SSU JOB DESCRIPTION

JOB TITLE: CHIEF OPERATOR
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 6 - Craft Workers

GENERAL PURPOSE

Responsible for the 24-hour operation of a water and/or wastewater plant(s), including the supervision, assignment, training and cross training of facility personnel.

DUTIES

Responsibilities may include:

1. Administrative: Scheduling and work assignments of assigned personnel. Develops and administers annual preventative maintenance programs. Prepares or assists in the preparation of budgets and monitors and files laboratory records/reports, compliance and permitting issues (flow rates, fecal coliform, etc.) and MORs. Reviews, approves, processes and files timesheets, time off requests, local purchasing for plant(s) and other employee requests. Prepares weekly operational reports. Develops recordkeeping systems to meet environmental, operations and regulatory requirements.
2. Laboratory: Monitors lab results to ensure they are in compliance with acceptable operating procedures and regulatory requirements.
3. Operations/Maintenance: Performs periodic and daily visual checks on the operating conditions of the plant, relying on operating experience to identify inconsistencies or problems in operating conditions and effectiveness. May develop, recommend and implement minor modifications to plant operating systems.
4. Supervisory: Supervises staff including interviewing, hiring recommendations, conducting performance appraisals, administering discipline, providing training and cross-training, planning and directing work assignments, administering company policies affecting staff and keeping staff up-to-date on information and changes in requirements/procedures necessary for effective job performance.
5. Is subject to being called to address operating problems and emergencies at any time.

KNOWLEDGE AND SKILLS (cont.)

- Oral and written communication skills
- Organizing and planning
- Plant operations
- Problem solving, decision making
- Recordkeeping
- Scheduling
- Supervision
- Teaching and training
- Understanding of rules and regulations applicable to department

CONTACTS

INTERNAL: Throughout the Company, at various levels.

EXTERNAL: Contractors, vendors, customers, representatives of other utilities and inspectors from DER, EPA and the county.

HIRING STANDARDS

EDUCATION: High school graduate or equivalent. Minimum "B" in water and/or wastewater.

EXPERIENCE: Minimum four (4) years experience as a license operator, plus at least two (2) years in a supervisory capacity.

SSU JOB DESCRIPTION

JOB TITLE: CUSTOMER SERVICE REPRESENTATIVE I
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 5 - Office and Clerical

GENERAL PURPOSE

Under direct supervision, serves as primary customer contact providing service relating to customer accounts including receiving payments and answering basic questions, performing merchandise sales duties, maintaining associated automated and manual records, and performing a variety of administrative/secretarial duties to support office operations. Effective performance required to assure enhancing company image, providing high level of customer service, preserving confidentiality of account and credit information, and furnishing accurate information relating to customer accounts.

DUTIES

Performs several of the following:

1. Performs a variety of duties to provide service related to customer accounts including assisting customers with account questions, explaining information on accounts and usage, making entries and statements, and calculating interest and tax on merchandise sales as the situation requires.
2. Receives customer payments; balances cash, accounts and transactions assuring proper availability of cash; prepares daily cash reports and deposit slips; makes bank deposits; records payments on delinquent accounts; and sends appropriate forms and records to the general office.
3. Enters and verifies data in a variety of computer programs covering items such as connecting/disconnecting service, adjustments to customer accounts, installation/change of meters, etc.; reviews errored billings for correctness or re-billing; enters customer read meter accounts; assists meter readers with loading/unloading electronic meter reading devices; assists with questions on meter edit runs.
4. Performs a variety of duties relating to delinquent accounts and collections including reviewing credit and payment history and sending notices, and enters data into customer information system.

CONTACTS

Frequent internal and external contacts in person or by phone requiring high level of interpersonal skills to enhance positive image of company and provide clearly understood explanations of customer accounts and other available services.

HIRING STANDARDS

EDUCATION: High school diploma or equivalent, business and office course work preferred

EXPERIENCE: Over one year of office or related work experience with good communication skills. Customer service and computer experience preferable.

SSU JOB DESCRIPTION

JOB TITLE: CUSTOMER SERVICE REPRESENTATIVE II
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 5 - Office and Clerical

GENERAL PURPOSE

Under supervision, serves as primary customer contact providing service relating to customer accounts including receiving payments and answering basic questions, performing merchandise sales duties, maintaining associated automated and manual records, and performing a variety of administrative/secretarial duties to support office operations. Effective performance required to assure enhancing company image, providing high level of customer service, preserving confidentiality of account and credit information, and furnishing accurate information relating to customer accounts.

DUTIES

Performs several of the following:

1. Performs a variety of duties to provide service related to customer accounts including assisting customers with account questions including determining customer needs/wants; investigating, evaluating, and verifying information from several sources; explaining information on accounts and usage; preparing entries and statements; determining factors for preparation of corrected bills; and calculating interest and tax on merchandise sales as the situation requires. THIS PAGE INTENTIONALLY LEFT BLANK

SSU JOB DESCRIPTION

JOB TITLE: Laboratory Technician
DEPARTMENT: Operations/Varied
IMMEDIATE SUPERVISOR: Lead or Chief Operator or Area Supervisor
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE:

GENERAL PURPOSE

Under direction, performs all necessary laboratory analyses of collected samples from appropriate collection points in the water and/or wastewater systems and reports the results of these tests in accordance with regulatory agency rules.

DUTIES

1. Tests and analyzes samples to determine contaminant levels in accordance with Standard Methods and EPA Methodology. Prepares reports and records the results of same in accordance with regulatory requirements and company policy. Performs process control, chemical and biological tests including, but not limited to: BOD, Chlorine residuals, Total Dissolved Solids, Total Suspended Solids, fecal coliform and total coliform. May be responsible for monitoring and coordinating the implementation of Lead and Copper Programs and reporting results. May assist in responding to plant operational needs as needed or directed. Monitors laboratory testing completed by operations personnel, providing remedial training as necessary. Identifies and reports test results that indicate non-compliance with permit conditions to supervision.
2. Coordinates, monitors and schedules collection of samples from appropriate locations in water and/or wastewater treatment facilities.
3. Performs the proper calibration of laboratory equipment on a daily or more frequent basis, as needed or required.
4. Complies with company operational and personnel policies and procedures and performs other duties as required or directed.
5. Duties are typically performed in an office environment, but incumbent is frequently exposed to the elements, hazardous materials and plant operations equipment.

SSU JOB DESCRIPTION

JOB TITLE: Laboratory Technician Continued

KNOWLEDGE AND SKILLS

- Proper laboratory techniques including housekeeping, recordkeeping, calibration and maintenance of laboratory equipment and use of standards.

- Visual acuity and attention to detail to enable the correct reading of meters, measuring devices and equipment and recording results.

- Basic mathematics and Algebra to enable computation of averages, percentages and metric usage computations including decimals, fractions, formulas, tables and specifications.

- Diagnose, analyze and correct problems in water and wastewater systems.

- Safe driving practices and record with a valid driver's license.

- Oral and written communications.

- Technical and business writing.

- Quality Control/Quality Assurance methods to apply to test and sampling procedures.

- Analysis of laboratory results using the following equipment:

- a. ph meter
- b. D.O. Meter
- c. Spectrophotometers/colorimeters
- d. Analytical Balances
- e. Turbidimeters
- f. Conductivity meters
- g. Sampling Equipment

CONTACTS

INTERNAL: All levels at the local plant level, Environmental Services, Engineering and other departments and personnel.

EXTERNAL: Vendors and regulatory personnel (Department of Environmental Protection, EPA and various county regulators).

HIRING STANDARDS

EDUCATION: Associate's degree in Chemistry, Biology or closely related physical science

EXPERIENCE: Three years in a laboratory environment dealing with water and/or wastewater industry, or an equivalent combination of education and experience.

EFFECTIVE 10/94

SSU JOB DESCRIPTION

JOB TITLE: Large Meter Testing and Repair Trainer
DEPARTMENT: Operations Services
IMMEDIATE SUPERVISOR: Operations Services Manager
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: Technicians

GENERAL PURPOSE

Under general direction, provides training and direction to field operatives in the selection of appropriate meters for any given application; and the accurate testing, repair and installation of new and existing meters (3" to 12") using sophisticated testing devices. Administers and schedules the company's large meter testing, repair and replacement program.

DUTIES

1. Develops and provides individual and platform training programs for all field meter repair technicians on the proper selection of meters for a given application, testing techniques and procedures and the installation or repair of existing meters. Evaluates the training programs to ensure that objectives are being met and that the content of training is pertinent to individual and company needs. Maintains records on employee participation in training and organizes follow-up or periodic retraining, as needed, as well as training to comply with new methods or changing company needs. Provides specialized training on specialized test procedures including Polysonics, Comparative Method or C.W. Cox techniques. Provides training on repair methods for a variety of meters including disc meters, turbine meters, compound meters, multi-jets, single jets and fire line meters. Training in the use of cutting torches and stick welding may be necessary.
2. Analyzes water system by-pass configurations to determine if there are any other alternatives to system shutdown to effect meter repair or replacement, which would result in a "boil water" notice under Department of Environmental Protection regulations. Coordinates and schedules the repair and installation of large meters with local plant personnel, trainees, customers and regulatory agencies.
3. Provides research, recommendations and data in support of long range budgets, annual budgets and monthly variance reports for the area of responsibility.

Large Meter Testing and Repair Trainer

Effective 10/94

Job Description, Page 2

4. Maintains records of the type of meter, repair record, testing frequency and results, location and age of all large meters in the company's system. Analyzes the cost-benefit ratio on all meter repair or replacement projects, based on past consumption and current meter inaccuracy. Places orders for meters and meter parts, maintaining physical inventory and inventory records.
5. Performs other duties or special projects as needed or directed related to the area of responsibility.
6. Duties are performed both indoors (in a temperature controlled environment) and outdoors with exposure to changing weather conditions, insect and animal bites, dirt and limited and occasional exposure to chemical hazards. Considerable overtime may be is required, with overnight travel away from home.

KNOWLEDGE AND SKILLS

- Good physical condition to facilitate loading, unloading, movement and lifting of meter test equipment weighing 80 pounds, bending, kneeling, crouching, reaching, feeling and fingering. Visual acuity and attention to detail to enable the correct reading of meters and the recording of results.
- Basic mathematics and algebra to enable the computation of averages, percentages and usage computations, including the use of decimals, fractions, formulas, tables, specifications, schematics and blueprints.
- Use of precision measuring instruments including Polysonic (Doppler) testing unit, comparative test unit and C.W. Cox unit.
- Safe driving practices and record with a valid driver's license.
- Training techniques and adult learning processes.
- Interpersonal communications
- Filing
- Organizing and planning
- Problem solving, decision making
- Recordkeeping
- Budgeting

Large Meter Testing and Repair Trainer
Job Description, Page 3

Effective 10/94

CONTACTS

INTERNAL: Employees at all levels within the operations division, customer service and engineering personnel.

