PRICE LIST FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the Price List. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the FPSC follows in their Price List approval process, the most current sheet number on file with the Commission is not always the Price List sheet in effect. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets - When a Price List filing is made with the FPSC, an updated check sheet accompanies the Price List filing. The check sheet lists the sheets contained in the Price List, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Price List user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

SECTION 3 - BASIC SERVICE DESCRIPTION AND RATES, CONT'D.

3.4 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 3.4.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 3.4.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 3.4.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 3.4.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 3.4.5 All times refer to local time.

SECTION 3 - BASIC SERVICE DESCRIPTION AND RATES, CONT'D.

3.6 Network Exchange Bundled Service

3.6.1 General

The Company offers local exchange only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll), and selected custom calling features. Voice mail and optional Internet access¹ may be available with some packages at an additional price. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company.

IDT provides its Network Exchange Bundled Service via the use of the unbundled network elements (“UNEs”) of the incumbent local exchange carrier(s) (“ILEC”). The rates for UNEs may vary depending on the ILEC and the UNE “zone” that a particular consumer is located within. These UNE zones (or similarly named designation) are on file with the Commission by the ILEC. Accordingly, IDT may charge different rates for the same service plan depending on which ILEC’s UNE zone its consumer is located within. Where IDT offers the same plan at different rates depending on the UNE zone, it shall so designate the distinction in this Tariff. IDT concurs in the UNE zones of the ILEC presently on file with the Commission and in any subsequent modifications.

4.5 Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone, not presubscribed to the Company, used to access Company provided services. This surcharge, which is in addition to standard Pricelist usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

Speed Dialing (8) - This feature allows a user to dial selected numbers using one digit. Up to eight telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Speed Dialing (30) - This feature allows a user to dial selected numbers using two digits. Up to thirty telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Call Return - Call return stores the number of the most recent incoming call (including unanswered calls) to a Customer's number. This allows a Customer to dial back any missed or unanswered telephone calls.

Repeat Dialing automatically redials the last telephone number the Customer dialed in the Customer's local calling area. The system will keep retrying the number attempting to make the connection if the line is busy.

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you.

When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customer are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you.

A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

SECTION 4- MISCELLANEOUS SERVICES AND CHARGES, CONT'D.**4.11 Carrier Presubscription****4.11.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

4.11 Carrier Presubscription**4.11.4 Presubscription Procedures**

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.
