**PETITION FOR APPROVAL OF SECTION 252(i) ADOPTION OF THE TERMS OF  
THE INTERCONNECTION, RESALE AND UNBUNDLING AGREEMENT BETWEEN  
VERIZON FLORIDA INC. AND WINSTAR WIRELESS OF FLORIDA, INC. BY  
EAGLE TELECOMMUNICATIONS, INC.**

Verizon Florida Inc. (Verizon) (formerly GTE Florida Incorporated) files this petition before the Florida Public Service Commission (Commission) seeking approval of Eagle Telecommunications, Inc.'s Section 252(i) adoption of the terms of the interconnection, resale and unbundling agreement between Verizon and WinStar Wireless of Florida, Inc. The agreement, which was approved by the Commission on August 24, 1998 in Docket No. 980645-TP, is attached.

Verizon respectfully requests that the Commission approve its petition and that Verizon be granted all other relief proper under the circumstances.

Respectfully submitted on November 4, 2002.

Mr. Mike Ray  
President  
Eagle Telecommunications, Inc.  
2901 First Avenue North  
St. Petersburg, FL 33713]

Re: Requested Adoption Under Section 252(i) of the TA96

Dear Mr. Ray:

Verizon Florida Inc., f/k/a GTE Florida Incorporated ("Verizon"), a Florida corporation, with principal place of business at 201 N. Franklin St., Tampa, FL 33602-5167, has received your letter stating that, under Section 252(i) of the Telecommunications Act of 1996 (the "Act"), Eagle Telecommunications, Inc. ("Eagle"), a Florida corporation, with principal place of business at 2901 First Avenue North, St. Petersburg, FL 33713, wishes to adopt the terms of the Interconnection Agreement between WinStar Wireless of Florida Inc. ("WinStar") and Verizon that was approved by the Florida Public Service Commission (the "Commission") as an effective agreement in the State of Florida, as such agreement exists on the date hereof after giving effect to operation of law (the "Terms"). I understand Eagle has a copy of the Terms. Please note the following with respect to Eagle's adoption of the Terms.

1. By Eagle's countersignature on this letter, Eagle hereby represents and agrees to the following three points:
  - (A) Eagle adopts (and agrees to be bound by) the Terms of the WinStar/Verizon agreement for interconnection as it is in effect on the date hereof after giving effect to operation of law, and in applying the Terms, agrees that Eagle shall be substituted in place of WinStar Wireless of Florida Inc. and WinStar in the Terms wherever appropriate.

- (B) Notice to Eagle and Verizon as may be required under the Terms shall be provided as follows:

To: W. Scott McCollough  
Stumpf, Craddock, Massey & Pulman  
1801 N. Lamar Suite 104  
Austin, TX 78701  
Attention: Eagle Telecommunications, Inc.  
Telephone number: 512-485-7920  
FAX number: 512-485-7921

To Verizon:

Director-Contract Performance & Administration  
Verizon Wholesale Markets  
600 Hidden Ridge  
HQEWMNOTICES  
Irving, TX 75038  
Telephone Number: 972-718-5988  
Facsimile Number: 972-719-1519  
Internet Address: [wmnotices@verizon.com](mailto:wmnotices@verizon.com)

with a copy to:

Vice President and Associate General Counsel  
Verizon Wholesale Markets  
1515 N. Court House Road  
Suite 500  
Arlington, VA 22201  
Facsimile: 703-351-3664

- (C) Eagle represents and warrants that it is a certified provider of local telecommunications service in the State of Florida, and that its adoption of the Terms will cover services in the State of Florida only.
2. Eagle's adoption of the WinStar Terms shall become effective on October 1, 2002. Verizon shall file this adoption letter with the Commission promptly upon receipt of an original of this letter countersigned by an authorized officer of Eagle. The term and termination provisions of the WinStar/Verizon agreement shall govern Eagle's adoption of the Terms. The adoption of the Terms is currently scheduled to expire on August 4, 2003.
  3. As the Terms are being adopted by you pursuant to your statutory rights under section 252(i), Verizon does not provide the Terms to you as either a voluntary or negotiated agreement. The filing and performance by Verizon of the Terms does not in any way constitute a waiver by Verizon of any position as to the Terms or a

portion thereof, nor does it constitute a waiver by Verizon of all rights and remedies it may have to seek review of the Terms, or to seek review in any way of any provisions included in these Terms as a result of Eagle's 252(i) election.

4. Nothing herein shall be construed as or is intended to be a concession or admission by Verizon that any provision in the Terms complies with the rights and duties imposed by the Act, the decisions of the FCC and the Commissions, the decisions of the courts, or other law, and Verizon expressly reserves its full right to assert and pursue claims arising from or related to the Terms.
5. Verizon reserves the right to deny Eagle's adoption and/or application of the Terms, in whole or in part, at any time:
  - (a) when the costs of providing the Terms to Eagle are greater than the costs of providing them to WinStar;
  - (b) if the provision of the Terms to Eagle is not technically feasible; and/or
  - (c) to the extent that Verizon otherwise is not required to make the Terms available to Eagle under applicable law.
6. For avoidance of doubt, please note that adoption of the Terms will not result in reciprocal compensation payments for Internet traffic. Verizon has always taken the position that reciprocal compensation was not due to be paid for Internet traffic under section 251(b)(5) of the Act. Verizon's position that reciprocal compensation is not to be paid for Internet traffic was confirmed by the FCC in the Order on Remand and Report and Order adopted on April 18, 2001 ("*FCC Internet Order*"), which held that Internet traffic constitutes "information access" outside the scope of the reciprocal compensation obligations set forth in section 251(b)(5) of the Act.<sup>1</sup> Accordingly, any compensation to be paid for Internet traffic will be handled pursuant to the terms of the *FCC Internet Order*, not pursuant to adoption of the Terms.<sup>2</sup> Moreover, in light of the *FCC Internet Order*, even if the Terms include provisions invoking an intercarrier compensation mechanism for Internet traffic, any reasonable amount of time permitted for adopting such provisions has expired under the FCC's rules implementing section 252(i) of the Act.<sup>3</sup> In fact, the *FCC Internet Order* made clear that carriers may not adopt provisions of an existing interconnection

---

<sup>1</sup> Order on Remand and Report and Order, In the Matters of: Implementation of the Local Competition Provisions in the Telecommunications Act of 1996 and Intercarrier Compensation for ISP-Bound Traffic, CC Docket No. 99-68 (rel. April 27, 2001) ("*FCC Remand Order*") ¶44, *remanded*, *WorldCom, Inc. v. FCC*, No. 01-1218 (D.C. Cir. May 3, 2002). Although the D.C. Circuit remanded the *FCC Remand Order* to permit the FCC to clarify its reasoning, it left the order in place as governing federal law. *See WorldCom, Inc. v. FCC*, No. 01-1218, slip op. at 5 (D.C. Cir. May 3, 2002).

<sup>2</sup> For your convenience, an industry letter distributed by Verizon explaining its plans to implement the *FCC Internet Order* can be viewed at Verizon's Customer Support Website at URL [www.verizon.com/wise](http://www.verizon.com/wise) (select Verizon East Customer Support, Resources, Industry Letters, CLEC).

<sup>3</sup> *See, e.g.*, 47 C.F.R. Section 51.809(c).

agreement to the extent that such provisions provide compensation for Internet traffic.<sup>4</sup>

7. Should Eagle attempt to apply the Terms in a manner that conflicts with paragraphs 3-6 above, Verizon reserves its rights to seek appropriate legal and/or equitable relief.
8. In the event that a voluntary or involuntary petition has been or is in the future filed against Eagle under bankruptcy or insolvency laws, or any law relating to the relief of debtors, readjustment of indebtedness, debtor reorganization or composition or extension of debt (any such proceeding, an "Insolvency Proceeding"), then: (i) all rights of Verizon under such laws, including, without limitation, all rights of Verizon under 11 U.S.C. § 366, shall be preserved, and Eagle's adoption of the Verizon Terms shall in no way impair such rights of Verizon; and (ii) all rights of Eagle resulting from Eagle's adoption of the Verizon terms shall be subject to and modified by any Stipulations and Orders entered in the Insolvency Proceeding, including, without limitation, any Stipulation or Order providing adequate assurance of payment to Verizon pursuant to 11 U.S.C. § 366.

---

<sup>4</sup> *FCC Internet Order* ¶ 82.

Please arrange for a duly authorized representative of Eagle to sign this letter in the space provided below and return it to the undersigned.

Sincerely,

VERIZON FLORIDA INC.

Jeffrey A. Masoner

Vice President – Interconnection Services Policy & Planning

10/16/02

(DATE)

Reviewed and countersigned as to points A, B, and C of paragraph 1:

By execution, we don't necessarily agree with Verizon's position relative to paragraph #8 above. Further, it is Eagle's position that it did not "request" to adopt the agreement "after giving effect to operation of law" and Verizon has not informed Eagle of any changes in interpretation or needed revisions as a result of operation of law other than those set forth herein. It is Eagle's position that it is adopting the agreement, as written and as it is in effect."

This Interconnection Agreement (the "Agreement"), is made effective as of \_\_\_\_\_, 1997, by and between GTE Florida Incorporated, with its address for purposes of this Agreement at 201 N. Franklin Street, Tampa, FL 33602 ("GTE"), and WinStar Wireless of Florida, Incorporated, in its capacity as a certified provider of local dial-tone service ("WinStar"), with its address for this Agreement at 1577 Spring Hill Road, Vienna, VA 22182 (GTE and WinStar being referred to collectively as the "Parties" and individually as a "Party"). This Agreement covers services in the state of Florida only.

### SCOPE AND INTENT OF AGREEMENT

Pursuant to this Agreement, the Parties will extend certain arrangements to one another within each area in which they both operate within the State for purposes of interconnection and the exchange of traffic between their respective end user customers, and reciprocal access to poles, ducts, conduits and rights-of-way, and the terms and conditions of the collocation of certain equipment of WinStar in the premises of GTE. This Agreement is an integrated package that reflects a balancing of interests critical to the Parties. This Agreement will be submitted to the Florida Public Service Commission (the "Commission") for approval. The Parties agree that their entrance into this Agreement is without prejudice to and does not waive any positions they may have taken previously, or may take in the future, in any legislative, regulatory, judicial or other public forum addressing any matters, including matters related to the same types of arrangements covered in this Agreement. GTE's execution of this Agreement is not a concession or waiver in any manner concerning its position that certain of the rates, terms and conditions contained herein are unlawful, illegal and improper.

The services and facilities to be provided to WinStar by GTE in satisfaction of this Agreement may be provided pursuant to GTE tariffs and then current practices, except to the extent as otherwise referenced in Appendix 44B. Should such services and facilities be modified by tariff or by Order, including any modifications resulting from other Commission proceedings, federal court review or other judicial action, such modifications will be deemed to automatically supersede any rates and terms and conditions of this Agreement. GTE will provide notification to WinStar before such a tariff becomes effective, and WinStar may provide input on such proposed tariff. The Parties shall cooperate with one another for the purpose of incorporating required modifications into this agreement.

## I. RECITALS & PRINCIPLES

WHEREAS, interconnection between competing Local Exchange Carriers ("LECs") is necessary and desirable for the mutual exchange and termination of traffic originating on each LEC's network; and

WHEREAS, the Parties desire to exchange such traffic and related signaling in a technically and economically efficient manner at defined and mutually agreed upon points of interconnection; and

WHEREAS, the Parties wish to enter into an agreement to interconnect their respective telecommunications networks on terms that are fair and equitable to both Parties; and

WHEREAS, Section 251 of the Telecommunications Act of 1996 (the "Act") imposes specific obligations on LECs with respect to the interconnection of their networks, access to their poles, ducts, conduits and rights-of-way and, in certain cases, the collocation of equipment in GTE premises; and

WHEREAS, the Parties previously have an agreement which is approved by the Commission and still in existence and it is the intent of the Parties that the prior agreement be superseded by this one;

WHEREAS, GTE is entering, under protest, into certain aspects of the Agreement that incorporate adverse results from the arbitrated agreements approved by the Commission in this state and is doing so in order to avoid the expense of arbitration while at the same time preserving its legal positions, rights and remedies.

NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, WinStar and GTE hereby covenant and agree as follows:

## II. DEFINITIONS

1. "Automatic Number Identification" or "ANI" refers to the number transmitted through the network identifying the calling party.
2. "Bona Fide Request (BFR)" process is intended to be used when requesting customized Service Orders for certain services, features, capabilities or functionality defined and agreed upon by the Parties as services to be ordered as Bona Fide Requests.
3. "Central Office Switch", "Central Office" or "CO" means a switching entity within the public switched telecommunications network, including but not limited to:  
  
"End Office Switches" which are Class 5 switches from which end user Exchange Services are directly connected and offered.  
  
"Tandem Office Switches" or "Tandems" which are Class 4 switches which are used to connect and switch trunk circuits between and among Central Office Switches.  
  
Central Office Switches may be employed as combination End Office/Tandem Office switches (combination Class 5/Class 4).
4. "CLASS Features" (also called "Vertical Features") means certain CCIS-based features available to customers including, but not limited to: Automatic Call Back; Call Trace; Caller Identification and related blocking features; Distinctive Ringing/Call Waiting; Selective Call Forward and Selective Call Rejection.
5. "Co-Location" or "Co-Location Arrangement" is an interconnection architecture method in which one carrier extends network transmission facilities to a wire center/aggregation point in the network of a second carrier, whereby the first carrier's facilities are terminated into equipment installed and maintained in that wire center by or on behalf of the first carrier for the primary purpose of interconnecting the first carrier's facilities to the facilities of the second carrier.
6. "Commission" means the Florida Public Service Commission (PSC).
7. "Common Channel Signaling" or "CCS" means a method of digitally transmitting call set-up and network control data over a special network fully separate from the part of the public switched network that carries the actual call.
8. "DID" means direct inward dialing.
9. "DS-1" is a digital signal rate of 1.544 Mbps (Mega Bit Per Second).
10. "DS-3" is a digital signal rate of 44.736 Mbps.

11. "DSX panel" is a cross-connect bay/panel used for the termination of equipment and facilities operating at digital rates.
12. "Electronic File Transfer" refers to any system/process which utilizes an electronic format and protocol to send/receive data files.
13. "Exchange Message Record" or "EMR" is the standard used for exchange of telecommunications message information among Local Exchange Carriers for billable, non-billable, sample, settlement and study data. EMR format is contained in BR-010-200-010 *CRIS Exchange Message Record*, a Bellcore document which defines industry standards for exchange message records.
14. "Exchange Service" refers to all basic access line services, or any other services offered to end users which provide end users with a telephonic connection to, and a unique telephone number address on, the public switched telecommunications network, and which enable such end users to place or receive calls to all other stations on the public switched telecommunications network.
15. "Interconnection" means the connection of separate pieces of equipment, transmission facilities, etc., within, between or among networks. The architecture of interconnection may include several methods including, but not limited to, co-location arrangements and mid-span meet arrangements.
16. "Interconnection Point" ("IP") means the physical point on the network where the two parties interconnect. The "IP" is the demarcation point between ownership of the transmission facility.
17. "Interexchange Carrier" or "IXC" means a provider of stand-alone interexchange telecommunications services.
18. "Interim Number Portability" or "INP" means the transparent delivery of Local Telephone Number Portability ("LTNP") capabilities, from a customer standpoint in terms of call completion, and from a carrier standpoint in terms of compensation, through the use of existing and available call routing, forwarding, and addressing capabilities.
19. "ISDN" means Integrated Services Digital Network; a switched network service providing end-to-end digital connectivity for the simultaneous transmission of voice and data. Basic Rate Interface-ISDN (BRI-ISDN) provides for digital transmission of two 64 Kbps bearer channels and one 16 Kbps data channel (2B+D). Primary Rate Interface-ISDN (PRI-ISDN) provides for digital transmission of twenty-three (23) 64 Kbps bearer channels and one 64 Kbps data channel (23 B+D).
20. "Line Side" refers to an end office switch connection that has been programmed to treat the circuit as a local line connected to a ordinary telephone station set. Line side connections offer only those transmission and signaling features appropriate for a connection between an end office and an ordinary telephone station set.

21. "Link Element" or "Link" is a component of an Exchange Service; for purposes of general illustration, the "Link Element" is the transmission facility (or channel or group of channels on such facility) which extends from a Main Distribution Frame, DSX-panel, or functionally comparable piece of equipment in a GTE end office wire center, to a demarcation or connector block in/at a customer's premises. Traditionally, links were provisioned as 2-wire or 4-wire copper pairs running from the end office distribution frame to the customer premise; however, a link may be provided via other media, including, for example, radio frequencies, as a channel on a high capacity feeder/distribution facility which may in turn be distributed from a node location to the customer premise via a copper or coax drop facility, etc. Links fall, e.g., into the following categories:

"2-wire analog voice grade links" will support analog transmission of 300-3000 Hz, repeat loop start or ground start seizure and disconnect in one direction (toward the end office switch), and repeat ringing in the other direction (toward the end user). This link is commonly used for local dial tone service.

"2-wire ISDN digital grade links" will support digital transmission of two 64 Kbps bearer channels and one 16 Kbps data channel. This is a 2B+D basic rate interface Integrated Services Digital Network (BRI-ISDN) type of loop which will meet national ISDN standards.

"4-wire DS-1 digital grade links" will support full duplex transmission of isochronous serial data at 1.544 Mbps. This T-1/DS-1 type of loop provides the equivalent of 24 voice grade/DS0 channels.

22. "Local Exchange Carrier" or "LEC" means any company certified by the Commission to provide local exchange telecommunications service. This includes the Parties to this Agreement.

22.1 "Local Interconnection Trunks/Trunk Groups" are trunks and trunk groups used to transmit local/intraLATA toll traffic.

23. "Local Telephone Number Portability" or "LTNP" means the technical ability to enable an end user customer to utilize its telephone number in conjunction with any exchange service provided by any Local Exchange Carrier operating within the geographic number plan area with which the customer's telephone number(s) is associated, regardless of whether the customer's Chosen Local Exchange Carrier is the carrier which originally assigned the number to the customer, without penalty to either the customer or its chosen local exchange carrier.

24. "Local Traffic" means traffic that is originated by an end user of one Party and terminates to the end user of the other Party within GTE's then-current local serving area, including mandatory local calling scope arrangements. A mandatory local calling scope arrangement is an arrangement that provides end users a local calling scope, Extended Area Service ("EAS"), beyond their basic exchange serving area. Local Traffic does not

include optional local calling scopes (i.e., optional rate packages that permit the end user to choose a local calling scope beyond their basic exchange serving area for an additional fee), referred to hereafter as "optional EAS".

25. "Main Distribution Frame" or "MDF" is the primary point at which outside plant facilities terminate within a wire center, for interconnection to other telecommunications facilities within the wire center.
26. "Meet-Point Billing" or "MPB" refers to an arrangement whereby two LECs jointly provide the transport element of a switched access service to one of the LEC's end office switches, with each LEC receiving an appropriate share of the transport element revenues as defined by their effective access tariffs.
27. "MECAB" refers to the *Multiple Exchange Carrier Access Billing (MECAB)* document prepared by the Billing Committee of the Ordering and Billing Forum (OBF), which functions under the auspices of the Carrier Liaison Committee (CLC) of the Alliance for Telecommunications Industry Solutions (ATIS). The MECAB document, published by Bellcore as Special Report SR-BDS-000983, contains the recommended guidelines for the billing of an access service provided by two or more LECs, or by one LEC in two or more states within a single LATA.
28. "MECOD" refers to the *Multiple Exchange Carriers Ordering and Design (MECOD) Guidelines for Access Services - Industry Support Interface*, a document developed by the Ordering/Provisioning Committee under the auspices of the Ordering and Billing Forum (OBF), which functions under the auspices of the Carrier Liaison Committee (CLC) of the Alliance for Telecommunications Industry Solutions (ATIS). The MECOD document, published by Bellcore as Special Report SR STS-002643, establish methods for processing orders for access service which is to be provided by two or more LECs.
29. "Mid-Span Meet" is an interconnection architecture method whereby two carriers mutually agree to jointly plan and engineer their facility meet-point at a designated location by means of a fiber splice or other transmission facility, including a 38 Ghz transmission facility.
30. "NANP" means the "North American Numbering Plan", the system of telephone numbering employed in the United States, Canada, and the Caribbean countries which employ NPA 809.
31. "Numbering Plan Area" or "NPA" is also sometimes referred to as an area code. This is the three digit indicator which is defined by the "A", "B", and "C" digits of each 10-digit telephone number within the North American Numbering Plan ("NANP"). Each NPA contains 800 possible NXX Codes. There are two general categories of NPA, "Geographic NPAs" and "Non-Geographic NPAs". A "Geographic NPA" is associated with a defined geographic area, and all telephone numbers bearing such NPA are associated with services provided within that geographic area. A "Non-Geographic NPA", also known as a "Service Access Code" or "SAC Code" is typically associated

with a specialized telecommunications service which may be provided across multiple geographic NPA areas; 800, 900, 700, and 888 are examples of Non-Geographic NPAs.

32. "NXX", "NXX Code", "Central Office Code" or "CO Code" is the three digit switch entity indicator which is defined by the "D", "E", and "F" digits of a 10-digit telephone number within the North American Numbering Plan ("NANP"). Each NXX Code contains 10,000 station numbers. Historically, entire NXX code blocks have been assigned to specific individual local exchange end office switches.
33. "On-Line Transfer" means the transferring of an incoming call to another telephone number without the call being disconnected.
34. "Permanent Number Portability" or "PNP" means the use of a database solution to provide fully transparent LTNP for all customers and all providers without limitation.
35. "Plain Old Telephone Service Traffic" or "POTS traffic." The parties agree that this initially includes only local traffic as defined in GTE's tariff but will be expanded to also include non-local intraLATA toll traffic exchanged between the parties' respective exchange customers at such time as the Commission may so direct, and/or at such time as GTE agrees with a third party ALEC (either voluntarily or otherwise, e.g., as a result of arbitration) to so include non-local intraLATA toll traffic within the definition of "POTS traffic."
36. "Port Element" or "Port" is a component of an Exchange Service; for purposes of general illustration, the "Port" is a line card and associated peripheral equipment on a GTE end office switch which serves as the hardware termination for the customer's exchange service on that switch and generates dial tone and provides the customer a pathway into the public switched telecommunications network. Each Port is typically associated with one (or more) telephone number(s) which serves as the customer's network address. Port categories include, e.g.:

"2-wire analog line port" is a line side switch connection employed to provide basic residential and business type Exchange Services.

"2-wire ISDN digital line port" is a Basic Rate Interface (BRI) line side switch connection employed to provide ISDN Exchange Services.

"2-wire analog DID trunk port" is a direct inward dialing (DID) trunk side switch connection employed to provide incoming trunk type Exchange Services.

"4-wire DS-1 digital DID trunk port" is a direct inward dialing (DID) trunk side switch connection employed to provide the equivalent of 24 analog incoming trunk type Exchange Services.

"4-wire ISDN digital DS-1 trunk port" is a Primary Rate Interface (PRI) trunk side switch connection employed to provide the ISDN Exchange Services.

37. "Rate Center" means the specific geographic point and corresponding geographic area which has been identified by a given LEC as being associated with a particular NPA-NXX code which has been assigned to the LEC for its provision of Exchange Services. The "rate center point" is the finite geographic point identified by a specific V&H coordinate, which is used to measure distance-sensitive end user traffic to/from Exchange Services bearing the particular NPA-NXX designation associated with the specific Rate Center. The "rate center area" is the exclusive geographic area which the LEC has identified as the area within which it will provide Exchange Services bearing the particular NPA-NXX designation associated with the specific Rate Center. The Rate Center point must be located within the Rate Center area.
38. "Rating Point", sometimes also referred to as "Routing Point", means a location which a LEC has designated on its own network as the homing (routing) point for traffic inbound to Exchange Services provided by the LEC which bear a certain NPA-NXX designation. Pursuant to Bellcore Practice BR 795-100-100 (*Common Language® CLLI™ Code Description for Location Identification*), the Rating Point may be an "End Office" location, or a "LEC Consortium Point of Interconnection". Pursuant to that same Bellcore Practice, examples of the latter shall be designated by a common language location identifier (CLLI) code with (x)KD in positions 9, 10, 11, where (x) may be any alphanumeric A-Z or 0-9. The Rating Point/Routing Point need not be the same as the Rate Center Point, nor must it be located within the Rate Center Area.
39. "Reference of Calls" refers to a process in which calls are routed to an announcement which states the new telephone number of an end user.
40. "Service Control Point" or "SCP" is the node in the signaling network to which informational requests for service handling, such as routing, are directed and processed. The SCP is a real time database system that, based on a query from the SSP, performs subscriber or application-specific service logic, and then sends instructions back to the SSP on how to continue call processing.
41. "Signal Transfer Point" or "STP" performs a packet switching function that routes signaling messages among SSPs, SCPs and other STPs in order to set up calls and to query databases for advanced services.
42. "Synchronous Optical Network" or "SONET" means an optical interface standard that allows inter-networking of transmission products from multiple vendors. The base rate is 51.84 Mbs (OC-1/STS-1) and higher rates are direct multiples of the base rate, up to 13.22 Gbs.
43. "Switched Access Service" means the offering of facilities for the purpose of the origination or termination of non-POTS traffic to or from Exchange Services offered in a given area. Switched Access Services include: Feature Group A, Feature Group B, Feature Group D, 800 access, and 900 access.
44. "Trunk Side" refers to a central office switch connection that is capable of, and has been

programmed to treat the circuit as, connecting to another switching entity, for example a private branch exchange ("PBX") or another central office switch. Trunk side connections offer those transmission and signaling features appropriate for the connection of switching entities, and can not be used for the direct connection of ordinary telephone station sets.

45. "Wire Center" means a building or space within a building which serves as an aggregation point on a given carrier's network, where transmission facilities and circuits are connected or switched.

### III. NETWORK INTERCONNECTION ARCHITECTURE

1. The Parties shall interconnect as shown on Appendix A. Where WinStar and GTE interconnect at a IP, the parties may mutually agree to other arrangements including, but not limited to any of the following interconnection methods:
  - 1.1 a mid-span meet at the IP, or in a manhole, on a roof top or radio tower, or other appropriate junction point near to or just outside the IP;
  - 1.2 a digital cross-connection hand-off, DSX panel to DSX panel, where both WinStar and GTE maintain such facilities at the IP;
  - 1.3 a co-location facility maintained by WinStar, or by a 3rd-party with whom WinStar has contracted for such purposes, at a GTE wire center, where such wire center has been designated as the IP; or
  - 1.4 a co-location facility maintained by GTE, or by a 3rd-party with whom GTE has contracted for such purposes, at a WinStar wire center, where such wire center has been designated as the IP.
2. In extending network interconnection facilities to the IP, WinStar shall have the right to extend its own facilities or to lease digital transport facilities from GTE or from any 3rd-party, subject to the following terms:
  - 2.1 Such leased facilities shall extend from any point designated by WinStar on its own network (including a co-location facility maintained by WinStar at an GTE wire center) to the IP or associated manhole or other appropriate junction point.
  - 2.2 Where WinStar leases such facilities from GTE, WinStar shall have the right to lease under non-discriminatory tariff or contract terms from GTE.
3. Upon reasonable notice and if mutually agreed to by the Parties (which agreement shall not be unreasonably withheld), WinStar and GTE may change from one of the interconnection methods in Appendix A to another specified method with no penalty, conversion or rollover charges except as unusual or extraordinary circumstances may warrant.
4. Interconnection will be provided via two-way trunks. Separate two-way trunks will be established to exchange 1) local and intraLATA toll and, 2) meet-point Switched Access traffic.
5. The Parties will use fiber transmission or 38 Ghz wireless transmission facilities to physically interconnect their networks.
6. Collocation of WinStar's wireless equipment, for purposes of interconnection or access to

unbundled elements, in GTE's central office (including access to roofspace and risers for purposes of such collocation) will be provided pursuant to tariff or contract, and as described in Section XVI. GTE will charge WinStar the same price that any other similarly situated collocator, either wireless or wireline, is charged for the same service.

7. This Agreement covers the initial tandem-level local interconnection between the Parties. Future Interconnection between the Parties may also include end office to end office direct connections determined by joint engineering and planning and based on actual and forecasted traffic between the Parties.
8. Nothing in this Agreement restricts the Parties from agreeing in the future to Interconnection at other technically feasible points, and/or from ordering and establishing WinStar/GTE Local Interconnection Trunk Groups in addition to the initial combination(s) described above.
9. Indirect Network Interconnection. Neither Party shall deliver traffic destined to terminate at the other Party's end office via another LEC's end office. In addition, neither Party shall deliver traffic destined to terminate at an end office subtending the other Party's tandem via another LEC's tandem as described in Section VI-2, Paragraph 2.1.

#### IV. NUMBER RESOURCE ARRANGEMENTS

1. Nothing in this Agreement shall be construed to in any manner limit or otherwise adversely impact WinStar's right to employ or to request and be assigned any NANP number resources including, but not limited to, central office (NXX) codes pursuant to the Central Office Code Assignment Guidelines<sup>1</sup>.
2. As contemplated by the Central Office Code Assignment Guidelines, WinStar will designate within the geographic NPA with which each of its assigned NXX codes is associated, a Rate Center area within which it intends to offer Exchange Services bearing that NPA-NXX designation, and a Rate Center point to serve as the measurement point for distance-sensitive traffic to/from the Exchange Services bearing that NPA-NXX designation.
3. WinStar will also designate a Rating Point for each assigned NXX code. WinStar may designate one location within each Rate Center as the Rating Point for the NPA-NXXs associated with that Rate Center; alternatively, WinStar may designate a single location within one Rate Center to serve as the Rating Point for all the NPA-NXXs associated with that Rate Center and with one or more other Rate Centers served by WinStar within the same LATA.
4. Until such time as WinStar receives specific permission from the Commission to vary its rate centers from GTE's rate centers, WinStar will agree to deploy a minimum of one NXX per established GTE rate center area.
5. To the extent GTE serves as Central Office Code Administrator for a given region, GTE will support all WinStar requests related to central office (NXX) code administration and assignments in an effective and timely manner.
6. The Parties will comply with code administration requirements as prescribed by the Federal Communications Commission, the Commission, and accepted industry guidelines.
7. It shall be the responsibility of each Party to program and update its own switches and network systems to recognize and route traffic to other Party's assigned NXX codes at all times. Neither Party shall impose any fees or charges whatsoever on the other Party for such activities. GTE will perform Local Exchange Routing Guide ("LERG") updates on behalf of WinStar at no charge.

---

<sup>1</sup> Last published by the Industry Numbering Committee ("INC") as INC 95-0407-008, Revision 4/7/95, formerly ICCF 93-0729-010.

## V. MEET-POINT BILLING ARRANGEMENTS

### 1. Description

- 1.1 WinStar may establish meet-point billing arrangements with GTE in order to provide Switched Access Services to third parties via a GTE access tandem switch, in accordance with the Meet-Point Billing guidelines adopted by and contained in the Ordering and Billing Forum's MECAB and MECOD documents, except as modified herein.
- 1.2 Interconnection for the meet-point arrangement shall occur at the IP shown on Appendix A.
- 1.3 Common channel signalling ("CCS") shall be utilized in conjunction with meet-point billing arrangements to the extent such signaling is resident in the GTE access tandem switch.
- 1.4 WinStar and GTE will maintain provisions in their respective federal and state access tariffs, and/or provisions within the National Exchange Carrier Association ("NECA") Tariff No. 4, or any successor tariff, sufficient to reflect this meet-point billing arrangement, including meet-point billing percentages.
- 1.5 As detailed in the MECAB document, WinStar and GTE will in a timely fashion exchange all information necessary to accurately, reliably and promptly bill third parties for Switched Access Services traffic jointly handled by WinStar and GTE via the meet-point arrangement. Information shall be exchanged in Electronic Message Record ("EMR") format, on magnetic tape or via a mutually acceptable electronic file transfer protocol.
- 1.6 WinStar and GTE shall work cooperatively to coordinate rendering of meet-point bills to customers, and shall reciprocally provide each other, at no charge, the usage data, etc.

### 2. Compensation

- 2.1 Initially, billing to 3rd-parties<sup>2</sup> for the Switched Access Services jointly provided by WinStar and GTE via the meet-point billing arrangement shall be according to the multiple-bill/multiple-tariff method.
- 2.2 Subsequently for billing to 3rd-parties for the Switched Access Services jointly provided by WinStar and GTE via the meet-point arrangement, WinStar and GTE may mutually agree to implement one of the following options: single-bill/single

---

<sup>2</sup> Including any future GTE separate interexchange subsidiaries.

tariff method, single-bill/multiple-tariff method, multiple-bill/single-tariff method, or multiple-bill/multiple-tariff method. Should WinStar prefer to change among these billing methods, WinStar shall notify GTE of such a request in writing, 90-days in advance of the date on which such change shall be implemented.

- 2.3 Switched Access charges to 3rd-parties shall be calculated utilizing the rates specified in WinStar's and GTE's respective federal and state access tariffs, in conjunction with the appropriate meet-point billing factors specified for each meet-point arrangement either in those tariffs or in the NECA No. 4 tariff.
- 2.4 WinStar shall be entitled to the balance of the switched access charge revenues associated with the jointly handled switched access traffic, less the amount of transport element charge revenues<sup>3</sup> to which GTE is entitled pursuant to the above-referenced tariff provisions.
- 2.5 MPB will apply for all traffic bearing the 800, 888, or any other non-geographic NPA which may be likewise designated for such traffic in the future, where the responsible party is an IXC. In those situations where the responsible party for such traffic is a LEC, full switched access rates will apply.