EXTERNAL: Vendors and manufacturer's representatives.

HIRING STANDARDS

EDUCATION: High school graduate, with some meter manufacturer's certification in meter testing, repair and installation is highly preferred.

EXPERIENCE: A minimum of 5 years of experience in the testing, repair and installation of 3 inch to 12 inch meters of various types, including at least one year of training experience on the repair and replacement of large meters.

SSU JOB DESCRIPTION

JOB TITLE: Lead UFW/Backflow Technician
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Regional Manager
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: Craft Workers

GENERAL PURPOSE:

Under general direction is responsible for the analysis, maintenance, investigation, tracking and reporting of the backflow/cross connection control program. Assists Operations Support with the analysis, maintenance, investigation and corrective action of unaccounted for water (UFW), the meter replacement program and large meter testing and retrofitting. Conducts field inspections and leak detection for UFW. Assists the Operations Administrator with the development of manuals and standard procedures on UFW and backflow/cross connection control. Responsible for assisting with budgeting and budget variances related to the backflow/cross connection program and meter replacements.

DUTIES MAY INCLUDE:

1. Survey all customer locations, identifying existing and potential backflow/cross connection risks or problems; notify customers of required assemblies; follow-up on customer compliance. Survey and maintain backflow/cross connection control compliance on all future connections. Coordinate, maintain, track and report on an annual basis backflow/cross connection control testing.
2. On an annual basis, develop meter change-out action plans for compliance with the comprehensive meter program. Coordinate the generation of service orders through customer service; participates in meter change-outs; repipe when necessary.
3. Maintain meter inventory logs; provide documentation regarding meter change-outs to Customer Service, Property Accounting and Operations Administration; Assure meter change-out records are accurate; budget for yearly meter needs; prepare and submit budget variances.

4. In conjunction with Technical Services, test, repair and/or replace and retrofit all large (3" and above) meters, taking corrective action when necessary. Maintain accurate records and assure that Operations Administration is provided with the documentation.
5. At the direction of the Region Manager and the Operations Administrator travel to all region systems to monitor, investigate, analyze and make recommendations for corrective action for UFW. Provide training to Operations' personnel on UFW for all systems above or below 10%. Schedules and performs leak detection when necessary,
6. May recommend personnel actions such as hiring, promotion, transfer, termination and discipline. Prepare performance appraisals. Identify and report unusual conditions or safety hazards to supervision or other personnel.
7. Assists with the development and implementation of Backflow/cross connection control, meter change-out and UFW programs.
8. Responds to operational emergencies as required and assists in contacting customers and operational personnel when the need arises.
9. Performs other duties and coordinates special projects as requested.
10. Normal working environment is primarily field work and is affected by changing weather conditions. Work may be performed around heavy equipment and travel throughout the Region is required. Overnight trips may be required periodically.

KNOWLEDGE AND SKILLS:

- Supervision, organizing, scheduling and planning
- Oral and interpersonal communications
- Recordkeeping
- Basic mathematical skills (addition, subtraction, multiplication and division) to determine meter readings, measurements and other uses.
- FPSC, DEP and other regulatory rules
- Safe driving record and a valid Drivers License
- Extensive knowledge of meters and backflow prevention equipment
- Good physical condition to enable considerable walking, kneeling, stooping, crouching and movement/lifting/carrying objects weighing up to 50 lbs. Visual acuity and attention to detail to enable reading meters recording results, reading blueprints and repairing valves/meters.

CONTACTS:

- INTERNAL:** Maintains an effective working relationship with personnel in Customer Service, Accounting, Operations, Engineering, Corporate Development and Rates.
- EXTERNAL:** Contact with interconnected companies, customers, regulatory agencies, community leaders and vendors.

HIRING STANDARDS

- EDUCATION:** High school or equivalent; Backflow Prevention/Tester and Backflow Repair/Assembly Licenses.
- EXPERIENCE:** A minimum of 2 years experience with a utility company in distribution and collection; Must have an excellent understanding of meters and meter installations and UFW problems.

SSU JOB DESCRIPTION

JOB TITLE: MAINTENANCE HELPER
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 8 - Laborer

GENERAL PURPOSE

Under direct supervision, assists in the upkeep, maintenance and cleanliness of vehicles, equipment, grounds and buildings. Assists in maintenance, repairs and new construction.

DUTIES

1. Properly uses basic handtools (such as shovel, rake, wrenches, power tools, mowers) to perform light maintenance duties on pre-established schedules or as requested.
2. Loads and unloads materials, supplies and equipment as needed for construction and maintenance work. May drive a company vehicle. Brings needed materials and supplies to operators or other maintenance personnel.
3. Performs basic maintenance (such as cleaning and lubrication) on equipment, vehicles and tools.
4. Cleans or clears work sites by cutting brush and trees, mowing and trimming grass, and cleaning ditches, drains, culverts and ground of debris. Seeds and cares for lawn and ornamental plants.
5. Assists in the general preparation of various surfaces for painting and paints various surfaces.
6. Assists in other activities related to construction, repair and maintenance of water and wastewater lines, meters, etc. as requested; is familiar with forms required for related work. May serve on **Emergency Call** duty.
7. Reports unusual conditions or safety violations to supervisor.
8. Normal working environment is dirty, noisy and affected by changing weather conditions.

KNOWLEDGE AND SKILLS

- Basic employment skills (read, write, understands simple oral instructions).
- Safe and practical use of simple equipment or hand tools
- Safe driving practices and record
- Good physical condition to enable loading, unloading and movement of equipment and tools weighing up to 150 lbs and continuous walking, stair climbing and lifting of objects up to 50 lbs.
- Visual acuity and attention to detail.
- Safe and efficient methods of loading and unloading trucks and equipment.
- Map reading.
- Human Relations skills

CONTACTS

Little contact with others outside of assigned work crews. May occasionally have some customer contact requiring courtesy.

HIRING STANDARDS

EDUCATION: High school diploma or equivalent preferred; must be able to read and write.

EXPERIENCE: No previous experience required.

SSU JOB DESCRIPTION

JOB TITLE: MAINTENANCE TECHNICIAN
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 7 - Operatives

GENERAL PURPOSE

Under direction and supervision, performs a variety of day to day tasks involved in the technical maintenance, repair or construction of Company facilities and water, wastewater or gas pipelines.

DUTIES

Responsibilities may involve any number of the following:

1. Construction, repair and maintenance of water, sewer and gas lines.
2. Basic maintenance, lubrication and repair of vehicles, and power and hand tools. May be responsible for driving various vehicles including tractors.
3. Assists in the maintenance, repair and construction of plant equipment and facilities.
4. Reads, water and/or gas meters. Assists in resolving customer problems and complaints and in the collection of past due accounts. May install and change out meters and turn on and off service to customers.
5. Performs lawn and grounds maintenance tasks, including the safe operation of a tractor with grass cutting and other attachments and bush hog.
6. Cleans and maintains buildings and related equipment such as changing air filters and caring for ornamental plants, trees and landscaping.
7. May be responsible for maintaining fire hydrants in company service areas.
8. Performs other duties or special projects as requested related to the area of responsibility. May serve on Emergency Call duty.
9. Duties performed outdoors with exposure to weather, elements, heavy equipment, earth excavation, power tools, flammable gas, animal and insect bites, dirt and noise.

HIRING STANDARDS

EDUCATION: High School graduate or equivalent is strongly preferred.

EXPERIENCE: One (1) year of Company experience including obtainment of one license.

SSU JOB DESCRIPTION

JOB TITLE: MAINTENANCE TECHNICIAN II
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 7 - Operatives

GENERAL PURPOSE

Under moderate supervision, performs a variety of tasks involved in the technical maintenance, repair or construction of Company water and wastewater facilities.

DUTIES

Responsibilities may involve some or all of the following:

1. Construction, repair and maintenance of water or wastewater pipelines.
2. Maintenance, lubrication and repair of vehicles, equipment, facilities and tools. May be responsible for driving various company vehicles.
3. Maintenance, repair and construction of plant equipment and facilities.
4. Reads meters. Assists in resolving customer problems and complaints and in the collection of past due accounts. Installation and change out meters and turn on and off service to customers.
5. Performs lawn and grounds maintenance tasks.
6. Cleans and maintains buildings and related equipment such as changing air filters and caring for ornamental plants, trees and landscaping.
7. May be responsible for maintaining fire hydrants in company service areas.
8. Performs other duties or special projects as requested related to the area of responsibility. May serve on Emergency Call duty.

9. Duties performed outdoors with exposure to weather, elements, heavy equipment, earth excavation, power tools, animal and insect bites, dirt and noise.

KNOWLEDGE AND SKILLS

- Experienced use of equipment such as hand tools, wrench, shovel, pick, hammers, saws, chisels.
- Safe driving practices and record.
- Good physical condition.
- Experienced in the operation and maintenance of jack-and-bore, pneumatic gopher, power mole, trencher, backhoe, and tapping machines.
- Basic mathematical skills
- Map reading and knowledge of facility locations.
- Human relations skills
- Ability to rebuild, straighten and align structures.
- Basic carpentry.
- Marking/flagging procedures
- Meter reading, installation, repair and change-out.

CONTACTS

- INTERNAL: Regular contact with others inside and outside the work group.
- EXTERNAL: Exposure to customers, contractors, vendors, other utility representatives and inspectors, requiring common courtesy.

HIRING STANDARDS

- EDUCATION: High School graduate or equivalent is required.
- EXPERIENCE: A minimum of four years related maintenance experience or one (1) year of Company experience including obtainment of two collection/distribution/backflow prevention or equivalent licenses or two years company experience as a Maintenance Technician I.

SSU JOB DESCRIPTION

JOB TITLE: LEAD MAINTENANCE TECHNICIAN
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 6 - Craft Workers

GENERAL PURPOSE

Under very limited supervision, performs construction, maintenance and/or repair on equipment, vehicles and company facilities (including office and plant buildings). May operate heavy equipment. Directs the work of other maintenance employees.

