RE: Don Pedro & Knight Island Sewer Project.
DATE: 9-11-02

020745-SU

Sirs,

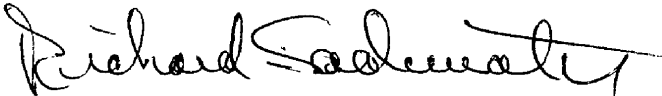

I am writing this letter of concern regarding the proposed sewer project certificate application recently submitted to your office by Island Environmental Utility Inc. As a permanent full time resident of Don Pedro Island, I must object to the way this application was presented with no explanation to the residents that will be directly affected.

The full implications of the project have not been presented to the residents of the Islands involved. The timing of the mailing of the notice was done when only 10 to 15% of the families are in residence on the islands.

The notice did not include cost implications involved with a project of this magnitude. Residents are not aware of the true costs of hook up, plumbing costs, and the cost of removing decommissioned septic tank systems. They also were not informed that hook up will be mandatory in accordance with Florida law.

Therefore, I respectfully request that any action on this certificate application be delayed until proper notification of the residents is accomplished. The majority of residents will return in late October.

Respectfully Submitted,

Richard Sadenwater