---

<sup>3</sup> For purposes of clarification, this does not include the interconnection charge, which is to be remitted to the end office provider, which in this case would be WinStar.

## VI. RECIPROCAL TRAFFIC EXCHANGE ARRANGEMENT

### 1. Description

The Parties shall reciprocally terminate POTS calls originating on each others' networks, as follows:

- 1.1 The Parties shall make available to each other the following traffic exchange trunk groups for the reciprocal exchange of local and intra-LATA traffic at the respective IPs and in accordance with Appendix A.
- 1.2 Reciprocal Traffic Exchange Arrangement trunk connections shall be made at a DS-1 or multiple DS-1 level, DS-3, (SONET where technically available and a fiber transmission medium has been agreed upon for interconnection) and shall be jointly-engineered to an objective P.01 grade of service. Nothing in this Agreement is to be understood to preclude the Parties from agreeing on an Interconnection architecture utilizing 38 Ghz transmission facilities, which by definition do not include SONET.
- 1.3 WinStar and GTE agree to mutually develop and agree on a Joint Interconnection Grooming Process prescribing standards to ensure that the Reciprocal Traffic Exchange Arrangement trunk groups are maintained at consistent P.01 or better grades of service. Such process shall also include mutually-agreed upon default standards for the configuration of all segregated trunk groups. The Parties recognize that, as may be required in high usage situations, the Parties will jointly engineer end office to end office trunks.
- 1.4 The Parties will provide Common Channel Signalling (CCS) to one another, where and as available, in conjunction with all traffic exchange trunk groups. The parties will cooperate on the exchange of Transactional Capabilities Application Part (TCAP) messages to facilitate full inter-operability of CCS-based features between their respective networks, including all CLASS features and functions. All CCS signalling parameters will be provided including automatic number identification (ANI), originating line information (OLI) calling party category, charge number, etc. All privacy indicators will be honored. Network signalling information such as Carrier Identification Parameter (CCS platform) and CIC/OZZ information (non-CCS environment) will be provided wherever such information is needed for call routing or billing. For traffic for which CCS is not available, in-band multi-frequency (MF), wink start, E&M channel-associated signalling with ANI will be forwarded.
- 1.5 Third-Party Signaling Providers. WinStar has chosen a third-party SS7 signaling provider, Illuminet, to transport messages to and from the GTE SS7 network. In that event, that third-party provider must present a letter of agency to GTE, prior to the testing of the interconnection, authorizing Illuminet to act on behalf of

WinStar in transporting SS7 messages to and from GTE. Illuminet must interconnect with the GTE STP(s) serving the LATA in which the traffic exchange trunk groups are interconnected.

2. Transport and Termination of Traffic.

2.1 Types of Traffic. The Parties shall reciprocally terminate Local, IntraLATA Toll, optional EAS and jointly provided Interexchange Carrier Traffic originating on each other's networks utilizing either Direct or Indirect Network Interconnections as provided in Section III herein. To this end, the Parties agree that there will be interoperability between their networks. Only traffic originated by or terminating to the Parties' end user customers is to be exchanged. The Parties also agree to exchange traffic associated with Third-Party LECs, CLECs and Wireless Service Providers and acknowledge that such traffic will not be blocked by either Party; at the same time, the Parties also recognize the need to execute a separate agreement between the originating and terminating companies. In addition, the Parties will notify each other of any anticipated change in traffic distribution.

2.2 Compensation For Exchange Of Traffic.

2.2.1 Mutual Compensation. The Parties shall compensate each other for the exchange of Local Traffic in accordance with Appendix C. Charges for the transport and termination of intraLATA toll and interexchange traffic shall be in accordance with the Parties' respective intrastate or interstate access tariffs, as appropriate. Optional extended area service (EAS), where applicable, will be classified as toll traffic. Mandatory EAS will be classified as local traffic.

2.2.2 Bill-and-Keep. The Parties shall assume that Local Traffic is roughly balanced between the Parties for the first nine months following initiation of live traffic flow and thereafter unless traffic studies indicate otherwise. Accordingly, the Parties agree to use a Bill-and-Keep Arrangement with respect to termination of Local Traffic only after initial nine (9) months following initiation of live traffic flow. Either Party may request that a traffic study be performed no more frequently than once a quarter. Should such traffic study indicate, in the aggregate, that either Party is terminating more than 60 percent of the Parties' total terminated minutes for Local Traffic, either Party may notify the other that mutual compensation will commence pursuant to the rates set forth in Appendix C of this Agreement and following such notice it shall begin and continue for the duration of the Term of this Agreement unless otherwise agreed. Nothing in this Section shall be interpreted to (i) change compensation set forth in this Agreement for traffic or services other than Local Traffic, including but not limited to internetwork facilities, access traffic or wireless traffic, or (ii) allow either Party to aggregate traffic other than Local Traffic for the purpose of compensation under the Bill-and-Keep Arrangement described

in this Section.

2.2.3 Sharing of Access Charges on Calls to Ported Numbers. Until permanent number portability is implemented, the Parties agree that switched access termination to a ported number will be billed by the Party providing interim number portability and that the Party billing the switched access will share the switched access revenue with the other Party. After permanent number portability is implemented, the Parties agree to renegotiate sharing of access charges to ported numbers in accordance with permanent number portability requirements. In lieu of actual measurements of minutes and/exchange of billing records for this traffic the Parties agree that the Party providing the ported number will pay the other Party the rate per line/per month as specified in Appendix D.

2.2.3.1 The number of lines/talk paths per ported number that are subject to compensation will be determined at the time the end user customer's local service is changed from one Party to the other. After conversion the number of lines per number available for compensation can only be increased by mutual consent of the Parties, which consent will not be unreasonably withheld.

2.2.3.2 The Parties agree that the compensation rate in Appendix D may change as a result of changes in access rates, traffic volume or for other reasons and agree to renegotiate the rate if a significant event occurs. At a minimum, the Parties agree to reevaluate the rate on an annual basis.

2.2.3.3 The Parties agree that terminating switched access calls ported via interim number portability may appear to the receiving Party to be a local call and that the implementation of reciprocal compensation for terminating local calls may result in overcompensation for ported switched access calls. Therefore, the Parties agree that upon written request by either party, they will renegotiate the terminating shared access compensation rate if reciprocal compensation on a basis other than bill and keep for local calls is implemented.

2.3 Tandem Switching Services. The Parties will provide tandem switching for traffic between the Parties' end offices subtending each other's tandem, as well as for traffic between either Party's end users and any Third Party which is interconnected to the other Party's tandems as follows:

2.3.1 The originating Party will compensate the tandem Party for each minute of originated tandem switched traffic which terminates to a third party (e.g., other CLECs, ILEC, or wireless service provider). The applicable rate for this charge is identified in Appendix C.

- 2.3.2 The originating Party also assumes responsibility for compensation to the company which terminates the call.
- 2.3.3 Services Provided. Tandem switching services provided pursuant to this Section shall include the following:
  - 2.3.3.1 signaling;
  - 2.3.3.2 screening and routing;
  - 2.3.3.3 recording;
  - 2.3.3.4 access to AIN functionality
  - 2.3.3.5 access to operator services and directory assistance
  - 2.3.3.6 support of all trunk interconnections;
  - 2.3.3.7 access to PSAPs
  - 2.3.3.8 transit of traffic to and from third parties in accordance with the terms and conditions of this section.
- 2.4 Inter-Tandem Switching. The Parties will only use inter-tandem switching for the transport and termination of traffic originating on each other's network at and after such time as either (I) WinStar has agreed to and fully implemented an existing intraLATA toll compensation mechanism such as IntraLATA Terminating Access Compensation (ITAC) or a functional equivalent thereof or (ii) generally accepted industry signaling standards and AMA record standards support the recognition of multiple tandem switching events.
  - 2.4.1 LATA-wide access for intraLATA toll traffic may be allowed from a single tandem interconnection. In return WinStar will participate in the ITAC plan that exists between GTE and the other incumbent LECs. This participation will require WinStar to provide GTE and BellSouth Services with records in the same format currently used by the industry for compensation for intraLATA toll calls originating from a WinStar end user and utilizing the existing Feature Group C intraLATA toll network for transport and termination. WinStar will also be required to design a system that can receive these 99-02 records from the other primary toll providers.

## VII. MISCELLANEOUS SERVICE ARRANGEMENTS

### 1. 911/E911 Arrangements.

1.1 Description of Service. Where GTE is the 911 service provider, GTE shall provide 911 Service as described in this Section. WinStar will install a minimum of two dedicated trunks per Numbering Plan Area (NPA) to GTE's 911/E911 selective routers (i.e., 911 tandem offices) that serve the areas in which WinStar provides Exchange Services, for the provision of 911/E911 services and for access to all subtending PSAPs. The dedicated trunks shall be, at minimum, DSO level trunks configured as a 2-wire analog interface or as part of a digital (1.544 Mbps) interface. "9-1-1 Selective Router" is a CAMA-type trunk connection to a 9-1-1 Selective Router employed to accept ANI and voice for routing the call to the correct PSAP. Either configuration shall use CAMA type signaling with multifrequency (MF) tones that will deliver ANI with the voice portion of the call. GTE will provide WinStar with the appropriate CLLI codes and switch types of the central offices in the 911 selective router serving area. If a WinStar central office serves end users in an area served by more than one GTE 911/E911 selective router, WinStar will install a minimum of two dedicated trunks in accordance with this section to each of such 911/E911 selective routers.

1.2 Transport. If WinStar desires to obtain transport from GTE to the GTE 911 selective routers, WinStar may purchase such transport from GTE at the rates set forth in Appendix M.

1.3 Cooperation and Level of Performance. The Parties agree to provide access to 911/E911 in a manner that is transparent to the end user. The Parties will work together to facilitate the prompt, reliable and efficient interconnection of WinStar's systems to the 911/E911 platforms, with a level of performance that will provide the same grade of service as that which GTE provides to its own end users. To this end, GTE will provide documentation to WinStar showing which central offices are served by which 911 selective routers, and GTE will provide maps of NXX overlays, NXX boundaries, and GTE's network maps to identify diverse routing for purposes of 911 service provisioning. Such maps (if available) shall be to the same level of detail as are used by GTE network design engineers. GTE will provide reports to identify which GTE databases cover which 911 districts.

GTE plans to provide WinStar notification of any pending tandem moves, NPA splits, or scheduled maintenance outages in advance via its data base management centers and agrees to negotiate the procedures to mutual satisfaction.

1.4 Updates to MSAG. It shall be the responsibility of WinStar to ensure that the address of each of its end users is included in the Master Street Address Guide (MSAG). Where GTE is the lead telco, GTE will accept address records provided

on WinStar's Local Service Request ("LSR") or via a separate feed established by WinStar pursuant to Section 1.1 of this Article. GTE and WinStar will work together to develop the process by which LSR errors out of the MSAG will be handled, with appropriate cost recovery to GTE. Where GTE is not the lead telco, GTE has no action and WinStar must establish a separate relationship with the lead telco to submit records for MSAG validation. Where GTE is the lead telco, it will have a copy of the MSAG and will provide a copy to WinStar upon request at a reasonable, non-discriminatory charge as shown in Appendix M.

- 1.5 Updates to Database. The 911/E911 database will be updated with WinStar's end user 911/E911 information. If WinStar provides its update data to GTE as frequently as does GTE's internal systems, the update process will be as timely. In any case, GTE will not update the ALI database any later than one working day subsequent to receipt of data from WinStar.

1.6 Compensation.

1.6.1 In situations in which GTE is responsible for maintenance of the 911/E911 database and can be compensated for maintaining WinStar's information by the 911 district, GTE will seek such compensation from the 911 district. GTE will seek compensation from WinStar only if and to the extent that GTE is unable to obtain such compensation from the 911 district. GTE may, as appropriate, charge WinStar a portion of the cost of the shared 911/selective router.

1.6.2 Subject to 1.6.1 above, compensation to GTE for provision of services it provides WinStar hereunder shall be according to the rates in Appendix M.

- 1.7 PSAP Routing. GTE will identify and be responsible for any special routing arrangements when it provides the switching to the PSAP.

- 1.8 Emergency Backup Numbers. When available under the 911 District contract, GTE must identify any arrangements for emergency backup number in case of massive trunk failures.

- 1.9 Liability. GTE will not be liable for errors with respect to 911/E911 services except for its gross negligence or willful misconduct as addressed in applicable tariffs.

- 1.10 SAG. GTE will provide to WinStar upon request the Street Address Guide at a reasonable charge. Two companion files will be provided with the SAG which lists all services and features at all Local Switching Offices (LSOs), and lists services and features that are available in a specific LSO.

2. Exchange of 800 Traffic

2.1 Description

The Meet-point Billing terms and conditions contained in Section V of this Agreement apply for the exchange of 800 traffic.

2.2 Compensation

Applicable Switched Access Meet-point billing rates shall apply for all 800 calls per the terms and conditions contained in Section V of this Agreement.

3. Information Services Billing and Collection

3.1 Description

3.1.1 WinStar and GTE shall work cooperatively to reach agreement on all information services (e.g. 976, 974, N11, weather lines, sports lines, publisher lines, etc.) issues. The subsequent information services agreement shall enable WinStar and GTE to reciprocally provide information services, originate and terminate information services calls between each other, bill and collect revenues from each others end users (including Information Providers), and reasonably compensate WinStar and GTE.

3.1.2 Blocking. Nothing in this Agreement shall restrict either Party from offering to its end user customers the ability to block the completion of information service traffic. If WinStar does not wish to be responsible for collect, third number billed, toll, 900 and 976 calls, it must order blocking for resold lines and pay any applicable charges. Should GTE block its end users from making 976 calls, GTE shall also block WinStar resale end users from making such calls.

4. Directory Listings and Directory Distribution

Additional terms for these items are included in a separate agreement between WinStar and GTE (the "Directories Agreement").

4.1 Description

The directory listings and distribution terms and rate specified in this section shall apply to listings of WinStar customer numbers falling within NXX codes directly assigned to WinStar, and to listings of WinStar customer telephone numbers which are retained by WinStar pursuant to Local Telephone Number Portability Arrangements described below.

4.1.1 GTE will include WinStar's customers' telephone numbers in all its "White Pages" and "Yellow Pages" directory listings and directory

assistance databases associated with the areas in which WinStar provides services to such customers, and will distribute such initial directories and directory updates to such customers, in the identical and transparent manner in which it provides those functions for its own customers' telephone numbers.

- 4.1.2 WinStar will provide GTE with its directory listings and daily updates to those listings in GTE's format; GTE will provide WinStar a magnetic tape or computer disk containing the proper format.
- 4.1.3 WinStar and GTE will accord WinStar's directory listing information the same level of confidentiality which GTE accords its own directory listing information, and GTE shall ensure that access to WinStar's customer proprietary confidential directory information will be limited solely to those GTE employees who are directly involved in the preparation of listings.
- 4.1.4 GTE will include in the "Information Pages" or comparable section of its White Pages Directories for areas served by WinStar, critical customer contact information provided by WinStar for WinStar's installation, repair and customer services and other service-oriented information. GTE shall provide this critical customer contact information in the directories at no charge to WinStar and will provide the information in a nondiscriminatory manner.

#### 4.2 Compensation

- 4.2.1 GTE and WinStar will work cooperatively to address any payments for sales of any bulk directory lists to third parties, where such lists include WinStar customer listings and any compensation due GTE for administrative functions associated with furnishing listings to third parties. GTE will not provide/sell WinStar's listings to any third parties without WinStar's prior written approval.
- 4.2.2 GTE shall provide directory distribution, directory database maintenance, and directory listings for WinStar and its customers under the same terms that GTE provides these same services for its end users. In-area directory delivery, database maintenance, and basic "White" and "yellow" page listings will be at no fee. Out-of-area directory delivery and enhanced listings, i.e. bolding, indention, second listings, etc., will be per GTE's currently tariffed or non-discriminatory available contract rates.

#### 5. Yellow Page Maintenance

GTE will work cooperatively with WinStar to ensure that Yellow Page advertisements purchased by customers who switch their service to WinStar (including customers

utilizing WinStar-assigned telephone numbers and WinStar customers utilizing co-carrier number forwarding) are maintained without interruption. GTE will allow WinStar customers to purchase new yellow pages advertisements without discrimination, at non-discriminatory rates, terms and conditions.

6. Transfer of Service Announcements

For services other than GTE resold and ported number services, when an end user customer transfers service from one Party to the other Party, and does not retain its original telephone number, the Party formerly providing service to the end user will provide, upon request and if such service is provided to its own customers, a referral announcement on the original telephone number. This announcement will provide the new number of the customer and will remain in effect for the same time period this service is provided to GTE's own end users. For GTE resold and ported number services, GTE shall provide an intercept referral on behalf of WinStar.

7. Coordinated Repair Calls

WinStar and GTE will employ the following procedures for handling misdirected repair calls:

- 7.1 WinStar and GTE will educate their respective customers as to the correct telephone numbers to call in order to access their respective repair bureaus.
- 7.2 To the extent the correct provider can be determined, misdirected repair calls will be referred to the proper provider of local exchange service in a courteous manner, at no charge, and the end user will be provided the correct contact telephone number. Extraneous communications beyond the direct referral to the correct repair telephone number are strictly prohibited.
- 7.3 WinStar and GTE will provide their respective repair contact numbers to one another on a reciprocal basis.

8. Busy Line Verification and Interrupt

8.1 Description

Each Party shall establish procedures whereby its operator bureau will coordinate with the operator bureau of the other Party operating in order to provide Busy Line Verification ("BLV") and Busy Line Verification and Interrupt ("BLVI") services on calls between their respective end users. BLV and BLVI inquiries between operator bureaus shall be routed over the appropriate trunk groups. WinStar and GTE will reciprocally provide adequate connectivity to facilitate this capability.

8.2 Compensation

Each Party shall compensate the other Party for BLV and BLVI inquiries according to the other party's tariff.

9. Bona Fide Request Process.

9.1 Intent. The Bona Fide Request process is intended to be used when WinStar requests customized Service Orders for certain services, features, capabilities or functionality defined and agreed upon by the Parties as services to be ordered as Bona Fide Requests.

9.2 Process.

9.2.1 A Bona Fide Request shall be submitted in writing by WinStar and shall specifically identify the need to include technical requirements, space requirements and/or other such specifications that clearly define the request such that GTE has sufficient information to analyze and prepare a response.

9.2.2 Although not expected to do so, WinStar may cancel a Bona Fide Request in writing at any time prior to WinStar and GTE agreeing to price and availability. GTE will then cease analysis of the request.

9.2.3 Within two (2) Business Days of its receipt, GTE shall acknowledge in writing the receipt of the Bona Fide Request and identify a single point of contact and any additional information needed to process the request.

9.2.4 Except under extraordinary circumstances, within ten (10) Business Days of its receipt of a Bona Fide Request, GTE shall provide a proposed price and availability date, or it will provide a detailed explanation as to why GTE is not able to meet WinStar's request. If extraordinary circumstances prevail, GTE will inform WinStar as soon as it realizes that it cannot meet the ten (10) Business Day response due date. WinStar and GTE will then determine a mutually agreeable date for receipt of the request.

9.2.5 Unless WinStar agrees otherwise, all proposed prices shall be consistent with the pricing principles of the Act, FCC and/or the Commission. Payments for services purchased under a Bona Fide Request will be made upon delivery, unless otherwise agreed to by WinStar, in accordance with the applicable provisions of the Agreement.

9.2.6 Upon affirmative response from GTE, WinStar will submit in writing its acceptance or rejection of GTE's proposal. If at any time an agreement cannot be reached as to the terms and conditions or price of the request, the dispute resolution process in Section XVII-5 will be used..

9.2.7 If GTE responds that it cannot or will not offer the requested item in the

Bona Fide Request and WinStar deems GTE's position to be inconsistent with the Act, FCC or Commission regulations and/or the requirements of this Agreement, the dispute resolution process in Section XVII-5 will be used.

10. Directory Assistance (DA) and Operator Services (OS). WinStar will initially provide local DA/OS service with its own switch using a third-party DA/OS provider.

11. Directory Assistance

- 11.1 Description

Based upon a BFR from WinStar, GTE will:

- 11.1.1 Provide to WinStar unbranded directory assistance service which is functionally equivalent in every way to the directory assistance service GTE makes available to its own end users.

- 11.1.2 Provide to WinStar branded directory assistance service which is functionally equivalent in every way to the directory assistance service GTE makes available to its own end users. Branding is only available for WinStar switched service which is routed on a direct trunk group from WinStar's switch to GTE comparable to IXC routing.

- 11.2 When available from GTE in the state of Florida, at WinStar's request, GTE will:

- 11.2.1 Provide to WinStar operators or to a WinStar-designated operator bureau on-line access to GTE's directory assistance database, where such access is identical to the type of access GTE's own directory assistance operators utilize in order to provide directory assistance services to GTE end users;

- 11.2.2 Allow WinStar or a WinStar-designated operator bureau to license GTE's directory assistance database for use in providing competitive directory assistance services; and/or

- 11.2.3 In conjunction with 11.2.1 above, provide caller-optional directory assistance call completion service which is functionally equivalent in every way to the directory assistance call completion service GTE makes available to its own end users. When this functionality is available to GTE in the state of Florida, GTE will route the calls back to WinStar for WinStar to complete the customer call.

12. GTE will include in the "Information Pages" or comparable section of its White Pages Directories for areas served by WinStar, critical customer contact information provided by WinStar for WinStar's installation, repair and customer services and other service-oriented information. GTE shall provide this critical information in the directories at no

charge to WinStar and will provide the information in a nondiscriminatory manner.

13. Dialing Format Changes. GTE will provide reasonable notification to WinStar of changes to local dialing format, *i.e.*, 7 to 10 digit, by end office.
14. Operational Support Systems (OSS). GTE shall provide OSS functions to WinStar for ordering, provisioning and billing that are generally available as described in Appendix G attached to this Agreement. WinStar shall pay GTE for access to GTE's OSS functions consistent with processes defined in Appendix G.

## VIII. UNBUNDLED EXCHANGE SERVICE ARRANGEMENTS

General. The purpose of this Section is to define the unbundled network elements that may be leased by WinStar from GTE. Unless otherwise specified in this Agreement, provisioning of unbundled network arrangements will be governed with the GTE Customer Guide for CLEC Establishment of Services - Resale and Unbundling (the "Guide"). Additional procedures for preordering, ordering, provisioning and billing of unbundled network elements are outlined in Appendix G.

### 1. Unbundled Network Elements.

#### 1.1 Categories. There are several separate categories of Network Components that shall be provided as unbundled network elements by GTE:

1.1.1 Network Interface Device or NID

1.1.2 Loop Elements

1.1.3 Port and Local Switching Elements

1.1.4 Transport Elements

1.1.5 Signaling Elements

1.1.6 Data Switching

1.1.7 Digital Cross Connect System (DCS)

#### 1.2 Prices. Individual unbundled network elements and prices are identified on Appendix F attached to this Agreement and made a part hereof, or under the appropriate GTE tariff as referenced in this Article. Nonrecurring charges relating to unbundled elements are also listed on Appendix E

#### 1.3 Interconnection to Unbundled Elements. WinStar may lease and interconnect to whichever of these unbundled network elements WinStar chooses, and subject to technical feasibility, may combine these unbundled elements with any facilities or services that WinStar may itself provide subject to the following:

1.3.1 Interconnection shall be achieved via expanded interconnection/ collocation arrangements WinStar shall maintain at the wire center at which the unbundled services are resident.

1.3.2 WinStar may order transport pursuant to Section 5 below from the wire center at which the unbundled elements (e.g., loop, port) are located to the GTE wire center where WinStar has established an interconnection/

collocation arrangement.

1.3.3 Each loop or port element shall be delivered to the CLEC collocation arrangement over a loop/port connector applicable to the unbundled services.

1.3.4 WinStar shall combine unbundled network elements with its own facilities. WinStar may not combine such network elements to provide solely interexchange service or solely access service to an interexchange carrier.

1.4 Service Quality. To the degree possible, all service attributes, grades-of-service and installation, maintenance and repair intervals which apply to the bundled service will apply to unbundled network elements. Notwithstanding the foregoing, GTE shall not be responsible for impacts on service attributes, grades of service, etc., resulting from WinStar's specific use of or modification to any unbundled network element.

## 2. Network Interface Device.

2.1 Direct Connection. WinStar shall be permitted to connect its own Loop directly to GTE's Network Interface Device or NID in cases in which WinStar uses its own facilities to provide local service to an end user formerly served by GTE, as long as such direct connection does not adversely affect GTE's network. In order to minimize any such adverse effects, WinStar shall follow the procedures in Sections 2.1.1 and 2.1.2 below. (See Attachment 1, NID diagram.)

2.1.1 When connecting its own loop facility directly to GTE's NID for a residence or business customer, WinStar must make a clean cut on the GTE drop wire at the NID so that no bare wire is exposed. WinStar shall not remove or disconnect GTE's drop wire from the NID or take any other action that might cause GTE's drop wire to be left lying on the ground.

2.1.2 At multi-tenant customer locations, WinStar must remove the jumper wire from the distribution block (i.e. the NID) to the GTE cable termination block. If WinStar cannot gain access to the cable termination block, WinStar must make a clean cut at the closest point to the cable termination block. At WinStar's request and discretion, GTE will determine the cable pair to be removed at the NID in multi-tenant locations. WinStar will compensate GTE for the trip charge necessary to identify the cable pair to be removed.

2.1.3 GTE agrees to offer NIDs for lease to WinStar but not for sale. WinStar may remove GTE identification from any NID which it connects to a WinStar loop, but WinStar may not place its own identification on such NID.

- 2.2 NID to NID Connection. Rather than connecting its loop directly to GTE's NID, WinStar may also elect to install its own NID and effect a NID to NID connection to gain access to the end user's inside wiring.
- 2.3 Removal of Cable Pairs. Removal of existing cable pairs required for WinStar to terminate service is the responsibility of WinStar.
- 2.4 Maintenance. When WinStar provides its own loop and connects directly to GTE's NID, GTE does not have the capability to perform remote maintenance. WinStar can perform routine maintenance via its loop and inform GTE once the trouble has been isolated to the NID and GTE will repair (or replace) the NID, or, at WinStars option, it can make a NID to NID connection, using the GTE NID only to gain access to the inside wire at the customer location.

### 3. Loop Elements.

- 3.1 Service Description. A "Loop" is an unbundled component of Exchange Service. In general, it is the transmission facility (or channel or group of channels on such facility) which extends from a Main Distribution Frame ("MDF") or functionally comparable piece of equipment in a GTE end office or wire center to a demarcation or connector block in/at a subscriber's premises. Traditionally, Loops were provisioned as 2-wire or 4-wire copper pairs running from the end office MDF to the customer premises. However, a loop may be provided via other media, including radio frequencies, as a channel on a high capacity feeder/distribution facility which may, in turn, be distributed from a node location to the subscriber premises via a copper or coaxial drop facility, etc.
- 3.2 Categories of Loops. There are three general categories of loops:
  - 3.2.1 "2-wire analog voice grade" loops will support analog transmission of 300-3000 Hz, repeat loop start or ground start seizure and disconnect in one direction (toward the end office switch), and repeat ringing in the other direction (toward the end user). This loop is commonly used for local dial tone service;
  - 3.2.2 "4-wire analog voice grade" loops conform to the characteristics of a 2-wire voice grade loop and, in addition, can support the simultaneous independent transmission of information in both directions;
  - 3.2.3 "DS-3" loops will support the transmission of isochronous bipolar serial data at a rate of 44.736 Mbps. This DS-3 type of loop provides the equivalent of 28 DS-1 channels and shall include the electronics at either end.
- 3.3 Loops for Digital Services. WinStar may also lease 2-wire or 4-wire Loops that have been conditioned to transmit the digital signals needed to provide services

such as ISDN, ADSL, HDSL and DS-1 level signals, subject to the limitations indicated in Sections 3.2.1 and 3.2.2. The price for such conditioned Loops shall be the price for the basic 2-wire or 4-wire loop, as applicable, that is listed in Appendix E, plus the applicable charge for the special conditioning as provided for in the appropriate GTE intrastate special access tariff. Prices for DS-3 grade Loops are the prices set forth in the appropriate GTE intrastate special access tariff.

3.4 Features, Functions, Attributes. To the degree possible, all transport-based features, functions, service attributes, grades-of-service, installation, maintenance and repair intervals that apply to the bundled services will apply to unbundled loops.

3.4.1 GTE will not perform routine testing of the unbundled loop for maintenance purposes. WinStar will be responsible for testing to prove trouble. GTE will perform repair and maintenance once trouble is identified by WinStar.

3.4.2 All Loop facilities furnished by GTE on the premises of WinStar's end users and up to the network interface or functional equivalent are the property of GTE. GTE must have access to all such facilities for network management purposes. GTE employees and agents may enter said premises at any reasonable hour to test and inspect such facilities in connection with such purposes or, upon termination or cancellation of the Loop facility, to remove such facility.

3.4.3 GTE will provide loop transmission characteristics to WinStar end users which are equal to those provided to GTE end users.

3.4.4 If WinStar leases loops which are conditioned to transmit digital signals, as a part of that conditioning, GTE will test the loop and provide recorded test results to WinStar. In maintenance and repair cases, if loop tests are taken, GTE will provide any recorded readings to WinStar at time the trouble ticket is closed in the same manner as GTE provides to itself and its end users.

3.5 Digital Loop Carrier. Where GTE utilizes integrated digital loop carrier ("IDLC")<sup>4</sup> technology to provision the Loop element, GTE will take the necessary affirmative steps to provide unbundled Loops. The basic Loop provided will support voice grade services. Loop capabilities beyond voice grade (i.e., ISDN, ADSL, etc.) will be provided under GTE's tariffed terms and conditions, and at the prices indicated in Section F.

---

<sup>4</sup> See Bellcore TR-TSY-000008, Digital Interface Between the SLC-96 Digital Loop Carrier System and Local Digital Switch and TR-TSY-000303, Integrated Digital Loop Carrier (IDLC) Requirements, Objectives and Interface.

- 3.5.1 GTE will permit WinStar to collocate digital loop carriers and associated equipment in conjunction with collocation arrangements WinStar maintains at a GTE wire center for the purpose of interconnecting to unbundled Loop elements.

3.6 Unbundled Loop Facility Certification.

- 3.6.1 Before deploying any service enhancing copper cable technology (e.g., HDSL, ISDN, etc.) over unbundled 2-wire analog voice grade loops leased from GTE, WinStar shall notify GTE of such intentions to enable GTE to assess the loop transport facilities to determine whether there are any existing copper cable loop transport technologies (e.g., analog carrier, etc.) deployed within the same cable sheath that would be interfered with if WinStar deployed the proposed service enhancing copper cable technology. If there are existing copper cable loop transport technologies already deployed within the same cable sheath, or if GTE already has existing near term within 18 months of the date of facility certification plans to deploy copper cable loop transport technologies that would be interfered with as described above, GTE will so inform WinStar and WinStar shall not be permitted to deploy such service enhancing copper cable technologies. GTE will charge WinStar the applicable nondiscriminatory engineering time and labor costs to perform the certification.
- 3.6.2 If WinStar fails to notify GTE of its plans to deploy service enhancing copper cable technology and obtain prior certification from GTE of the facilities, if WinStar's deployment of such technology is determined to have caused interference with existing or planned copper cable loop transport technologies deployed by GTE in the same cable sheath, WinStar will immediately remove such service enhancing copper cable technology and shall reimburse GTE for all incurred expense related to this interference.

3.7 Unbundled Loop Facility Notification.

- 3.7.1 GTE reserves the right to deploy within its network at its sole discretion any and all copper cable loop transport technologies. If GTE plans to deploy copper cable loop transport technology within a cable sheath in which such technology was not previously deployed, GTE will provide notice to WinStar of such planned deployment, indicating all service enhancing copper cable technologies that would cause interference with the technology to be deployed, or that would be interfered with by the deployment of such technology. Such notice will be provided at least ninety (90) Business Days in advance of the planned deployment. If WinStar has deployed any technologies within the same cable sheath that would interfere with, or be interfered with, by the technology GTE plans

to deploy, the parties will work together to resolve the situation.

3.8 Subloops.

- 3.8.1 GTE will provide as separate items the loop distribution, loop concentrator and loop feeder on a case-by-case basis pursuant to a Bona Fide Request ("BFR"), when technically feasible and when WinStar pays the cost of such separate provision.
- 3.8.2 GTE will design and construct loop access facilities (including loop feeders and loop concentration/multiplexing systems) in accordance with standard industry practices as reflected in applicable tariffs and/or as agreed to by GTE and WinStar.
- 3.8.3 Transport for loop concentrators/multiplexers services not supported by embedded technologies will be provided pursuant to applicable tariffs or as individually agreed upon by GTE and WinStar. The Parties understand that embedded loop concentrators/multiplexers are not necessarily capable of providing advanced and/or digital services.
- 3.8.4 GTE will provide loop transmission characteristics as specified in Section 5 herein.