DUTIES

Responsibilities include the following:

1. Supervises staff including hiring, conducting performance appraisals, administering discipline, providing training, planning and directing work assignments, administering company policies affecting staff and keeping up-to-date on information for effective job performance.
2. Prepares maintenance schedules for equipment, vehicles and facilities for employees. Assures the proper maintenance duties are performed.
3. Assures the proper maintenance of equipment or plant facilities; may drive a company vehicle.
4. Directs the work of other maintenance employees, and conducts training of new employees in job duties as necessary. Coordinates the efficient use of allocated labor and supplies for day-to-day requirements.
5. Responsible for planning purchase requisitions which meet budget restraints.
6. Responsible for keeping maintenance records up-to-date including work orders and related forms.
7. May assist in other duties such as reading meters, cleaning and clearing activities, painting, loading and unloading materials.

DUTIES (cont.)

8. Operates heavy equipment (backhoe, trencher, etc.) and trains others in the proper uses, operation and maintenance of heavy equipment.
9. Performs or directs the removal, repair, rebuilding or installation of turbine pumps, electrical motors, centrifugal pumps and chlorination systems in pumping station maintenance and repair.
10. Performs sophisticated electrical troubleshooting and repairs including wiring single/three-phase motors.
11. Normal working environment is dirty, noisy and affected by changing weather conditions. Work may be performed around heavy equipment.

KNOWLEDGE AND SKILLS

- Company policies and procedures
- Leadership, training, planning and organizing
- Oral and written communication
- Regulations affecting departmental work
- Knowledge of auto mechanics, hydraulics, and engine repair.
- Good physical condition
- Operation and maintenance of jack-and-bore, trencher, backhoe, and tapping machines.
- Extensive knowledge of hydraulic, mechanical and electrical systems.
- Safe driving practices and record.

CONTACTS

Regular contact with others inside and outside of Company. Customer contacts require courtesy. Requires ability to clearly explain work duties.

HIRING STANDARDS

EDUCATION: High school diploma or equivalent required.

EXPERIENCE: A minimum of six years related maintenance experience with at least two years of senior level responsibilities.

SSU JOB DESCRIPTION

JOB TITLE: SENIOR MAINTENANCE TECHNICIAN
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 6 - Craft Workers

GENERAL PURPOSE

Under limited supervision, performs construction, maintenance and/or repair on equipment, vehicles and company facilities. May operate heavy equipment. May direct the work of other maintenance employees.

DUTIES

Responsibilities may involve some or all of the following:

1. Performs maintenance duties on company equipment, vehicles or facilities.
2. Operation of heavy equipment for earth excavation or plant equipment repairs; may drive a company vehicle.
3. Performs or directs the maintenance of equipment, vehicles, pumps, motors, water and wastewater lines and hand tools.
4. May direct the work of other maintenance employees and conduct training of new employees in job duties as necessary. Coordinates the efficient use of allocated labor and supplies for day-to-day requirements.
5. Assists in planning purchase requisitions which meet budget restraints.
6. Assists in keeping maintenance records up-to-date including work orders and related forms.
7. May assist in other duties such as reading meters, cleaning and clearing activities, painting, loading and unloading materials.
8. Operates heavy equipment (backhoe, trencher, etc.) and trains others in the proper use, operation and maintenance of heavy equipment.

DUTIES (cont.)

9. Performs or directs the removal, repair, rebuilding or installation of turbine pumps, electrical motors, centrifugal pumps and chlorination systems in pumping station maintenance and repair.
10. Performs basic electrical troubleshooting and repairs including wiring single/three-phase motors.
11. Normal working environment is dirty, noisy and affected by changing weather conditions.

KNOWLEDGE AND SKILLS

- Company policies and procedures
- Leadership, training, planning and organizing
- Oral and written communication
- Regulations affecting departmental work
- Basic knowledge of auto mechanics, hydraulics, and general engine repair
- Good physical condition
- Operation and maintenance of jack-and-bore, trencher, backhoe, and tapping machines.
- Meter reading, installation, repair and change-out.
- Maintenance and repair knowledge of hydraulic, mechanical and electrical systems.
- Structural repairs including rebuilding, straightening and aligning.
- Safe driving practices and record. A valid Chauffeur's license may be required.
- Pump station maintenance and repair (electrical and mechanical).

CONTACTS

Regular contact with others inside and outside of Company. Customer contacts require courtesy. Requires ability to clearly explain work duties.

HIRING STANDARDS

EDUCATION: High school diploma or equivalent required.

EXPERIENCE: A minimum of six years related maintenance experience or two (2) years of Company experience including obtainment of three collection/distribution/backflow prevention or equivalent licenses or two years company experience as a Maintenance Technician II.

SSU JOB DESCRIPTION

JOB TITLE: MAINTENANCE WORKER
DEPARTMENT: Various

- Safe and efficient methods of loading and unloading trucks and equipment.
- Map reading.
- Common courtesy in answering basic questions from customers.
- Preparation of wood and metal surfaces for painting and a knowledge of appropriate selection, colors of paints and application.

CONTACTS

Little contact with others outside of assigned work crews. May occasionally have some customer contact requiring courtesy.

HIRING STANDARDS

EDUCATION: High school diploma or equivalent preferred; must be able to read and write.

EXPERIENCE: No previous experience required.

SSU JOB DESCRIPTION

JOB TITLE: MANAGER, AREA
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 1 - Office and Managerial

GENERAL PURPOSE

Responsible for the 24-hour operation of several water, wastewater and (in some cases) gas plants including the supervision, assignment, training and cross training of facility personnel. The Area Manager is responsible either for 50 employees under his direction or for an advanced waste treatment wastewater plant or reverse osmosis water plant.

DUTIES

Responsibilities may include:

1. Administrative: Scheduling and work assignments of assigned personnel. Develops and administers or oversees annual preventative maintenance programs. Responsible for the safety and security of plants equipment and personnel. Develop, submit, justify and maintain capital staffing and O&M budgets, preparing monthly variance analysis reports. Monitors and files laboratory records/reports, compliance and permitting issues (flow rates, fecal coliform, etc.) and MORs. Reviews, approves, processes and files timesheets, time off requests, local purchasing for plant(s) and other employee related documents and requests. Prepares weekly operational reports. Develops recordkeeping systems to meet environmental, operational and regulatory requirements.
2. Laboratory: Monitors lab results or performs tests to ensure compliance with acceptable operating procedures and regulatory requirements.
3. Operations/Maintenance: Performs periodic or daily visual checks on the operating conditions of the plant, relying on operating experience to identify inconsistencies or problems in operating conditions and effectiveness. May develop, recommend and implement minor modifications to plant operating systems. Oversee and inspect construction jobs completed by staff and/or sub-contractors. Work with developers or the

Business Development Administrator in evaluating new systems targeted for acquisition and in communicating with and ensuring quality service and customer relations. Respond (or testify) to PSC and county inquiries and complaints.

4. Supervisory: Supervises staff, including interviewing, hiring and termination recommendations, conducting performance appraisals, administering discipline, motivating, counselling, providing training and cross-training, planning and directing work assignments, administering company policies affecting staff and keeping staff up-to-date on information and changes in requirements/procedures necessary for effective job performance. May participate in collective bargaining unit contract negotiations and, with the assistance of the Human Resource Manager, maintains effective labor-management relations through effective interpretation/enforcement of contract provisions and processing of grievances.
5. Customer Relations: Responsible for an effective customer relations program which may include encounters by phone, in person and by mail. May speak to homeowner and civic groups on a variety of topics and settle damage claims with homeowners.
6. Is subject to being called to address operating problems and emergencies at any time.
7. Performs other duties or special projects as needed or requested related to the area of responsibility.
8. Duties performed under usual office conditions with occasional to moderate exposure to the elements, noise, energized tools/equipment and odors. Typically, managerial and supervisory responsibilities occupy at least 80% of the work day, with no more than 20% of the time spent performing manual tasks normally associated with plant operations and maintenance.

KNOWLEDGE AND SKILLS MAY INCLUDE

- Familiarity with industry forms and reports required for related work.
- Identify and report or correct unusual conditions or safety hazards.
- Safe driving practices and record, with a valid driver's license.
- Good physical condition to enable loading, unloading and movement of equipment and tools weighing up to 150 lbs. and continuous walking, stair climbing and lifting of objects up to 50 lbs.
- Visual acuity and attention to detail to enable the correct

- reading of meters and the recording of results.
- General maintenance and repair knowledge of hydraulic, mechanical and electrical systems.
- Procedures for accident investigation.
- Appropriate State certification in water treatment operations and/or wastewater treatment operations.
- Basic mathematics and algebra to enable the computation of averages, percentages and usage computations, including the use of decimals, fractions, formulas, tables, specifications or wiring diagrams.
- Basic reading schematics or blueprints.
- Diagnose, analyze and correct problems in water, wastewater or gas systems.
- Use of precision measuring instruments (calipers, micrometer, multi-meter and laboratory equipment.)
- Pump station maintenance and repair (electrical and mechanical).
- Methods (i.e. probe or metal detector) and marking/flagging procedures to identify the location of various utility (electric, cable TV, etc.) underground lines to direct construction and repair crews in excavation.
- Analysis.
- Budgeting and estimating.
- Business Writing.
- Human Relations.
- Interpersonal communications.
- Inventory control.
- Laboratory testing, recordkeeping and housekeeping procedures.
- Leadership.
- Operating and environmental permits.
- Oral and written communication skills.
- Organizing and planning.
- Problem solving, decision making.
- Recordkeeping.
- Scheduling.
- Supervision.
- Teaching and training.
- Understanding of rules and regulations applicable to department.

CONTACTS

INTERNAL: Throughout the Company, at various levels.

EXTERNAL: Contractors; vendors; customers; representatives of the media and Homeowner and civic associations and other utilities; and inspectors and other officials from DER, EPA and the county.

HIRING STANDARDS

EDUCATION: High school graduate or equivalent.
Appropriate licenses in water, wastewater and/or LP Gas.

EXPERIENCE: Minimum 5 to 8 years experience in utility operations, four years in a supervisory capacity.

THIS PAGE INTENTIONALLY LEFT BLANK

SSU JOB DESCRIPTION

JOB TITLE: REGIONAL MANAGER
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Vice President-Operations
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 1 - Officials and Managers

GENERAL PURPOSE

Under general direction of the Vice President of Operations, complies with overall corporate goals and objectives as they impact regional operations. Advise and recommend to the Vice President of Operations, improvements in policies and procedures as they affect the region. Assures quality systems that meet all rules and regulations.

