COMPANY PROFILE

Provide a brief narrative company profile which covers the following areas:

- A. Brief company history.
- B. Public services rendered.
- C. Major goals and objectives.
- D. Major operating divisions and functions.
- E. Current and projected growth patterns.
- F. Major transactions having a material effect on operations.

A. Park Water Company Inc. was formed in 1955 during the development of Crooked Lake in Polk County. It has been privately owned and operated in part and subsequently in its entirety by the Staiano family. Louis Staiano started the corporation and now Anthony Staiano currently owns it.

B. Park Water Company Inc. has a service area of approximately 5 square miles. Currently it provides potable water service only to approximately 804 water connections. All services are metered. Meters are read and billed on a monthly basis. Park Water Company also provides fire protection through numerous fire hydrants, which produce in excess of 2000 gallons per minute in water flow.

C. Our goal as a corporation is to meet customer expectation regarding potable water service while being as efficient as possible. First and foremost we must provide safe and aesthetically pleasing potable water. Secondly we strive to keep costs down so that we may provide water at reasonable rates. Thirdly our goal is to provide fire protection to every customer in the form of fire hydrants with sufficient water flows.

D. Park Water Company Inc. has a small staff of 2 that is dedicated to providing quality customer service. Meter reading, billing, work orders, leak repair, book keeping, and customer service are handled by all 2 employees, so that response to customer requests can be made swiftly.

E. Growth in our service area has been relatively slow when compared to neighboring towns and communities. However it is only a matter of time until a large development or project comes into the service area.

F. Park Water Company Inc. installed large standpipe in 1999 and booster pumps with a backup generator to ensure that we can operate during emergency conditions. These two projects enhanced our ability to provide fire protection as well as keep a constant 60 PSI throughout the system.

G. During 2008 the Company completed the SRF Mainline Extension Project at a cost of approximately \$2,340,000 virtually updating their entire system.

CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).

Use one of the following methods:

- (a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.
- (b) If no historical flow data are available, use:
 $ERC = (\text{Total SFR gallons sold (Omit 000)} / 365 \text{ days} / 350 \text{ gallons per day})$

ERC Calculation:

$$38,284,850 / 781 / 365 = 134.3$$