4. Port and Local Switching Elements.

- 4.1 Port. Port is an unbundled component of Exchange Service that provides for the interconnection of individual loops or trunks to the switching components of GTE's network. In general, it is a line card or trunk card and associated peripheral equipment on GTE end office switch that serves as the hardware termination for the end user's Exchange Service on that switch and generates dial tone and provides the end user access to the public switched telecommunications network. The port does not include such features and functions which are provided as part of local switching. Each line-side port is typically associated with one (or more) telephone number(s), which serve as the end user's network address.
- 4.2 Ports Available as Unbundled Network Elements. There are four types of Ports available as unbundled network elements;
  - 4.2.1 "2-wire analog line" Port is a line side switch connection employed to provide basic residential and business type Exchange Service.
  - 4.2.2 "2-wire ISDN digital line" Port is a Basic Rate Interface (BRI) line side switch connection employed to provide ISDN Exchange Services.
  - 4.2.3 "DS-1 digital trunk" Port is a direct inward dialing (DID) trunk side switch connection employed to provide the equivalent of 24 analog incoming

trunk type Exchange Services.

4.2.4 "4-wire ISDN digital DS-1 trunk" Port is a Primary Rate Interface (PRI) trunk side switch connection employed to provide the ISDN Exchange Services

4.3 Port Prices. Prices for 2-wire analog and DS-1 Ports are listed in Appendix F. 2-wire ISDN line side Ports and 4-wire ISDN trunk side Ports shall be provided at a price agreed to by the Parties.

4.4 Future Interfaces. GTE will make available as unbundled network elements any interfaces that are deployed within its switches and which it provides to its own end user customers. GTE will interface with WinStar using standard industry interfaces and support future interfaces that are deployed within the GTE switch.

4.5 Local Switching. Local switching provides the basic switching functions to originate, route and terminate traffic and any signaling deployed in the switch. GTE will only provide switch features and functions inherent to the particular platform used (e.g., DMS, 5ESS, GTD5).

4.6 WinStar must purchase Local Switching with the line-side Port or trunk-side Port, if applicable.

4.7 WinStar shall only order unbundled elements in accordance with Section 1.3 herein and it will be the responsibility of WinStar to make arrangements for the delivery of interexchange traffic and routing of traffic over interoffice transmission facilities, if applicable.

4.8 GTE will provide tandem switching capability at GTE tandems for traffic between WinStar and GTE end offices subtending the GTE tandem and for traffic between WinStar and non-GTE end offices subtending GTE tandems. GTE will provide the features and functions that are centralized in tandem switches including but not limited to call recording, the routing of calls to operator services when technically feasible, and signaling conversion features.

4.9 Compensation Arrangements for Call Termination. Reciprocal compensation arrangements for call termination shall be as provided in Appendix K attached hereto.

## 5. Transport Facility.

5.1 Service Description. Transport is an unbundled component of Exchange Service. In general, it is the transmission facility (or channel or group of channels on such facility) which extends from a Main Distribution Frame (MDF) or functionally comparable piece of equipment in a GTE end office or tandem to either (i) another MDF or functionally comparable piece of equipment in a GTE end office or

tandem, or (ii) a meet point with transport facilities of WinStar or another carrier. Transport may be provided over a variety of media, including, but not limited to, copper cables, radio frequencies or channels on a high capacity facility.

- 5.2 Categories/Types. Unbundled transport is provided under rates, terms and conditions of the applicable GTE access tariff or local private line tariff, except as otherwise specified or provided for in Appendix 44B.
6. SS7 Transport and Signaling. SS7 signaling and transport services in support of WinStar's local exchange services shall be provided in accordance with the terms and conditions of Article VI, Sections 1.4/1.5.
  - 6.1 GTE will provide interconnection with its SS7 at the STPs but not at other points.
7. LIDB Services. Access to GTE's LIDB shall be provided in accordance with the rates, terms and conditions of GTE's switched access tariff, GTOC Tariff FCC No. 1, Section 8.
8. Database 800-Type Services. Access to GTE's 800-Type database (*i.e.*, 888, 877) shall be provided in accordance with the rates, terms and conditions of GTE's switched access tariff, GTOC Tariff FCC No. 1, Section 8.
9. Data Switching.
  - 9.1 Access. GTE will provide unbundled access to GTE data switches to WinStar at the user network interface ("UNI") and network to network interface ("NNI") level subject to mutual agreement on technical standards.
  - 9.2 Nondiscrimination. Data switching features and functionalities provided to WinStar will be without discrimination with respect to the way GTE provides them to GTE end users. In the event of overflow or congestion conditions on the data switching network, WinStar's data traffic carried on GTE facilities will be equal priority to GTE data traffic.
  - 9.3 Interface. To the extent a standard interface is available in a GTE switch, it will be made available to WinStar.
  - 9.4 Testing, Monitoring, Administration and Maintenance. Testing, monitoring, administration and maintenance will be performed by GTE in a nondiscriminatory manner.
10. Digital Cross Connect System (DCS).
  - 10.1 Access. GTE will provide unbundled access to the DCS element, which shall provide automated cross-connection (with CNC), facility grooming, bridging (MJU-digital), point to multipoint connections (DMB-analog), broadcast and

automated facility test capabilities. These functionalities will be provided consistent with that which is provided to GTE end users. WinStar shall submit a Bona Fide Request to GTE specifying these functionalities.

- 10.2 Optional Characteristics. The DCS element may include multiplexing, format conversion, signaling conversion and manual cross connection wiring.
- 10.3 Alternate Provisioning. Where no automated DCS capability exists, the cross connection function will be provided manually by GTE through the combination of DSX patch panels and D4 banks or DS0 (or higher capacity) equipment.
- 10.4 Elements. WinStar will have access to the following DCS elements:
  - 10.4.1 DS0 with DS1 interface (CNC)
  - 10.4.2 DS1/VT1.5 with DS1, DS3 and SONET interfaces (CNC and Titan 5500)
- 10.5 Capabilities. The DCS elements will provide the following capabilities:
  - 10.5.1 Real-time configuration (with CNC)
  - 10.5.2 Real-time access to integrated test equipment (with React and Customer Service)
  - 10.5.3 SONET asynchronous gateway functionality (with Titan 5500 only)
  - 10.5.4 Compliance with Bellcore and industry standards.
- 10.6 Protection and Performance. The unbundled DCS elements provided to WinStar will have equipment/interface protection, redundant power supply and/or battery backup and performance/availability consistent with that provided to GTE end users.
- 10.7 Provisioning, Administration and Maintenance. GTE will provide provisioning, administration and maintenance of the DCS elements at parity with GTE as well as real time access to performance monitoring and alarm data affecting WinStar traffic (with CNC). GTE is not required to keep software updated to the "current available release" in every instance.
- 11. Operator Services (OS) and Directory Assistance (DA). If ordered in conjunction with an unbundled Port, GTE will provide OS and DA to WinStar in accordance with the terms set forth as follows:
  - 11.1 Where Customized Routing is available and WinStar so requests, GTE will offer unbranded OS and DA or rebranded OS and DA with the WinStar brand. GTE will provide such unbranding or rebranding on a switch-by-switch basis, subject

to capability and capacity limitations. Upon receipt of an order for unbranding or rebranding, GTE will implement upon a nondiscriminatory basis within a maximum of 90 Business Days when technically capable, unless a shorter time period is agreed upon.

11.1.1 WinStar will be billed an element charge for OS and DA and a charge for unbranding or rebranding and Customized Routing as set forth in 11.

11.1.2 For those offices that WinStar has requested GTE to rebrand OS and DA, live operators handling OS and DA calls from WinStar local service customers will identify themselves as WinStar operators where such rebranding is not technically feasible, live operator response will be provided on an unbranded basis. WinStar agrees to withdraw its request for branding of OS and DA for calls that are handled by automated systems until these systems are capable of rebranding.

11.2 Customized Routing. Where technically feasible and upon receipt of written request from WinStar, GTE agrees to provide customized routing for the following types of calls:

0-

0+Local

0+411

1+411

0+HNPA-555-1212 (intraLATA, only when intraLATA presubscription is not available)

1+HNPA-555-1212 (intraLATA, only when intraLATA presubscription is not available)

11.2.1 GTE will provide WinStar a list of switches that can provide customized routing using line class codes or similar method (regardless of current capacity limitations). WinStar will return a list of these switches ranked in priority order. GTE will return to WinStar a schedule for customized routing in the switches with existing capabilities and capacity.

11.2.2 Upon written request from WinStar, GTE will provide WinStar with applicable charges, and terms and conditions, for providing OS and DA, branding, and Customized Routing.

11.2.3 Subject to the above provisions, GTE will choose the method of implementing customized routing of OS and DA calls.

11.2.4 The use of customized routing will require the purchase of a trunk side port and dedicated facilities between the GTE end office and the designated OS/DA platform.

12. Advanced Intelligent Network Access (AIN). GTE will provide WinStar access to GTE AIN functionality from GTE's AIN SCP via GTE's local switch or CLEC's local switch.
13. Nondiscrimination Provision and Support. GTE will provide unbundled network elements in a timely, nondiscriminatory manner and shall provide power to such elements on the same basis as GTE provides to itself.
14. Advance Notification of Network and Technology Changes. GTE will establish quarterly reviews of network and technology plans and will notify WinStar six (6) months in advance, or in accordance with appropriate FCC, state utility commission and/or other applicable regulatory rules.

## IX. LOCAL TELEPHONE NUMBER PORTABILITY ARRANGEMENTS

### 1. Description

GTE and WinStar will provide Interim Number Portability (INP) on a reciprocal basis between their networks to enable each of their end user customers to utilize telephone numbers associated with an Exchange Service provided by one carrier, in conjunction an Exchange Service provided by the other carrier, upon the coordinated or simultaneous termination of the first Exchange Service and activation of the second Exchange Service.

1.1 WinStar and GTE will provide reciprocal INP immediately upon execution of this Agreement via remote call forwarding. GTE and WinStar will migrate from INP to a Permanent Number Portability arrangement as soon as practically possible, without interruption of service to their respective customers and in accordance with the FCC's decision released July 2, 1996 in CC Docket No. 95-116.

1.1.1 Where either Party has activated for a customer either (1) an entire NXX (i.e., a block of 10,000 seven-digit telephone numbers beginning with the same three-digits) or (2) at least 80% of NXX with the remaining numbers in that NXX either reserved for future use or otherwise unused, then if such customer chooses to receive service from the other Party, the Party that initially activated the NXX shall cooperate with the other Party to have the entire NXX reassigned (or subsequently reassigned, in the case of subsequent carrier change) in the LERG (and associated industry databases, routing tables, etc.) to an end office operated by the Party to whom such customer's service is being transferred.

1.2 INP shall operate as follows:

1.2.1 A customer of Carrier A elects to become a customer of Carrier B. The customer elects to utilize the original telephone number(s) corresponding to the Exchange Service(s) it previously received from Carrier A, in conjunction with the Exchange Service(s) it will now receive from Carrier B. Upon receipt of a signed letter of agency from the customer assigning the number to Carrier B, Carrier A will implement one of the following arrangements:

1.2.1.1 For the initial implementation of the portability of telephone numbers, Carrier A will implement an arrangement whereby all calls to the original telephone number(s) will be forwarded to a new telephone number(s) designated by Carrier B. Carrier A will route the forwarded traffic to Carrier B via the mutual traffic exchange arrangements, as if the call had originated from the original telephone number and terminated to the new telephone number.

- 1.2.2 Carrier B will become the customer of record for the original Carrier A telephone numbers subject to the INP arrangements. Carrier A will provide Carrier B a single consolidated master billing statement for INP. Also, GTE will use its best efforts to provide sub-account detail for collect, calling card, and 3rd-number billed calls, and the capability of having billing statements delivered in real time via an agreed-upon Electronic data transfer, or via daily or monthly magnetic tape.
- 1.2.3 Carrier A will update its Line Information Database ("LIDB") listings for retained numbers and cancel calling cards associated with those forwarded numbers.
- 1.2.4 Within two (2) business days of receiving notification from the customer, Carrier B shall notify Carrier A of the customer's termination of service with Carrier B, and shall further notify Carrier A as to the Customer's instructions regarding its telephone number(s). Carrier A will cancel the INP arrangements for the customer's telephone number(s). If the Customer has chosen to retain its telephone number(s) for use in conjunction with Exchange Services provided by Carrier A, Carrier A will simultaneously transition the number(s) to the customer's preferred carrier.
- 1.3 If WinStar wishes to use Direct Inward Dialing ("DID") to provide INP to its end users, CLEC may purchase DID service from GTE at the GTE Tariff rate .

## 2. Compensation

Compensation for INP will be as defined in Appendix D unless as otherwise modified by Appendix 44B.

## X. RESPONSIBILITIES OF THE PARTIES

1. GTE and WinStar agree to treat each other fairly, on a reciprocal basis, for all items included in this Agreement, or related to the support of items included in this Agreement.
2. WinStar and GTE will work cooperatively to minimize fraud associated with 3rd-number billed calls, calling card calls, or any other services related to this Agreement.
3. WinStar and GTE agree to promptly exchange all necessary records for the proper billing of all traffic.
4. For network expansion, WinStar and GTE will jointly review engineering requirements on a quarterly basis and establish forecasts for trunk utilization. New trunk groups will be implemented as dictated by engineering requirements for both GTE and WinStar. The Parties agree that new trunk groups will be established and/or existing trunk groups augmented based on sound and standard local telephone company network engineering principles. High usage trunk groups will be used between WinStar end offices and GTE end offices when engineering principles dictate their implementation. GTE and WinStar are required to provide each other the proper call information (e.g., originated call party number and destination call party number, CIC, OZZ, etc.) to enable each company to bill in a complete and timely fashion.
5. There will be no re-arrangement, reconfiguration, disconnect, or other non-recurring fees for any mutually beneficial network interconnections associated with the reconfiguration for traffic exchange, 911/E911, Interim Number Portability, Meet-point Billing, Directory Assistance, Information Services, Common Channel Signalling, and BLV/BLVI connectivity.
6. With respect to any outstanding issues set forth in this Agreement requiring an additional agreement within a set number of days, each party will use its best efforts to address all such outstanding items within that time period. Failure to reach agreement on these additional issues will not affect the enforceability of this Agreement.
7. WinStar and GTE shall share responsibility for all Control Office functions for Local Interconnection Trunks and Trunk Groups, and all meet point trunks and trunk groups and both Parties shall share the overall coordination, installation, and maintenance responsibilities for these trunks and trunk groups.
8. WinStar and GTE shall:
  - 8.1 Provide trained personnel with adequate and compatible test equipment to work with each other's technicians.
  - 8.2 Notify each other when there is any change affecting the service requested, including the due date.

- 8.3 Coordinate and schedule testing activities of their own personnel, and others as applicable, to ensure its interconnection trunks/trunk groups are installed per the interconnection order, meet agreed-upon acceptance test requirements, and are placed in service by the due date.
- 8.4 Perform sectionalization to determine if trouble is located in its facility or its portion of the interconnection trunks prior to referring the trouble to each other.
- 8.5 Advise each other's Control Office if there is an equipment failure which may affect the interconnection trunks.
- 8.6 Provide each other with a trouble reporting number that is readily accessible and available 24 hours/7 days a week.
- 8.7 Provide to each other test-line numbers and access to test lines.

## XI. SERVICE STANDARDS

1. The Parties shall meet applicable quality of local service standards imposed by the Commission and will provide a level of services to each other under this Agreement in compliance with the nondiscrimination requirements of the Act.
2. GTE and CLEC agree to implement standards to measure the quality of Local Services (Unbundled Network Elements, Collocation, ROW, Conduit and Pole Attachments, as applicable) supplied by GTE with respect to pre-ordering, order/provisioning, maintenance and billing. (See Appendix L for Performance Measures.)
  - 2.1 GTE's Performance Measures (PM) support five (5) Key Customer Expectations: delivered as promised, works when delivered, works over time, repaired when broken, and billed accurately.
  - 2.2 Reporting will be available monthly, or at a greater interval, as requested by WinStar. GTE and WinStar will work with each other's respective account teams to determine the level of reporting that may be appropriate.
  - 2.3 GTE's PM include certain financial incentives that specifically require WinStar to provide timely and accurate forecasts. If WinStar chooses not to comply with the forecasting PM, GTE will rescind the financial incentives.
3. GTE shall provide WinStar with notice of any new or changed feature, functionality or price pertaining to pre-ordering, ordering/provisioning, maintenance and billing for "Services" necessary to ensure that WinStar can provide retail local exchange services which are at least equal in quality to comparable GTE retail local exchange services.
4. The Parties will alert each other to any network events that can result or have resulted in service interruption, blocked calls, and/or changes in network performance. GTE will treat WinStar in a nondiscriminatory manner equal to GTE's established business practice, e.g., GTE will advise WinStar of any such network event resulting in blocked calls or lost features.

## XII. INSTALLATION AND MAINTENANCE

Due dates for the installation of the initial local interconnection and meet-point trunks covered by this Agreement shall be based on mutual agreement of the Parties in accordance with the availability of local interconnection facilities, but in no circumstances will the standard provisioning, maintenance and/or repair intervals for facilities provided by each Party exceed the interval for the same or similar services under similar circumstances as provided by that Party to any other ALEC, LEC, and/or itself. WinStar and GTE shall effectuate all the terms of the Agreement upon approval by the PSC of the Agreement.

### XIII. NETWORK MAINTENANCE AND MANAGEMENT

WinStar and GTE will work cooperatively to install and maintain a reliable network. WinStar and GTE will exchange appropriate information (e.g., maintenance contact numbers, network information, information required to comply with law enforcement and other security agencies of the Government, etc.) to achieve this desired reliability.

WinStar and GTE will work cooperatively to apply sound network management principles by invoking network management controls to alleviate or to prevent congestion.

1. Orders between the Parties to establish, add, change or disconnect trunks shall be processed by use of an Access Service Request (ASR).
2. As discussed in this Agreement, both Parties will jointly manage the capacity of Local Interconnection Trunk Groups to the Parties' Tandem and End Offices. The Parties recognize their joint responsibility for efficient local interconnection trunk routing to Tandem and End Offices, and agree to use the following criteria to determine when direct end office local interconnection trunks should be established:
  - 2.1 Primary high usage trunk groups will be established between end offices when the trunk group load between those offices exceeds 385 Centum Call Seconds. Parties may agree to establish high usage trunks at a lower threshold level;
  - 2.2 Primary high usage trunk groups will be engineered using an Economic Centum Call Seconds of 15; and
  - 2.3 Modular trunking will be used with the module size of 24 trunks.
3. As set forth in this Agreement, both Parties will jointly manage the capacity of Local Interconnection Trunk Groups. GTE will send WinStar a Trunk Group Service Request (TGSR) to trigger changes GTE desires to the Local Interconnection Trunk Groups based on GTE's capacity assessment. WinStar will issue an ASR to GTE:
  - 3.1 within 10 business days after receipt of the TGSR, upon review of and in response to GTE's TGSR; or
  - 3.2 at any time as a result of WinStar's own capacity management assessment, to begin the provisioning process.
4. Orders that comprise a major project shall be submitted at the same time, and their implementation shall be jointly planned.
5. WinStar will be responsible for engineering its network. GTE will be responsible for engineering its network.

#### XIV. ACCESS TO RIGHTS-OF-WAY

To the extent lawfully required by Section 251(b)(4) of the Act, each Party shall afford to the other access to the poles, ducts, conduits (including conduit risers), and rights-of-way it owns or controls on nondiscriminatory terms, conditions and prices comparable to those offered to any other entity pursuant to each Parties' tariffs and/or standard agreements. GTE's standard agreement for pole attachment and conduit occupancy is shown in Appendix I and J. In addition, if either Party provides access to roof space or riser capacity in a particular building it owns or controls to another entity for provision of radio-based communications services, the Party will provide access to roof space and/or riser capacity that it owns or controls on a first-come, first-serve basis; subject, in all cases to the providing Party's normal request processes based on the evaluation of operational issues, including, but not limited to capacity, potential interference, roof loading, power requirements, and protection grounding which approval shall not be unreasonably withheld.

## XV. RESALE

1. General. The purpose of this Article is to define the Exchange Services and related Vertical Features and other Services (collectively referred to for purposes of this Article XV as the "Services") that may be purchased from GTE and resold by WinStar and the terms and conditions applicable to such resold Services. Except as specifically provided otherwise in this Agreement, provisioning of Exchange Services for resale will be governed by the GTE Guide. GTE will make available to WinStar for resale any Telecommunications Service that GTE currently offers, or may offer hereafter, on a retail basis to subscribers that are not telecommunications carriers, except as qualified by Section 2.3 below.

2. Terms and Conditions.

The following terms and conditions shall apply unless otherwise modified by Appendix 44B.

- 2.1 Quality and Performance. GTE shall provide Services to WinStar that are equal in quality and performance standards to the same Services provided by GTE to its own end user customers.
- 2.2 Restrictions on Resale. The following restrictions shall apply to the resale of retail services by WinStar.
  - 2.2.1 WinStar shall not resell Basic Exchange Residential Service.
  - 2.2.2 WinStar shall not resell to one class of customers a service that is offered by GTE only to another class of customers in accordance with State requirements (e.g., R-1 to B-1, disabled services or Lifeline services to non-qualifying customers).
  - 2.2.3 WinStar shall not resell public pay telephone lines.
  - 2.2.4 WinStar shall not resell semi-public pay telephone lines.
  - 2.2.5 WinStar shall not resell promotional offerings.
- 2.3 Restrictions on Discount of Retail Services. The discount specified in Appendix E herein shall apply to all retail services except for the following:
  - 2.3.1 WinStar shall resell services that are provided at a volume discount in accordance with terms and conditions of applicable tariff. WinStar shall not aggregate end user traffic in order to qualify for volume discount.
  - 2.3.2 WinStar shall resell ICB/Contract services without a discount and only to

end user customers that already have such services.

2.3.3 WinStar shall resell COCOT coin or coinless line but no discount applies.

2.3.4 WinStar shall resell Lifeline services and services for the disabled but no discount shall apply and they shall only be resold to end user customers who qualify under GTE's tariffs and state/Commission rules, orders and regulations.

2.3.5 WinStar shall resell special access but no discount applies.

2.3.6 WinStar shall resell Operator Services and Directory Assistance herein; however, no discount applies.

2.4 Resale to Other Carriers. Services available for resale may not be used by WinStar to provide access to the local network as an alternative to tariffed switched and special access by other carriers, including, but not limited to; interexchange carriers, wireless carriers, competitive access providers, or other retail telecommunications providers.

### 3. Ordering and Billing.

The following ordering procedures shall apply unless otherwise modified by Appendix 44B.

3.1 Local Service Request. Orders for resale of Services will be placed utilizing a standard Local Service Request ("LSR") form. GTE will continue to participate in industry forums for developing service order/disconnect order formats and will incorporate appropriate industry standards. A complete and accurate LSR (containing the requisite end user information as described in the Guide) must be provided by WinStar before a request can be processed.

3.2 Certificate of Operating Authority. When ordering, WinStar must represent and warrant to GTE that it is a certified provider of local dial-tone service. WinStar will provide a copy of its Certificate of Operating Authority or other evidence of its status to GTE upon request.

3.3 Letter of Authorization. A Letter of Authorization ("LOA") will be required before resold Services will be provided in cases in which the subscriber currently receives Exchange Service from GTE or from a local service provider other than WinStar. Such LOA may be a blanket LOA or such other form as agreed upon between GTE and WinStar. GTE will not release information to WinStar on GTE end user customer accounts unless WinStar first provides to GTE a written LOA, signed by the end user customer, authorizing the release of such information to WinStar or if state or federal law provides otherwise, in accordance with such law.

- 3.4 Directory Assistance Listings. GTE shall include a WinStar customer listing in its Directory Assistance database as part of the Local Service Request ("LSR") process. GTE will honor WinStar Customer's preferences for listing status, including non-published and unlisted, as noted on the LSR and will enter the listing in the GTE database which is used to perform Directory Assistance functions as it appears on the LSR.
- 3.5 Nonrecurring Charges. WinStar shall be responsible for the payment of all nonrecurring charges ("NRCs") applicable to resold Services (e.g., installation, changes, ordering charges) in accordance with the appropriate tariff. No discount applies to nonrecurring charges.
- 3.6 Transfers Between WinStar and Another Reseller of GTE Services. When WinStar has obtained an end user customer from another reseller of GTE services, WinStar will inform GTE of the transfer by submitting a standard LSR to GTE.
- 3.7 Local Calling Detail. Except for those Services and in those areas where measured rate local service is available to end users, monthly billing to WinStar does not include local calling detail. However, WinStar may request via the BFR process developing the capabilities to provide local calling detail in those areas where measured local service is not available for a mutually agreeable charge.
- 3.8 Procedures. An overview of the procedures for preordering, ordering, provisioning and billing for resold services are outlined in Appendix G, attached hereto and made a part hereof.
- 3.9 LIDB. For resale services, GTE's service order will generate updates to the LIDB for validation of calling card, collect, and third number billed calls.
- 3.10 "OLN". Upon request, GTE will update the database to provide Originating Line Number ("OLN") Screening which indicates to an operator the acceptable billing methods for calls originating from the calling number (e.g., penal institutions, COCOTS).

#### 4 Maintenance.

- 4.1 Maintenance, Testing and Repair. GTE will provide repair and maintenance services to WinStar and its end user customers for resold Services in accordance with the same standards and charges used for such services provided to GTE end user customers. GTE will not initiate a maintenance call or take action in response to a trouble report from a WinStar end user until such time as trouble is reported to GTE by WinStar. WinStar must provide to GTE all end user information necessary for the installation, repair and servicing of any facilities used for resold Services according to the procedures described in the Guide.
- 4.2 Specifics and Procedures for Maintenance. An overview of the procedures for

maintenance of resold services and additional matters agreed to by the Parties concerning maintenance are set forth in Appendix G.

5. Services Available for Resale.

5.1 Description of Local Exchange Services Available for Resale. Resold basic Exchange Service includes, but is not limited to, the following elements:

- 5.1.1 Voice Grade Local Exchange Access Line - includes a telephone number and dial tone.
- 5.1.2 Local Calling - at local usage measured rates if applicable to the end user customer.
- 5.1.3 Access to long distance carriers
- 5.1.4 E-911 Emergency Dialing
- 5.1.5 Access to Special Access Codes - e.g., 800, 888, 900
- 5.1.6 Use of AIN Services (those currently available to end users)
- 5.1.7 End User Private Line Services
- 5.1.8 Listing of telephone number in appropriate "white pages" directory; and
- 5.1.9 Copy of "White Pages" and "Yellow Pages" directories for the appropriate GTE service area

5.2 List of Services Available for Resale. The type of Services listed on Appendix E, attached hereto and made a part of this Agreement, are available for resale by WinStar. Subject to the limitations on resale enumerated in this Article, any new services that GTE offers in the future at retail to customers who are not telecommunications carriers shall also be available to WinStar for resale under the same terms and conditions contained in this Agreement. Additional regulations, terms and conditions relating to the type of Services listed on Appendix E can be found in the appropriate intrastate local, toll and access tariffs. Terms, conditions and other matters concerning rate applications, technical parameters, provisioning capability, definitions and feature interactions contained in such tariffs are applicable to the type of Services offered under this Agreement and are incorporated herein by reference. Modifications to Services listed on Appendix E shall be provided to WinStar in accordance with GTE's practices and procedures.

5.3 Rates. The prices charged to WinStar for Local Services shall be calculated as follows unless otherwise modified by Appendix 44B:

- (1) Avoided Cost Discount shall apply to all retail services except those services listed in Section 2.2 and Section 2.3 herein.
- (2) The discount dollar amount calculated under Step 1 above will be deducted from the retail rate.
- (3) The resulting rate is the Wholesale Rate.
- (4) This discount dollar amount in Step 2 above shall not change during the Term of this Agreement, even though GTE may change its retail rates.

- 5.4 Grandfathered Services. Services identified in GTE Tariffs as grandfathered in any manner are available for resale only to end user customers that already have such grandfathered service. An existing end user customer may not move a grandfathered service to a new service location.
- 5.5 Access. GTE retains all revenue due from other carriers for access to GTE facilities, including both switched and special access charges.
- 5.6 Operator Services (OS) and Directory Assistance (DA). Where GTE provides access to GTE Operator Services for local and toll assistance (for example, call completion, busy line verification and emergency interruption) and Directory Assistance (e.g., 411 calls routed to GTE's DA operator centers) as an element of Exchange Services offered for resale, WinStar will be billed in accordance with Appendix E. GTE will provide its existing OS and DA to WinStar at the same quality and in a nondiscriminatory manner as the service GTE's end users receive.
- 5.6.1 Where Customized Routing is available and WinStar so requests, GTE will offer unbranded OS and DA or rebranded OS and DA with the WinStar brand. GTE will provide such unbranding or rebranding on a switch-by-switch basis, subject to capability and capacity limitations. Upon receipt of an order for unbranding or rebranding, GTE will implement within 90 Business Days when technically capable.
- 5.6.2 WinStar will be billed for unbranding or rebranding and Customized Routing. Upon written request from WinStar, GTE will provide WinStar with terms and conditions for providing Customized Routing and branding, plus the applicable charges. The rates charged will be on a non-discriminatory basis and will be determined on a switch-by switch basis.
- 5.6.3 For those offices that WinStar has requested GTE to rebrand and/or unbrand OS and DA. Live operators handling OS and DA calls from WinStar local service customers will identify themselves as WinStar operators; where such rebranding is not technically feasible, live operator response will be provided on an unbranded basis. WinStar agrees to

withdraw its request for branding of OS and DA for calls that are handled by automated systems until these systems are capable of rebranding.

## XVI. COLLOCATION

1. Physical Collocation. GTE shall provide to WinStar physical collocation of equipment pursuant to 47 CFR § 51.323 necessary for interconnection or for access to unbundled network elements, provided that GTE may provide virtual collocation in place of physical collocation, or in some cases deny a particular collocation request entirely, if GTE demonstrates that physical collocation, or perhaps even virtual collocation, is not practical because of technical reasons or space limitations, as provided in Section 251(c)(6) of the Act. GTE will work with WinStar to install collocation arrangements within 120 calendar days absent extenuating circumstances, GTE will provide such collocation for purposes of interconnection or access to unbundled network elements pursuant to the terms and conditions in the applicable federal and state EIS tariffs. In addition, GTE agrees that the terms and conditions set forth in this Section shall apply to physical collocation provided to WinStar. Further, WinStar has the option to place remote switching modules for use as transmission equipment in collocation spaces in GTE central offices in the State of Florida for purposes of interconnection and access to unbundled services. In no event shall such collocated remote switching modules be used to perform switching functions. GTE reserves the right to audit the performance functions of any such collocated remote switching module.
  - 1.1 Space Planning. In addition to such provisions for space planning and reservation as may be set forth in the applicable GTE federal and state EIS tariffs, the parties agree to the following terms and conditions.
    - 1.1.1 GTE has the right to reserve space within its central offices for its own use based on a 5-year planning horizon.
    - 1.1.2 GTE will notify WinStar if it plans to build an addition to a central office where WinStar has collocated facilities, if such addition would result in a material increase of space available for collocation.
    - 1.1.3 Should WinStar submit to GTE a two-year forecast for space planning for collocated facilities in a central office, GTE will, in good faith, consider and discuss such forecast with WinStar when considering space planning or utilization decisions for such central office; provided, however that any final space planning or utilization decision shall be made by GTE in its sole discretion in light of GTE requirements.
    - 1.1.4 Subject to technical feasibility and space limitations, GTE will make available at applicable federal and state EIS tariffs such intraoffice facilities as may be necessary to accommodate projected volumes of WinStar traffic.
  - 1.2 Connection to Customer Loops and Ports. Facilities for cross-connection to unbundled loops and ports shall be provided under the applicable GTE federal

tariff for Special Access Cross Connect, until such time as a local tariff applicable to the facilities used for such cross-connection is filed.

- 1.3 Connection to Other Collocated Carriers. Subject to technical feasibility and space limitations, WinStar may interconnect with other carriers collocated at a GTE central office at which WinStar has collocated facilities; provided, however, that WinStar and such other carriers must be collocated at the GTE central office for the primary purpose of interconnecting with GTE or accessing GTE's unbundled network elements. If WinStar wants to interconnect with other carriers collocated at a GTE central office, WinStar must provide GTE with thirty Business Days' prior written notice, during which time GTE may elect to provide the facilities necessary to accomplish such interconnection. WinStar and the other collocated carriers may provide the necessary interconnection facilities only if GTE elects not to provide such facilities or fails to so elect within the thirty day notice period. If GTE elects to provide interconnection facilities under this section, GTE will provide this cross connection under the GTE federal tariff for Special Access Cross Connect, until such time as a local tariff applicable to the facilities used for such interconnection facilities is filed.
- 1.4 Choice of Vendor. WinStar may use the vendor of its choice to install, maintain and repair equipment within WinStar's collocated space. Access by the employees, agents or contractors of such vendor shall be subject to the same restrictions on access by employees, agents or contractors of WinStar imposed under the applicable GTE federal and state EIS tariffs, including but not limited to certification and approval by GTE.
- 1.5 Monitoring. Subject to technical feasibility and space limitations, WinStar may extend its own facilities for remote monitoring of its collocated equipment to its collocated space. WinStar may request that GTE provide the facilities necessary for such remote monitoring, at which time GTE and WinStar will negotiate in good faith the price, terms and conditions of remote monitoring by GTE.
- 1.6 Phone Service. Upon ordering collocated space, WinStar may order that its collocation cage be provided with plain old telephone service (POTS) commencing at such time as GTE has completed construction of the collocated space. WinStar shall pay separately for any ordered POTS service.
- 1.7 Intraoffice Diversity. At WinStar's request, GTE will provide diversity for ingress/egress fiber and power cables where such diversity is available and subject to technical feasibility and space limitations.
- 1.8 WinStar Proprietary Information. GTE will protect all WinStar proprietary information to the extent required under non-disclosure agreements existing as of the date GTE completes construction of a physical collocation space at WinStar's request.