DUTIES

Responsibilities involve the following:

1. Supervises personnel including interviewing, hiring, conducting performance appraisals, administering discipline, provide training, planning and directing work assignments and keeping staff up to date on information necessary for effective job performance.
2. Schedules regular visits to division offices and facilities to observe conditions and operational status. Analyzes and evaluates operations, construction and maintenance functions to assure efficiency and quality of service. Review facility operational records to insure compliance with regulatory and/or corporate policies and procedures. Reports noncompliance incidents and assures repair and return to service with minimal downtime. Makes recommendations to the Vice President of Operations, Operations Administrator or Technical Services Administrator for improvements in operations, procedures and policies.
3. Oversees administrative functions at regional and Division offices to insure compliance with Company policies and procedures.
4. Assists with the development of facility preventive and/or corrective maintenance programs, safety programs and emergency plans to insure that all facilities meet industry and Company standards. Monitors these systems to insure that records are properly maintained to insure effectiveness and provide appropriate reporting.

CONTACTS

INTERNAL: Maintains a working relationship with all levels of staff throughout the Company.

EXTERNAL: Contact with affiliated companies, vendors, professional contacts in other organizations, regulatory agencies, community leaders and customers.

HIRING STANDARDS

EDUCATION: Degree in Business, Engineering or related field preferred, but can be substituted with training and experience in increasingly responsible management positions with a water/wastewater utility. If unlicensed, must obtain a license in water and wastewater within two (2) years and is expected to continue advanced licensure efforts.

EXPERIENCE: 8-10 years experience in the operations of water/wastewater facilities and management of assigned personnel.

SSU JOB DESCRIPTION

JOB TITLE: METER READER I
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 8 - Laborer

GENERAL PURPOSE

Reads, checks, installs and repairs water and, if appropriate, gas meters on designated routes.

DUTIES

Responsibilities may involve any of the following:

1. Accurately reads and records water/gas meters for billing purposes.
2. Checks meters and reports inoperable, damaged or missing meter boxes. Replaces inoperable meters. Reports and repairs leaks and vandalism of meters and meter boxes. Maintains records. Performs bench tests of meters, at customer request. Rebuild inoperable or defective meters.
3. Cleans meter boxes and surrounding areas. Collects past due accounts.
4. Ensures the cleanliness of any assigned vehicle, tools or equipment.
5. May serve on **Emergency Call** duty.
6. Performs other duties or special projects as requested related to the area of responsibility.
7. Duties performed outdoors, with exposure to the elements, insect and animal bites, and occasional exposure to hazardous chemicals.

KNOWLEDGE AND SKILLS

- Basic employment skills (read, write, understand simple oral instructions.
- Safe and practical use of simple equipment or hand tools, such as wrenches, shovel, pick, hammers, saws, chisels.
- Safe driving practices and record, with a valid driver's license.
- Good physical condition to enable continuous walking and stair climbing.

KNOWLEDGE AND SKILLS (cont).

- Good physical condition to enable stooping, kneeling, continuous walking, stair climbing and lifting of objects up to 50 lbs.
- Visual acuity and attention to detail to enable the correct reading of meters and the recording of results.
- Basic mathematical skills (addition, subtraction, multiplication and division) to enable computation of past/present meter readings to determine customer usage, or other uses.
- Map reading or knowledge of facility locations.
- Common courtesy in answering basic questions from customers.
- Above average oral communication and customer relations skills.

CONTACTS

INTERNAL: Employees throughout the assigned location.

EXTERNAL: Direct customer contact, requiring common courtesy.
Also vendor contact.

HIRING STANDARDS

EDUCATION: High school graduate or equivalent is preferred.

EXPERIENCE: 0-1 year experience in a water or electric utility.

SSU JOB DESCRIPTION

JOB TITLE: METER READER II

- Visual acuity and attention to detail to enable the correct reading of meters and the recording of results.
- Basic mathematical skills (addition, subtraction, multiplication and division) to enable computation of past/present meter readings to determine customer usage, or other uses.
- Map reading, plot map reading, or knowledge of facility locations.
- Common courtesy in answering basic questions from customers.
- Methods (i.e. probe or metal detector) and marking/flagging procedures to identify the location of various utility (electric, cable TV, etc.) underground lines to direct construction and repair crews in excavation.
- Filing
- Interpersonal communications
- Leadership
- Scheduling
- Human Relations

CONTACTS

- INTERNAL: All levels at assigned location. Various support levels throughout the Company.
- EXTERNAL: Customer and vendor contact requiring common courtesy and tact.

HIRING STANDARDS

- EDUCATION: High school graduate or equivalent is preferred.
- EXPERIENCE: Three or more years of meter reading experience. At least one year Company experience.

Effective 6/94

SSU SERVICES

JOB DESCRIPTION

JOB TITLE: MOTORPOOL MECHANIC
DEPARTMENT: Varied
IMMEDIATE SUPERVISOR: Area Manager/Supervisor
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 6 - Craft Workers

GENERAL PURPOSE

Performs the routine maintenance and complex repair of plant, equipment and vehicles. Assists in the development and administration of preventive maintenance programs. While the incumbent may be engaged in plant operations and facilities maintenance and repair, the primary function of this position is auto mechanic.

DUTIES

Responsibilities may include:

1. Performs routine maintenance on vehicles, mowers, tractors, backhoes, portable pumps, pneumatic tools, mud hogs, jet pumps, air compressors and related mechanical equipment. This includes, but is not limited to, lubrication, oil changes, filter changes, tune-ups and brake jobs.
2. Repairs, rebuilds and overhauls pumps, hydrants, valves, flow meters, engines, differentials, motors, suspensions, transmissions, exhaust systems, air conditioners, lift stations and minor electronic components for computer controls of operational processes (radios, transmitters, control circuits and telemetry systems).
3. Performs minor cosmetic repairs and replacement of fenders, beds and other parts. This includes sanding and painting of surfaces. Applies decals to new vehicles.
4. Performs basic welding as needed. Ensures compliance with pollution control and environmental regulations consistent with responsibilities.
5. Performs other duties or special projects as requested related to the area of responsibility.
6. Duties performed outdoors with exposure to changing weather conditions and mechanical/electrical/chemical hazards.

KNOWLEDGE AND SKILLS

Safe driving practices and record, with a valid driver's license.

Good physical condition to enable loading, unloading and movement of equipment and tools weighing up to 250 lbs and considerable walking, standing, stooping, kneeling and lifting of objects up to 50 lbs.

Visual acuity and attention to detail.

Maintenance and repair knowledge of hydraulic (oil and water), pneumatic, mechanical, electronic and electrical systems.

Principles of internal combustion engines including overhaul of engines, transmissions and differentials, diagnosis and repair.

Fabrication of special parts, as required.

Operation of drill press, buffer, grinder, valve refacer, voltmeter, odometer, gauges, welding equipment and related hydraulic equipment.

Structural repairs including rebuilding, straightening and aligning.

Basic mathematics and algebra to enable the computation of averages, percentages and usage computations, including the use of decimals, fractions, formulas, tables, specifications or wiring diagrams.

Reading and researching schematics, blueprints and shop manuals.

Pump station maintenance and repair (electrical and mechanical).

Knowledge of welding techniques.

CONTACTS

INTERNAL: Employees at all local levels.

EXTERNAL: Vendors and customers, requiring tact and common courtesy.

HIRING STANDARDS

EDUCATION: High school graduate or equivalent with specialized automotive training from an automobile manufacturer highly desirable.

EXPERIENCE: Five years of experience in automotive related work.

SSU JOB DESCRIPTION

JOB TITLE: OFFICE CLERK
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 5 - Office and Clerical

GENERAL PURPOSE

Under direct supervision, performs a variety of clerical duties to assist in processing departmental records to meet applicable schedules. Accuracy of performance required to avoid loss of time and expense.

DUTIES

1. Assembles data; reviews, verifies and corrects entries on-line; prints and distributes appropriate reports after entries have been made.
2. Operates a variety of office equipment such as computer, typewriter, and/or check signer machine, recording appropriate numbers to track usage where applicable.
3. Sets up and maintains department files to assure access in a timely manner. Files and retrieves documents as requested.
4. Frequent operation of photocopy machine for departmental records.
5. Performs other duties as requested to meet departmental needs.
6. Duties performed under usual office conditions, requires standing at copier for long periods of time and filing in high and low levels; infrequently work overtime.

KNOWLEDGE AND SKILLS

- Company and departmental filing procedures
- Computer and peripheral equipment operation
- Functions, policies and procedures of assigned department
- Basic knowledge of work order system
- Basic math skills
- Office machine and telephone operations
- Problem solving and decision making

SSU JOB DESCRIPTION

JOB TITLE: OPERATIONS GENERAL MANAGER
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Vice-President - Operations
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 2 - Professional

GENERAL PURPOSE

Responsible for technical direction, administration, quality control, regulatory compliance, and operator training for all Company water/wastewater facilities. Ensures that facilities are operated in compliance with all permits, safety rules and good operating and engineering practice. Provides operating procedures, standards, guidelines and management support for operation and maintenance of facilities. Responsible for the management of the Central Region, including all duties and responsibilities of a Regional Manager.

DUTIES

Responsibilities involve the following:

1. Monitors and analyzes data and reports, operating systems activity and provides technical assistance and direction to operating personnel.
2. Staffing, supervising and evaluating personnel in the Central Region. Planning and directing work assignments and administrative functions to insure compliance with Company policies and procedures.
3. Conducts studies on plant operations and staffing, recommending changes in operations or modification to facilities.
4. Acts as the core team member of the Budget Evaluation Team (BE Team).
5. Provides technical direction in the development, maintenance, and implementation of documentation and manuals. Develops and implements preventive maintenance program for all systems.
6. Responsible for the implementation and administration of back-flow and cross-connection, residuals management, infiltration/inflow - infrastructure videochronicling, instrumentation support, meters, etc. as assigned.

7. Confers with engineers, attorneys and developers to resolve questions and problems which may arise and/or operational related activities and provides corrected information to indicate field changes.
8. Travels to job sites to review the operations, resolve problems and assure compliance with standards, specifications, safety rules, governmental rules and regulations and company operating policies and procedures.
9. Coordinates the preparation of Operations capital and operating budgets including determining and justifying need.
10. Develops and implements emergency plans for all systems and assists with the documentation and training for these plans.
11. Represents the Operations Division in FPSC hearings, including rate cases, DEP investigation and reports, new acquisitions analysis and similar activities.
12. Monitors operations activities to assure adherence to environmental regulations and assure the best quality of service available. Reports noncompliance incidents and assures repair and return to service with minimal downtime.
13. Responds to operational emergencies as required.
14. Performs other duties or special projects as requested related to the area of responsibility.
15. Duties performed under office and field conditions. Frequent travel is required.

