I'm "serious" Brenda now. The reason is when I received this docket, I didn't have a clear understanding of what the company was requesting so I called and explained to Mr. Bylander the difference between local service and long distance service, he quickly stated he DOES NOT want long distance access. The company already has an interconnect agreement with BellSouth. To make sure I called back again about an hour ago and the gentleman said again that they want ALEC service. I was having some questions with this because they only offer internet service and WE (PSC) don't regulate that but when I called a second time, the gentleman said they would probably offer more that internet service.

Why would we do this?

Hello ladies! You know I can't stand for you to sit idle so here's something for you to do! Ha! ha! ha! Please change the above docket title from and IXC provider to an ALEC provider.

"Application for certificate to provide alternative local exchange telecommunications service by Direct2Internet Corp."

The word "Corp." is abbreviated in the listing with Secretary of State. Holler at me if you need to and thanks. You know I just luv' you ladies!