- 1.9 Notification of Modifications. GTE will notify WinStar of modifications to collocation space in accord with the terms of applicable GTE state and federal EIS tariffs. Additionally, GTE shall notify WinStar when major upgrades are made to the power plants supporting WinStar's collocation space. The following shall constitute such major upgrades:
- (a) replacement of a rectifier;
  - (b) addition or replacement of a new fusing module;
  - (c) addition or replacement of a power distribution unit frame; or
  - (d) addition or replacement of modular rectifiers.
- 1.10 Drawings. When WinStar orders collocated space, GTE and WinStar will hold a GTE/customer meeting in accord with applicable GTE state and federal EIS tariffs. At such meeting, GTE will provide such drawings of GTE's central office facility as may be necessary to adequately depict WinStar's proposed collocation space.
- 1.11 Construction of Space. GTE will construct WinStar's collocation space in accord with the terms and conditions set forth in the applicable GTE state and federal EIS tariff. Additionally, GTE agrees to the following terms and conditions regarding construction of collocated space:
- 1.11.1 Space will be constructed in 100 square foot increments, and shall be designed so as to prevent unauthorized access.
  - 1.11.2 A standard 100 square foot cage shall have the following standard features:
    - (a) eight-foot high, nine gauge chain link panels;
    - (b) three of the panels listed at (a) above shall measure eight by ten feet, the fourth panel shall measure eight by seven feet;
    - (c) the door to the cage shall measure eight by three feet and shall also consist of nine gauge chain link;
    - (d) the cage shall be provided with one padlock set, with GTE retaining one master key;
    - (e) one ac electrical outlet;
    - (f) one charger circuit system;

- (g) one electrical sub-panel;
- (h) such additional lighting as may be necessary;
- (I) one fire detection requirement evaluation;
- (j) grounding for the cage consistent with COEI.

1.11.3 Modifications to the standard configuration set forth in Section 1.11.2 can be made on an individual case basis. If modifications are agreed upon and made by the Parties, GTE will work with WinStar to implement such additional modifications as may be necessary to ensure that WinStar's collocated space is protected from unauthorized access.

1.11.4 At such time as construction of WinStar's collocation space is approximately 50 percent completed, GTE will give WinStar notification, and such notification shall include scheduled completion and turnover dates.

1.11.5 Upon completion of construction of collocated space, GTE will conduct a walk through of the collocated space with WinStar. Should WinStar note any deviations from the plan agreed upon by GTE and WinStar at the customer meeting, and if such deviations were not requested by WinStar or not required by law, GTE shall correct such deviations at its own expense within 5 Business Days.

1.12 Connection Equipment. WinStar may provision equipment for the connection of WinStar termination equipment to GTE equipment using either of the following methods:

1.12.1 WinStar may extend an electrical or optical cable from the terminal within WinStar's collocation cage and terminate that cable at GTE's network.

1.12.2 WinStar may install a patch panel within its collocation cage and then hand the cabling to GTE to extend to and have GTE terminate that cable at GTE's network.

1.13 Access to WinStar's Collocation Space. The terms and conditions of access to WinStar's collocation space shall be as set forth in applicable GTE state and federal EIS tariffs. Additionally, GTE agrees that the following terms and conditions shall apply to access:

1.13.1 GTE shall implement adequate measures to control access to collocation cages.

1.13.2 Collocation space shall comply with all applicable fire and safety codes.

- 1.13.3 Doors with removable hinges or inadequate strength shall be monitored by an alarm connected to a manned site. All other alarms monitoring WinStar's collocation space provided by GTE shall also be connected to a manned site. WinStar may, at its option, provide its own intrusion alarms for its collocated space.
- 1.13.4 GTE shall control janitorial access to collocation cages, and restrict such access to approved and certified employees, agents or contractors.
- 1.13.5 GTE shall establish procedures for access to collocation cages by GTE and non-GTE emergency personnel, and shall not allow access by security guards unless such access comports with this section and is otherwise allowed under applicable GTE state and federal EIS tariffs.
- 1.13.6 GTE shall retain a master key to WinStar's collocation space for use only in event of emergency as detailed in applicable GTE state and federal tariffs. At WinStar's option, the Parties shall review key control procedures no more frequently than once in any twelve month period. At any time, WinStar may elect to change keys if it suspects key control has been lost, provided, however, that GTE will be provided with a master key in accord with this section.
- 1.13.7 Not more frequently than once a year, WinStar may audit the security and access procedures and equipment applicable to its collocated space and the central office housing the collocation space. Access by personnel necessary to conduct such an audit shall be limited as set forth in applicable GTE state and federal EIS tariffs. Should WinStar identify deficiencies in security and access procedures and equipment as a result of such audit, the cost, terms and conditions of the correction of such deficiencies shall be negotiated in good faith between the parties.
- 1.14 Virtual Collocation. Subject to this Article, GTE will provide virtual collocation for purposes of interconnection or access to unbundled network elements pursuant to the terms and conditions in the applicable GTE federal and state EIS tariffs. In addition, GTE agrees that the terms and conditions set forth in this Article shall apply to virtual collocation provided to WinStar.
- 1.15 Conversion from Physical to Virtual. Unless it is not practical for technical reasons or because of space limitations, WinStar may convert a physical collocation arrangement to a virtual collocation arrangement. WinStar's request to do so shall be treated as a new virtual collocation request and WinStar shall pay GTE at the applicable tariff rates for construction and rearrangement of WinStar's equipment as well as all applicable tariffed virtual collocation recurring charges. If WinStar elects to change to a virtual collocation arrangement pursuant to this section, GTE will not refund previous payments for physical collocation received from WinStar.

- 1.16 Vendors. Choice of vendors for equipment used for virtual collocation shall be under the terms and conditions set forth in the applicable GTE federal and state EIS tariff. Upon request by WinStar, GTE shall provide a list of locally qualified vendors approved for the type of equipment to be collocated.
- 1.17 Inspection. Upon provision of virtual collocation by GTE, the Parties shall agree on a mutually acceptable schedule whereby WinStar may inspect the equipment in its virtual collocation space.

## XVII. GENERAL PROVISIONS

1. Scope of General Provisions. Except as may otherwise be set forth in a particular Article or Appendix of this Agreement, in which case the provisions of such Article or Appendix shall control, these General Provisions apply to all Articles and Appendices of this Agreement.
2. Term and Termination.
  - 2.1 WinStar and GTE agree to provide service to each other on the terms defined in this Agreement until superseded by amended or additional mutually-agreeable arrangements approved by the Commission, whichever occurs first. The term of this Agreement shall be two (2) years from the effective date of this Agreement and shall continue in effect for consecutive one (1) year terms until either Party gives the other Party at least ninety (90) days' written notice of termination, which termination shall be effective at the end of the then-current term. In the event that the agreement terminates, the terms of the agreement shall nevertheless continue in effect after either party exercises its right to terminate as provided above, but only while the parties are in good faith actively negotiating/arbitrating a replacement agreement and then only until a replacement agreement is effective or six (6) month, whichever is earlier. Good-faith negotiations on such a new agreement shall commence no later than forty-five (45) days prior to the expiration of this Agreement. By mutual agreement, WinStar and GTE may amend this Agreement to extend the term of this Agreement. Also by mutual agreement, GTE and WinStar may jointly petition the appropriate regulatory bodies for permission to have this Agreement supersede any future standardized agreements or rules such regulators might adopt or approve.
  - 2.2 Post-Termination Arrangements. Except in the case of termination as a result of either Party's default or a termination upon sale, for service arrangements made available under this Agreement and existing at the time of termination, those arrangements may continue without interruption (a) under a new agreement voluntarily executed by the Parties; (b) standard terms and conditions approved and made generally effective by the Commission, if any; (c) tariff terms and conditions made generally available to all CLECs; or (d) any rights under Section 252(i) of the Act.
  - 2.3 Termination Upon Default. Either Party may terminate this Agreement in whole or in part in the event of a default by the other Party; *provided however*, that the non-defaulting Party notifies the defaulting party in writing of the alleged default and that the defaulting Party does not cure the alleged default within sixty (60) calendar days of receipt of written notice thereof. Default is defined to include:
    - 2.3.1 A Party's insolvency or the initiation of bankruptcy or receivership proceedings by or against the Party; or

- 2.3.2 A Party's refusal or failure in any material respect properly to perform its obligations under this Agreement, or the violation any of the material terms or conditions of this Agreement.
- 2.4 Termination Upon Sale. Notwithstanding anything to the contrary contained herein, a Party may terminate this Agreement as to a specific operating area or portion thereof of such Party, if such Party sells or otherwise similarly divests itself of such asset(s). The Party shall provide the other Party with at least ninety (90) calendar days' prior written notice of such termination, which shall be effective on the date specified in the notice. Notwithstanding termination of this Agreement as to a specific operating area, this Agreement shall remain in full force and effect in the remaining operating areas.
- 2.5 Liability upon Termination. Termination of this Agreement, or any part hereof, for any cause shall not release either Party from any liability which at the time of termination had already accrued to the other Party or which thereafter accrues in any respect to any act or omission occurring prior to the termination or from an obligation which is expressly stated in this Agreement to survive termination.
3. Amendments. Any amendment, modification, or supplement to this Agreement must be in writing and signed by an authorized representative of each Party. The term "this Agreement" shall include future amendments, modifications, and supplements.
4. Assignment. Any assignment by either Party of any right, obligation, or duty, in whole or in part, or of any interest, without the written consent of the other Party shall be void, except that either Party may assign all of its rights, and delegate its obligations, liabilities and duties under this Agreement, either in whole or in part, to any entity that is, or that was immediately preceding such assignment, a Subsidiary or Affiliate of that Party without consent, but with written notification. The effectiveness of an assignment shall be conditioned upon the assignee's written assumption of the rights, obligations, and duties of the assigning Party.
5. Authority. Each person whose signature appears on this Agreement represents and warrants that he or she has authority to bind the Party on whose behalf he or she has executed this Agreement.
6. Responsibility for Payment. All charges for Services provided under this Agreement will be billed to WinStar, including all applicable taxes and surcharges. In addition, the End User Common Line (EUCL) Charge from GTOC Tariff FCC No. 1 is applicable to Resold Services. WinStar is responsible for payment of charges billed regardless of any billing arrangements or situation between WinStar and its end user customer.
7. Billing and Payment. Except as provided elsewhere in this Agreement and where applicable, in conformance with MECAB and MECOD guidelines, WinStar and GTE agree to exchange all information to accurately, reliably, and properly bill for features, functions and services rendered under this Agreement.

- 7.1 Dispute. If one Party disputes a billing statement issued by the other Party, the billed Party shall notify Provider in writing regarding the nature and the basis of the dispute within sixty (60) calendar days of the statement date or the dispute shall be waived. The Parties shall diligently work toward resolution of all billing issues.
- 7.2 Late Payment Charge. If any undisputed amount due on the billing statement is not received by Provider on the payment due date, Provider may charge, and Customer agrees to pay, at Provider's option, interest on the past due balance at a rate equal to the lesser of the interest rates set forth in the applicable GTE/Contel state access tariffs or the GTOC/GSTC FCC No. 1 tariff, one and one-half percent (1½%) per month or the maximum nonusurious rate of interest under applicable law. Late payment charges shall be included on the next statement.
- 7.3 Due Date. Payment is due 30 calendar days from the bill date or 20 calendar days from receipt of bill whichever is later.
- 7.4 Audits. Either Party may conduct an audit of the other Party's books and records pertaining to the Services provided under this Agreement, no more frequently than once per twelve (12) month period, to evaluate the other Party's accuracy of billing, data and invoicing in accordance with this Agreement. Any audit shall be performed as follows: (i) following at least thirty (30) Business Days' prior written notice to the audited Party; (ii) subject to the reasonable scheduling requirements and limitations of the audited Party; (iii) at the auditing Party's sole cost and expense; (iv) of a reasonable scope and duration; (v) in a manner so as not to interfere with the audited Party's business operations; and (vi) in compliance with the audited Party's security rules.
8. Binding Effect. This Agreement shall be binding on and inure to the benefit of the respective successors and permitted assigns of the Parties.
9. Compliance with Laws and Regulations. Each Party shall comply with all federal, state, and local statutes, regulations, rules, ordinances, judicial decisions, and administrative rulings applicable to its performance under this Agreement.
10. Confidential Information.
- 10.1 Identification. Either Party may disclose to the other proprietary or confidential customer, technical, or business information in written, graphic, oral or other tangible or intangible forms ("Confidential Information"). In order for information to be considered Confidential Information under this Agreement, it must be marked "Confidential" or "Proprietary," or bear a marking of similar import. Orally or visually disclosed information shall be deemed Confidential Information only if contemporaneously identified as such and reduced to writing and delivered to the other Party with a statement or marking of confidentiality within thirty (30) calendar days after oral or visual disclosure.

Notwithstanding the foregoing, all orders for Services or network elements placed by WinStar pursuant to this Agreement, and information that would constitute customer proprietary network information of WinStar end user customers pursuant to the Act and the rules and regulations of the FCC, as well as recorded usage information with respect to WinStar end users, whether disclosed by WinStar to GTE or otherwise acquired by GTE in the course of its performance under this Agreement, and where GTE is the NANP Number Plan Administrator, WinStar information submitted to GTE in connection with such responsibilities shall be deemed Confidential Information of WinStar for all purposes under this Agreement whether or not specifically marked or designated as confidential or proprietary.

10.2 **Handling.** In order to protect such Confidential Information from improper disclosure, each Party agrees:

10.2.1 That all Confidential Information shall be and shall remain the exclusive property of the source;

10.2.2 To limit access to such Confidential Information to authorized employees who have a need to know the Confidential Information for performance of this Agreement;

10.2.3 To keep such Confidential Information confidential and to use the same level of care to prevent disclosure or unauthorized use of the received Confidential Information as it exercises in protecting its own Confidential Information of a similar nature;

10.2.4 Not to copy, publish, or disclose such Confidential Information to others or authorize anyone else to copy, publish, or disclose such Confidential Information to others without the prior written approval of the source;

10.2.5 To return promptly any copies of such Confidential Information to the source at its request; and

10.2.6 To use such Confidential Information only for purposes of fulfilling work or services performed hereunder and for other purposes only upon such terms as may be agreed upon between the Parties in writing.

10.3 **Exceptions.** These obligations shall not apply to any Confidential Information that was legally in the recipient's possession prior to receipt from the source, was received in good faith from a third party not subject to a confidential obligation to the source, now is or later becomes publicly known through no breach of confidential obligation by the recipient, was developed by the recipient without the developing persons having access to any of the Confidential Information received in confidence from the source, or that is required to be disclosed pursuant to subpoena or other process issued by a court or administrative agency having appropriate jurisdiction, provided, however, that the recipient shall give prior notice to the source and shall reasonably cooperate if the source deems it necessary to seek protective arrangements.

- 10.4 Survival. The obligation of confidentiality and use with respect to Confidential Information disclosed by one Party to the other shall survive any termination of this Agreement for a period of three (3) years from the date of the initial disclosure of the Confidential Information.
11. Consent. Where consent, approval, or mutual agreement is required of a Party, it shall not be unreasonably withheld or delayed.
12. Cooperation on Fraud Minimization. WinStar assumes responsibility for all fraud associated with its end user customers and accounts. GTE shall have no responsibility for, nor is it required to investigate or make adjustments to WinStar's account in cases of fraud. The Parties agree that they shall cooperate with one another to resolve cases of fraud. The Parties' fraud minimization procedures are to be cost effective and implemented so as not to unduly burden or harm one Party as compared to the other.
13. Dispute Resolution.
- 13.1 Alternative to Litigation. Except as provided under Section 252 of the Act with respect to the approval of this Agreement by the Commission, the Parties desire to resolve disputes arising out of or relating to this Agreement without litigation. Accordingly, except for action seeking a temporary restraining order or an injunction related to the purposes of this Agreement, or suit to compel compliance with this dispute resolution process, the Parties agree to use the following alternative dispute resolution procedures as their sole remedy with respect to any controversy or claim arising out of or relating to this Agreement or its breach.
- 13.2 Negotiations. At the written request of a Party, each Party will appoint a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute arising out of or relating to this Agreement. The location, format, frequency, duration, and conclusion of these discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery, and shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise discoverable, be discovered or otherwise admissible, be admitted in evidence, in the arbitration or lawsuit.
- 13.3 Arbitration. If the negotiations do not resolve the dispute within sixty (60) Business Days of the initial written request, the dispute shall be submitted to binding arbitration by a single arbitrator pursuant to the Commercial Arbitration Rules of the American Arbitration Association except that the Parties may select an arbitrator outside American Arbitration Association rules upon mutual agreement. A Party may demand such arbitration in accordance with the

procedures set out in those rules. Discovery shall be controlled by the arbitrator and shall be permitted to the extent set out in this section. Each Party may submit in writing to a Party, and that Party shall so respond to, a maximum of any combination of thirty-five (35) (none of which may have subparts) of the following: interrogatories, demands to produce documents, or requests for admission. Each Party is also entitled to take the oral deposition of one individual of another Party. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) Business Days of the demand for arbitration. The arbitration shall be held in a mutually agreeable city. The arbitrator shall control the scheduling so as to process the matter expeditiously. The Parties may submit written briefs. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) Business Days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

- 13.4 Expedited Arbitration Procedures. If the issue to be resolved through the negotiations referenced in Section 13 directly and materially affects service to either Party's end user customers, then the period of resolution of the dispute through negotiations before the dispute is to be submitted to binding arbitration shall be five (5) Business Days. Once such a service affecting dispute is submitted to arbitration, the arbitration shall be conducted pursuant to the expedited procedures rules of the Commercial Arbitration Rules of the American Arbitration Association (i.e., rules 53 through 57).
- 13.5 Costs. Each Party shall bear its own costs of these procedures. A Party seeking discovery shall reimburse the responding Party the costs of production of documents (including search time and reproduction costs). The Parties shall equally split the fees of the arbitration and the arbitrator.
- 13.6 Continuous Service. The Parties shall continue providing services to each other during the pendency of any dispute resolution procedure, and the Parties shall continue to perform their obligations in accordance with this Agreement.
- 14. Entire Agreement. This Agreement constitutes the entire agreement of the Parties pertaining to the subject matter of this Agreement and supersedes all prior agreements, negotiations, proposals, and representations, whether written or oral, and all contemporaneous oral agreements, negotiations, proposals, and representations concerning such subject matter. No representations, understandings, agreements, or warranties, expressed or implied, have been made or relied upon in the making of this Agreement other than those specifically set forth herein.
- 15. Expenses. Except as specifically set out in this Agreement, each Party shall be solely responsible for its own expenses involved in all activities related to the subject of this Agreement.

16. Force Majeure. In the event performance of this Agreement, or any obligation hereunder, is either directly or indirectly prevented, restricted, or interfered with by reason of fire, flood, earthquake or like acts of God, wars, revolution, civil commotion, explosion, acts of public enemy, embargo, acts of the government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing, or boycotts, unavailability of equipment from vendor, changes requested by Customer, or any other circumstances beyond the reasonable control and without the fault or negligence of the Party affected, the Party affected, upon giving prompt notice to the other party, shall be excused from such performance on a day-to-day basis to the extent of such prevention, restriction, or interference (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis until the delay, restriction or interference has ceased); *provided however*, that the Party so affected shall use diligent efforts to avoid or remove such causes of nonperformance and both Parties shall proceed whenever such causes are removed or cease.
17. Good Faith Performance. In the performance of their obligations under this Agreement, the Parties shall act in good faith. In situations in which notice, consent, approval or similar action by a Party is permitted or required by any provision of this Agreement, such action shall not be unreasonably delayed, withheld or conditioned.
18. Governing Law. This Agreement shall be governed by and construed in accordance with the domestic laws of the state where the Services are provided or the facilities reside and shall be subject to the exclusive jurisdiction of the courts therein.
19. Headings. The headings in this Agreement are inserted for convenience and identification only and shall not be considered in the interpretation of this Agreement.
20. Liability and Indemnity.
  - 20.1 Indemnification. Each Party agrees to release, indemnify, defend, and hold harmless the other Party from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, whether suffered, made, instituted, or asserted by any other party or person, for invasion of privacy, personal injury to or death of any person or persons, or for losses, damages, or destruction of property, whether or not owned by others, proximately caused by the indemnifying Party's negligence or willful misconduct, regardless of form of action. The indemnified Party agrees to notify the other Party promptly, in writing, of any written claims, lawsuits, or demands for which it is claimed that the indemnifying Party is responsible under this Section and to cooperate in every reasonable way to facilitate defense or settlement of claims. The indemnifying Party shall have complete control over defense of the case and over the terms of any proposed settlement or compromise thereof. The indemnifying Party shall not be liable under this Section for settlement by the indemnified Party or any claim, lawsuit, or demand, if the

indemnifying Party has not approved the settlement in advance, unless the indemnifying Party has had the defense of the claim, lawsuit, or demand tendered to it in writing and has failed to assume such defense. In the event of such failure to assume defense, the indemnifying Party shall be liable for any reasonable settlement made by the indemnified Party without approval of the indemnifying Party.

- 20.2 End User and Content-Related Claims. Each Party agrees to release, indemnify, defend, and hold harmless the other Party, its affiliates, and any third-party provider or operator of facilities involved in the provision of Services or Facilities under this Agreement (collectively, the "Indemnified Party") from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, suffered, made, instituted, or asserted by either Party's end users against an Indemnified Party arising from Services or Facilities. Each Party further agrees to release, indemnify, defend, and hold harmless the Indemnified Party from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, suffered, made, instituted, or asserted by any third party against an Indemnified Party arising from or in any way related to actual or alleged defamation, libel, slander, interference with or misappropriation of proprietary or creative right, or any other injury to any person or property arising out of content transmitted by the Indemnified Party or such Party's end users, or any other act or omission of the Indemnified Party or such Party's end users.
- 20.3 DISCLAIMER. EXCEPT AS SPECIFICALLY PROVIDED TO THE CONTRARY IN THIS AGREEMENT, PROVIDER MAKES NO REPRESENTATIONS OR WARRANTIES TO CUSTOMER CONCERNING THE SPECIFIC QUALITY OF ANY SERVICES, UNBUNDLED NETWORK ELEMENTS OR FACILITIES PROVIDED UNDER THIS AGREEMENT. PROVIDER DISCLAIMS, WITHOUT LIMITATION, ANY WARRANTY OR GUARANTEE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARISING FROM COURSE OF PERFORMANCE, COURSE OF DEALING, OR FROM USAGES OF TRADE.
- 20.4 Limitation of Liability. Provider's liability, whether in contract, tort or otherwise, shall be limited to direct damages, which shall not exceed the pro rata portion of the monthly charges for the Services, Unbundled Network Elements or facilities for the time period during which the Services, Unbundled Network Elements or facilities provided pursuant to this Agreement are inoperative, not to exceed in total Provider's monthly charge to Customer. Under no circumstance shall Provider be responsible or liable for indirect, incidental, or consequential damages, including, but not limited to, economic loss or lost business or profits, damages arising from the use or performance of equipment or software, or the loss of use of software or equipment, or accessories attached thereto, delay, error, or loss of data. In connection with this limitation of liability, the Parties recognize that Provider may, from time to time, provide advice, make recommendations, or supply other analysis related to the Services, unbundled network elements or

facilities described in this Agreement, and, while Provider shall use diligent efforts in this regard, Customer acknowledges and agrees that this limitation of liability shall apply to provision of such advice, recommendations, and analysis.

- 20.5 Intellectual Property. Neither Party shall have any obligation to defend, indemnify or hold harmless, or acquire any license or right for the benefit of, or owe any other obligation or have any liability to, the other based on or arising from any claim, demand, or proceeding by any third party alleging or asserting that the use of any circuit, apparatus, or system, or the use of any software, or the performance of any service or method, or the provision or use of any facilities by either Party under this Agreement constitutes direct or contributory infringement, or misuse or misappropriation of any patent, copyright, trademark, trade secret, or any other proprietary or intellectual property right of any third party.
21. Multiple Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which shall together constitute but one and the same document.
22. No Offer. This Agreement will be effective only upon execution and delivery by both Parties and approval by the Commission in accordance with Section 252 of the Act.
23. No Third Party Beneficiaries. Except as may be specifically set forth in this Agreement, this Agreement does not provide and shall not be construed to provide third parties with any remedy, claim, liability, reimbursement, cause of action, or other right or privilege.
24. Notices. Any notice to a Party required or permitted under this Agreement shall be in writing and shall be deemed to have been received on the date of service if served personally, on the date receipt is acknowledged in writing by the recipient if delivered by regular U.S. mail, or on the date stated on the receipt if delivered by certified or registered mail or by a courier service that obtains a written receipt. Upon prior immediate oral agreement of the parties' designated recipients identified below, notice may also be provided by facsimile, internet or electronic messaging system, which shall be effective if sent before 5:00 p.m. on that day, or if sent after 5:00 p.m. it will be effective on the next Business Day following the date sent. Any notice shall be delivered using one of the alternatives mentioned in this section and shall be directed to the applicable address indicated below or such address as the Party to be notified has designated by giving notice in compliance with this section:

25. Protection.

25.1 Impairment of Service. The characteristics and methods of operation of any circuits, facilities or equipment of either Party connected with the services, facilities or equipment of the other Party pursuant to this Agreement shall not interfere with or impair service over any facilities of the other Party, its affiliated companies, or its connecting and concurring carriers involved in its services, cause damage to their plant, violate any applicable law or regulation regarding the invasion of privacy of any communications carried over the Party's facilities or create hazards to the employees of either Party or to the public (each hereinafter referred to as an "Impairment of Service").

25.2 Resolution. If either Party causes an Impairment in Service, the Party whose network or service is being impaired (the "Impaired Party") shall promptly notify the Party causing the Impairment of Service (the "Impairing Party") of the nature and location of the problem and that, unless promptly rectified, a temporary discontinuance of the use of any circuit, facility or equipment may be required. The Impairing Party and the Impaired Party agree to work together to attempt to promptly resolve the Impairment of Service. If the Impairing Party is unable to promptly remedy the Impairment of Service, then the Impaired Party may at its option temporarily discontinue the use of the affected circuit, facility or equipment.

26. Publicity. Any news release, public announcement, advertising, or any form of publicity pertaining to this Agreement, provision of Services or Facilities pursuant to it, or association of the Parties with respect to provision of the services described in this Agreement shall be subject to prior written approval of both GTE

and WinStar.

27. Regulatory Agency Control. This Agreement shall at all times be subject to changes, modifications, orders, and rulings by the Federal Communications Commission and/or the applicable state utility regulatory commission to the extent the substance of this Agreement is or becomes subject to the jurisdiction of such agency.
28. Changes in Legal Requirements. GTE and WinStar further agree that the terms and conditions of this Agreement were composed in order to effectuate the legal requirements in effect at the time the Agreement was produced. Any modifications to those requirements will be deemed to automatically supersede any terms and conditions of this Agreement.
29. Effective Date. If this Agreement or changes or modifications thereto are subject to approval of a regulatory agency, the "effective date" of this Agreement for such purposes will be ten (10) Business Days after such approval or in the event this Agreement is developed in whole or in part through arbitration, sixty (60) Business Days after such approval. Such date (i.e., ten (10) or, if arbitrated, sixty (60) Business Days after the approval) shall become the "effective date" of this Agreement for all purposes.
30. Regulatory Matters. Each Party shall be responsible for obtaining and keeping in effect all their own FCC, state regulatory commission, franchise authority and other regulatory approvals that may be required in connection with the performance of its obligations under this Agreement. WinStar shall reasonably cooperate with GTE in obtaining and maintaining any required approvals for which GTE is responsible, and GTE shall reasonably cooperate with WinStar in obtaining and maintaining any required approvals for which WinStar is responsible.
31. Rule of Construction. No rule of construction requiring interpretation against the drafting party hereof shall apply in the interpretation of this Agreement.
32. Section References. Except as otherwise specified, references within an Article of this Agreement to a Section refer to Sections within that same Article.
33. Severability. If any provision of this Agreement is held by a court or regulatory agency of competent jurisdiction to be unenforceable, the rest of the Agreement shall remain in full force and effect and shall not be affected unless removal of that provision results, in the opinion of either Party, in a material change to this Agreement. If a material change as described in this paragraph occurs as a result of action by a court or regulatory agency, the Parties shall negotiate in good faith for replacement language. If replacement language cannot be agreed upon within a reasonable period, either Party may terminate this Agreement without penalty or liability for such termination upon written notice to the other Party.
34. Subcontractors. Provider may enter into subcontracts with third parties or

affiliates for the performance of any of Provider's duties or obligations under this Agreement.

35. Subsequent Law. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, or regulations that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, or regulation, the Parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, or regulation.

36. Taxes. Any state or local excise, sales, or use taxes (excluding any taxes levied on income) resulting from the performance of this Agreement shall be borne by the Party upon which the obligation for payment is imposed under applicable law, even if the obligation to collect and remit such taxes is placed upon the other Party. The collecting Party shall charge and collect from the obligated Party, and the obligated Party agrees to pay to the collecting Party, all applicable taxes, except to the extent that the obligated Party notifies the collecting Party and provides to the collecting Party appropriate documentation that qualifies the obligated Party for a full or partial exemption. Any such taxes shall be shown as separate items on applicable billing documents between the Parties. The obligated Party may contest the same in good faith, at its own expense, and shall be entitled to the benefit of any refund or recovery, provided that such Party shall not permit any lien to exist on any asset of the other Party by reason of the contest. The collecting Party shall cooperate in any such contest by the other Party.

36.1 Tax - A charge which is statutorily imposed by the state or local jurisdiction and is either (a) imposed on the seller with the seller having the right or responsibility to pass the charge(s) on to the purchaser and the seller is responsible for remitting the charge(s) to the state or local jurisdiction or (b) imposed on the purchaser with the seller having an obligation to collect the charge(s) from the purchaser and remit the charge(s) to the state or local jurisdiction.

Taxes shall include but not be limited to: federal excise tax, state/local sales and use tax, state/local utility user tax, state/local telecommunication excise tax, state/local gross receipts tax, and local school taxes. Taxes shall not include income, income-like, gross receipts on the revenue of a provider, or property taxes. Taxes shall not include payroll withholding taxes unless specifically required by statute or ordinance.

36.2 Fees/Regulatory Surcharges - A charge imposed by a regulatory authority, other agency, or resulting from a contractual obligation, in which the seller is responsible or required to collect the fee/surcharge from the purchaser and the seller is responsible for remitting the charge to the regulatory authority, other agency, or contracting party.

Fees/Regulatory Surcharges shall include but not be limited to E911/911, E311/311, franchise fees, Lifeline, hearing impaired, and Commission surcharges.

37. Trademarks and Trade Names. Except as specifically set out in this Agreement, nothing in this Agreement shall grant, suggest, or imply any authority for one Party to use the name, trademarks, service marks, or trade names of the other for any purpose whatsoever.
38. Waiver. The failure of either Party to insist upon the performance of any provision of this Agreement, or to exercise any right or privilege granted to it under this Agreement, shall not be construed as a waiver of such provision or any provisions of this Agreement, and the same shall continue in full force and effect.
39. Environmental Responsibility.
- 39.1 GTE and WinStar agree to comply with applicable federal, state and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (EPA) regulations issued under the Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation and Liability Act, Superfund Amendments and Reauthorization Act and the Toxic Substances Control Act and OSHA regulations issued under the Occupational Safety and Health Act of 1970. Each Party has the responsibility to notify the other if compliance inspections occur and/or citations are issued that impact any aspect of this Agreement such as occurring on a LEC facility or involving WinStar potential employee exposure.
- 39.2 GTE and WinStar shall provide notice of known and recognized physical hazards or hazardous chemicals that must include providing Material Safety Data Sheets (MSDSs) for materials existing on site or brought on site to the facility. Each Party is required to provide specific notice for potential imminent danger conditions which could include, but is not limited to, a defective utility pole or significant petroleum contamination in a manhole.
- 39.3 GTE will make available additional environmental control or safety procedures for WinStar to review and follow when working at a GTE facility. Providing these procedures, beyond government regulatory compliance requirements, is the decision of GTE. These practices/procedures will represent the regular work practices required to be followed by the employees and contractors of GTE for safety and environmental protection.
- 39.4 Any materials brought, used or remaining at the facility by WinStar are owned by WinStar. WinStar will indemnify GTE for these materials. No substantial new safety or environmental hazards can be created or new hazardous materials can be used at a GTE facility. WinStar must demonstrate adequate emergency response capabilities for its materials used or remaining at the GTE facility.
- 39.5 When third party contamination is discovered at a GTE facility, the Party uncovering the condition must notify the proper safety or environmental authority, if required under applicable laws or regulations. WinStar must also notify GTE of third party contamination it discovers at GTE facilities. The cost causer (requiring access) will become the generator, as owner or operator, of any waste

materials such as petroleum contaminated water, sewage or manhole sediment.