KNOWLEDGE AND SKILLS

- Organizational and leadership skills
- Knowledge of plant operations
- Interpersonal communications
- Analysis
- Budgeting and estimating
- Company service area and organization
- Construction work order system
- Math

SSU JOB DESCRIPTION

JOB TITLE: OPERATIONS SPECIALIST
DEPARTMENT: Operations Administration
IMMEDIATE SUPERVISOR: Operations Administrator
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 5 - Office and Clerical

GENERAL PURPOSE

Under general direction, is responsible for the analysis and maintenance of the backflow/cross connection control program, meter replacement program and unaccounted for water (UFW). Conducts on-site water audits and leak detection tests. Acts as the system supervisor for the division's computerized monitoring, tracking and reporting systems and analyzes, monitors and maintains the data base. Provides rate case support and assists with the development of policies and procedures.

DUTIES

1. Monitors UFW information. Analyzes and prepares reports regarding the same. Provides technical assistance and training as necessary. Conducts on-site audits and leak detection surveys and assists operations' personnel in corrective action and in making recommendations to bring the system into compliance with UFW of less than 10%.
2. Supervises, monitors, controls and maintains operations' computerized data base systems (i.e. compliance tracking, backflow/cross connection control). Ensures adequate training and documentation. Produces, analyzes and distributes reports and observes and enforces security.
3. Assists in the development, writing and implementation of operations procedures, policies, programs, documentation and reports.
4. Administers the division's beepers and answering service. Monitors beeper assignments, audits monthly bills and ensures that call out lists and call out procedures are accurate and communicated to the answering service on a timely basis.
5. Assists or takes a lead role in the research, development, and production of informational needs of the division. Attends planning meetings as the division's representative.
6. Responds to operational emergencies as required, and assists in contacting customers and operational personnel when the need arises.

7. Performs other duties and coordinates special projects as needed or directed.

KNOWLEDGE AND SKILLS

- Organizing, scheduling and planning
- Basic mathematical skills (addition, subtraction, multiplication and division).
- Computer concepts and operation (Word Perfect, Quattro Pro, Fox Pro, and DOS).
- Problem solving and decision making
- Written and oral communications
- General understanding of Public Service Commission and Department of Environmental Regulations.
- General understanding of plant operations and maintenance.
- Recordkeeping

CONTACTS

- INTERNAL:** Maintains an effective working relationship with personnel at all levels throughout the company.
- EXTERNAL:** Contact with affiliated companies, professional contacts in other organizations, customers, regulatory agencies and vendors.

HIRING STANDARDS

- EDUCATION:** Associate's degree with coursework in business, computer science and accounting as well as completion of Volumes I and II (or equivalent) for water and wastewater treatment; or an equivalent combination of education, training and experience.
- EXPERIENCE:** Six to eight years experience with a utility company and three years of microcomputer experience and field operations. Must possess a general understanding of water and wastewater plant operations.

SSU JOB DESCRIPTION

JOB TITLE: OPERATOR I
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Varied
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 6 - Craft Workers

GENERAL PURPOSE

Under supervision, operates water and/or wastewater treatment process and facilities, controlling the variations of flow rates and processing methods.

DUTIES

Responsibilities may involve any of the following:

1. Assists immediate supervisor in the training and supervision of operator trainees and maintenance helpers. May sign off on documentation of such individuals.
2. Monitors gauges, meters and control panels; and controls variations and operating conditions of the treatment process. Records meter and gauge readings.
3. Operates and maintains valves, motors, pumps and engines either manually or by remote control. Monitors and adjusts plant operations manually or by computer.
4. Extracts samples and performs routine laboratory tests, documenting and certifying test results.
5. Performs change-out of chemical containers as needed.
6. May perform other utility related work including changeout and/or repairing meters, service line leaks and main leaks, meter reading, repair and maintenance of lift stations, service orders, turn-ons/turn-offs, collections of past due accounts from customers, and monitor and maintain distribution and collection systems.
7. Performs scheduled plant inspections, certifying completion of such inspections in the facility log book.
8. Maintains various plant records and reports.
9. Ensures that plant facilities and grounds are kept clean, neat and orderly.

HIRING STANDARDS

EDUCATION: High School graduate or equivalent with a "C" water
or "C" wastewater license in the state of Florida.

EXPERIENCE: Zero to two years in plant operations.

HIRING STANDARDS

EDUCATION: High School graduate or equivalent with an "A" license in both water and wastewater from the state of Florida.

EXPERIENCE: A minimum of six years of plant operations experience.

SSU JOB DESCRIPTION

JOB TITLE: Lead Operator I - IV
DEPARTMENT: Operations - Various
IMMEDIATE SUPERVISOR: Varied
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 6- Craft Workers

GENERAL PURPOSE

Under general direction, ensures the safe, efficient and cost-effective operation of water and/or wastewater plants and the effective use of assigned personnel. Ensures compliance with federal and state rules and regulations and local operating permits. Typically, the incumbent performs the same or similar work as those reporting to him or her and spends no more than 50% of his or her time on Administrative and Supervisory tasks outlined below.

DUTIES

Responsibilities may involve some of the following:

1. Operations/Maintenance Tasks: Monitors gauges, meters and control panels; and controls variations and operating conditions of the treatment process. Records meter and gauge readings. Operates and maintains valves, motors, pumps and engines either manually or by remote control. Monitors and adjusts plant operations manually or by computer. Extracts samples and performs routine laboratory tests, documenting and certifying test results. Performs change-out of chemical containers as needed. May perform other utility-related work including change-out and/or repairing meters, service line leaks and main leaks, meter reading, repair and maintenance of life stations, service orders, turn-ons/turn-offs, collections of past due accounts from customers, and monitor and maintain distribution and collection systems. Performs scheduled plant inspections, certifying completion of such inspections in the facility log book. Maintains various plant records and reports. Ensures that plant facilities and grounds are kept clean, neat and orderly.

2. Administrative Tasks: Preparation of annual budgets (staffing, capital and O&M) and monthly variance reports. Provide input and information to the Engineering Department concerning plant modifications and upgrades. Attend pre- and post-construction conferences and conduct inspections of completed work. Reviews Monthly Operating Reports and Lab tests for accuracy and may sign off on these reports. Performs research, provides information and prepares

reports as needed or directed. With the guidance from Technical Services, other ancillary service departments, the Regional Manager or Supervisor, may develop a response to new regulations, preparing a written plan for compliance for submission to regulatory authorities.

3. Supervisory Tasks: Supervises staff, conducts interviews and investigations and recommends personnel actions such as hiring, terminations and discipline. Conducts performance appraisals, motivates, counsels, provides training and cross-training, plans and directs work assignments, administers company policies affecting staff and keeps staff up-to-date on information and changes in requirements/procedures necessary for effective job performance. May be responsible for an effective customer relations program which may include encounters by phone, in person and by mail. May speak to homeowner and civic groups on a variety of topics and settle small damage claims with homeowners.

4. Performs other duties or special projects as requested related to the area of responsibility.

5. Duties performed in both an office environment as well as outdoors, with exposure to changing weather conditions, insect/animal bites, energized equipment and electrical/chemical hazards.

KNOWLEDGE AND SKILLS

- Safe driving practices and record, with a valid driver's license. A Commercial Driver's License with appropriate endorsements may be required subject to Department of Transportation regulations.
- Ability to load, unload and move equipment and tools weighing up to 250 lbs and endure considerable walking, stair climbing and lifting of objects up to 50 lbs.
- Safe and practical operation and maintenance of jack-and-bore, trencher, backhoe, and tapping machines.
- Visual acuity and attention to detail.
- Map reading or knowledge of facility locations.
- Meter reading, installation, repair and change-out. Recognize and record meter malfunctions.
- State certification in water treatment operations, wastewater treatment operations, consistent with permitting requirements.
- Basic mathematics and algebra to enable the computation of averages, percentages and usage computations, including the use of decimals, fractions, formulas, tables, specifications or wiring diagrams.
- Budgeting and estimating
- Interpersonal communications
- Oral and written communication skills

- Organizing and planning
- Plant operations
- Problem solving, decision making
- Recordkeeping
- Scheduling
- Supervision
- Teaching and training

CONTACTS

INTERNAL: All departments to provide or exchange information and obtain guidance.

EXTERNAL: Vendors, customers, regulatory authorities.

HIRING STANDARDS

EDUCATION: High School graduate or equivalent is preferred.

EXPERIENCE: Advanced education, work experience and licensure consistent with the permitting requirements of the plant(s) for which the individual is to be held accountable for. Work experience in a comparable plant and treatment process (e.g., R.O., AWT, lime softening, etc.) is also required.

CATEGORIES: Lead Operator I - a single "C" license in water or wastewater.

Lead Operator II - a double "C" in water and wastewater or a single "B" in water or wastewater.

Lead Operator III - a double "B" in water and wastewater or a single "A" in water or wastewater.

Lead Operator IV - a double "A" in water and wastewater.

GENERAL PURPOSE

Responsible for the 24-hour operation of several water, wastewater and (in some cases) gas plants including the supervision, assignment, training and cross training of facility personnel.

DUTIES

Responsibilities may include:

1. Administrative: Scheduling and work assignments of assigned personnel. Develops and administers or oversees annual preventative maintenance programs. Responsible for the safety and security of plants equipment and personnel. Develop, submit, justify and maintain capital staffing and O&M budgets, preparing monthly variance analysis reports. Monitors and files laboratory records/reports, compliance and permitting issues (flow rates, fecal coliform, etc.) and MORs. Reviews, approves, processes and files timesheets, time off requests, local purchasing for plant(s) and other employee related documents and requests. Prepares weekly operational reports. Develops recordkeeping systems to meet environmental, operational and regulatory requirements.
2. Laboratory: Monitors lab results or performs tests to ensure compliance with acceptable operating procedures and regulatory requirements.
3. Operations/Maintenance: Performs periodic or daily visual checks on the operating conditions of the plant, relying on operating experience to identify inconsistencies or problems in operating conditions and effectiveness. May develop, recommend and implement minor modifications to plant operating systems. Oversee and inspect construction jobs completed by staff and/or sub-contractors. Work with developers or the

Business Development Administrator in evaluating new systems targeted for acquisition and in communicating with and ensuring quality service and customer relations. Respond (or testify) to PSC and county inquiries and complaints.

