**Subject:** Proposed Utility Rate Increase

Dear Honorable Commission members,

I'm a divorced retired senior native Floridian and I'm appalled by the suggestion of a proposed utility rate increase for the 'Big Bad Three' Tampa Electric, Duke Energy, and Florida Power & Light Company. Not one but two increases, January and April 2023.

I was gainfully employed for 45 years before I medically retired due to my disability, Multiple Sclerosis. I live on a government stipend, Medicare, and what I can get from my only adult child. I have to decide each month whether I buy groceries or medication.

I was elated when Social Security announced an increase in benefit amounts in 2023. Now, I'm deflated because that increase will slip between my fingers into the silk-lined pockets of the utility companies. No matter what their argument is, they are making money, far more than my Social Security increase.

May I please catch a break? I do not want the increase, I can't afford the increase. Greed is not good! I reviewed your pictures on the website and you all look pretty well-heeled and content with your lofty positions of authority. The word public in your office is there for a reason. You're supposed to consider the public in your decisions.

No one will speak for the elderly and senior customers so I'm doing it. Deny both of the proposed utility rate increases in January and February 2023. Also, you'll be rewarding Teco for the two recent deadly horrendous workplace 'accidents' for which they admit liability. They are trying to compensate for the lawsuits that they had to pay the victims' families.

Respectfully,  
Mrs. Vanessa H. Dixie