- 39.6 WinStar should obtain and use its own environmental permits, if necessary. If GTE's permit or EPA identification number must be used, WinStar must comply with all of GTE's environmental processes including environmental "best management practices (BMP)" and/or selection of disposition vendors and disposal sites.
- 39.7 WinStar visitors must comply with GTE security, fire safety, safety, environmental and building practices/codes including equivalent employee training when working in GTE facilities.
- 39.8 GTE and WinStar shall coordinate plans or information required to be submitted to government agencies, such as emergency response plans and community reporting. If fees are associated with filing, GTE and WinStar must develop a cost sharing procedure.
- 39.9 GTE and WinStar shall indemnify, defend and hold harmless the other party from and against any claims (including, without limitation, third party claims for personal injury or real or personal property damage), judgments, damages (including direct and indirect damage, and punitive damages), penalties, fines, forfeitures, cost, liabilities, interest and losses or in connection with the violation or alleged violation of any applicable requirement or the presence or alleged presence of contamination arising out of the indemnifying party's acts or omissions concerning its operations at the facility.
- 39.10 Activities impacting safety or the environment of a Right of Way must be harmonized with the specific agreement and the relationship between GTE and the private land owner. This could include limitations on equipment access due to environmental conditions (e.g., wetland area with equipment restrictions).
40. TBD Prices. Numerous provisions in this Agreement and its Attachments refer to pricing principles. If a provision references prices in an Attachment and there are no corresponding prices in such Attachment, such price shall be considered "To Be Determined" (TBD). With respect to all TBD prices, prior to WinStar ordering any such TBD item, the Parties shall meet and confer to establish a price. If the Parties are unable to reach agreement on a price for such item, an interim price shall be set for such item that is equal to the price for the nearest analogous item for which a price has been established (for example, if there is not an established price for a non recurring charge (NRC) for a specific network element, the Parties would use the NRC for the most analogous retail service for which there is an established price). Any interim prices so set shall be subject to modification by any subsequent decision of the Commission. If an interim price is different from the rate subsequently established by the Commission, any underpayment shall be paid by WinStar to GTE, and any overpayment shall be refunded by GTE to WinStar, within 45 Business Days after the establishment of the price by the Commission.

41. Amendment of Certain Rates, Terms and Conditions. The rates, terms and conditions in this Agreement that are specified in Appendix 44B (the "AT&T Terms") were taken from the GTE/AT&T Interconnection, Resale and Unbundling Agreement (the AT&T Agreement) approved by the Commission. The rates, terms and conditions not included in this Agreement but referenced in Appendix 44A (the "GTE Terms") were excluded from the AT&T Agreement by the Commission in the arbitration case. GTE and WinStar agree that if the "AT&T Terms" are deemed to be unlawful, or are stayed, enjoined or otherwise modified, in whole or in part, by a court or commission of competent jurisdiction, then this Agreement shall be deemed to have been amended accordingly, by modification of the "AT&T Terms" or, as appropriate, the substitution of "GTE Terms" for all stayed and enjoined "AT&T Terms", and such amendments shall be effective retroactive to the Effective Date of this Agreement.

GTE and WinStar further agree that the terms and conditions of this Agreement reflect certain requirements of the FCC's First Report and Order in CC Docket No. 96-98. The terms and conditions of this Agreement shall be subject to any and all actions by any court or other governmental authority that invalidate, stay, vacate or otherwise modify the FCC's First Report and Order, in whole or in part ("action"). To the extent warranted by any such action, the parties agree that this Agreement shall be deemed to have been modified accordingly as in the first paragraph of this Section 41. The parties agree to immediately apply any effected terms and conditions, including any in other sections and articles of this Agreement, consistent with such action, and within a reasonable time incorporate such modified terms and conditions in writing into the Agreement. If the AT&T terms are affected by such action and GTE determines they cannot be consistently applied therewith, the GTE terms shall apply. WinStar acknowledges that GTE may seek to enforce such action before a commission or court of competent jurisdiction. GTE does not waive any position regarding the illegality or inappropriateness of the FCC's First Report and Order.

The rates, terms and conditions (including rates which may be applicable under true-up) specified in both the "GTE Terms" and the "AT&T Terms" are further subject to amendment, retroactive to the Effective Date of the Agreement, to provide for charges or rate adjustments resulting from future Commission or other proceedings, including but not limited to any generic proceeding to determine GTE's unrecovered costs (e.g., historic costs, contribution, undepreciated reserve deficiency, or similar unrecovered GTE costs (including GTE's end user surcharge)), the establishment of a competitively neutral universal service system, or any appeal or other litigation.

If the Commission (or any other commission or federal or state court) in reviewing this Agreement pursuant to applicable state and federal laws, including Section 252(e) of the Telecommunications Act of 1996, deletes or modifies in any way this Section 41, WinStar agrees that this entire Agreement is void and will not become effective, and WinStar agrees to withdraw this Agreement from consideration by the Commission (or any other commission or federal or state court).

If this Agreement is acceptable to WinStar and GTE, both parties shall sign in the space provided below. This Agreement shall not bind WinStar and GTE until executed by both parties.

APPENDIX B  
INTERCONNECTION, TELECOMMUNICATIONS SERVICES  
AND FACILITIES AGREEMENT

BETWEEN

GTE FLORIDA INCORPORATED

AND

WINSTAR WIRELESS OF FLORIDA, INCORPORATED

AMENDMENT NO. \_\_\_\_\_

**THIS AMENDMENT** (herein so called) is made effective as of \_\_\_\_\_, 199\_\_\_\_, by and between GTE Florida Incorporated ("GTE") and WinStar Wireless of Florida, Incorporated ("WinStar"). GTE and WinStar are sometimes referred to herein collectively as the "Parties" and individually as a "Party." Either GTE or WinStar may be referred to as "Provider" or "Customer" as the context requires.

**WHEREAS**, Provider is providing to Customer and Customer is purchasing from Provider those Services described in that certain Interconnection, Telecommunications Services and Facilities Agreement for the State of Florida by and between GTE and WinStar dated effective as of \_\_\_\_\_, 199\_\_\_\_ (the "Agreement"); and

**WHEREAS**, the Parties desire to amend the Agreement as provided in this Amendment.

**NOW, THEREFORE**, in consideration of the terms and conditions contained in this Amendment, the Parties agree as follows:

1.

2.           **Additional Services [if applicable]**

- a.           Provider agrees to provide to Customer and Customer agrees to purchase from Provider the following services under the terms and conditions set forth in the Agreement and within the service attachment listed below and attached to this Amendment:

Service Attachment \_\_\_\_\_ - \_\_\_\_\_

- b.           As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, \_\_\_\_\_ is made a part of the Services provided under the Agreement and Service Attachment \_\_\_\_\_ shall be deemed to be a Service Attachment to the Agreement.

- c. As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, Appendix A, Service Matrix, to the Agreement is hereby deleted and Appendix A, Service Matrix, to this Amendment is hereby inserted in lieu thereof to reflect the additional Services and related Service Locations.

3. **Service Locations [if applicable]**

- a. Provider agrees to provide to Customer and Customer agrees to purchase from Provider the following Services in the following locations:

Service Location (identified by tandem serving area)	IP (identified by CLLI code)	Services (identified by Service Attachment Number)
--	------------------------------------	--

---

- b. As of the effective date of this Amendment, the locations set forth in Section 3.a above shall be deemed Service Locations under the Agreement.
- c. As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, Appendix A, Service Matrix, to the Agreement is hereby deleted and Appendix A, Service Matrix, to this Amendment is hereby inserted in lieu thereof to reflect additional Service Locations.

4. **Interpretation**

All capitalized terms used but not defined herein shall have the meanings ascribed to such terms in the Agreement.

5. **Effect**

Except as modified herein, the Agreement shall remain in full force and effect.

6. **Authority**

Each person whose signature appears below represents and warrants that he or she has the authority to bind the Party on whose behalf he or she has executed this Amendment.

7. **Multiple Counterparts**

This Amendment may be executed in multiple counterparts, each of which shall be deemed an original, and all of which shall constitute but one and the same instrument.

8. **No Offer**

Submission of this Amendment for examination or signature does not constitute an offer by Provider for the provision of the products or services described herein. This Amendment will be effective only upon execution by both Provider and Customer.

**IN WITNESS WHEREOF**, the Parties have executed this Amendment on the date or dates written below effective as of the date first above written.

APPENDIX C  
RATES AND CHARGES FOR  
TRANSPORT AND TERMINATION OF TRAFFIC

General. The rates contained in this Appendix C are the rates as defined in Article VI and are subject to change resulting from future Commission or other proceedings, including but not limited to any generic proceeding to determine GTE's unrecovered costs (e.g., historic costs, contribution, undepreciated reserve deficiency, or similar unrecovered GTE costs (including GTE's interim Universal Service Support Surcharge)), the establishment of a competitively neutral universal service system, or any appeal or other litigation.

Each Party will bill the other Party as appropriate:

- A. The Local Interconnection rate element that applies to Local Traffic on a minute of use basis that each Party switches for termination purposes at its wire centers. The local interconnection rate is **\$0.0053073**.
- B. The Tandem Switching rate element that applies to tandem routed Local Traffic on a minute of use basis. The tandem switching rate is **\$0.0013681**.
- C. The Common Transport Facility rate element that applies to tandem routed Local Traffic on a per minute/per mile basis. The Common Transport Facility rate is **\$0.0000021**.
- D. The Common Transport Terminal element that applies to tandem routed Local Traffic on a per minute/per termination basis. The Common Transport Termination rate is **\$0.0001357**.

APPENDIX D  
RATES AND CHARGES FOR LOCAL NUMBER PORTABILITY USING RCF

General. The rates contained in this Appendix D are as defined in Article IX and are subject to change resulting from future Commission or other proceedings, including but not limited to any generic proceeding to determine GTE's unrecovered costs (e.g., historic costs, contribution, undepreciated reserve deficiency, or similar unrecovered GTE costs (including GTE's interim Universal Service Support Surcharge)), the establishment of a competitively neutral universal service system, or any appeal or other litigation.

In addition, as defined in Article VI, Section 2.2.3, the Party providing the ported number will pay the other Party the rate per line per month for each ported business line and the rate per line per month for each ported residential line for the sharing of Access Charges on calls to ported numbers.

Business Rate Per Line Per Month:	\$ 4.69
-----------------------------------	---------

Residential Rate Per Line Per Month:	\$ 2.54
--------------------------------------	---------

**Service Number Portability**

Remote Call Forwarding	\$ 5.10 line/month
------------------------	--------------------

Simultaneous Call Capability	\$ 3.10 path/month
------------------------------	--------------------

Non-recurring for Portability	\$10.50
-------------------------------	---------

APPENDIX E  
SERVICES AVAILABLE FOR RESALE

General. The rates contained in this Appendix E/matrix are based upon an avoided cost discount from GTE's retail rates to which this Appendix E/matrix is attached and are subject to change resulting from future Commission or other proceedings, including but not limited to any generic proceeding to determine GTE's unrecovered costs (e.g., historic costs, contribution, undepreciated reserve deficiency, or similar unrecovered GTE costs (including GTE's interim Universal Service Support Surcharge)), the establishment of a competitively neutral universal service system, or any appeal or other litigation.

The avoided cost discount is 15.3%.

**Non-Recurring Charges for Resale Services**

Initial Service Order, per order	\$41.50
Subsequent Service Order, per order	\$24.00
Installation, per line	\$23.75
Outside Facility Connection Charge, per order *	\$Tariffed

\*This charge will apply when field work is required for establishment of new resale service. The terms, conditions and rates that apply for this work are described in GTE's retail local service tariffs.

APPENDIX G  
SERVICE ORDERING, PROVISIONING, BILLING AND MAINTENANCE

1. Service Ordering, Service Provisioning, and Billing Systems Generally. The following describes generally the operations support systems that GTE will use and the related functions that are available for ordering, provisioning and billing for resold services, interconnection facilities and services and unbundled network elements. Except as specifically provided otherwise in this Agreement, service ordering, provisioning, billing and maintenance shall be governed by the GTE Guide. Before orders can be taken, WinStar will provide GTE with its Operating Company Number ("OCN") and Company Code ("CC") as follows:
  - (a) The ALEC must provide their OCN/CC (four-digit alpha-numeric assigned by NECA) on the ALEC Profile. The GTE Guide provides the necessary information for the ALEC to contact NECA to obtain the OCN/CC. There are no optional fields on the Profile.
  - (b) Before the Local Service Request ("LSR") and Directory Service Request ("DSR") order forms can be processed WinStar must provide the Company Code CC field when the Customer Carrier Name Abbreviation ("CCNA") is populated with CUS (Customer) and the customer has an industry assigned code, otherwise CC is an optional field.
- 1.1 Operations Support Systems for Trunk-Side Interconnection
  - 1.1.1 WinStar will be able to order trunk-side interconnection services and facilities from GTE through a direct electronic interface over the GTE Network Data Mover ("NDM") in a nondiscriminatory manner. Orders for trunk-side interconnection will be initiated by an Access Service Request ("ASR") sent electronically by WinStar over the NDM. ASRs for trunk-side interconnection will be entered electronically into GTE's Carrier Access Management System ("CAMS") to validate the request, identify any errors, and resolve any errors back to WinStar. CAMS is a family of GTE systems comprised primarily of EXACT/TUF, SOG/SOP, and CABS.
  - 1.1.2 The use of CAMS to support WinStar's requests for trunk-side interconnection will operate in the following manner: GTE will route the ASR through its data center to one of two WinStar Access Ordering Centers ("NAOC"). The ASR will be entered electronically into the EXACT/TUF system for validation and correction of errors. Errors will be referred back to WinStar. WinStar then will correct any errors that GTE has identified and resubmit the request to GTE electronically through a supplemental ASR, without penalty or charge (e.g., order modification charge) to WinStar. Similarly, errors committed by GTE subsequent to the receipt of a valid ASR from WinStar will be expeditiously identified and corrected by GTE

without the need for WinStar's submission of a supplemental ASR. GTE then will translate the ASR into a service order for provisioning and billing. In order to convert the ASR into a service order, GTE personnel must apply the necessary elements to provision the service and include the billable elements necessary for GTE to bill WinStar for the services provided. This application also requires a determination of the access tandem to end office relationships with the service requested.

1.1.3 At the next system level, translated service orders will be distributed electronically through the SOG/SOP systems to several destinations. The SOG/SOP system will begin the actual provisioning of the service for WinStar. Other GTE provisioning systems are CNAS and ACES. The GTE Database Administrative Group ("DBA") and the Special Services Control Center ("SSCC") will be the two most important destinations at this level. The DBA location will identify codes for the appropriate GTE switch in order to provide the functions required by the ASR. The SSCC will provide the engineering for the facilities over which the services will be handled. Information from these two groups (and others) then will be transmitted electronically to GTE's field service personnel (Customer Zone Technicians or "CZTs") who will establish the trunks and facilities, thus connecting the GTE facilities to a connecting company, if one is required, and to WinStar. GTE's CZTs also will contact WinStar directly to perform testing, and upon acceptance by WinStar, will make the necessary entries into the GTE system to complete the order. The completed orders then will pass to GTE's Carrier Access Billing System ("CABS") which will generate the bill to WinStar. The billing process under CABS requires coordination with several other systems.

1.1.4 Billing for transport and termination services cannot be accomplished without call records from GTE's central office switches. Records of usage will be generated at GTE's end office switches or the access tandems. Call usage records will be transmitted electronically from GTE's switches through GTE's Billing Intermediate Processor ("BIP"). This system will collect the call records, perform limited manipulations to the record and transfer them to a centralized data center where they will be processed through the Universal Measurement System ("UMS") to determine the validity and accuracy of the records. UMS also will sort the records and send them to the CABS billing system, from which GTE will produce a bill and send it to WinStar.

## 1.2 Operations Support Systems for Resold Services and Unbundled Elements

1.2.1 WinStar will also be able to order services for resale and unbundled network elements, as well as interim number portability, directly from GTE through an electronic interface. To initiate an order for these services or elements, WinStar will submit a Local Service Request ("LSR") from its data center to

GTE's Data Center using the same electronic NDM interface used for trunk-side interconnection. If no NDM interface exists or if WinStar chooses to establish a separate NDM interface, WinStar must request an NDM facility. For new entrants that elect not to interface electronically, GTE will accommodate submission of LSR orders by facsimile, E-mail, Internet or a dial NDM arrangement. An LSR is very similar to an ASR, except that it will be used exclusively for line-side interconnection requests. GTE will transfer LSRs to GTE's NOMC centralized service order processing center electronically.

- 1.2.2 Most LSRs will be used either to transfer an existing GTE customer to WinStar or to request service for a new customer who is not an existing GTE customer. Depending on the situation, different information will be required on the LSR. LSRs for a conversion of a GTE local customer to WinStar must include information relating to all existing, new and disconnected services for that customer, including the customer's name, type of service desired, location of service and features or options the customer desires. WinStar will be able to obtain this customer information after GTE has received the customer's written consent as specified in Article XV. For service to a new customer who is not an existing GTE customer, the LSR must contain the customer's name, service address, service type, services, options, features and ALEC data. If known, the LSR should include the telephone number and due date/desired due date.
- 1.2.3 While WinStar would have its own customer information and may have the SAG/GTE products on tape from GTE, WinStar would not have the due date or new telephone number for new customers since that information is contained in GTE's systems. Therefore, a process is required to provide this information to WinStar. GTE itself does not have uniform access to this information electronically. Until GTE and WinStar have agreed and established electronic interfaces, WinStar agrees that an 800 number is the method that will be used. The 800 telephone number will connect WinStar directly to GTE's NOMC service representatives. When WinStar receives a request for basic services from a new local service customer, WinStar will call GTE's NOMC through the 800 number, and, while the new customer is on hold, GTE will provide the due date for service and the new telephone number for that customer. At the same time, WinStar will give GTE the new customer's name, service address and type of requested service (i.e., R1, B1). GTE will enter that information into its SORCES or SOLAR service ordering systems to be held in suspense until WinStar sends the confirming LSR. WinStar will then return to its customer holding on the line and provide the due date and new telephone number.
- 1.2.4 After concluding the telephone call with the new customer, WinStar will complete a confirming LSR for the new service and send it electronically to GTE's data center for processing. Upon receipt, GTE will match the LSR

with the service order suspended in GTE's system, and if there is a match, GTE will process the LSR. After the LSR is processed, GTE will transmit confirmation electronically to WinStar through the NDM that the LSR has been processed, providing a record of the telephone number and due date. WinStar will be required to submit the confirming LSR by 12:00 p.m. each day local time, as defined by the location of the service address. If WinStar fails to submit the LSR in a timely manner, the suspended LSR will be considered in jeopardy, at which time GTE will assign a new due date upon receipt of the delayed LSR for such customer requests and notify WinStar of the change.

1.2.5 Number assignments and due date schedules for services other than single line service and hunt groups up to 12 lines will be assigned within approximately twenty-four (24) hours after GTE's receipt of the LSR using the standard Firm Order Confirmation ("FOC") report sent electronically to WinStar over the NDM, thereby providing a record of the newly established due date. An exception would be a multi-line hunt group for 12 lines or fewer. The other numbers then will be provided through the normal electronic confirmation process.

1.2.6 The processing of specifically requested telephone numbers (called "vanity numbers") is as follows. GTE will work with WinStar on a real time interface to process vanity numbers while WinStar's customer is still on the line. If a number solution can be established expeditiously, it will be done while the customer is still on the line. If extensive time will be required to find a solution, GTE service representatives will work with WinStar representatives off line as GTE would for its own customers. For all of this, the basic tariff guidelines for providing telephone numbers will be followed.

1.2.7 Once the order for line-side interconnection service is established, it is moved for provisioning to the next system level. Here, GTE will validate and process the LSR to establish an account for WinStar and, if GTE continues to provide some residual services to the customer, GTE will maintain a GTE account. In GTE's system, GTE's account is called the Residual Account and WinStar's account is referred to as the CLEC Account. If any engineering for the service is necessary, the account would be distributed to the SSCC. Otherwise, it will be distributed for facility assignment.

1.2.8 With the account established and any engineering and facility assignment complete, GTE then will transmit electronically a record to GTE's CZT field personnel if physical interconnection or similar activity is required. The CZTs will provision the service and then electronically confirm such provision in the SOLAR/SORCES system when completed. The accounts then will be transmitted to GTE's Customer Billing Services System ("CBSS"). GTE shall provide to WinStar a service completion report. Call

records for actual service provided to WinStar's customers on GTE facilities will be transmitted from GTE's switches through some usage rating systems (BIP, UMS), screened and eventually delivered to CBSS for the generation of bills.

- 1.2.9 CBSS is a different system than CABS, and it is the one that GTE will utilize to produce the required bills for resold services, unbundled elements and local number portability. CBSS will create a bill to WinStar for resold services and unbundled elements along with a summary bill master. Daily unrated records for intraLATA toll usage and local usage (incollect usage data will be provided on rated basis) on WinStar's accounts will be generated and transmitted electronically to WinStar.
- 1.2.10 On resold accounts, GTE will provide usage in EMR/EMI format per existing file exchange schedules. The usage billing will be in agreed upon level of detail for WinStar to issue a bill to its end users.
- 1.2.11 GTE will provide WinStar with detailed monthly billing information in a paper format until an agreed upon Electronic Data Interchange 811 electronic bill format is operational.
- 1.2.12 State or sub-state level billing will include up to ten (10) summary bill accounts.
- 1.2.13 GTE accepts WinStar's control reports and agrees to utilize industry standard return codes for unbillable messages. Transmission will occur via the NDM. Tape data will conform to Attachment "A" of the LRDTR. Data will be delivered Monday through Friday except for Holidays as agreed. Data packages will be tracked by invoice sequencing criteria. GTE contacts will be provided for sending/receiving usage files.
- 1.2.14 GTE will retain data backup for 45 Business Days. To the extent this retention is exclusively for WinStar, WinStar shall reimburse GTE for all expenses related to this retention.
- 1.2.15 In addition to the LSR delivery process, WinStar will distribute directory assistance and directory listing information (together sometimes referred to hereafter as "DA/DL information") to GTE via the LSR ordering process over the NDM. GTE will provide listings service via its "listing continuity" offering.
- 1.2.16 Charges and credits for PIC changes ordered via an LSR will appear on the wholesale bill. As WinStar places a request for a PIC change via LSR, the billing will be made on the WinStar account associated with each individual end user. GTE will process all PIC changes

from IXCs that are received for WinStar end users by rejecting back to the IXC with the WinStar OCN. Detail is provided so that WinStar can identify the specific charges for rebilling to their end user.

- 1.2.17 CMDS. The parties will provide for the distribution of intraLATA CMDS incollect messages and/or selected local measured service messages as follows:

1.2.17.1 Messages to be Screened. GTE receives CMDS I transmissions containing intraLATA incollect messages from the state RBOC CMDS host each business day. Per WinStar's request, GTE will screen the incollects by NPA and line number and accumulate the Collect, Third Number Billed and Credit Card (collectively called incollects) messages in a data file. The screening will be for end users who have chosen WinStar as their local service provider through a Resale or Unbundled Network arrangement. The screened incollect messages and any Local Measured Service (LMS) usage will be accumulated and forwarded to WinStar. The Parties will mutually agree on the frequency of the data exchange and the method of transmission (i.e., magnetic tape or direct electronic transmission). GTE will forward the screened messages in the industry standard EMR format. GTE intraLATA toll messages that are recorded by GTE and dialed on a one plus or zero plus basis are not part of this section and will not be screened.

1.2.17.2 Compensation. GTE will bill WinStar monthly for all services related to the screening, accumulating, processing and transmitting of incollect messages and LMS usage, if applicable, at a reasonable and mutually agreeable charge. In addition, any message processing fee associated with WinStar's incollect messages that are charged to GTE by the CMDS Host will be passed on to WinStar on the monthly statement. All revenue, surcharges, taxes and any other amounts due to the CMDS Host for WinStar's incollect messages will be billed on the monthly statement. It is WinStar's responsibility to bill and collect all incollect and LMS amounts due from its end users. The incollect and LMS revenue amounts that are listed on the monthly invoice are payable to GTE in total. The Parties agree that the arrangement for invoicing the incollect and LMS revenue amounts due GTE is not a settlement process with WinStar.

1.2.17.3 Administration. The Parties agree to develop a process

whereby WinStar's end user information is available in a timely manner to allow GTE to build tables to screen the CMDS incollect files and LMS files on behalf of WinStar.

- 1.2.18 Backbilling. GTE shall bill WinStar on a timely basis. In no case shall GTE bill WinStar for previously unbilled charges that are for more than one year prior to the current bill date except for charges resulting from resolution of an audit pursuant to Article XVII.

1.3 Order Processing.

- 1.3.1 Order Expectations. WinStar agrees to warrant to GTE that it is a certified provider of telecommunications service. WinStar will document its Certificate of Operating Authority on the ALEC Profile and agrees to update this ALEC Profile as required to reflect its current certification. The Parties agree to exchange and to update end user contact and referral numbers for order inquiry, trouble reporting, billing inquiries, and information required to comply with law enforcement and other security agencies of the government. The Parties also agree to exchange and to update internal order, repair and billing point of contacts. Prior to submitting an order under this Agreement, WinStar shall obtain such documentation as may be required by state and federal laws and regulations.

- 1.3.2 GTE shall provide WinStar with a specified customer contact center for purposes of placing service orders and coordinating the installation of services. These activities shall be accomplished by telephone call or facsimile until electronic interface capability has been established. The Parties adopt the OBF LSR and DSR forms for the ordering, confirmation and billing of resale and unbundled services. The Parties adopt the OBF ASR forms for the ordering, confirmation and billing of trunk-side interconnection.

- 1.3.3 GTE will process such service orders during normal operating hours, at a minimum on each Business Day between the hours of 8 a.m. to 8 p.m. Eastern Time and shall implement service orders within the same time intervals used to implement service orders for similar services for its own users.

- 1.3.4 GTE will provide current GTE customer proprietary network information (name, address, telephone number and description of services provided by GTE including PIC and white page directory listing information) as provided in Article XV, Paragraph 3. The return of customer information will be via facsimile or via electronic transmission.

- 1.3.5 Although in most circumstances the end user's current telephone number may be retained by the end user when switching local service providers, if

an end user service has been temporarily disconnected for non-payment, the end user's previous telephone number will not be made available to WinStar until the end user's outstanding balance has been paid.

- 1.3.6 Transfer Between Local Service Providers - GTE will provide a displacement/out service report to a Local Service Provider (LSP) whenever an end user leaves that LSP and procures service from another LSP. When a WinStar end user changes to another LSP, GTE will notify WinStar when such activity occurs the day after completion or within 48 hours of such disconnect.

## 2. Maintenance Systems.

### 2.1 General Overview

- 2.1.1 If WinStar requires maintenance for its local service customers, WinStar will initiate a request for repair (sometimes referred to as a "trouble report") by calling GTE's Customer Care Repair Center. During this call, GTE service representatives will verify that the end-user is a WinStar customer and will then obtain the necessary information from WinStar to process the trouble report. While the WinStar representatives are still on the line, GTE personnel will perform an initial analysis of the problem and remote line testing for resale services. If engineered services are involved, the call will be made to the GTE SSCC for handling. If no engineering is required and the line testing reveals that the trouble can be repaired remotely, GTE personnel will correct the problem and close the trouble report while WinStar representatives are still on the line. If on-line resolution is not possible, GTE personnel will provide WinStar representatives a commitment time for repair and a trouble ticket number, and the GTE personnel then will enter the trouble ticket into the GTE service dispatch queue. WinStar's repair service commitment times will be within the same intervals as GTE provides to its own end users. Maintenance and repair of GTE facilities is the responsibility of GTE and will be performed at no incremental charge to WinStar. If, as a result of a WinStar-initiated trouble report, trouble is found to be the responsibility of WinStar (e.g., non-network cause) GTE will charge WinStar for trouble isolation. WinStar will have the ability to report trouble for its end users to appropriate trouble reporting centers 24 hours a day, 7 days a week. WinStar will be assigned a customer contact center when initial service agreements are made.
- 2.1.2 Repair calls to the SSCC for engineered services will be processed in essentially the same manner as those by the GTE Customer Care Center. GTE personnel will analyze the problem, provide the WinStar representative with a commitment time while they are still on the line, and then place the trouble ticket in the dispatch queue.

2.1.3 GTE then will process all WinStar trouble reports in the dispatch queue along with GTE trouble reports in the order they were filed (first in, first out), with priority given to out-of-service conditions. If, at any time, GTE would determine that a commitment time given to WinStar becomes in jeopardy, GTE service representatives will contact WinStar by telephone to advise of the jeopardy condition and provide a new commitment time.

2.1.4 Trouble reports in the dispatch queue will be transmitted electronically to GTE CZT service technicians who will repair the service problems and clear the trouble reports. For cleared WinStar trouble reports, GTE service technicians will make a telephone call to WinStar directly to clear the trouble ticket. GTE service technicians will make the confirmation call to the telephone number provided by WinStar. If WinStar is unable to process the call or places the GTE technician on hold, the call will be terminated. To avoid disconnect, WinStar may develop an answering system, such as voice mail, to handle the confirmation calls expeditiously.

2.1.5 GTE will provide electronic interface access to operation support systems functions which provide the capability to initiate, status and close a repair trouble ticket. GTE will not provide to WinStar real time testing capability on WinStar end user services. GTE will not provide to WinStar an interface for network surveillance (performance monitoring).

2.1.6 GTE will resolve repair requests by or for WinStar local service customers using GTE's existing repair system in parity with repair requests by GTE end users. GTE will respond to service requests for WinStar using the same time parameters and procedures that GTE uses. WinStar then would call GTE's Customer Care Center or SSCC while the customers were on hold.

## 2.2 Network Management Controls.

2.2.1 Network Maintenance and Management. The Parties will work cooperatively to install and maintain a reliable network.

2.2.2 Neither Party shall be responsible to the other if necessary changes in network configurations render any facilities of the other obsolete or necessitate equipment changes.

2.2.3 Network Management Controls. Each Party shall provide a 24-hour contact number for Network Traffic Management issues to the other's network surveillance management center. A fax number must also be provided to facilitate event notifications for planned mass calling events. Additionally, both Parties agree that they shall work cooperatively that all such events shall attempt to be conducted in such a manner as to avoid degradation or loss of service to other end users. Each Party shall maintain the capability of respectively implementing basic protective controls such as "Cancel To"

and "Call Gap."

3. Electronic Interface. The Parties shall work cooperatively in the implementation of electronic gateway access to GTE operational support systems functions in the long-term in accordance with established industry standards. WinStar shall compensate GTE for the full costs including but not limited to design, development, testing, implementation and deployment, for access to GTE's Operational Support System functions. Where subsequent parties request use of GTE's operation support systems, cost recovery for such electronic interface systems shall be allocated among all requesting users.
  - 3.1 WinStar shall have immediate access to the following OSS electronic interfaces that will provide functionality to enable WinStar to service customers in an equal and non-discriminatory manner:
    - 3.1.1 Pre-Order functions, e.g., TN Assignment, DD Reservation, Address Validation, Product Availability, that are available on a dial-up or dedicated basis using the Secure Integrated Gateway System (SIGS).
    - 3.1.2 Order functions that are available on a dial-up or dedicated basis using CONNECT: Mail file transfer.
    - 3.1.3 Repair functions, e.g., trouble report repair functions, to allow WinStar to determine status and close trouble reports.
    - 3.1.4 Electronic transfer of the WinStar bill in electronic data interchange 811 format.
  - 3.2 WinStar may migrate to fully interactive system to system interconnectivity. GTE, with input from CLECs and other carriers, shall provide general interface specifications for electronic access to this functionality. These specifications will be provided to enable WinStar to design system interface capabilities. Development will be in accordance with applicable WinStar standards committee guidelines. Such interfaces will be available as expeditiously as possible.
  - 3.3 All costs and expenses for any new or modified electronic interfaces exclusively to meet WinStar requirements that GTE determines are technically feasible and GTE agrees to develop will be paid by WinStar. Costs for development of systems intended for common use by competing carriers will be assessed based on a mutually agreed method of cost recovery.
  - 3.4 WinStar shall be responsible for modifying and connecting any of its pre-ordering and ordering systems with GTE provided interfaces as described in this Appendix.
4. GTE Initiated Electronic System Redesigns. GTE will not charge WinStar when GTE initiates its own electronic system redesigns/reconfigurations.

APPENDIX H  
RESERVED FOR FUTURE USE

Reserved.

APPENDIX I  
POLE ATTACHMENT AGREEMENT

1. Parties.

This agreement (Agreement) is between GTE \_\_\_\_\_ INCORPORATED, a State of \_\_\_\_\_ corporation having its principal office at \_\_\_\_\_ ("GTE"), and \_\_\_\_\_, a corporation of the State of \_\_\_\_\_, having its principal office at \_\_\_\_\_ ("Licensee").