4. Supervisory: Supervises staff, including interviewing, hiring and termination recommendations, conducting performance appraisals, administering discipline, motivating, counselling, providing training and cross-training, planning and directing work assignments, administering company policies affecting staff and keeping staff up-to-date on information and changes in requirements/procedures necessary for effective job performance. May participate in collective bargaining unit contract negotiations and, with the assistance of the Human Resource Manager, maintains effective labor-management relations through effective interpretation/enforcement of contract provisions and processing of grievances.
5. Customer Relations: Responsible for an effective customer relations program which may include encounters by phone, in person and by mail. May speak to homeowner and civic groups on a variety of topics and settle damage claims with homeowners.
6. Is subject to being called to address operating problems and emergencies at any time.
7. Performs other duties or special projects as needed or requested related to the area of responsibility.
8. Duties performed under usual office conditions with occasional to moderate exposure to the elements, noise, energized tools/equipment and odors. Typically, managerial and supervisory responsibilities occupy at least 80% of the work day, with no more than 20% of the time spent performing manual tasks normally associated with plant operations and maintenance.

KNOWLEDGE AND SKILLS MAY INCLUDE

- Familiarity with industry forms and reports required for related work.
- Identify and report or correct unusual conditions or safety hazards.
- Safe driving practices and record, with a valid driver's license.
- Good physical condition to enable loading, unloading and movement of equipment and tools weighing up to 150 lbs. and continuous walking, stair climbing and lifting of objects up to 50 lbs.
- Visual acuity and attention to detail to enable the correct

- reading of meters and the recording of results.
- General maintenance and repair knowledge of hydraulic, mechanical and electrical systems.
- Procedures for accident investigation.
- Appropriate State certification in water treatment operations and/or wastewater treatment operations.
- Basic mathematics and algebra to enable the computation of averages, percentages and usage computations, including the use of decimals, fractions, formulas, tables, specifications or wiring diagrams.
- Basic reading schematics or blueprints.
- Diagnose, analyze and correct problems in water, wastewater or gas systems.
- Use of precision measuring instruments (calipers, micrometer, multi-meter and laboratory equipment.)
- Pump station maintenance and repair (electrical and mechanical).
- Methods (i.e. probe or metal detector) and marking/flagging procedures to identify the location of various utility (electric, cable TV, etc.) underground lines to direct construction and repair crews in excavation.
- Analysis.
- Budgeting and estimating.
- Business Writing.
- Human Relations.
- Interpersonal communications.
- Inventory control.
- Laboratory testing, recordkeeping and housekeeping procedures.
- Leadership.
- Operating and environmental permits.
- Oral and written communication skills.
- Organizing and planning.
- Problem solving, decision making.
- Recordkeeping.
- Scheduling.
- Supervision.
- Teaching and training.
- Understanding of rules and regulations applicable to department.

CONTACTS

INTERNAL: Throughout the Company, at various levels.

EXTERNAL: Contractors; vendors; customers; representatives of the media and Homeowner and civic associations and other utilities; and inspectors and other officials from DER, EPA and the county.

HIRING STANDARDS

EDUCATION: High school graduate or equivalent.
Appropriate licenses in water, wastewater and/or LP Gas.

EXPERIENCE: Minimum 5 to 8 years experience in utility operations, four years in a supervisory capacity.

THIS PAGE INTENTIONALLY LEFT BLANK

SSU JOB DESCRIPTION

JOB TITLE: SUPERVISOR, FIELD MAINTENANCE OPERATIONS
DEPARTMENT: Various
IMMEDIATE SUPERVISOR: Various
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 3 - Technical

GENERAL PURPOSE

Responsible for supervision of maintenance crews in a variety of activities including the construction, maintenance and repair of water and wastewater pipelines and facilities.

DUTIES

Responsibilities include the following:

1. Supervises staff including hiring, conducting performance appraisals, administering discipline, providing training, planning and directing work assignments, administering company policies affecting staff and keeping up-to-date on information for effective job performance.
2. Prepares maintenance schedules for equipment, vehicles and facilities for employees. Assures the proper maintenance duties are performed.
3. Monitors or identifies and marks pipeline locations for contractors and construction crews.
4. Supervises and trains crews on the correct, efficient and safe methods of performing any necessary maintenance task.
5. Organizes and distributes work assignments for crew members.
6. Responsible for preparation of budget relating to maintenance responsibilities.
7. Performs other duties or special projects as requested related to the area of responsibility.
8. Duties performed under normal office conditions. Some exposure to the elements, dust, noise, insect and animal bites, energized equipment and potentially hazardous conditions is required.

KNOWLEDGE AND SKILLS

- Company policies and procedures
- Mathematical and budgeting skills
- Knowledge of company equipment, vehicles and facilities.
- Knowledge of hydraulic, mechanical, carpentry and electrical systems.
- Procedures for accident investigation.
- Diagnose, analyze and correct problems in water and wastewater systems.
- Thorough knowledge of NFPA pamphlets for safety (NFPA 54 & 58).
- Safe driving practices and record.
- Blueprint reading and plan specifications.
- Knowledge of the layout, types and choices of fittings and related equipment used in water/wastewater industry.
- Pump station maintenance and repair (electrical and mechanical).
- Interpersonal communications.
- Leadership.
- Oral and written communication skills.
- Supervision.

CONTACTS

- INTERNAL: Employees at all levels in the assigned location.
- EXTERNAL: Customer contact requiring common courtesy and tact. Also contact with contractors, other utility representatives, county inspectors and vendors.

HIRING STANDARDS

- EDUCATION: High school graduate or equivalent required.
- EXPERIENCE: A minimum of eight or more years extensive experience in various facets of water/wastewater utility operations including four years with lead maintenance responsibilities.

SSU JOB DESCRIPTION

JOB TITLE: TECHNICAL SERVICE SPECIALIST
DEPARTMENT: Technical Services
IMMEDIATE SUPERVISOR: Technical Services Administrator
ELIGIBLE FOR OVERTIME: No
EEO JOB CODE: 3 - Technician

GENERAL PURPOSE

Provides technical assistance to Operations for the development of procedures, standards and guidelines for proper use of operating systems and facilities.

DUTIES

Responsibilities involve the following:

1. Visit all utility plants on a regular basis to ascertain that Company policies related to Operations are understood and followed as intended.
2. Review all requirements of the different regulatory agencies with respect to the number of analyses to be run, its frequencies, required number of hours of supervision by certified operators, class of operators, etc. Report on the operator's needs to perform their jobs, i.e, equipment to run analyses more efficiently, calculators, new chemicals, etc.
3. Prepare preventive maintenance log for all utility equipment. Responsible to monitor that these schedules are consistently observed by everyone. Keep an inventory of parts to readily repair the most recurrent breakdowns experienced at each location.
4. Assist operators in improving the efficiency of their operations and will complete a monthly report indicating deficiencies, needs for improvement, compliance with above directions, etc.
5. Assist operators in case of breakdowns or emergencies and determine causes of excessive unaccounted for water, etc.

KNOWLEDGE AND SKILLS

- Managerial
- Organizational and leadership skills
- Knowledge of plant operations
- Interpersonal communications
- Analysis
- Budgeting and estimating

SSU JOB DESCRIPTION

JOB TITLE: WELDER
DEPARTMENT: Operations
IMMEDIATE SUPERVISOR: Manager, Gas Operations
ELIGIBLE FOR OVERTIME: Yes
EEO JOB CODE: 3 - Technician

GENERAL PURPOSE

Performs specialized construction, maintenance and repair of water, wastewater and LP Gas facilities and equipment. Activities involve fabrication, patching and repairs using acetylene, MIG, TIG and stick welding, flame cutting, poly-heat fusion, metal fabrication and other activities.

DUTIES

Responsibilities involve several of the following:

1. Performs a variety of tasks involving construction of LP Gas pipelines, cathodic protection, main extensions, commercial meter sets and the installation of specialized LP Gas services. Replaces regulators, vaporizers and effects changes in piping in bulk plants.
2. Repairs or fabricates replacement parts for water and wastewater systems including sweeper arms, chute assemblies, treatment tanks and other activities.
3. Performs repairs or fabrication of parts or modifications to equipment and vehicles including installation of hoists, repairs to semi-trailers.
4. Performs other duties or special projects as requested related to the area of responsibility.
5. Duties performed outdoors, with potential exposure to explosive materials, welding fumes, changing weather conditions, hazardous chemicals and energized equipment and tools.

KNOWLEDGE AND SKILLS

- Safe driving practices and record, with a valid driver's license.
- Good physical condition to enable loading, unloading and movement of equipment and tools weighing up to 150 lbs. and continuous walking, stair climbing and lifting of objects up to 50 lbs.

Customer said a sewage plant was built 150 feet from her home and now rats are infesting her home. She also said that plant workers are harassing her kids. She said the utility will tell the PSC that they don't have a problem with rats and that its workers are not harassing her kids. Please investigate fully and advise by the date shown below.

Re: Response to Consumer Request No.10832P

Dear Ms. Isler,

Orange Osceola Utilities response to the referenced consumer request is as follows:

- 1) The treatment plant in the consumer request is approximately 250 feet from the Lakes residence of 952 Juniper Court. The first phase of the facility was built in 1983. The construction permit was issued March 12, 1982.
- 2) Orange Osceola has tried to be cordial and cooperative with all of the neighboring residences and especially the Lakes at 952 Juniper Court. O.O.U. has planted large plants both on company property to block view of the WWTP (see photos). O.O.U. also provided and had planted trees and shrubs in the Lake's backyard, (not all showing in photos).
- 3) O.O.U. worked diligently to control undesirable odors from the vacuity around the site and any other undesirable conditions that would be experienced by the neighbors.
- 4) O.O.U. has had to call the Osceola sheriff on occasions regarding the Lake family children at the plant area with BB guns or air rifles. Some O.O.U. employees feel their vehicles have ben hit by the shots. The Lake kids on more than one occasion have been seen shooting ducks, in the canal and lake behind their house. The property behind the Lake's house is O.O.U.'s property of which is kept mowed and cleaned by our company.
- 5) On several occasions the Lake's kids and friend have verbally threatened O.O.U. employees. They have on one occasion (mooned), O.O.U. employees leaving the work site at the end of a shift.
- 6) O.O.U. staff has been directed to make no verbal or physical responses back to the Lake's kids unless imminent personal danger occurs.

