I would encourage you to a) remove the \$30 minimum from our bills, allow the Utilities to label a fee for Grid Support/Connection that applies to all, not just the people with low bills. c) I would suggest you think about how the profits of the Utility companies has changed in the past few years and to think about windfalls they've been allowed to benefit from.

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.