2. Definitions.

- 2.1 "GTE's poles" or "GTE pole(s)" means a pole or poles solely owned by GTE, jointly owned by GTE and another entity, and space on poles obtained by GTE through arrangements with the owner(s) thereof.
- 2.2 "Telecommunications Services" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.
- 2.3 "Cable Television Services" means the transmission to subscribers of off-the-air pickup of broadcast signals or the transmission, without separate charge, of locally originated closed circuit television to the subscribers of off-the-air service.
- 2.4 "Attachments" means the equipment reasonably required by Licensee to provide its Telecommunications Services or Cable Television Services that is placed on GTE's poles.
- 2.5 "Make-Ready Work" means all work, including, but not limited to, rearrangement, removal, or transfer of existing attachments, placement, repair, or replacement of poles, or any other changes required to accommodate the Licensee's Attachments on a pole.
- 2.6 "Hazardous Materials" means (i) any substance, material or waste now or hereafter defined or characterized as hazardous, extremely hazardous, toxic or dangerous within the meaning of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, or any similar law, ordinance, statute, rule or regulation of any governmental body or authority, (ii) any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, ordinance, statute, rule or regulation of any governmental body or authority or (iii) any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

2.7 "Attachment Fee" means the fee assessed per pole and paid by Licensee to place Attachments on GTE's poles.

3. Purpose.

3.1 Licensee represents to GTE that Licensee has a need to occupy, place and maintain Attachments on GTE's poles for the purpose of providing Telecommunications Services.

3.2 GTE agrees to permit Licensee to occupy, place and maintain its Attachments on such GTE poles as GTE may allow pursuant to the terms of this Agreement.

4. Grant of License.

GTE grants to Licensee and Licensee accepts from GTE a non-exclusive revocable license to occupy, place and maintain in a designated space on specified GTE poles Licensee's Attachments on the terms and conditions set forth herein. Licensee shall have no further right, title, or other interest in connection with GTE's poles. GTE shall have the right to grant, renew or extend privileges to others not parties to this Agreement to occupy, place or maintain Attachments on or otherwise use any or all GTE poles. Nothing herein is intended to, nor should it be construed to require GTE to construct or modify any facilities not needed for its own service requirements. GTE grants this license in reliance on the representation of Licensee that Licensee intends to provide Telecommunications Services with the Attachments covered by this Agreement.

5. Term.

Subject to the termination provisions contained in this Agreement, the term of this Agreement shall be two (2) years from the effective date referenced in the first paragraph of this Agreement and shall continue in effect for consecutive one (1) year terms until either Party gives the other Party at least ninety (90) calendar days written notice of termination, which termination shall be effective at the end of the then-current term. In the event notice is given less than 90 calendar days prior to the end of the current term, this Agreement shall remain in effect for 90 calendar days after such notice is received, provided, that in no case shall the term be extended beyond 90 calendar days after the end of the current term.

6. Pole Attachment Requests (PARs).

6.1 Licensee shall submit a written Pole Attachment Request ("PAR") to GTE identifying the GTE poles upon which it desires to place Attachments. Each PAR shall be in a form specified by GTE and may be revised from time to time by GTE. All PARs submitted to GTE shall be processed on a first come, first served basis. GTE, in its sole judgment, will determine the availability of space on the GTE pole(s) specified in the PAR and will provide its response to the PAR within

thirty (30) Business Days of its submission. Upon approval of the PAR, GTE shall return one copy thereof to Licensee bearing an endorsement acknowledging GTE's authorization. All Attachments placed on GTE's poles pursuant to an approved PAR shall become subject to all of the terms and conditions of this Agreement. Licensee may submit subsequent PARs for approval by GTE as needed. GTE is under no obligation to provide general information respecting the location and availability of GTE poles, except as may be necessary to process a PAR. No Attachment shall be placed on any GTE pole identified in a PAR until that PAR has been approved by GTE.

- 6.2 Licensee shall pay GTE a fee for processing a PAR to compensate GTE for the general administrative costs as well as the actual engineering costs reasonably incurred. The fee for engineering costs shall be computed by multiplying the fully loaded hourly rate for an engineer times the number of hours reasonably required by each engineer to inspect the GTE poles included in the PAR. GTE will charge its then current rates for administrative and engineering costs, as may be changed from time to time by GTE to remain consistent with prevailing costs.
- 6.3 Upon receiving an approved PAR, Licensee shall have the right, subject to the terms of this License, to place and maintain the facilities described in the PAR in the space designated on the GTE poles identified therein.
- 6.4 In the event Make-Ready Work is necessary to accommodate Licensee's Attachments, GTE shall notify Licensee of such fact and provide Licensee with a good faith estimate of the total cost of such Make-Ready Work needed to accommodate Licensee's Attachments. Within fifteen (15) days after receiving such notice from GTE, Licensee shall notify GTE either (1) that Licensee shall pay all of the costs actually incurred to perform the Make-Ready Work and shall pay the total estimated amount to GTE at least ten (10) days prior to the date the Make-Ready Work is to begin or (2) that it desires to cancel its PAR.
- 6.5 GTE shall not be responsible to Licensee for any loss sustained by Licensee by reason of the refusal or failure of any other party with attachments on GTE's poles to rearrange or modify its attachments as may be required to accommodate Licensee's Facilities.
- 6.6 Licensee is not authorized and shall have no right to place facilities on any GTE pole unless that GTE pole is identified in an approved PAR.

7. Availability of Information Regarding Space on Poles.

GTE will provide information regarding the availability of pole space within thirty (30) Business Days of a written request by Licensee. Because GTE will endeavor to determine available space as quickly as possible, a shorter interval may be experienced for requests of a limited scope where physical field verification is not necessary. In the event the thirty (30) Business Day time frame cannot be met, GTE shall so advise

Licensee and shall seek a mutually satisfactory alternative response date. No representation regarding the availability of space shall be made in the absence of a physical field verification.

8. Authority to Place Attachments.

- 8.1 Before Licensee places any Attachments on GTE's poles pursuant to an approved PAR, Licensee shall submit evidence satisfactory to GTE of its authority to erect and maintain the facilities to be placed on GTE's poles within the public streets, highways and other thoroughfares or on private property. Licensee shall be solely responsible for obtaining all rights-of-way, easements, licenses, authorizations, permits and consents from federal, state and municipal authorities or private property owners that may be required to place Attachments on GTE's poles. In the event Licensee must obtain any additional easements, permits, approvals, licenses and/or authorizations from any governmental authority or private individual or entity in order to utilize GTE's poles under an approved PAR, GTE shall, upon Licensee's request, provide written confirmation of its consent to Licensee's utilization of poles in a particular location in accordance with this Agreement, if needed by Licensee to obtain such additional approvals or authorizations. GTE shall also provide maps or drawings of its facilities' locations to the extent reasonably required by such governmental authority or private individual or entity for purposes of considering or granting Licensee's request to it for authority or approval.
- 8.2 GTE shall not unreasonably intervene in or attempt to delay the granting of any rights-of-way, easements, licenses, authorizations, permits and consents from federal, state or municipal authorities or private property owners that may be required for Licensee to place its Attachments on GTE's poles.
- 8.3 If any right-of-way, easement, license, authorization, permit or consent obtained by Licensee is subsequently revoked or denied for any reason, Licensee's permission to attach to GTE's poles shall terminate immediately and Licensee shall promptly remove its Attachments. Should Licensee fail to remove its Attachments within one hundred twenty (120) days of receiving notice to do so from GTE, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand.
- 8.4 Upon notice from GTE to Licensee that the cessation of the use of any one or more of GTE's poles is necessary for reasons of safety or has been directed by any federal, state or municipal authority, or private property owner, permission to attach to such pole or poles shall terminate immediately and Licensee promptly shall remove its Attachments. Should Licensee fail to remove its Attachments

within the time frame provided by the requesting or directing party or one hundred twenty (120) days of receiving notice to do so from GTE, whichever is less, GTE shall have the option to remove all such Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Attachments shall be reimbursed to GTE by Licensee upon demand by GTE.

9. Placement of Attachments.

9.1 Licensee shall, at its own expense, place and maintain its Attachments on GTE's poles in accordance with (i) such requirements and specifications as GTE shall from time to time prescribe in writing, (ii) all rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and (iii) all currently applicable requirements and specifications of the National Electrical Safety Code, and the applicable rules and regulations of the Occupational Safety and Health Act. Licensee agrees to comply, at its sole risk and expense, with all specifications included in Exhibits \_\_ through \_\_ hereto, as may be revised from time to time by GTE.

9.2 Licensee's Facilities shall be tagged at maximum intervals of 300 feet so as to identify Licensee as the owner of the Facilities. The tags shall be of sufficient size and lettering so as to be easily read from ground level.

10. Failure of Licensee to Place Attachments.

Once Licensee has obtained an approved PAR, Licensee shall have sixty (60) days from the date the PAR is approved to begin the placement of its Attachments on the GTE poles covered by the PAR. If Licensee has not begun placing its Attachments within that sixty (60) day period, Licensee shall so advise GTE with a written explanation for the delay. If Licensee fails to advise GTE of its delay, with a written explanation therefor, or if Licensee fails to act in good faith by not making a bona fide effort to begin placing its Attachments within the sixty (60) days prescribed by this Section, the previously approved PAR shall be deemed rescinded by GTE and Licensee shall have no further right to place Attachments pursuant to that PAR.

11. Attachment Fees.

11.1 Licensee shall pay to GTE an Attachment Fee, as specified in Exhibit \_\_ hereto, for each GTE pole upon which Licensee obtains authorization to place an Attachment. The Attachment Fee may be increased by GTE from time to time as permitted by law upon sixty (60) days written notice to Licensee.

11.2 Attachments Fees shall become due and payable on the date a PAR is approved by GTE for all GTE poles identified in that PAR on a pro rata basis until the end of

the then current year and thereafter on an annual basis within thirty (30) days of the date of a statement from GTE specifying the fees to be paid. Any payment after thirty (30) days shall bear interest at the rate of eighteen percent (18%) per annum or the maximum rate allowed by law, whichever is less.

- 11.3 GTE shall maintain an inventory of the total number of GTE poles occupied by Licensee based upon the cumulative number of poles specified in all PARs approved by GTE. GTE may, at its option, conduct a physical inventory of Licensee's Attachments under this Section. It shall be Licensee's sole responsibility to notify GTE of any and all removals of Attachments from GTE's poles. Except as provided in Section 18 of this Agreement in connection with the termination of this Agreement, such notice shall be provided to GTE at least thirty (30) days prior to the removal of the Attachments. Each Notice of Removal shall be in a form specified by GTE and may be revised from time to time at GTE's sole discretion. Licensee shall remain liable for Attachment Fees until Licensee's Attachments have been physically removed from GTE's poles.

12. Modifications, Additions or Replacements to Existing Attachments.

- 12.1 Licensee shall not modify, add to or replace Facilities on any pre-existing Attachment without first notifying GTE in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include: (1) the date the activity is scheduled to begin, (2) a description of the planned modification, addition or replacement, (3) a representation that the modification, addition or replacement will not require any space other than the space previously designated for Licensee's Attachments, and (4) a representation that the modification, addition or replacement will not impair the structural integrity of the poles involved.
- 12.2 Should GTE determine that the modification, addition or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require the reinforcement of, replacement of or an addition of support equipment to the poles involved in order to accommodate Licensee's modification, addition or replacement, GTE will so notify Licensee, whereupon Licensee will be required to submit a PAR in compliance with this Agreement in order to obtain authorization for the modification, addition or replacement of its Attachments.
- 12.3 Access to GTE's poles for repairs, modifications, additions, or replacements required in emergency situations shall be governed by Section 22 of this Agreement.
- 12.4 Should Licensee request GTE to expand capacity or purchase additional plant, Licensee agrees to pay all costs.

13. Rearrangements to Accommodate Other Licensees.

Licensee acknowledges that at some point in the future it may become necessary to rearrange Licensee's Facilities in order to create space to accommodate the facilities of another licensee. Licensee agrees that in such event Licensee will cooperate in good faith with such other licensee to come to a mutually agreeable understanding regarding the manner in which the rearrangement of Licensee's Facilities will be achieved.

14. Unauthorized Attachments.

14.1 The parties agree that because it would be impracticable and extremely difficult to determine the actual amount of damages resulting from Licensee's unauthorized Attachment(s), a charge equal to five (5) times the amount of the then current Attachment Fee shall be paid by Licensee to GTE for each unauthorized Attachment to a GTE pole. Such payment shall be deemed liquidated damages and not a penalty. Licensee also shall pay GTE an Attachment Fee for each unauthorized Attachment accruing from the date the unauthorized Attachment was first placed on the GTE pole. In the event that the date the unauthorized Attachment was first placed on a GTE pole cannot be determined, such date shall be deemed the date of the last physical inventory made in accordance with this Agreement or, if no physical inventory has been conducted, the date the first PAR from Licensee was approved in accordance with this Agreement. Licensee also shall pay to GTE all costs incurred by GTE to rearrange any unauthorized Attachment(s) of Licensee if such rearrangement is required to safeguard GTE's Attachment(s) or to accommodate the Attachment(s) of another party whose Attachment(s) would not have required a rearrangement but for the presence of Licensee's unauthorized Attachment(s). Licensee shall also pay to GTE all costs incurred by GTE to reinforce, replace or modify any GTE pole, which reinforcement, replacement or modification was required as a result of the unauthorized Attachment of Licensee. The Attachment Fee referenced in this subsection 14.1 shall be determined in the same manner as such fee would have been determined if the attachment had been authorized by GTE.

14.2 For purposes of this section, an unauthorized Attachment shall include, but not be limited to:

- 14.2.1 An Attachment to a GTE pole which pole is not identified in any PAR approved in accordance with this Agreement;
- 14.2.2 An Attachment that occupies more space than that allocated to Licensee by GTE;
- 14.2.3 An Attachment that is not placed in accordance with the provisions of this Agreement or the appropriate PAR issued pursuant to this Agreement;

- 14.2.4 An addition or modification by Licensee to its pre-existing Attachment(s) that impairs the structural integrity of the involved GTE pole(s).
- 14.2.5 An Attachment that consists of facilities owned or controlled by, and for the use of a party other than Licensee.

15. Surveys and Inspections of Pole Attachments.

- 15.1 Upon written notice to Licensee, the total number and exact location of Licensee's Attachments on GTE's poles may be determined, at GTE's discretion, through a survey to be made not more than once per calendar year by GTE. If so requested, Licensee and/or any other entity owning or jointly owning the poles with GTE may participate in the survey. The costs incurred by GTE to conduct the survey shall be reimbursed to GTE by Licensee upon demand by GTE. If the Attachments of more than one Licensee are surveyed, each such Licensee shall contribute a proportionate share of the costs reimbursed to GTE.
- 15.2 Apart from surveys conducted in accordance with this section, GTE shall have the right to inspect any Attachment of Licensee on GTE's poles as conditions may warrant upon written notice to Licensee. Licensee shall, upon demand by GTE, reimburse GTE all costs incurred to conduct its inspection. No joint survey or inspection, or lack thereof, by GTE shall operate to relieve Licensee of any responsibility, obligation or liability assumed under this Agreement.

16. Notice of Modification or Alteration of Poles by GTE.

- 16.1 In the event GTE plans to modify or alter any GTE pole(s) upon which Licensee has Attachments, GTE shall provide Licensee notice of the proposed modification or alteration at least thirty (30) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter its Attachments on the GTE poles to be modified or altered by GTE, Licensee shall so notify GTE in writing. In such event, Licensee shall bear a proportionate share of the total costs incurred by GTE to make such poles accessible to Licensee.
- 16.2 In the event GTE is required by a federal, state, or local authority to move, replace or change the location of any GTE pole(s), Licensee shall concurrently relocate Licensee's Attachments. GTE and each Licensee required to relocate its Attachments shall bear its own costs for such relocation.

17. Disclaimer of Warranties.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, GTE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

18. Default and Remedies.

18.1 The occurrence of any one of the following shall be deemed a Material Default by Licensee under this Agreement:

- 18.1.1 Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a period of ten (10) days after written notice thereof to Licensee;
- 18.1.2 Failure by Licensee to perform or observe any other term, condition, covenant, obligation or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from GTE (provided that if such default is not curable within such thirty (30) day period, the period will be extended if Licensee commences to cure such default within such thirty (30) day period and proceeds diligently thereafter to effect such cure);
- 18.1.3 The filing of any tax or mechanic's lien against GTE's poles which is not bonded or discharged within thirty (30) days of the date Licensee receives notice that such lien has been filed;
- 18.1.4 Licensee's voluntary or involuntary bankruptcy;
- 18.1.5 Licensee's knowing use or maintenance of its Attachments in violation of any law or regulation, or in aid of any unlawful act or undertaking;
- 18.1.6 If any authorization which may be required of the Licensee by any governmental or private authority for the placement, operation or maintenance of Licensee's Attachments is denied or revoked.

18.2 In the event of a Material Default, GTE, without any further notice to the Licensee (except where expressly provided for below or required by applicable law) may do any one or more of the following:

- 18.2.1 Perform, on behalf and at the expense of Licensee, any obligation of Licensee under this Agreement which Licensee has failed to perform and of which GTE shall have given Licensee notice, the cost of which performance shall be paid by Licensee to GTE upon demand;
- 18.2.2 Terminate this Agreement by giving notice of such termination to Licensee and remove Licensee's Attachments and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby; or

18.2.3 Exercise any other legal or equitable right or remedy which GTE may have.

18.3 Any costs and expenses incurred by GTE (including, without limitation, reasonable attorneys' fees) in enforcing this Agreement shall be repaid to GTE by Licensee upon demand.

18.4 Upon termination of this Agreement by GTE because of a material default by Licensee, Licensee shall remain liable to GTE for any and all fees, other payments and damages which may be due or sustained prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorneys' fees incurred by GTE in pursuit of its remedies hereunder, and additional liquidated damages which shall be an amount equal to one full year of Pole Attachment fees.

18.5 All rights and remedies of each party set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

19. Indemnification.

19.1 Licensee shall compensate GTE for the full actual loss, damage or destruction of GTE's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments).

19.2 Licensee will further indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury (including death), damage to property, or other damage or financial loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Attachments), except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns. Licensee further indemnifies GTE from subsequent taxes and fees that may be levied by municipalities ROWs in association with these agreements. Such fees that are levied would be in addition to the attachment/occupancy fees reflected in this Agreement. Licensee expressly assumes all liability for actions brought against GTE and GTE's agents, officers, employees and assigns, by Licensee's agents, officers or employees and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

- 19.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve GTE of any and all liability for, loss or damage (and the consequences of loss or damage) to any Attachments placed on GTE's poles and any other financial loss sustained by Licensee, whether caused by fire, extended coverage perils, or other casualty, except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 19.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns from any and all claims asserted by customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the gross negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 19.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless GTE, its agents, officers, employees and assigns from and against any claims, liabilities, losses, damages, fines, penalties and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of: (i) any discharge of Hazardous Waste resulting from acts or omissions of Licensee or the Licensee's predecessor in interest; (ii) acts or omissions of the Licensee, its agents, employees, contractors or representatives in connection with any cleanup required by law, or (iii) failure of Licensee to comply with Environmental, Safety and Health Laws.
- 19.6 In no event shall either party be liable to the other party for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, tort or otherwise.
- 19.7 Licensee shall indemnify, protect and hold harmless GTE from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment on GTE's poles pursuant to this Agreement.

20. Insurance.

- 20.1 Licensee shall carry insurance, at its sole cost and expense, sufficient to cover its indemnification obligations as set forth in Section 19 of this Agreement. Such insurance shall include, but not be limited to, coverage against liability due to personal injury or death of persons in the amount of \$500,000 as to any one person and \$1,000,000 as to any one accident; coverage against liability due to property damage in the amount of \$500,000 as to each accident and \$500,000 aggregate; and coverage necessary to fully protect both it and GTE from all claims under any worker's compensation laws that may be applicable.

20.2 All insurance required of Licensee under this Agreement shall remain in force for the entire life of this Agreement. The company or companies issuing such insurance shall be approved by GTE and GTE shall be named as an additional insured in each such policy. Licensee shall submit to GTE certificates by each insurer to the effect that the insurer has insured Licensee for all potential liabilities of Licensee under this Agreement, and that it will not cancel or change any policy of insurance issued to Licensee except upon thirty (30) days notice to GTE. In the event Licensee's insurance coverage is to be canceled by reason of non-payment of premiums due, GTE shall have the option of paying any amount due and Licensee shall forthwith reimburse GTE the full amount paid by GTE.

20.3 Licensee shall promptly advise GTE in writing of any and all claims for damages, including, but not limited to, damage to property or injury to or death of persons, allegedly arising out of or in any manner related, directly or indirectly, to the presence or use of Licensee's Attachments.

20.4 Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage, the terms of which shall be subject to GTE's approval, in the amount of ten thousand dollars (\$10,000) to guarantee the payment of any sums which may become due to GTE for rentals, inspections or for work performed by GTE for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof. All bonds must specify that GTE be notified thirty (30) days prior to the expiration or cancellation of the policy.

21. Taxes.

Any state or local excise, sales, or use taxes (excluding any taxes levied on income) resulting from the performance of this Agreement shall be borne by the Party upon which the obligation for payment is imposed under applicable law, even if the obligation to collect and remit such taxes is placed upon the other Party. The collecting Party shall charge and collect from the obligated Party, and the obligated Party agrees to pay to the collecting Party, all applicable taxes, except to the extent that the obligated Party notifies the collecting Party and provides to the collecting Party appropriate documentation as GTE requires that qualifies the obligated Party for a full or partial exemption. Any such taxes shall be shown as separate items on applicable billing documents between the Parties. The obligated Party may contest the same in good faith, at its own expense, and shall be entitled to the benefit of any refund or recovery, provided that such Party shall not permit any lien to exist on any asset of the other Party by reason of the contest. The collecting Party shall cooperate in any such contest by the other Party. The other Party will indemnify the collecting Party from any sales or use taxes that may be subsequently levied on payments by the other Party by the collecting Party.

22. Emergency Restoration Procedures.

In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Attachments. While GTE shall not be responsible for the repair of Licensee's Attachments that are damaged (except by mutual written agreement), GTE shall nonetheless control access to its poles if the restoration is to be achieved in an orderly fashion.

22.1 Where GTE and Licensee are involved in emergency restorations, access to GTE's poles will be controlled by GTE's Maintenance District Manager or his/her on-site representative according to the following guidelines:

22.1.1 Service Disruptions/Outages

- (a) In the event of service disruptions and/or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (b) Where simultaneous access is not possible, access will be granted by GTE on a first come, first served basis.

22.1.2 Service Affecting Emergencies

- (a) In the event of service affecting emergencies not resulting in service disruptions or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with Attachments as is reasonably safe.
- (b) Where GTE is unable to grant simultaneous access to all other entities with Attachments, access will be granted according to the level of damage to the Attachments of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

22.2 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Attachments, or any action or failure to act by GTE, under this Section 22 shall not constitute a basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

23. Damage Suspected to Licensee's Facilities Only.

23.1 In the event Licensee receives information that Licensee's Attachments are

damaged, Licensee shall notify GTE of said damage at a number to be provided later by GTE. This is a 24-hour, 7 days per week notification number. Licensee shall provide GTE all information known to it regarding the damage to Licensee's Attachments.

23.2 In the event GTE receives notice that Licensee's Facilities are damaged, GTE will notify Licensee of said damage by telephone at the Licensee's emergency telephone number. GTE shall provide Licensee all information known to it regarding the damage to Licensee's Attachments.

23.3 After the giving of such notice by either Licensee or GTE, Licensee shall be authorized to perform emergency restoration maintenance activities in connection with Licensee's Attachments, subject to the provisions of this Agreement.

23.4 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Licensee's Attachments, or any action or failure to act by GTE, appropriately or inappropriately, under this Section shall not be the basis for any claim by Licensee against GTE for any damage to Licensee's Attachments or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee and Licensee shall indemnify and hold GTE harmless from any such claim.

24. Abandonment.

Nothing in this Agreement shall prevent or be construed to prevent GTE from abandoning, selling, assigning or otherwise disposing of any poles or other GTE property used for Licensee's Attachments; provided, however, that GTE shall condition any such sale, assignment or other disposition subject to the rights granted to Licensee pursuant to this Agreement. GTE shall promptly notify Licensee of any proposed sale, assignment or other disposition of any poles or other GTE property used for Licensee's Attachments.

25. Notices.

Any written notice to be given to a party to this Agreement shall be in writing and given or made by means of telegram, facsimile transmission, certified or registered mail, express mail or other overnight delivery service, or hand delivery, proper postage or other charges prepaid, and addressed or directed to the respective parties as follows:

To Licensee:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

To GTE:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Any notice given by personal delivery shall be deemed to have been given on the day of actual delivery and, if given by registered or certified mail, return receipt requested, on the date of receipt thereof and, if given by facsimile transmission, on the day of transmittal thereof if given during the normal business hours of the recipient and on the next business day if not given during normal business hours.

26. Non-Waiver of Terms and Conditions.

No course of dealing, course of performance or failure to enforce any of term, right, condition or other provision of this Agreement shall constitute or be construed as a waiver of any term, right or condition or other provision of this Agreement.

27. Dispute Resolution.

27.1 Except in the case of (i) a suit, action or proceeding by GTE to compel Licensee to comply with its obligations to indemnify GTE pursuant to this Agreement or (ii) a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy or claim arising out of or relating to this Agreement or its breach.

27.2 At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy or claim arising under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

27.3 If a resolution of the dispute, controversy or claim is not reached within sixty (60) days of the initial written request, the dispute, controversy or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be controlled by the arbitrator

and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the parties. The arbitration hearing shall be commenced within sixty (60) days of the demand for arbitration and shall be held in the city where GTE's local offices are located. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

27.4 Each party shall bear its own costs, including attorneys' fees, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

28. Compliance With Laws.

Notwithstanding anything to the contrary in this Agreement, each party shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of (i) workers' compensation laws, (ii) unemployment compensation laws, (iii) the Federal Social Security Law, (iv) the Fair Labor Standards Act, and (v) all laws, regulations, rules, guidelines, policies, orders, permits and approvals of any governmental authority relating to environmental matters and/or occupational safety.

29. Force Majeure.

Neither party shall have any liability for its delays or its failure in performance due to fire, flood, explosion, pest damage, power failures, strikes or labor disputes, acts of God, the Elements, war, civil disturbances, acts of civil or military authorities or the public enemy, inability to secure raw materials, transportation facilities, fuel or energy shortages, or other cause beyond its control.

30. Assignment.

30.1 The rights and obligations of Licensee under this Agreement shall not be assigned, transferred or sub-licensed, in whole or in part, without the prior written consent of GTE. An assignment, transfer or sub-license of this Agreement by Licensee shall not relieve Licensee of its obligations under this Agreement. Any assignment attempted without the prior written consent of GTE shall be void.

30.2 GTE shall have the right to assign this Agreement and to assign its rights and delegate its obligations and liabilities under this Agreement, either in whole or in part. GTE shall provide notice to Licensee of any assignment which shall state the effective date thereof. Upon the effective date and to the extent of the assignment, GTE shall be released and discharged from all obligations and liabilities under this Agreement.

30.3 Neither this Agreement nor any term or provision hereof, nor any inclusion by reference shall be construed as being for the benefit of any person or entity not a signatory hereto.

30.4 This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

31. Applicable Law.

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the State of \_\_\_\_\_ without regard to its conflicts of laws provisions.

32. Subsequent Law.

The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations, guidelines, orders, or tariffs that are currently in force or that may be prescribed by any federal, state or local governmental authority. The parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, regulation, guideline, order, or tariff. Should any term of this Agreement be determined by a court or other entity with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

33. Headings.

All headings contained in this Agreement are for convenience only and are not intended to affect the meaning or interpretation of any part of this Agreement.

34. Entire Agreement.

The terms and conditions of this Agreement supersede all prior oral or written understandings between the parties and constitute the entire agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by a writing signed by the party to be charged.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement through their authorized representatives.

APPENDIX J  
CONDUIT OCCUPANCY AGREEMENT

1. Parties.

This agreement (Agreement) is between GTE \_\_\_\_\_ INCORPORATED, a State of \_\_\_\_\_ corporation having its principal office at \_\_\_\_\_ ("GTE"), and \_\_\_\_\_, a corporation of the State of \_\_\_\_\_, having its principal office at \_\_\_\_\_ ("Licensee").

2. Definitions.

- 2.1 "GTE's conduit(s)" or "GTE conduit(s)" means any reinforced passage or opening in, on, under/over or through the ground capable of containing communications facilities.
- 2.2 "Telecommunications Services" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.
- 2.3 "Cable Television Services" means the transmission to subscribers of off-the-air pickup of broadcast signals or the transmission, without separate charge, of locally originated closed circuit television to the subscribers of off-the-air service.
- 2.4 "Conduit" or "Duct" means a single enclosed raceway used to house Innerduct.
- 2.5 "Innerduct," unless otherwise specified or approved by GTE, shall mean a single enclosed raceway 1" or 1-1/4" in diameter, placed within duct and used for housing communications facilities.
- 2.6 "Facilities" means all facilities, including, but not limited to, cables, equipment and associated hardware, owned and utilized by the Licensee which occupy an innerduct.
- 2.7 "Make-Ready Work" means all work, including, but not limited to, rearrangement, removal, or transfer of existing facilities, placement, repair, or replacement of duct or innerduct, or any other changes required to accommodate the Licensee's Facilities in a conduit.
- 2.8 "Manholes" and "handholes" mean subsurface enclosures which personnel may enter and use for the purpose of installing, operating and maintaining communications facilities.
- 2.9 "Hazardous Materials" means (i) any substance, material or waste now or

hereafter defined or characterized as hazardous, extremely hazardous, toxic or dangerous within the meaning of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, or any similar law, ordinance, statute, rule or regulation of any governmental body or authority, (ii) any substance, material or waste now or hereafter classified as a contaminant or pollutant under any law, ordinance, statute, rule or regulation of any governmental body or authority or (iii) any other substance, material or waste, the manufacture, processing, distribution, use, treatment, storage, placement, disposal, removal or transportation of which is now or hereafter subject to regulation under any law, ordinance, statute, rule or regulation of any governmental body or authority.

2.10 "Occupancy Fee" means the fee paid by Licensee to GTE per linear foot for each innerduct occupied by Licensee's Facilities in GTE's Conduit(s).

3. Purpose.

Licensee represents to GTE that Licensee has a need to occupy, place and maintain communications facilities within GTE's conduit(s) for the purpose of providing Telecommunications Service. GTE agrees to permit Licensee to occupy, place and maintain communications facilities within GTE's conduit(s) as GTE may allow pursuant to the terms of this Agreement.

4. Grant of License.

GTE grants to Licensee and Licensee accepts from GTE a non-exclusive revocable license to occupy, place and maintain in a designated space in specified GTE conduits Licensee's Facilities on the terms and conditions set forth herein. Licensee shall have no further right, title, or other interest in connection with GTE's conduit(s). GTE shall have the right to grant, renew or extend privileges to others not parties to this Agreement to occupy, place and maintain facilities in or otherwise use any or all of GTE's conduit(s). Nothing herein is intended to, nor should it be construed to require GTE to construct or modify any facilities not needed for its own service requirements. GTE grants this license in reliance on the representation of Licensee that Licensee intends to provide Telecommunications Service with Licensee's Facilities covered by this Agreement.

5. Term.

Subject to the termination provisions contained in this Agreement, the term of this Agreement shall be two (2) years from the effective date referenced in the first paragraph of this Agreement and shall continue in effect for consecutive one (1) year terms until either Party gives the other Party at least ninety (90) calendar days written notice of termination, which termination shall be effective at the end of the then-current term. In the event notice is given less than 90 calendar days prior to the end of the current term, this Agreement shall remain in effect for 90 calendar days after such notice is received, provided, that in no case shall the term be extended beyond 90

calendar days after the end of the current term.

6. Conduit Occupancy Requests.

- 6.1 Upon execution of this Agreement, Licensee shall have the right to submit a written Conduit Occupancy Request ("COR") to GTE specifying the GTE conduits in which it desires to place its Facilities. Each COR shall be in a form specified by GTE, which form may be revised from time to time by GTE. CORs received by GTE shall be processed on a first come, first served basis. GTE will determine the availability of space for Licensee's Facilities in the GTE conduit(s) specified in the COR within thirty (30) Business Days of its submission. Upon approval of the COR, GTE shall return a copy thereof to Licensee bearing an endorsement acknowledging GTE's authorization. All of Licensee's Facilities placed in GTE's conduit(s) pursuant to an approved COR shall become subject to all of the terms and conditions of this Agreement. Licensee may submit subsequent CORs for approval by GTE as needed. All of Licensee's Facilities shall be placed in innerduct unless otherwise approved by GTE. No facilities of any kind shall be placed in any GTE conduit(s) identified in a COR until that COR has been approved by GTE.
- 6.2 Licensee shall pay GTE a fee for processing a COR to compensate GTE for the general administrative costs as well as the actual engineering costs reasonably incurred. The fee for engineering costs shall be computed by multiplying the fully loaded hourly rate for an engineer times the number of hours reasonably required by each engineer to inspect the GTE conduits included in the COR. GTE will charge its then current rates for administrative and engineering costs, as may be changed from time to time by GTE to remain consistent with prevailing costs.
- 6.3 Upon receiving an approved COR, Licensee shall have the right, subject to the terms of this Agreement, to place and maintain Licensee's Facilities described in the COR in the innerducts of the GTE conduit(s) identified therein.
- 6.4 In the event Make-Ready Work is necessary to accommodate Licensee's Facilities, GTE shall notify Licensee of such fact and provide Licensee with an estimate of the total cost of such Make-Ready Work. Within fifteen (15) days after receiving such notice from GTE, Licensee shall notify GTE either (1) that Licensee shall pay all of the costs actually incurred to perform the Make-Ready Work and shall pay the total estimated amount to GTE at least ten (10) days prior to the date the Make-Ready Work is to begin or (2) that it desires to cancel its COR.
- 6.5 Nothing herein shall confer any right upon Licensee to place power cables or related power equipment in GTE conduit(s) or Manholes. Licensee shall place equipment of this nature in its own pull boxes outside of GTE's Conduit(s) or Manholes. Cable connectors or splicing devices shall not be used by Licensee in GTE's conduit(s) or innerducts.