2507 D Boggy Creek Rd., Kissimmee, FL 34744, (407) 348-4855

Page 2

Orange Osceola Utilities facilities poses no problem causing rats nor any other such conditions. O.O.U. request if it be the desire of the commission to have Osceola County Health Department come to the plant site to check for rats and conditions that would cause a rat problem to be encouraged.

Orange Osceola Utilities will also upon request provide notarized statements under oath by several of the staff of the Waste Water Treatment Plant. O.O.U. will provide as many reports from the Osceola County Sheriffs Dept. as obtainable if so requested.

Orange Osceola Utilities has no desire to be a problem for anyone in the neighborhood and strives not to be any type of nuisance as can be under the circumstances.

As stated earlier in this correspondence O.O.U. personnel has taken abusive verbal taunting from the Lake's kids and their friends from their backyard. I fell the controlled patience has been on O.O.U.'s part.

Orange Osceola Utilities is not attempting to cast discredit upon the Lakes but simply defending O.O.U.'s position regarding what actually occurs relative to people from their backyard to O.O.U.'s employees. We welcome them to communicate any issue they feel is O.O.U.'s problem with this office.

If there are any additional actions required taken by O.O.U. concerning this issue please notify this office as soon as possible.

Sincerely,

Orange Osceola Utilities, Inc.

Mike Johnson

Tallahassee, Fla. 32399

DEAR SIR:

EIGHT YEARS AGO AN IRRIGATION OUTLET WAS PUT IN FOR MY HOUSE BY THE WATER COMPANY IN BUENA VENTURA LAKES WHERE I LIVE. THIS OUTLET WAS PUT IN IN FRONT OF THE ELECTRICAL CASING NEXT TO THE WATER METERS WHICH IS LOCATED ON THE RIGHT OF WAY IN FRONT OF THE HOUSE NEXT TO OURS WHICH IS A RENTAL. WHOEVER RENTED THE HOUSE THOUGHT THIS BELONGED TO THEM AND USED THE WATER(WHICH I PAY FOR) UNTIL I TOLD THEM THAT I PAID FOR THIS. LAST YEAR NEW RENTERS MOVED IN WHO ARE IGNORANT OF THE CONCEPT OF RIGHT OF WAY. THE ADULTS AND CHILDREN LIVING THERE HAVE DESTROYED THE OUTLET AND TAKEN OFF THE VALVE KNOB. FOR ABOUT 8 MONTHS I HAVEN'T BEEN ABLE TO USE THIS OUTLET BECAUSE THE "ON AND OFF" VALVE HAS BEEN JAMMED ON "OFF". I HAVE BEEN DOWN TO THE LOCAL WATER COMPANY AND COMPLAINED 3 TIMES TO THEM IN THE LAST 3 MONTHS, AND THEY STILL HAVEN'T FIXED IT' ALTHOUGH THEY PROMISED TO. I ALSO HAVE ASKED THEM TO MOVE THIS OUTLET IN FRONT OF MY PROPERTY FREE OF CHARGE, AND NOT CHARGE ME THE \$4.46 MONTHLY FOR IRRIGATION WATER WHICH I CAN NOT USE AND GIVE ME A REFUND FOR THE PAST YEAR AND DO NOT CHARGE ME UNTIL IT IS MOVED, FIXED AND WORKING. PLEASE DO NOT ANSWER ME NEGATIVELY BECAUSE I AM HAVING TOO MUCH TROUBLE WITH THE IGNORANT RENTERS LIVING NEXT DOOR WHO CALLED THE POLICE WHEN I BLAMED THEM FOR THE DESTRUCTION OF THE SPIGOT.

Sincerely yours,
Mark Kevin Douglas

Re: Response to Consumer Request No.16572P

Dear Nancy Pruitt,

Orange Osceola Utilities response to the referenced consumer request dated 6/1/94 is as follows:

Orange Osceola Utilities was first notified of a valve problem on April 13, 1994. The valve (curb stop), at the Irrigation water service meter was inspected that date by O.O.U. technicians. No problem was found. What was found to be defective was customers spigot valve. The message was left on the customers door.

Orange Osceola Utilities technician responded on May 15, 1994 to a customer request for service to repair a valve at the water meter (irrigation water service). Technician Everett Reedy went to the site and thoroughly checked the meter and curb stop valve at the meter and determined there was no problem existing at that time. What was broken was the customers riser pipe and spigot missing. The customer was not home at that time to discuss the matter.

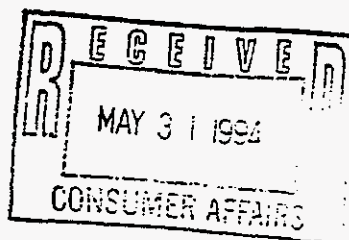

Orange Osceola Utilities as a courtesy has moved the meter on to the customers property line. Please feel free to contact us at 407-348-4855 if you have any further questions concerning this matter.

Sincerely,

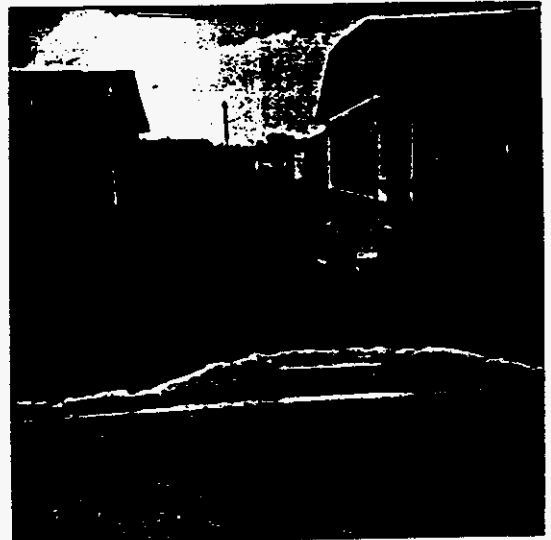

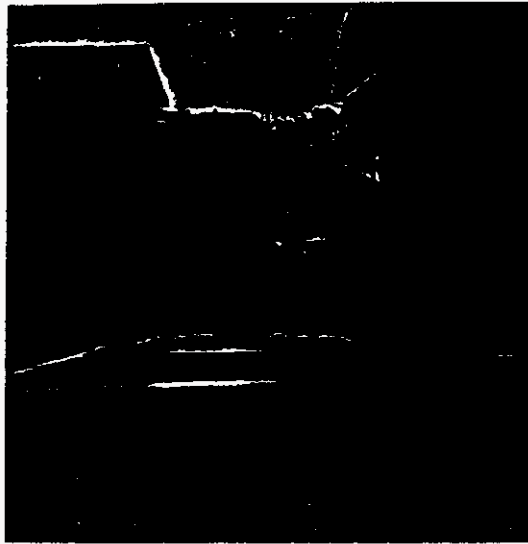

ORANGE OSCEOLA UTILITIES, INC.

DEAR MS. PRUITT:

THANK YOU FOR TAKING CARE OF MY LETTER CONCERNING THE ORANGE-OSCEOLA UTILITIES, INC.'S LACK OF LOOKING INTO MY COMPLAINTS REFERENCE THE INSTALLATION OF AN IRRIGATION OUTLET. ON 5/28 I NOTICED IT WAS MOVED EARLY A.M. CLOSER TO MY PROPERTY. HOWEVER, DUE TO THEIR INEFFICIENCY I WAS NOT NOTIFIED PREVIOUSLY OR CONSULTED TO WHERE I WOULD LIKE IT TO BE. IT WAS MOVED TO THE DIVIDING LINE BETWEEN PROPERTIES. DUE TO THE IGNORANCE OF THE NEIGHBORS, THIS STILL POSES A POSSIBLE PROBLEM. PLEASE MAKE SURE I AM NOT CHARGED FOR THIS.

ALTHOUGH I AM STILL NOT HAPPY WITH THE PLACEMENT OF THE IRRIGATION SPIGOT, I WANT TO THANK YOU FOR YOUR SPEEDY AND RESPONSIBLE ACTION. YOU ARE NOT TO BLAME FOR THE INCOMPETENCE OF THE ORANGE-OSCEOLA UTILITIES, INC.

PLEASE, IN ORDER TO AVOID FUTURE PROBLEMS, CAN YOU TELL THEM TO CONSULT ME WHEN THEY MOVE THE SPIGOT TO WHERE I INDICATE-WITHOUT CHARGE!

THANK YOU AGAIN FOR YOUR CONSIDERATION AND PATIENCE.

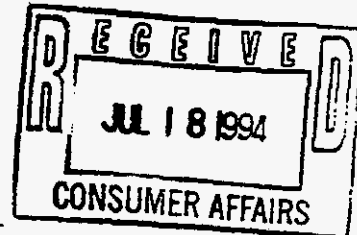

Sincerely yours,

Mark Kevin Douglas
MARK KEVIN DOUGLAS

P.S. I JUST SAW MY NEIGHBOR MOWING HIS LAWN ON A RIDING MOWER AND HE WENT CLOSE TO THE SPIGOT AND ALMOST DISLODGED IT.

M.K.D.

DEAR SIR,

TO DATE NOTHING HAS BEEN DONE ABOUT MOVING MY IRRIGATION SPIGOT. THEY SEND SOME OUT ON 7/14/94 AND HE NOT ONLY REFUSE TO MOVE IT HE WAS VERY RUDE TO ME. I WANT MY SPIGOT MOVE TO WHERE IT SHOULD BE TEN FEET OVER ON MY PROPERTY. IF THIS IS NOT DONE I WANT A FULL REFUND FOR THE SEVEN YEARS OR SO THAT I HAVE HAD IT. I DO NOT WANT TO HEAR THAT YOU WILL NOT DO IT OR YOU ONLY DO IT ONCE, I WAS NOT ASKED WHERE IT SOULD BE MOVED WHEN THEY DID IT AND THEY SHOULD OF ASKED WHERE I WANTED IT MOVED WHEN THEY DID IT BACK IN MAY OR JUNE. ALSO, THEY KEEP RAISING THE RATES FOR NO OTHER REASON THEN TO GIVE THEMSELVES A RAISE. THE RATES SHOULD BE A FLAT \$5.00 FOR SEWER AND A FLAT \$5.00 FOR THE WATER. IF THEY CAN NOT RUN ON THIS THEN GET SOMEONE IN HERE WHO CAN. I REPEAT MOVE MY SPIGOT AGAIN OR GIVE ME A REFUND FOR THE PAST SEVEN YEARS PLUS A SUM FOR THE RUDENESS OF THE MAN WHO CAME OUT AND REFUSE TO DO ANYTHING BECAUSE HE IS LAZY AND DOES NOT WANT TO WORK. ALSO, MY NEIGHBOR HAS BEEN HITTING MY SPIGOT WITH HIS RIDING MOWER. I REPEAT I WANT A REFUND AND SOMEONE WHO CAN RUN THIS WATER COMPANY MORE EFFICIENT AND LOWER WATER BILL, AND PEOPLE WHO ARE NOT RUDE. I HOPE WE CAN SETTLE THIS LIKE NORMAL HUMAN BEINGS AND I DO NOT HAVE TO TAKE ANY OTHER ACTION BUT THIS LETTER SO I REPEAT EITHER MOVE IT OR GIVE ME MY WATER WHICH IS UNDRINKABLE ANY WAY FOR FREE.