7. Availability of Conduit Maps.

Existing conduit maps will be made available for viewing by Licensee for the purpose of pre-order planning at the GTE area engineering offices during normal business hours, subject to reasonable advance notification. While a formal written request will not be required in connection with the first request by Licensee to view conduit maps, GTE reserves the right to refuse any subsequent viewing request or require written justification for the request if Licensee has demonstrated that it does not have a good faith intention to submit a COR. If the availability of specific point-to-point conduits can be determined at the time of viewing conduit maps, maps reflecting such point-to-point conduits may be made available for copying. Licensee shall pay to GTE a fee for making such copies available sufficient to cover the general administrative costs incurred. IN MAKING CONDUIT MAPS AVAILABLE, GTE WILL BE MAKING NO EXPRESS OR IMPLIED WARRANTY REGARDING THEIR ACCURACY OTHER THAN THAT THEY ARE THE SAME CONDUIT MAPS USED BY GTE IN ITS DAY-TO-DAY OPERATIONS.

8. Availability of Information Regarding Space In Conduits.

GTE will provide information regarding the availability of conduit space within thirty (30) Business Days of a written request by Licensee. Because GTE will endeavor to determine available space as quickly as possible, a shorter interval may be experienced for requests of a limited scope where physical field verification is not necessary. In the event the thirty (30) Business Day time frame cannot be met, GTE shall so advise Licensee and shall seek a mutually satisfactory alternative response date. No representation regarding the availability of space shall be made in the absence of a physical field verification.

9. Authority to Place Licensee's Facilities.

- 9.1 Before Licensee places any of Licensee's Facilities in GTE's conduit(s) pursuant to an approved COR, Licensee, upon request, shall submit sufficient evidence to GTE of its authority to maintain the Facilities to be placed in GTE's conduit(s) within the public streets, highways and other thoroughfares or on private property. Licensee shall be solely responsible for obtaining all licenses, authorizations, permits and consents from federal, state and municipal authorities or private property owners that may be required to place and maintain Licensee's Facilities in GTE's conduit(s).
- 9.2 GTE shall not attempt to prevent or delay the granting of any rights-of-way, easements, licenses, authorizations, permits and consents from any federal, state or municipal authorities, or private property owners that may be required by Licensee to place Licensee's Facilities in GTE's conduit(s).
- 9.3 If any right-of-way, easement, license, authorization, permit or consent obtained by Licensee is subsequently revoked or denied for any reason, Licensee's

permission to occupy GTE's conduit(s) shall terminate immediately and Licensee shall promptly remove Licensee's Facilities. Should Licensee fail to remove Licensee's Facilities within thirty (30) days of receiving notice to do so from GTE, GTE shall have the option to remove Licensee's Facilities and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Facilities shall be reimbursed to GTE by Licensee upon demand.

- 9.4 Upon notice from GTE to Licensee that the cessation of the use of any portion of GTE's conduit(s) has been ordered or directed by any federal, state or municipal authority, or private property owner, Licensee's permission to occupy such GTE conduit(s) shall terminate immediately and Licensee promptly shall remove Licensee's Facilities. Should Licensee fail to remove Licensee's Facilities within thirty (30) days of receiving notice to do so from GTE, GTE shall have the option to remove Licensee's Facilities and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby. All costs incurred by GTE to remove Licensee's Facilities shall be reimbursed to GTE by Licensee upon demand by GTE.

10. Placement of Licensee's Facilities.

- 10.1 Licensee shall, at its sole expense, place and maintain Licensee's Facilities in GTE's conduit(s) in accordance with (i) such requirements and specifications as GTE shall from time to time prescribe in writing, (ii) all rules or orders now in effect or that hereafter may be issued by any regulatory agency or other authority having jurisdiction, and (iii) all currently applicable requirements and specifications of the National Electrical Safety Code, and the applicable rules and regulations of the Occupational Safety And Health Act. Licensee agrees to comply, at its sole risk and expense, with all specifications included in Exhibits \_\_ through \_\_ hereto, as may be revised from time to time by GTE.

- 10.2 Licensee's Facilities shall be tagged at each manhole so as to identify Licensee as the owner of the Facilities. The tags shall be of sufficient size and lettering so as to be easily read.

11. Failure of Licensee to Occupy Conduit Space.

Upon approval of a COR, Licensee shall have sixty (60) days in which to begin the placement of Licensee's Facilities in the GTE conduit(s) covered by the COR. If Licensee has not begun placing its Facilities within that sixty (60) day period, Licensee shall so advise GTE with a written explanation for the delay. If Licensee fails to advise GTE of its delay, with a written explanation therefor, or if Licensee fails to act in good

faith by not making a bona fide effort to begin placing its Facilities within the sixty (60) days prescribed by this Section, the previously approved COR shall be deemed rescinded by GTE and Licensee shall have no further right to place Licensee's Facilities pursuant to that COR.

12. Occupancy Fees.

- 12.1 Licensee shall pay to GTE an Occupancy Fee, as specified in Exhibit \_\_ hereto, for each linear foot of innerduct occupied by Licensee's Facilities in GTE's conduit(s). If Licensee's Facilities occupy more than one innerduct, a separate Occupancy Fee shall be paid by Licensee for each innerduct occupied. The Occupancy Fee specified in Exhibit \_\_ hereto is the fee applicable to 1" or 1-1/4" diameter innerduct. GTE reserves the right to charge a higher fee for innerduct of greater diameter. The Occupancy Fee may be increased by GTE from time to time as permitted by law upon sixty (60) days written notice to Licensee.
- 12.2 Occupancy Fees shall become due and payable on the date a COR is approved by GTE for all GTE innerducts identified in that COR on a pro rata basis until the end of the calendar year and thereafter on an annual basis within thirty (30) days of the receipt of a statement from GTE specifying the fees to be paid. Any payment after thirty (30) days shall bear interest at the rate of eighteen percent (18%) per annum or the maximum rate allowed by law, whichever is less.
- 12.3 GTE shall maintain an inventory of the total linear footage of innerduct occupied by Licensee's Facilities in GTE's conduit(s) based upon the cumulative linear footage per innerduct from all CORs approved by GTE. GTE may, at its option, conduct a physical inventory of Licensee's Facilities for purposes of determining the Occupancy Fees to be paid by Licensee under this section. It shall be Licensee's sole responsibility to notify GTE of any and all removals of Licensee's Facilities from GTE's conduit(s). Written notice of such removals (unless they are covered by Section 17 of this Agreement) shall be provided to GTE at least thirty (30) days prior to the removal. Each Notice of Removal shall be in a form specified by GTE. Licensee shall remain liable for all Occupancy Fees until Licensee's Facilities have been physically removed from GTE's conduits.

13. Modifications, Additions or Replacements of Licensee's Facilities.

- 13.1 Licensee shall not modify, add to or replace Licensee's Facilities in any GTE conduit(s) without first notifying GTE in writing of the intended modification, addition or replacement at least thirty (30) days prior to the date the activity is scheduled to begin. The required notification shall include: (1) the date the activity is scheduled to begin, (2) a description of the planned modification, addition or replacement, (3) a representation that the modification, addition or replacement will not require any space other than the space previously designated for Licensee's Facilities, and (4) a representation that the modification, addition or replacement will not impair the structural integrity of the GTE conduit(s)

involved.

13.2 Should GTE determine that the modification, addition or replacement specified by Licensee in its notice will require more space than that allocated to Licensee or will require any modification, replacement or reinforcement of the GTE conduit(s) involved in order to accommodate Licensee's modification, addition or replacement, GTE will so notify Licensee, whereupon Licensee shall be required to submit a COR in compliance with this Agreement in order to obtain authorization for the modification, addition or replacement of Licensee's Facilities.

13.3 Access to GTE's conduit(s) for repairs, modifications, additions, or replacements required in emergency situations shall be governed by the provisions of Section 21 of this Agreement.

14. Unauthorized Occupancy of GTE Conduit.

14.1 It is agreed that a charge equal to five (5) times the amount of the then current Occupancy Fee shall be paid by Licensee to GTE for each unauthorized occupancy of GTE's conduit(s) by Licensee. Such payment shall be deemed liquidated damages and not a penalty. Licensee also shall pay GTE an Occupancy Fee for each unauthorized occupancy accruing from the date the unauthorized occupancy first began. In the event that the date the unauthorized occupancy first began cannot be determined, such date shall be deemed the date of the last physical inventory made in accordance with this Agreement or, if no physical inventory has been conducted, the date the first COR from Licensee was approved in accordance with this Agreement. Licensee also shall pay to GTE all costs incurred by GTE to rearrange Licensee's Facilities that are unauthorized if such rearrangement is required to safeguard GTE's facilities or to accommodate the facilities of another party whose facilities would not have required a rearrangement but for the presence of Licensee's unauthorized facilities. Licensee also shall pay to GTE all costs incurred by GTE to reinforce, replace or modify any GTE conduit(s), which reinforcement, replacement or modification is required as a result of the unauthorized occupancy by Licensee. The Occupancy Fee referenced in this subsection 14.1 shall be determined in the same manner as such a fee would have been determined if the occupancy had been authorized by GTE.

14.2 For purposes of this section, an unauthorized occupancy shall include, but not be limited to:

14.2.1 The presence of Licensee's Facilities in any GTE conduit which conduit is not identified in any COR approved in accordance with this Agreement;

14.2.2 The presence of Licensee's Facilities in any GTE conduit that

occupies more space than that allocated to Licensee by GTE;

- 14.2.3 Licensee's Facilities that are not placed in accordance with the provisions of this Agreement or the appropriate COR issued pursuant to this Agreement;
- 14.2.4 An addition or modification by Licensee to its pre-existing Facilities in any GTE conduit that impairs the structural integrity of that GTE conduit.
- 14.2.5 The presence of facilities in GTE's conduit(s) placed by Licensee that are owned or controlled by and for the use of a party other than Licensee.

15. Modification or Alteration GTE Conduits.

- 15.1 In the event GTE plans to modify or alter any GTE conduit(s) that house Licensee's Facilities, GTE shall provide Licensee notice of the proposed modification or alteration at least fourteen (14) days prior to the time the proposed modification or alteration is scheduled to take place. Should Licensee decide to modify or alter Licensee's Facilities in the GTE conduit(s) to be modified or altered by GTE, Licensee shall so notify GTE in writing. In such event, Licensee shall bear a proportionate share of the total costs incurred by GTE to make the GTE conduit(s) accessible. Licensee's proportionate share of the total cost shall be based on the ratio of the amount of new space occupied by Licensee to the total amount of new space occupied by all of the parties joining in the modification.
- 15.2 In the event GTE moves, replaces or changes the location, alignment or grade of GTE's conduit(s) ("relocation") for reasons beyond GTE's control, Licensee concurrently shall relocate Licensee's Facilities. Licensee shall be solely responsible for the costs of the relocation of Licensee's Facilities.

16. Disclaimer of Warranties.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, GTE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

17. Default and Remedies.

- 17.1 The occurrence of any one of the following shall be deemed a Material Default by Licensee under this Agreement:
  - 17.1.1 Failure by Licensee to pay any fee or other sum required to be paid under the terms of this Agreement and such default continues for a

period of five (5) days after written notice thereof to Licensee;

- 17.1.2 Failure by Licensee to perform or observe any other term, condition, covenant, obligation or provision of this Agreement and such default continues for a period of thirty (30) days after written notice thereof from GTE (provided that if such default is not curable within such thirty (30) day period, the period will be extended if Licensee commences to cure such default within such thirty (30) day period and proceeds diligently thereafter to effect such cure);
  - 17.1.3 The filing of any tax or mechanic's lien against any GTE conduit(s) which is not bonded or discharged within thirty (30) days of the date Licensee receives notice that such lien has been filed;
  - 17.1.4 Licensee's voluntary or involuntary bankruptcy;
  - 17.1.5 Licensee's knowing use or maintenance of Licensee's Facilities in violation of any law or regulation, or in aid of any unlawful act or undertaking;
  - 17.1.6 If any authorization which may be required of the Licensee by any governmental or private authority for the placement, operation or maintenance of Licensee's Facilities is denied or revoked.
- 17.2 In the event of a Material Default, GTE, without any further notice to the Licensee (except where expressly provided for below or required by applicable law) may do any one or more of the following:
- 17.2.1 Perform, on behalf and at the expense of Licensee, any obligation of Licensee under this Agreement which Licensee has failed to perform and of which GTE shall have given Licensee notice, the cost of which performance shall be paid by Licensee to GTE upon demand;
  - 17.2.2 Terminate this Agreement by giving notice of such termination to Licensee and remove Licensee's Facilities and store them in a public warehouse or elsewhere at the expense of and for the account of Licensee without GTE being deemed guilty of trespass or conversion, and without GTE becoming liable for any loss or damages to Licensee occasioned thereby; or
  - 17.2.3 Exercise any other legal or equitable right or remedy which GTE may have.
- 17.3 Any costs and expenses incurred by GTE (including, without limitation, reasonable attorneys' fees) in enforcing this Agreement shall be paid to GTE by Licensee upon demand.

17.4 Upon termination of this Agreement by GTE, Licensee shall remain liable to GTE for any and all fees, other payments and damages which may be due or sustained prior to such termination, all reasonable costs, fees and expenses, including, without limitation, reasonable attorneys' fees incurred by GTE in pursuit of its remedies hereunder, and additional liquidated damages which shall be an amount equal to one full year of Occupancy Fees.

17.5 All rights and remedies of GTE set forth in this Agreement shall be cumulative and none shall exclude any other right or remedy, now or hereafter allowed by or available under any statute, ordinance, rule of court, or the common law, either at law or in equity, or both.

18. Indemnification.

18.1 Licensee shall compensate GTE for the full actual loss, damage or destruction of GTE's property that in any way arises from or is related to this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Facilities).

18.2 Licensee will further indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns, from any and all losses, damages, costs, expenses (including, without limitation, reasonable attorneys' fees), statutory fines or penalties, actions or claims for personal injury (including death), damage to property, or other damage or financial loss of whatever nature in any way arising out of or connected with this Agreement or activities undertaken pursuant to this Agreement (including, without limitation, the installation, construction, operation or maintenance of Licensee's Facilities), except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns. Licensee further indemnifies GTE from subsequent taxes and fees that may be levied by municipalities ROWs in association with these agreements. Such fees that are levied would be in addition to the attachment/occupancy fees reflected in this Agreement. Licensee expressly assumes all liability for actions brought against GTE and GTE's agents, officers, employees and assigns, by Licensee's agents, officers or employees and Licensee expressly waives any immunity from the enforcement of this indemnification provision that might otherwise be provided by workers' compensation law or by other state or federal laws.

18.3 Without limiting any of the foregoing, Licensee assumes all risk of, and agrees to relieve GTE of any and all liability for, loss or damage (and the consequences of loss or damage) to any of Licensee's Facilities placed in any GTE conduit(s) and any other financial loss sustained by Licensee, whether caused by fire, extended coverage perils, or other casualty, except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.

- 18.4 Without limiting the foregoing, Licensee expressly agrees to indemnify, defend and hold harmless GTE and GTE's agents, officers, employees and assigns from any and all claims asserted by customers of Licensee in any way arising out of or in connection with this Agreement or Licensee's Attachments, except to the extent caused by the negligence or willful misconduct on the part of GTE or GTE's agents, officers, employees and assigns.
- 18.5 Notwithstanding anything to the contrary in this Agreement, Licensee further shall indemnify and hold harmless GTE, its agents, officers, employees and assigns from and against any claims, liabilities, losses, damages, fines, penalties and costs (including, without limitation, reasonable attorneys' fees) whether foreseen or unforeseen, which the indemnified parties suffer or incur because of: (i) any discharge of Hazardous Waste resulting from acts or omissions of Licensee or the Licensee's predecessor in interest; (ii) acts or omissions of the Licensee, its agents, employees, contractors or representatives in connection with any cleanup required by law, or (iii) failure of Licensee to comply with Environmental, Safety and Health Laws.
- 18.6 In no event shall GTE be liable to Licensee for any special, consequential or indirect damages (including, without limitation, lost revenues and lost profits) arising out of this Agreement or any obligation arising hereunder, whether in an action for or arising out of breach of contract, tort or otherwise.
- 18.7 Licensee shall indemnify, protect and hold harmless GTE from and against any and all claims for libel and slander, copyright and/or patent infringement arising directly or indirectly by reason of installation of Licensee's equipment in GTE's Ducts pursuant to this Agreement.

19. Insurance.

- 19.1 Licensee shall carry insurance, at its sole cost and expense, sufficient to cover its indemnification obligations as set forth in Section 18 of this Agreement. Such insurance shall include, but not be limited to, coverage against liability due to personal injury or death of persons in the amount of \$500,000 as to any one person and \$1,000,000 as to any one accident; coverage against liability due to property damage in the amount of \$500,000 as to each accident and \$500,000 aggregate; and coverage necessary to fully protect both it and GTE from all claims under any worker's compensation laws that may be applicable.
- 19.2 All insurance required of Licensee under this Agreement shall remain in force for the entire life of this Agreement. The company or companies issuing such insurance shall be approved by GTE and GTE shall be named as an additional insured in each such policy. Licensee shall submit to GTE certificates by each insurer to the effect that the insurer has insured Licensee for all potential liabilities of Licensee under this Agreement, and that it will not cancel or change any policy of insurance issued to Licensee except upon thirty (30) days notice to GTE. In the

event Licensee's insurance coverage is to be cancelled by reason of non-payment of premiums due, GTE shall have the option of paying any amount due and Licensee shall forthwith reimburse GTE the full amount paid by GTE.

19.3 Licensee shall promptly advise GTE in writing of any and all claims for damages, including, but not limited to, damage to property or injury to or death of persons, allegedly arising out of or in any manner related, directly or indirectly, to the presence or use of Licensee's Facilities.

19.4 Licensee shall furnish bond or satisfactory evidence of contractual insurance coverage, the terms of which shall be subject to GTE's approval, in the amount of ten thousand dollars (\$10,000) to guarantee the payment of any sums which may become due to GTE for rentals, inspections or for work performed by GTE for the benefit of Licensee under this Agreement, including the removal of Licensee's equipment pursuant to any of the provisions hereof. All bonds must specify that the GTE be notified thirty (30) days prior to the expiration or cancellation of the policy.

20. Taxes.

Any state or local excise, sales, or use taxes (excluding any taxes levied on income) resulting from the performance of this Agreement shall be borne by the Party upon which the obligation for payment is imposed under applicable law, even if the obligation to collect and remit such taxes is placed upon the other Party. The collecting Party shall charge and collect from the obligated Party, and the obligated Party agrees to pay to the collecting Party, all applicable taxes, except to the extent that the obligated Party notifies the collecting Party and provides to the collecting Party appropriate documentation as GTE requires that qualifies the obligated Party for a full or partial exemption. Any such taxes shall be shown as separate items on applicable billing documents between the Parties. The obligated Party may contest the same in good faith, at its own expense, and shall be entitled to the benefit of any refund or recovery, provided that such Party shall not permit any lien to exist on any asset of the other Party by reason of the contest. The collecting Party shall cooperate in any such contest by the other Party. The other Party will indemnify the collecting Party from any sales or use taxes that may be subsequently levied on payments by the other Party by the collecting Party.

21. Emergency Restoration Procedures.

In the event of an emergency, restoration procedures may be affected by the presence of Licensee's Facilities in GTE's conduit(s). While GTE shall not be responsible for the repair of Licensee's Facilities that are damaged (except by mutual written agreement), GTE shall nonetheless control access to its Conduits if the restoration is to be achieved in an orderly fashion.

21.1 Where GTE and Licensee are involved in emergency restorations, access to GTE's

conduit(s) will be controlled by GTE's Maintenance District Manager or his/her on-site representative according to the following guidelines:

21.1.1 Service Disruptions/Outages

- (a) In the event of service disruptions and/or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with facilities in GTE's conduit(s) as is reasonably safe.
- (b) Where simultaneous access is not possible, access will be granted by GTE on a first come, first served basis.

21.1.2 Service Affecting Emergencies

- (a) In the event of service affecting emergencies not resulting in service disruptions or outages, while exercising its right to first access, GTE shall make all reasonable efforts to grant access to as many other entities with facilities in GTE's conduit(s) as is reasonably safe.
- (b) Where GTE is unable to grant simultaneous access to all other entities with facilities in GTE's conduit(s), access will be granted according to the level of damage to the facilities of each entity and the likelihood that a given level of damage will result in service disruption. Where the likelihood that a service disruption will result is not clearly discernible, access will be on a first come, first served basis.

21.2 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Licensee's Facilities, or any action or failure to act by GTE under this Section 21 shall not constitute a basis for any claim by Licensee against GTE for any damage to Licensee's Facilities or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee.

22. Damage Suspected to Licensee's Facilities Only.

22.1 In the event Licensee receives information that Licensee's Facilities are damaged, Licensee shall notify GTE of said damage at [---TELEPHONE NUMBER---]. This is a 24-hour, 7 days per week notification number. Licensee shall provide GTE all information known to it regarding the damage to Licensee's Facilities.

22.2 In the event GTE receives notice that Licensee's Facilities are damaged, GTE will notify Licensee of said damage by telephone at the Licensee's emergency telephone number. GTE shall provide Licensee all information known to it regarding the damage to Licensee's Facilities.

- 22.3 After the giving of such notice by either Licensee or GTE, Licensee shall be authorized to perform emergency restoration maintenance activities in connection with Licensee's Facilities, subject to the provisions of this Agreement.
- 22.4 Without limiting any other indemnification or hold harmless provisions of this Agreement, Licensee agrees that any decision by GTE regarding access to Licensee's facilities, or any action or failure to act by GTE, appropriately or inappropriately, under this Section shall not be the basis for any claim by Licensee against GTE for any damage to Licensee's Facilities or disruption of Licensee's services, or any other direct or indirect damages of any kind whatsoever incurred by Licensee and Licensee shall indemnify and hold GTE harmless from any such claim.

23. Access to GTE's Manholes/Handholes.

- 23.1 GTE will allow Licensee to audit manholes/handholes that are included in any COR submitted to GTE to confirm usability. Licensee shall give GTE at least fourteen (14) days advance written notice of its desire to audit and shall obtain all authorizations from appropriate authorities required to open the manholes/handholes. GTE shall have the right to have a GTE employee or agent present when its manholes/handholes are being opened. Such GTE employee or agent shall have the authority to suspend Licensee's activities in and around GTE's manholes/handholes if, in the sole discretion of said employee or agent, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees, agents, or contractors. Licensee agrees to reimburse GTE the cost of having GTE's employee or agent present. Such charge shall be GTE's fully loaded labor rates then in effect.
- 23.2 For purposes other than to audit usability, GTE's manholes/handholes shall be opened only as permitted by GTE and only after Licensee has obtained all necessary authorizations from appropriate authorities to open manholes/handholes and conduct work operations therein. GTE shall have the right to have a GTE employee or agent present at any site at which its manholes/handholes are being opened. Such GTE employee or agent shall have the authority to suspend Licensee's work operations in and around GTE's manholes/handholes if, in the sole discretion of said employee or agent, any hazardous conditions arise or any unsafe practices are being followed by Licensee's employees, agents, or contractors. Licensee agrees to reimburse GTE the cost of having GTE's employee or agent present. Such charge shall be GTE's fully loaded labor rates then in effect. The presence of GTE's authorized employee or agent shall not relieve Licensee of its responsibility to conduct all of its work operations in and around GTE's conduit(s) in a safe and workmanlike manner, in accordance with the terms of this Agreement.

24. Abandonment.

Nothing in this Agreement shall prevent or be construed to prevent GTE from abandoning, selling, assigning or otherwise disposing of any GTE conduit(s) or other GTE property used in connection with Licensee's Facilities; provided, however, that GTE shall condition any such sale, assignment or other disposition subject to the rights granted to Licensee pursuant to this Agreement. GTE shall promptly notify Licensee of any proposed sale, assignment or other disposition of any GTE conduit(s) or other GTE property used in connection with Licensee's Facilities.

25. Notices.

Any written notice to be given to a party to this Agreement shall be in writing and given or made by means of telegram, facsimile transmission, certified or registered mail, express mail or other overnight delivery service, or hand delivery, proper postage or other charges prepaid, and addressed or directed to the respective parties as follows:

To Licensee:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

To GTE:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Any notice given by personal delivery shall be deemed to have been given on the day of actual delivery and, if given by registered or certified mail, return receipt requested, on the date of receipt thereof and, if given by facsimile transmission, on the day of transmittal thereof if given during the normal business hours of the recipient and on the next business day if not given during normal business hours.

26. Non-Waiver of Terms and Conditions.

No course of dealing, course of performance or failure to enforce any of term, right, condition or other provision of this Agreement shall constitute or be construed as a waiver of any term, right or condition or other provision of this Agreement.

27. Dispute Resolution.

27.1 Except in the case of (I) a suit, action or proceeding by GTE to compel Licensee to comply with its obligations to indemnify GTE pursuant to this Agreement or (ii) a suit, action or proceeding to compel either party to comply with the dispute resolution procedures set forth in this section, the parties agree to use the following procedure to resolve any dispute, controversy or claim arising out of or relating to this Agreement or its breach.

27.2 At the written request of a party, each party shall designate a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute, controversy or claim arising under this Agreement. The parties intend that these negotiations be conducted by non-lawyer, business representatives. The substance of the negotiations shall be left to the discretion of the representatives. Upon mutual agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence between the representatives for purposes of these negotiations shall be treated as confidential, undertaken for purposes of settlement, shall be exempt from discovery and production, and shall not be admissible in the arbitration described below or in any subsequent lawsuit without the concurrence of all parties. Documents identified in or provided during such negotiations, which are not prepared for purposes of the negotiations, shall not be so exempt and may, if otherwise admissible, be admitted as evidence in any subsequent proceeding.

27.3 If a resolution of the dispute, controversy or claim is not reached within sixty (60) days of the initial written request, the dispute, controversy or claim shall be submitted to binding arbitration by a single arbitrator pursuant to the rules of the American Arbitration Association (AAA), except as hereinafter provided. Discovery in any proceeding before the AAA shall be controlled by the arbitrator and shall be permitted to the extent set forth in this section. Parties may exchange, in any combination, up to thirty-five (35) (none of which may contain subparts) written interrogatories, demands to produce documents and requests for admission. Each party may also take the oral deposition of one (1) witness. Additional discovery may be permitted upon mutual agreement of the parties. The arbitration hearing shall be commenced within sixty (60) days of the demand for arbitration and shall be held in the city where GTE's local offices are located. The arbitrator shall rule on the dispute, controversy or claim by issuing a written opinion within thirty (30) days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

27.4 Each party shall bear its own costs, including attorneys' fees, incurred in connection with any of the foregoing procedures. A party seeking discovery shall reimburse the responding party the cost of reproducing documents (to include search time and reproduction time costs). The fees associated with any arbitration, including the fees of the arbitrator, shall be divided equally between the parties.

## 28. Compliance With Laws.

Notwithstanding anything to the contrary in this Agreement, Licensee shall ensure that any and all activities it undertakes pursuant to this Agreement shall comply with all applicable laws, including, without limitation, all applicable provisions of (I) workers'

compensation laws, (ii) unemployment compensation laws, (iii) the Federal Social Security Law, (iv) the Fair Labor Standards Act, and (v) all laws, regulations, rules, guidelines, policies, orders, permits and approvals of any governmental authority relating to environmental matters and/or occupational safety.

29. Force Majeure.

Except for payment of the Occupancy Fees and other amounts payable under this Agreement, neither party shall have any liability for its delays or its failure in performance due to fire, flood, explosion, pest damage, power failures, strikes or labor disputes, acts of God, the Elements, war, civil disturbances, acts of civil or military authorities or the public enemy, inability to secure raw materials, transportation facilities, fuel or energy shortages, or other cause beyond its control.

30. Assignment.

30.1 The rights and obligations of Licensee under this Agreement shall not be assigned, transferred or sub-licensed, in whole or in part, without the prior written consent of GTE. An assignment, transfer or sub-license of this Agreement by Licensee shall not relieve Licensee of its obligations under this Agreement. Any assignment attempted without the prior written consent of GTE shall be void.

30.2 GTE shall have the right to assign this Agreement and to assign its rights and delegate its obligations and liabilities under this Agreement, either in whole or in part. GTE shall provide notice to Licensee of any assignment which shall state the effective date thereof. Upon the effective date and to the extent of the assignment, GTE shall be released and discharged from all obligations and liabilities under this Agreement.

30.3 Neither this Agreement nor any term or provision hereof, nor any inclusion by reference shall be construed as being for the benefit of any person or entity not a signatory hereto.

30.4 This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

31. Applicable Law.

This Agreement, and the rights and obligations contained in it, shall be governed and construed under the laws of the State of \_\_\_\_\_ without regard to its conflicts of laws provisions.

32. Subsequent Law.

The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines that subsequently may be prescribed by any

federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline. Should any term of this Agreement be determined by a court or other entity with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

33. Headings.

All headings contained in this Agreement are for convenience only and are not intended to affect the meaning or interpretation of any part of this Agreement.

34. Entire Agreement.

The terms and conditions of this Agreement supersede all prior oral or written understandings between the parties and constitute the entire agreement between them concerning the subject matter of this Agreement. There are no understandings or representations, express or implied, not expressly set forth in this Agreement. This Agreement shall not be modified or amended except by a writing signed by the party to be charged.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement through their authorized representatives.

APPENDIX K  
RECIPROCAL COMPENSATION FOR CALL TERMINATION

1. This document describes the reciprocal compensation arrangements between WinStar and GTE for Local Tariff, Toll and Switched Access Services. The Parties shall compensate each other for transport and termination of such traffic at the rates provided in Appendix C and/or the appropriate Parties' Switched Access Tariff.
2. Compensation for Call Termination
  - A. Reciprocal compensation does not apply in a resale environment.
  - B. The following compensation terms shall apply in all cases where WinStar purchases GTE's unbundled Local Switching:
    1. For local intra-switch calls between lines connected to GTE's switch where WinStar has purchased GTE's unbundled Local Switching, the Parties agree to impose no call termination charges on each other. GTE's Local Switching charge will apply as described below where the call is:
      - (a) Originated by WinStar's customer and completed to a GTE customer:
        - (1) (For use of the local switch): Local Switching charge at the originating office will apply to WinStar.
      - (b) Originated by WinStar's customer and completed to the customer of a third party LEC (not affiliated with WinStar) using GTE's unbundled Local Switching:
        - (1) (For use of the local switch): Local Switching charge at the originating office will apply to WinStar.
      - (c) Originated by WinStar's customer and completed to another WinStar's customer using GTE's unbundled Local Switching.
        - (1) (For use of the local switch): Local Switching charge at the originating office will apply to WinStar.
      - (d) Originated by a GTE customer and terminated to WinStar's customer using GTE's unbundled Local Switching.
        - (1) No Local Switching charge will apply.
      - (e) Originated by the customer of a third party LEC (not affiliated with WinStar) using GTE's unbundled Local Switching and terminated to

WinStar's customers using GTE's unbundled Local Switching.

(1) No Local Switching charge will apply to WinStar.

2. For Local inner-switch calls where WinStar has purchased GTE's unbundled Local Switching.

GTE's charges will apply to WinStar described below where the call is:

- (a) Originated from WinStar's end-user customer using GTE's unbundled Local Switching and completed to a GTE customer.
  - (1) (For use of the local switch): Local Switching charge at the originating office.
  - (2) A mileage-based transport charge will apply when WinStar uses GTE's transport.
  - (3) (For call termination): Charges for local interconnection/call termination, when applicable.
- (b) Originated from WinStar's customer using GTE's unbundled Local Switching and completed to a third party LEC (not affiliated with WinStar) customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge at the originating office.
  - (2) A mileage-based transport charge will apply when WinStar uses GTE's transport.
- (c) Originated from WinStar's customer using GTE's unbundled Local Switching and completed to the interconnected network of a third party LEC (not affiliated with WinStar).
  - (1) (For use of the local switch): Local Switching charge at the originating office.
  - (2) A mileage-based transport charge will apply when WinStar uses GTE's transport, and mileage shall be measured between the originating office and the POI of the third party's network.
- (d) Originated from WinStar's customer using GTE's unbundled Local Switching and completed to WinStar's customer using GTE's unbundled Local Switching.

- (1) (For use of the local switch): Local Switching charge at the originating office.
- (2) A mileage-based transport charge will apply when WinStar uses GTE's transport.
- (3) (For use of the local switch): Local Switching charge at the terminating office.
- (d) Originated by a GTE customer and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use at local switch): Local Switching Charge at the terminating office.
  - (2) (For call termination): WinStar shall charge GTE for local interconnection/call termination, when applicable.
- (f) Originated by a customer of a third-party LEC (not affiliated with WinStar) using GTE's unbundled Local Switching and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge at the terminating office.
- (g) Originated by a customer of the interconnected network of a third-party LEC (not affiliated with WinStar) and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge at the terminating office.

3. For intraLATA toll calls where WinStar has purchased GTE's unbundled Local Switching, charges per Unbundled Network Element pricing shall apply as follows:

- (a) Originated by WinStar's customer and completed to a GTE customer.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC (Residual Interconnection Charge) at the originating office.
  - (2) Shared transport charge between the two offices will apply when WinStar uses GTE's transport.
  - (3) (For call termination): End Office Switching charge at the terminating office (Switched Access Rate).

- (4) RIC and CCLC at the terminating office.
- (b) Originated by WinStar's customer and completed to the customer of a third-party LEC (not affiliated with WinStar) using GTE's unbundled Local Switching in a distant end office.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC at the originating office.
  - (2) Shared transport charge between the two offices will apply when WinStar uses GTE's transport.
- (c) Originated by WinStar's customer and completed to the network of a third-party LEC (not affiliated with WinStar) interconnected with GTE's network.
  - (1) (For use of the local switch): Local Switching charge, plus RIC and CCLC, at the originating office.
  - (2) Common transport charge will apply when WinStar uses GTE's transport, and mileage shall be measured between the originating office and the POI of the third party's network.
  - (3) Tandem Switching, where applicable.
- (d) Originated by WinStar's customer and completed by another of WinStar's customers being served through GTE's unbundled Local Switching in a distant office.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC at the originating office.
  - (2) Shared transport charge between the two offices will apply when WinStar uses GTE's transport.
  - (3) (For use of the local switch): Local Switching charge plus RIC and CCLC at the terminating office.
- (e) Originated by a GTE customer and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC at the terminating office.
  - (2) (For call termination): WinStar will charge GTE Local Switching at the terminating office (Switched Access Rate).

- (3) (For call termination): WinStar will charge GTE NIC and CCLC at the terminating office.
- (f) Originated by the customer of a third-party LEC (not affiliated with WinStar) using GTE's unbundled Local Switching in a distant end office and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC at the terminating office.
- (g) Originated by a customer of the network of a third-party LEC (not affiliated with WinStar) interconnected with GTE's network and terminated to WinStar's customer using GTE's unbundled Local Switching.
  - (1) (For use of the local switch): Local Switching charge plus RIC and CCLC at the terminating office.
- 4. For intrastate Switched Access calls where WinStar's is using GTE's unbundled Local Switching for calls originated from or terminated to an IXC for completion:
  - (a) For calls originated from WinStar's customer to WinStar's own IXC switch (or that of an affiliate) for completion.
    - (1) (For use of the local switch): Local Switching charge at the terminating office.
    - (2) Originating RIC and CCLC.
    - (3) GTE will charge WinStar's IXC affiliate the following Switched Access elements on a meet-point basis:
      - a. Local Transport;
      - b. Tandem Switching.
    - (4) WinStar will charge WinStar's IXC affiliate the following Switched Access elements on a meet-point basis:
      - a. Originating RIC and CCLC;
      - b. Local Switching.
  - (b) For calls originating from WinStar's customer to an IXC's switch not affiliated with WinStar.
    - (1) (For use of the local switch): WinStar's customer to an IXC's switch not

affiliated with WinStar.

- (2) Originating RIC and CCLC.
  - (3) GTE shall charge the non-affiliated IXC for the following originating Switched Access on a meet-point basis:
    - a. Local Transport;
    - b. Tandem Switching.
  - (4) WinStar will charge the non-affiliated IXC for the following Switched Access elements on a meet-point basis:
    - a. Originating RIC and CCLC;
    - b. Local Switching.
- (c) For calls terminating to WinStar's end-user customer from WinStar's own IXC switch (or that of an affiliate) for completion.
- (1) (For use of the local switch): Local Switching charge at the terminating office.
  - (2) Terminating RIC and CCLC.
  - (3) GTE will charge WinStar's IXC (affiliate) the following Switched Access elements on a meet-point basis:
    - a. Local Transport;
    - b. Tandem Switching.
  - (4) WinStar will charge WinStar's IXC (affiliate) for the following Switched Access elements on a meet-point basis:
    - a. Terminating RIC and CCLC.
    - b. Local Switching.
- (d) For calls terminating to WinStar's customer from an IXC switch not affiliated with WinStar.
- (1) (For use of the local switch): Local Switching charge at the terminating office.

- (2) Terminating RIC and CCLC.
  - (3) GTE shall charge the IXC for the following terminating Switched Access on a meet-point basis:
    - a. Local Transport;
    - b. Tandem Switching.
  - (4) WinStar will charge IXC for the following Switched Access elements on a meet-point basis:
    - a. Terminating RIC and CCLC;
    - b. Local Switching.
- 5. For interstate Switched Access calls where WinStar is using GTE's unbundled Local Switching for calls originated from or terminated to an IXC for completion:
  - (a) For calls originated from WinStar's customer to WinStar's own IXC switch (or that of an affiliate) for completion.
    - (1) (For use of the local switch): Local Switching charge at the originating office.
    - (2) Originating Residual Interconnection Charge (RIC) and CCL.
    - (3) GTE shall charge WinStar's IXC affiliate for the following originating Switched Access on a meet-point basis:
      - a. Local Transport;
      - b. Tandem Switching.
    - (4) WinStar will charge WinStar's IXC affiliate the following Switched Access elements on a meet-point basis:
      - a. Originating RIC;
      - b. Originating CCLC;
      - c. Local Switching.
  - (b) For calls originated from WinStar's customer to an IXC's switch not affiliated to WinStar.

- (1) (For use of the local switch): Local Switching charge at the terminating office.
  - (2) Originating RIC and CCLC.
  - (3) GTE shall charge the IXC for the following originating Switched Access on a meet-point basis:
    - a. Local Transport;
    - b. Tandem Switching.
  - (4) WinStar will charge IXC the following Switched Access elements on a meet-point basis:
    - a. Originating RIC;
    - b. Originating CCLC;
    - c. Local Switching.
- (c) For calls terminating to WinStar's customer for WinStar's own IXC switch (or that of an affiliate) for completion.
- (1) (For use of the local switch): Local Switching charge at the terminating office.
  - (2) Terminating RIC and CCL.
  - (3) GTE will charge WinStar's IXC (affiliate) the following Switched Access elements on a meet-point basis:
    - a. Local Transport;
    - b. Tandem Switching.
  - (4) WinStar will charge WinStar's IXC affiliate the following Switched Access elements on a meet-point basis:
    - a. Terminating RIC;
    - b. Terminating CCLC;
    - c. Local Switching.
- (d) For calls terminating to WinStar's customer from an IXC switch not affiliated

with WinStar.

- (1) (For use of the local switch): Local Switching charge at the terminating office.
- (2) Terminating RIC and CCL.
- (3) GTE will charge the non-affiliated IXC for the following terminating Switched Access on a meet-point basis:
  - a. Local Transport;
  - b. Tandem Switching.
- (4) WinStar will charge IXC the following Switched Access elements on a meet-point basis:
  - a. Terminating RIC;
  - b. Terminating CCLC;
  - c. Local Switching.

## APPENDIX L PERFORMANCE MEASURES

Pursuant to Article XI of this Agreement, the following terms and conditions shall apply regarding the performance measures. The Parties recognize that these performance measures are new and evolving, and as further evolution is made by GTE, the parties will discuss the changed procedures, including new standard processes and procedures, if any, for the purpose of applying them to and incorporating them in this Agreement.

**GTE's Performance Measures (PMs)** implement standards to measure the quality of services supplied by GTE with respect to pre-ordering, order/provisioning, maintenance and billing that is equivalent in equality to what GTE provides to itself. GTE's PMs contain measures for both GTE and the CLEC with the measures for the CLEC being considered an essential element for GTE meeting customer expectations.

GTE's PMs are conditioned upon a 150 order per month minimum requirement as described below for Service Units, as a threshold for providing Financial Incentives for certain PMs. The 150 order per month requirement for Service Units was developed to provide a statistically valid sample size to measure GTE's performance for CLEC in relationship to the level of performance GTE provides to its own customers. Service Units are defined to include unbundled loops, unbundled ports, resold local service lines, INP ported numbers, and interconnection trunks.

GTE will begin recording of performance data in the first full month in which it receives the first official order from CLEC. GTE's report of performance measures to CLEC, however, will begin after 6 months of data recording; ie., for data recorded in the seventh full month. Each month's report will then be reported as a rolling 3-month result (IE., July's report will actually include May, June, July data). The calculation of CLEC performance will be based on this 3 month rolling average of actual performance unless otherwise specified.

Reporting will be available monthly, or at a longer interval, as requested by CLEC. The details of report delivery shall be agreed upon between CLEC and the appropriate GTE Account Management group.

**Forecasting Performance Measurement** - GTE's PMs are conditioned upon the requirement, as described more fully below, that the CLEC submit timely and accurate forecasts. The Forecasting PM includes provisions that measure the accuracy of the CLEC's forecast by comparing forecasted Service Units to ordered Service Units for the same period.

CLEC shall furnish a quarterly forecast of service order volumes and quantities of resold local services, unbundled network elements, and interconnection trunks on a State-wide basis, identifying these volumes/quantities by month, for each month included in the quarter. These forecasts shall be received by GTE at least one month before the beginning of the quarter covered by the forecast. Should the first month of the next quarterly forecast be greater than ten (10%) percent of the last month of the current quarterly forecast, the CLEC shall notify GTE

promptly of the increased order volume. Notification shall be made to the appropriate GTE Account Management group in order to allow sufficient "lead time" to ensure staffing levels are available to support the increased order volumes.

The CLEC must agree to comply with the requirements of the Forecasting PM as the basis for the application of Financial Incentives described below. If the CLEC chooses not to comply with the Forecasting PM, Financial Incentives will not apply. For purposes of applying Financial Incentives the accuracy of forecasts will be determined at the state level.

The measurement and reporting of GTE's PMs will still be made available as stated above regardless of the CLEC's election for the Forecasting PM.

**Financial Incentives** - When the CLEC agrees to the Forecasting PM described above, Financial Incentives will begin concurrently with reporting of individual CLEC performance data except as specified below for the Pre-Ordering/Ordering/Provisioning and Interconnection PMs.

Financial Incentives will apply to Maintenance/Repair PMs without restriction other than the CLEC's participation in the Forecasting PM.

Financial Incentives will apply to Pre-Ordering/Ordering/Provisioning and Interconnection PMs subject to the CLEC's participation in the Forecasting PM and the required per month ordering threshold. CLEC must place a 150 orders per month minimum for Service Units, by state, for three (3) consecutive months (hereafter the "150-order requirement"). Once the CLEC's order volume reaches the "150-order requirement", a ninety (90) day grace period will begin wherein data will be accumulated and reviewed. At the end of that ninety (90) day grace period, applicable Financial Incentives shall apply. The three (3) consecutive months and the subsequent ninety (90) day grace period may be concurrent with all or part of the beginning six (6) month period after recording of official data begins, between initial order activity and the implementation of performance reporting (ie., month 7 data).

For purposes of applying Financial Incentives to the Forecasting PM, if the CLEC's actual order activity for Service Units in a given month is below the forecast for that month by more than 10%, Financial Incentives will apply only to the incremental Service Units that were forecasted but not ordered; ie., the difference between the actual quantity ordered and the quantity which reflects the forecast less 10%.

For purposes of applying Financial Incentives to the Pre-ordering/Ordering/Provisioning and Interconnection PM, if the CLEC's actual order activity for Service Units in a given month exceeds the forecast for that month by more than 10%, Financial Incentives will not apply.

**Average Non-Recurring Charges** - The averages are calculated by dividing the sum of all non-recurring charges applied to service orders issued by the CLEC to GTE by the total number of orders or the total number of Service Units ordered. These calculations will be made by service activity and service category: Business (Single/Multi-line, Centranet, PBX, Trunks), Residence, etc.. The average Non-Recurring Charges will be separately calculated for field work and non-field work orders. These averages and a weighting factor for field and non-field work will be

calculated during a study period to be mutually agreed between the Parties. The initial average Non-Recurring Charge calculation will occur within three (3) months of the CLEC's initial issuance of official orders. The average Non-Recurring Charge shall be recalculated annually as mutually agreed between the Parties.

Average Recurring Charges - The averages are calculated by dividing the sum of all recurring charges applied to service orders issued by the CLEC to GTE by the total number of orders or Service Units ordered. These averages will be calculated during a study period to be mutually agreed between the Parties. These calculations will be made by service activity and service category, Business, Residence, etc.. The initial average Recurring Charge calculation will occur within three (3) months of the CLEC's initial issuance of official orders. The average Recurring Charges shall be recalculated annually as mutually agreed between the Parties.

**GTE Performance Measures  
with Financial Incentives**

**PRE-ORDERING/ORDERING/PROVISIONING**

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
1	GTE	National	Prompt transmission of Customer Service Record (CSR) Information	85% of CSR's sent to CLEC by the close of business on business day following receipt of request	5% of average NRC incurred by CLEC for the number of CSR's for which the Quality Standard is not met in the reported month
2	GTE	National	Prompt transmission of Local Service Confirmation (LSC)	85% of LSC's sent to CLEC by the close of business on business day following receipt of request	20% of average NRC incurred by CLEC for the lines ordered for which GTE failed to meet the Quality Standard in the reported month
3	GTE	State	Due Date commitments met	Percent of CLEC customer install, transfer, and change service orders for which service is installed by close of business on the committed due date is not more than 2.5% below the percent of GTE customer install, transfer, and change service orders	Waiver of the average NRC installation charges for the number of lines by which GTE fails to meet the Quality Standard in the reported month

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
4	GTE	State	% reporting trouble within 30 days of the date installed	Percent of CLEC customer install, transfer, and change service orders which are followed by a customer trouble report within 30 days of service order completion date is not more than 2.5% worse than the percent GTE customer install, transfer, and change service orders which are followed by a customer trouble report within 30 days of service order completion	One month's average MRC per trouble report exceeding the Quality Standard in the reported month (not to exceed one month's credit per customer line month)
5	GTE	State	Service Order discrepancy: LSR's issued without material errors	80% of LSR's initiated by CLEC's do not contain an order discrepancy or error: 90% in 12 months. Final target - 95%	Payment by CLEC to GTE equal to 20% of the average NRC installation charges for the number of lines which CLEC fails to meet the Quality Standard in the reported month

## INTERCONNECTION

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
1	GTE	State	Trunk orders completed on or before the Committed Due Date	Percent of trunk orders by CLEC completed by GTE on or before the commitment date is not more than 10% below the percent of FG B/D Switched access orders by all ordering companies completed by GTE on or before the commitment date	Waiver of 100% of average NRC for trunks ordered from which GTE failed to meet the Quality Standard in the reported month
2	GTE	National	Firm Order Confirmation (FOC) on time delivery	Percent of trunk orders by CLEC completed by GTE on or before the commitment date is not more than 5% below the percent of FG B/D Switched access by all ordering companies for which GTE sends FOC (within 5 days, or longer, as requested by CLEC)	Waiver of 20% average of average NRC installation for trunks for which GTE failed to meet the Quality Standard in the reported month

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
3	CLEC	National	Service Order discrepancy: ASR's issued without material errors	80% of ASR's initiated by CLEC do not contain material error or result in discrepancy; 90% in 12 months. Final target 95%	Charge equal to 20% of average NRC installation of trunks ordered for which CLEC failed to meet the Quality Standard in the reported month

# MAINTENANCE/REPAIR

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
1	GTE	State	Percent Commitments Met	Percent of CLEC customer Network trouble reports where commitment was met more than 2.5% worse than the percent of GTE's customer Network trouble reports where commitment was met (excluding reports which are cleared CPE, CLEC customer error)	One month's flat rate average MRC per line out of service for which Quality Standard is not met in the reported month
2	GTE	State	Average clearing time - Out of Service (OOS) - Designed	Average repair time (total number of elapsed hours/ minutes for OOS CLEC customer Network trouble reports divided by total number OOS customer Network trouble reports) for CLEC customers is more than 10% of the average repair time for GTE customers (includes only "Designed" services)	One month's flat rate average MRC per line OOS for which Quality Standard is not met in the reported month

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
3	GTE	State	Average clearing time - Out Of Service (OOS) - Non-Designed	Average repair time (total number of elapsed hours/minutes for OOS CLEC customer Network trouble reports divided by total number OOS customer Network trouble reports) for CLEC customers is more than 10% of the average repair time for GTE customers (includes only POTS and circuits which do not require a design)	One month's flat rate average MRC per line OOS for which Quality Standard is not met in the reported month
4	GTE	State	Percent reports per 100 (Failure Frequency)	Percent of CLEC customers making trouble reports (total number of CLEC customer Network trouble reports divided by the total access lines multiplied by 100) is not worse than .5 percent points of the percentage of GTE customers making trouble reports	<p>Within six (6) months of effective date, GTE will have established a minimum access line threshold.</p> <p>One month's flat rate average MRC per line OOS for which Quality Standard is not met in the reported month.</p>

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard	Financial Incentive
5	GTE	State	Percent repeat reports in 30 days	Percent of CLEC customer repeat trouble reports (total number of CLEC customer Network trouble reports which had a previous Network trouble report within the last 30 days divided by the total of customer Network trouble reports multiplied by 100) is not more than 2.5% worse than the percent of GTE customer repeat trouble reports	One month's flat rate average MRC per line OOS for which Quality Standard is not met in the reported month

**Note: Outage Credits: Local Service and Unbundled Network Elements: Outage Credits apply to interruptions of Local Services and Unbundled Network Elements in accordance with applicable state Public Service Commission requirements. If a Local Service or Unbundled Network Element is interrupted, CLEC will be entitled to outage credits. An interruption period begins when CLEC reports to GTE that a Local Service or Unbundled Network Element is interrupted (or GTE has knowledge that an interruption has occurred through service monitoring or other means). An interruption period ends when the Local Service is repaired and returned to the CLEC. A Local Service or Unbundled Network Element is considered to be interrupted when there has been a loss of continuity, the Local Service or Unbundled Network Element does not operate in accordance with the applicable service standards, or it is otherwise unavailable for use by CLEC. This definition is not intended to conflict with State Public Utility Commission requirements.**

## FORECASTING

Issue No.	Obligation	DataLevel	Performance Measurement(PM)	Quality Standard	Financial Incentive
1	CLEC	State	Service Units requirements accurately forecast all volumes for each month contained in the quarterly report.	Volume of CLEC's Service Units requirements in a month is not greater than 10% below the amount forecast by CLEC in it's most recent quarterly forecast (which shall have been made not later than 30 days prior to the quarter in question)	20% of the average NRC for the number of service units below the forecast when the actual volumes are greater than 10% and less than or equal to 30% under forecast. 40% of the average NRC for the number of service units below the forecast when the actual volumes are greater than 30% and less than or equal to 40% under the forecast. 50% of the average NRC for the number of service units below the forecast when the actual volumes are over 40% under the forecast

**GTE Performance Measures  
without Financial Incentives**

**PRE-ORDERING/ORDERING/PROVISIONING**

Issue No.	Obligation	Data Level	Performance Measure (PM)	Quality Standard
1	GTE	National	Average speed of answer per inquiry by GTE's call center within 20 seconds	80% of the time GTE will answer within 20 seconds

**MAINTENANCE/REPAIR**

Issue No.	Obligation	Data Level	Performance Measure (PM)	Quality Standard
1	GTE	State	Average speed of answer per inquiry by GTE's call center within 20 seconds	80% of the time GTE will answer within 20 seconds

## BILLING

Issue No.	Obligation	Data Level	Performance Measure(PM)	Quality Standard
1	GTE	National	Timeliness: Charges billed in current Wholesale Billing period for flat rated services	GTE agrees to make an initial assessment of it's capability to measure the percent of dollar amount due for service orders billed in the current billing period in which the service order was completed and provide such assessment to the CLEC so the Parties can agree on and establish Quality Standards
2	GTE	National	Timeliness: Charges billed within 90 days for Usage charges	GTE agrees to make an initial assessment of it's capability to measure the percent of dollar amount due for Usage charges billed within 90 days from the date the service was rendered and provide such assessment to the CLEC so the Parties can agree on and establish Quality Standards
3	GTE	National	Accuracy: Financial accuracy of local OCC billing. Financial accuracy is the percent of total Net dollars correctly billed	GTE agrees to make an initial assessment of it's capability to measure the percent of total Net dollars accurately billed, excluding bill correcting adjustments resulting from CLEC's inaccurate LSR's and provide such assessment to the CLEC so the Parties can agree on and establish Quality Standards
4	GTE	National	Timeliness: Making corrections and adjustments within agreed time frame	GTE agrees to make an initial assessment of it's capability to measure the percent of all corrections and adjustments made within agreed time frames and provide such assessment to CLEC so the parties can agree on and establish Quality Standards
5	GTE	National	Customer Usage Data: Timeliness: Delivery of all messages delivered within 5 days of when the message was recorded	GTE's initial service performance threshold will be 94% of all messages delivered within 5 days from when the message was recorded by GTE.
6	GTE	National	Customer Usage Data: Accuracy of transmitted customer Usage data	GTE's service delivery threshold will be established at 99% of recorded Usage data correctly transmitted to CLEC.

APPENDIX M  
RATES AND CHARGES FOR 911/E911 ARRANGEMENTS

The following services are offered by GTE for purchase by WinStar, where an individual item is not superseded by a tariffed offering.

	<u>NRC</u>	<u>MRC</u>
1. 9-1-1 Selective Router Map Provided is a color map showing a selective router's location and the GTE central offices that send their 9-1-1 call to it. The selective router and central office information will include CLLI codes and NPA/NXXs served. The map will include boundaries of each central office and show major streets and the county boundary. Permission to reproduce within WinStar for its internal use is granted without further fee. Non-tariffed price.	\$125.00	n/a
2. 9-1-1 Selective Router Pro-Rata Fee/trunk This fee covers the cost of selective routing switch capacity per trunk to cover investment to handle the additional capacity without going to the 9-1-1 districts for additional funding.	\$0	\$100.77
3. PS ALI Software A personal computer software program running on Windows 3.1™ for formatting subscriber records into NENA Verison #2 format to create files for uploading to GTE's ALI Gateway. Fee includes software, warranty and 1 800 872-3356 support at no additional cost.	\$790.80	
4. ALI Gateway Service Interface for delivery of ALI records to GTE's Data Base Management System. This provides a computer access port for WinStar to transmit daily subscriber record updates to GTE for loading into ALI databases. It includes support at 1 800 872-3356 at no additional cost.	\$135.00	\$36.12
5. 9-1-1 Interoffice Trunk This is a tariffed offering, to be found in each state's Emergency Number Service Tariff.	Tariff	Tariff
6. ALI Database This is a tariffed offering, to be found in each state's Emergency Number Service Tariff.	Tariff	Tariff

		<u>NRC</u>	<u>MRC</u>
7.	Selective Router Database per Record Charge Fee for each ALI record used in a GTE selective router. This is a tariffed offering, to be found in each state's Emergency Number Service Tariff.	Tariff	Tariff
8.	MSAG Copy Production of one copy of a 9-1-1 Customer's Master Street Address Guide, postage paid.		
a.	Copy provided in paper format	\$238.50	\$54.00
b.	Copy provided in flat ASCII file on a 3½" diskette	\$276.00	\$36.00

APPENDIX 44A  
GTE TERMS

Pursuant to Section 41 of Article XVII of this Agreement, and subject to all of the terms and conditions of that Section 41, each of the following rates may be replaced or supplemented by the correlative rate set forth in the AT&T Terms listed in Appendix 44B, as and when provided in Section 41 and only until, as long as, and under the conditions prescribed by Section 41.

1. Substitute each rate and charge in Appendix C with the rate or charge that may be indicated for the same items in Appendix 44B.
2. Substitute each rate and charge in Appendix D with the rate or charge that may be indicated for the same items in Appendix 44B.
3. Substitute each price in Appendix E with the price that may be indicated for the same items in Appendix 44B.
4. Substitute each price in Appendix F with the price that may be indicated for the same items in Appendix 44B.

APPENDIX 44B  
TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

Pursuant to Section 41 of Article XVII of this Agreement, and subject to all of the terms and conditions thereof, and after notice as called for in Section 41, the following terms as written in the AT&T Agreement referred to in Section 41 will be substituted for the GTE Terms which are set out in Appendix 44A.

**Main Agreement, § 25.**

**25.        General Terms and Conditions for Resale**

**25.1       Ordering**

25.1.1    Each Party shall transfer the customer's service features and functionalities "as is" to the other Party when requested by a customer. For purposes of this Section 25, an "as is transfer" is the transfer of all the telecommunications services and features available for resale that are currently being provided for the specified account without the requirement of a specific enumeration of the services and features on the LSR.

25.1.2    A Letter of Authorization ("LOA") will be required before Local Services will be provided for resale to a subscriber that currently receives local exchange service from GTE or from a local service provider other than AT&T. Such LOA may be a blanket letter of authorization (Blanket LOA) or such other form as agreed upon by AT&T and GTE. When a Blanket LOA has been provided by AT&T, GTE shall not require an additional disconnect order, LOA or other writing from a customer, or another LEC, in order to process an order for Local Service. Each Party will provide the capability for customers to retain their current phone number in the event that they change local service providers to the extent technically feasible, allowing them to retain all existing features and functionalities.

**Main Agreement, § 25.3**

**25.3       Restrictions on Resale**

To the extent consistent with the applicable rules and regulations of the FCC and the Commission, AT&T may resell all GTE Local Services as defined in GTE's tariffs. The following restrictions shall apply to the resale of Local Services, as described in Section 24 of this Agreement by AT&T: (i) AT&T

APPENDIX 44B  
TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

shall not resell residential services non-residential end users; (ii) AT&T shall not resell Lifeline/Linkup services or any other means-tested service offering to nonqualifying customers; and (iii) AT&T shall resell grandfathered services only to customers qualified to receive such services from GTE.

APPENDIX 44B  
TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

**Attachment 14 (Page 1)**  
**of**  
**AT&T/GTE Pricing Agreement**

**1. Local Service Resale**

The prices charged to AT&T for Local Service shall be calculated using the avoided cost discount applicable in the State determined on the basis of the retail rate charged to subscribers for the telecommunications service requested, excluding the portion thereof attributable to any marketing, billing, collection, and other costs that will be avoided by GTE, as further specified in Appendix 1.

The prices shall be GTE's retail rates applicable on the Effective Date, less the applicable discount. If GTE reduces or increases its retail rates after AT&T executes this Agreement, the applicable discount shall be applied to the reduced or increased retail rates.

**2. Unbundled Network Elements**

The prices charged to AT&T for Network Elements shall be as further specified in Appendix 2.

APPENDIX 44B  
TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

**Attachment 14 (Page 2)**  
**of**  
**AT&T/GTE Pricing Agreement**

**4. Interconnection Services**

GTE will make interconnection arrangements available at all tandem switching and end office switching locations. At the discretion of AT&T, local interconnection may be accomplished via one-way local trunks, or two way local trunks, or AT&T may chose to deliver both local and toll traffic over the same trunk group(s). With respect to the latter scenario, AT&T will have to provide an available Percent Local Usage (PLU) to facilitate billing if it desires application of the local interconnection rate.

Prices and terms for Interconnection Services are specified in Appendix 4.

APPENDIX 44B  
TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

**Attachment 14 (Page 3)**  
**of**  
**AT&T/GTE Pricing Agreement**

**(Appendix 1 - Local Service Resale)**

Beginning with the Effective Date of this Agreement, Resale Services will be priced in accordance with the standards and prices described below.

1. The wholesale rates for Local Service Resale will be calculated based upon the discounts described in Annex 1. Such discounts will be applied against the Retail Rates for each GTE Retail Offering.
  - 1.1 "Retail Rates" are the effective rates a GTE retail customer would have paid GTE under the Retail Offering selected by AT&T, taking into consideration all applicable discounts, including, but not limited to, volume, term and time of day.
  - 1.2 A "Retail Offering" is an individual contract or retail service rate element, or package of rate elements, which GTE offers to its retail customers, including, but not limited to, Grandfathered Services.
2. Nonrecurring "change" or "record" charges, rather than service establishment charges, shall apply for the conversion of existing Customers of GTE services, received either directly from GTE or through another reseller, to AT&T local service.

**(Appendix 1 - Annex 2 - Summary of Wholesale Charges)**

This Annex refers to contract or retail service charges

**Local Services-Residence and Business.**

**Line Charges:** These services should include but not be limited to the exchange line charges, by rate area within the jurisdiction. The price structure should encompass flat rates, measured rate service, one and/or two-party lines and any other subcategory that pertains to that jurisdiction. Line prices that reflect usage for such services as call-packs, extended area service, community calling would be included in this category.

**Usage Charges:** Includes all usage not captured in the line charge, such as messages or minutes in excess of any limited calling-plan.

**Features:** Custom calling features and advanced custom calling features as designed to be compatible with single and multi-line residence and business customer exchange lines. Custom calling features would include month and pay per attempt charges. Associated feature discounts for quantity or other marketing bundles would also be included. (Central office features that support CENTRANET and private line services would be included with each specific service category.).

**Listings:** All forms of directory listings for both local and toll services. Prices for customer listing options such as bold type, dual name, business name and custom advertising for the white and yellow pages are included.

**Non-recurring charges:** Charges associated with the installation, addition, changing or moving of service and equipment for local service.

TERMS ADOPTED FROM THE AT&T ARBITRATION AGREEMENT  
OF AT&T/GTE AGREEMENT

**Attachment 14 (Page 7)**  
**of**  
**AT&T/GTE Pricing Agreement**

**Toll Services:** Charges for any service that has been ordered by the Commission to be open to intraLATA presubscription whether charged on a per minute of use or other basis. This includes the non-recurring and listing charges associated with installation or record affecting work for toll service or toll usage plans and for listings, advertising and associated services in the 800 service directory.

**Operator Services:** Charges associated with, but not limited to, obtaining operator assistance for call placement, busy-line verification and interruption, time and weather and, if priced as such, DA call completion.

**Directory Assistance Services:** Charges associated with the use of directory assistance operators in obtaining local telephone numbers.

**Business Trunks and Service Arrangements:** Charges associated with PBX trunk arrangements for single and multi-line customers. Included are line and usage charges, features and service arrangements for direct inward (and/or outward) dialing.

**ISDN Services:** Charges associated with Integrated Services Digital Network Service for residence and business customers for the transmission of voice, data and packet switched signals.

**CENTRANET Services:** Charges associated with the provision and use of central office based private branch exchange services using equipment located on the premises owned or leased or controlled by GTE and connected by local loops to the premises of the customer or an authorized user.

**Private Line Services:** Charges associated with the provision and use of dedicated facilities between two or more customer locations.

**(Appendix 4 - Reciprocal Compensation)**

5. **Scope.**

This Appendix prescribes the methods and means for reciprocal compensation of interconnect traffic between GTE's and AT&T's networks as well as transiting traffic between AT&T and third party LECs or ILECs.

6. **Interconnecting Local Traffic.**

On each three (3) month anniversary of the Interconnection Activation Date in a Market Area, the Parties will review the minutes of usage for interconnect traffic for the prior quarter. If the minutes of usage imbalance for interconnect traffic for that period is less than ten (10%) percent, neither Party shall charge the other for services provided under this Appendix. If an imbalance is greater than ten (10%) percent, then the appropriate party may bill the other using the rates discussed in this Appendix. In the event of a disagreement regarding reciprocal compensation billing, either Party may invoke the dispute resolution procedures of Attachment 1.

7. **Transiting Traffic.**

AT&T shall pay to GTE a Transiting Service Charge for the use of its Tandem Switching as described in Annex 1 to this Appendix 4.

OF AT&T/GTE AGREEMENT

**Attachment 14 (Page 15)**  
**of**  
**AT&T/GTE Pricing Agreement**

**(Appendix 4 - Annex 1 - Prices for Reciprocal Compensation)**

Upon expiration of the Initial Contract Period, upon written notice by a Party, the Parties agree to renegotiate any or all of the prices, subject to the then applicable pricing standards established by the FCC and/or the state regulatory Commission. A Party may deliver only one request to renegotiate during a Contract Year. If the Parties are unable to agree upon revised prices within sixty (60) days of the request to renegotiate, a Party may invoke the Dispute resolution procedures of Attachment 1. Until such time as the revised prices are agreed to, or established by the decision of the Arbitrator in the dispute resolution procedure, the prices described in this Annex will continue to remain in effect.

Dedicated transport - See Appendix 2 - Annex 1 to this Attachment 14 (Note 1)

Common transport - See Appendix 2 - Annex 1 to this Attachment 14 (Note 1)