Yours truly,

Mark Kevin Douglas

Kissimmee, FL 34743

Dear Mr. Douglas:

This is a follow-up to your letter concerning moving a irrigation spigot. As you stated in your letter "my irrigation spigot", it is your spigot and you can move the spigot any where on your property that you desire.

The utilities are not required to place a spigot or irrigation system on a customers property. Orange Osceola first installed the spigot as a courtesy. All facilities past the meter are the customer's responsibility.

I can not require the company to move the spigot. I am sorry I can not be of further assistance in this matter.

Sincerely,

Nancy Pruitt

RECEIVED
JUL 29 1994
Florida Public Service Commission
Commissioner Deason

DEAR J. TERRY DEASON, CHAIRMAN,

ENCLOSED IS A COPY OF A RUDE LETTER I RECEIVED FROM NANCY PRUITT, SENIOR CONSUMER COMPLAINT ANALYST. I WOULD LIKE TO STRAIGHTEN OUT THE FOLLOWING POINTS-

1. THE SPIGOT WAS NOT PUT IN AS A COURTESY-I PAID \$95.00 TO HAVE IT INSTALLED, THIS MAKES THEM RESPONSIBLE FOR ANYTHING THAT GOES WRONG WITH IT-UNLESS THEY WANT TO REFUND THE \$95.00- AND EVERYTHING I PAID TO DATE.
2. IF MISS PRUITT IS NOT COMPETENT TO DO HER JOB OR IS AFRAID TO DO HER JOB TO THE PUBLIC SATISFACTION THEN GIVE ME THE JOB AND THE AUTHORITY TO SERVICE BVL. BECAUSE YOU ARE A PUBLIC SERVICE COMMISSION AND NOT A UTILITY SERVICE COMMISSION YOU MUST SERVE THE PUBLIC TO THEIR SATISFACTION. I AM ONE OF THE PUBLIC AND I'M NOT BEING SATISFIED.
3. OUR WATER IS UNDRINKABLE AND STAINS EVERYTHING IT COMES IN CONTACT WITH. IT HAS CAUSED TILES IN MY SHOWER TO COME LOOSE. I COMPLAINED TO THE WATER COMPANY AND THEY DENIED ANYTHING WAS WRONG. IF THEY ARE UNWILLING TO ACCEPT RESPONSIBILITY FOR THIS, I REPEAT , IF YOU PUT ME IN CHARGE I WILL MAKE SURE THAT THEY DO.
4. OUR WATER RATE IS TOO HIGH AT PRESENT, THERE SHOULD BE A FLAT SEWER RATE OF BETWEEN \$5-\$10-(AND THE WATER RATE SHOULD BE THE SAME).
5. WHEN I ASK FOR MY SPIGOT TO BE MOVED AND FIXED, I AM WITHIN MY RIGHTS, EITHER GET THE WATER COMPANY TO DO THIS OR GIVE ME THE FEW THOUSAND DOLLARS, PLUS, AND I WILL HAVE IT DONE. DON'T TELL ME THIS IS MY RESPONSIBILITY WHEN I PAID THEM TO HAVE IT INSTALLED.

IN CLOSING, ACT LIKE A PUBLIC SERVICE COMMISSION AND SERVE THE PUBLIC. DO NOT REPEAT WHAT MISS PRUITT SAID, OR CONSULT HER FOR THE ABOVE REASONS. I AM NOT ASKING FOR ANYTHING UNREASONABLE. I PAY FOR THIS SERVICE, FOR WHICH I AM ENTITLED-AND DRINKABLE WATER WHICH DOESN'T STAIN EVERYTHING IT COMES IN CONTACT WITH. I WOULDN'T BE SURPRISED IF EVERY TIME THE WATER RATES GO UP THEIR SALARIES GO UP. THEY CERTAINLY ARE NOT USING THE MONEY TO IMPROVE THE SERVICE OR THE SYSTEM.

Yours truly,

Mark Kevin Douglas

Orange/Osceola Utilities, Inc.

Dear Mr. Johnson:

Enclosed is the Commission's file on Mr. Mark Kevin Douglas's complaint filed originally May 16. You will note from his most recent letter that he's very unhappy with our handling of his complaint.

He now says that he paid \$95 to have the spigot installed. Did he pay Orange Osceola the \$95? If yes, when and exactly what did the \$95 cover?

Mr. Douglas also complains about the quality of water which he says is "undrinkable and stains everything it comes in contact with." Can you please investigate this and include with your report a copy of the latest chemical analysis of the Department of Environmental Protection's test?

In your May 27 letter to Ms. Pruitt, you wrote that Orange Osceola found a defective spigot valve, broken riser pipe and a missing spigot. You went on to say that as a courtesy, you moved "the meter on to the customer's property line." I'm confused. Does the meter and the defective, missing and broken parts of his irrigation system have anything in common other than the fact that the meter registers the usage? In one letter to Ms. Pruitt, Mr. Douglas said that the irrigation outlet was moved closer to his property. Please clarify exactly what was moved and how you decided on the location.

Page Two

I appreciate your review of this case. Hopefully, we can resolve this case once I receive your information. Please respond by August 18. Thanks for your assistance.

Sincerely,

Paula J. Isler

Attn: Paula J. Isler
Complaint Analyst Supervisor

Subject: 2nd response to consumer request No. 16572P, Mark Kevin Douglas, 115 Alameda Dr., Kissimmee, Fl., located on Orange Osceola Service area of Buenaventura Lake S/D.

Dear Ms. Isler:

Mr. Douglas paid an \$85.00 meter installation fee plus a \$10.00 new account turn on service fee for an irrigation meter June 1st. 1987. Orange Osceola Utilities, Inc. installed the meter and started the service June 16, 1987. As a courtesy to the customer the staff was installing a spigot on the riser pipe. The meter installation fee did not require the riser pipe and spigot therefore the staff was instructed to stop such when management became aware of the practice.

The standard practice by OOU for irrigation service is to install a service line with a meter attached immediately adjacent to the normal house service meter and on the side of the meter closest the house being serviced. In most of the house service instances the meter is in a double meter box shared with the house adjacent to it and installed at the common property line in the utility easement out in front of the property, (see attached sketch).

In the situation with Mr. Douglas's meter a power company transformer box conflicted with where OOU normally would install the water meter and caused a slight adjustment required to one side or the other of the property line. The location selected was arbitrary. When the condition was reviewed on site by myself and other staff the decision was made to accommodate the customer Mr. Douglas and move the irrigation meter serving his property onto his side of the property line. It is Mr. Douglas's responsibility to move his spigot from the meter to any other location on his property.

2507 D Boggy Creek Rd., Kissimmee, FL 34744, (407) 348-4855

Page 2

Regarding Mr. Douglas's comments concerning the quality of water OOU supplies to him is that water quality meets all of the State of Florida Requirements and all of the U.S.E.P.A. Safe Drinking Water Quality requirements, (data attached). As to the water making the tile in the shower to come loose, OOU suggest he obtain the opinion of a licensed tile setter.

The circumstance with the meter and meter box and the riser pipe with a spigot is, the riser pipe is immediately following the meter box with a spigot installed on the riser pipe approximately 12" to 18" above the ground level. The meter box and meter is the only responsibility OOU has with regards to location and or repairs to damaged material. The riser pipe and spigot as addressed above, does not belong to OOU and therefore is the property owners responsibility to make repairs to damaged riser pipes. The owner was not charged by the utility to install the spigot on the riser pipe and that was not a part of the service contract. The contract is only for water service and the charge is for a meter to measure the volume of water used so a fee can be calculated to issue a bill to the customer on an established regularity for services rendered.

Orange Osceola Utilities, Inc. has provided the services to the customer, Mr. Douglas of 115 Alameda Dr. contracted for, of which is to provide water of a quality which is safe to drink, meets all regulated requirements at an acceptable pressure and required a fee to install a metering device in order to measure the volume used to allow appropriate billing for the services.

Orange Osceola Utilities statement above is not intended to be in an uncooperative manner and attitude toward the customer but to provide what is established policy and standard operating procedures by OOU of which meets the rules and requirements of the Florida Public Service Commission and provide the appropriate service to the customer as per the service contract.

It is hoped that any confusion or misunderstood conditions that existed on this matter have been clarified above, but if there remains any additional information or action to be taken by OOU please notify us immediately.

Sincerely,

Orange Osceola Utilities, Inc.

Mike Johnson
General Manager

Lakeland, FL 33807-5252

To Whom It May Concern:

Enclosed is payment for the water we used but we are very dissatisfied with the quality of the water we are paying for. It is very discolored, very unsatisfactory for laundry use and unpleasant to drink. Due to the problems listed we had the water tested by an independent agent and he quoted us the following:

Raw Water Test 3/4/94

H	8 qpq
I	1.2 ppm (bacterial)
Ph	6.6
Free Chlorine	>3.5 ppm

Raw Water Sample 3 Weeks Old

I	5.0 ppm (bacterial)
---	---------------------

The suggestion that we have a Manganese Greensand iron filter followed by in-line filter at a cost of \$1,100 is absurd when we are paying your company for quality water.

Please inform us as to what measures will be taken to correct this most serious problem.

Sincerely,

Lucile Hurley

Dear Mrs. Hurley:

I have reviewed your letter regarding the water quality provided to your home. The water quality is in accordance with the testing requirements established by the regulatory agencies. We recognize the problems you have experienced periodically with iron. We continue to flush the lines along with balancing the chlorine level to minimize any discoloring.

Sincerely,

Fruitland Park
Fla -

I don't think we should
have to go through with all
this stress. The ~~From~~ Out I
was told to buy, does pretty
good but, doesn't solve
the problem. I don't think
you people care, or else the
water problem would be
fixed. Maybe the park
should get a lawyer to look
into the problem. This should
be ever looked.

I hope you do something
soon to clear up the
water. who needs to pay
