Certification Issues

5-21-03 LWS

I have been informed that the Miami Airport may be providing telephone service beyond its current authority. Pursuant to Rule 25-24.580, Florida Administrative Code, an airport is exempt from the certification requirements of this commission as long as it is only providing telephone service necessary to ensure the safe and efficient transportation of passengers and freight through the airport facility.

Therefore, any services provided to entities such as concession stands, restaurants, or hotels would be outside of the exemption and certification would be required before telephone service can be provided.

Please respond with a list of entities served by the Miami Airport by March 10, 2003. If you have questions, please contact me at 850/413-6582. Thank you.

Airports shall be exempt from the other STS rules due to the necessity to ensure the safe and efficient transportation of passengers and freight through the airport facility. The airport shall obtain a certificate as a shared tenant service provider before it provides shared local services to facilities such as hotels, shopping malls and industrial parks. However, if the airport partitions its trunks, it shall be exempt from the other STS rules for service provided only to the airport facility.

## Miami Airport Communications Services \_ MACS

### 1.0 Executive Summary

Overall we see the number of potential customers in our markets growing at about 8-9% per year, over the next few years. However, short term there is flat to negative growth while the industry is recovering from both the 9/11/02 disaster and the general economic downturn. We see our potential at MIA to grow the customer base over the next few years to double the number of customer served in some capacity. *why*  
*How*

The next big wave is high speed connectivity to the WAN and Internet, and wireless *ok* connectivity. The growth figures in these areas are spectacular. According to Harper's Internet Index, there are now 57 million Internet users in the United States, and that number has doubled in two years. The growth in high speed cable modems and DSL connections is 10 to 20 percent a year over the past few years. Wireless access is still in its infancy, but is expected to double in three years.

We anticipate a large growth in the CUTE line assuming MDAD issues a directive requesting all airline tenants to use CUTE equipment.

*Is this projected based on existing #'s & Harper's prediction.*

## 2.0 Situation Analysis

Before we talk about strategy for future development, we have to understand where we are, and where we've been. Strategy is about playing towards strengths and away from weaknesses. Marketing is about understanding our target markets and target market needs.

Therefore, we begin this section with our market analysis, looking in detail at our target market and market needs. Then we develop our SWOT analysis, looking at strengths, weaknesses, opportunities, and threats. Afterwards we finish up with a look at some other key factors of the present situation.

### 2.1 Market Summary

MACS focuses on SATS tenants in Miami-Dade Airport, with special focus on the airlines and the CUTE (Common Use Terminal Equipment) customers.

We have broken our markets into groups according to standard classifications used by the former company, SATS (Shared Airline Tenant Services) and CUTE.

Exact definitions of these market segments are not necessary for our marketing planning purposes here; general definitions will suffice. We know SATS customers are users of *our* <sup>your</sup> voice and/or data networks, wanting high-end systems options; people who rely on mission critical networks. We also know that ~~our~~ CUTE customers tend to be smaller airlines with no permanent gate locations, are more likely to need and want hand-holding, and more likely to pay for it.

### 2.1.1 Market Demographics

The CUTE Services opportunity at MIA are an important market segment. Our estimate in this plan for the CUTE Services in our market service area is based on an analysis of the total airlines at MIA verses the total number of airlines and the multiple construction projects. It is also assuming MDAD backs the wholesale usage of CUTE in place of the existing dedicated airlines terminal equipment.

CUTE Services include several options, some of which we do not offer today. For our plan, all options will need to be explored to fully expand the service within MIA including but not limited to the billing method.

SATS in our market includes virtually any business with a retail, office, airline or professional location inside MIA that requires voice and data services. We estimate ?? such businesses in our market area.

Pedro we need to  
Discuss.  
What will happen w/  
Cute Bid hits the street.  
Will nextira play a role ..

### 2.1.2 Market Needs

Our target customers are on average more dependent on reliable information technology than any other business. They care more about reliable service and confidence than about the rock-bottom lowest price. They don't want to rely solely on their own expertise, so they choose to deal with us instead, with our promise of service and support when needed.

Our standard customers will be voice and data installations, with networks needs, and will generally be smaller systems than the average large business. Telephone, fax modems, voicemail, and data network connections are likely system component additions they will desire. They will run their own applications.

It's important that we realize we won't be selling to the price-oriented buyers. We'll be able to offer an attractive proposition to the service-oriented and security-oriented buyers only. Our customers prefer to focus on what they do best - run airlines, and are looking to outsource their communications requirements.

Our target SATs are very dependent on reliable information technology. They use their computers for a complete range of communications within the business and outside of the business, and for personal productivity and as such need reliable networks on both LANS and WANS. Most are not, however, large enough to have dedicated computer personnel such as the MIS departments in large businesses to deal with network issues. They also require voice capabilities. Ideally, they come to us for a long-term alliance, looking to us for reliable service and support to substitute for their in-house people. These are not businesses that want to shop for rock-bottom prices through the bid process. They want to be sure they have reliable providers of expertise. We will need to offer more options to these customers rather than just a rental agreement.

Our standard CUTE will be 1-5 unit installations, critically dependent on LANs, WANs, and the terminal equipment itself. Back-up, training, installation, and ongoing support are very important. They require immediate repair for problems. However, there does exist a desire by the larger airlines to pursue the CUTE environment which allows flexibility in their operations.

### 2.1.3 Market Trends

The SATS customers are accustomed to buying equipment directly from vendors who visit their offices. They expect the copy machine vendor, office products vendors, and office furniture vendors, as well as the local graphic artist, freelance writer, or whoever, to come visit the office to make their sales. They understand leasing of equipment, and maintenance contracts for service. They do not seem well versed in the needs to rent equipment, advantages, etc.

CUTE customers are used to paying license fees for the software used in terminals. They are not used to rental equipment.

All MIA customers are faced with the same problem: a reduction in revenue and a needed reduction in expenses. The current trend in marketing to any airline customer or related business is to assist them through this slow down period in reducing expenses without jeopardizing service and reliability.

### 2.2 SWOT Analysis

(Strengths, Weaknesses, Opportunities, Threats)

As we look at our SWOT analysis to follow, we are in a sustainable overall position. We have strengths to balance our weaknesses, particularly our knowledge of what our customers need in terms of connectivity, the Internet, LANs, voice products, and CUTE services. We also have some attractive opportunities in these same areas of maintenance service. However, we have an inherent weakness in competing against price-oriented competition from the major vendors.

#### 2.2.1 Strengths

- Regional Bell Operating Companies*
1. Knowledge: Our competitors are RBOCS and interconnects, pushing boxes and base telco services. We know systems, networks, connectivity, infrastructure, all the MIA and county issues.
  2. Relationship selling: We get to know our customers, one by one. Our on site sales/marketing force maintains this relationship. The MDAD relationship can only assist in these relationships.
  3. History: We've been at MIA forever. We have loyal customers. We are local.
  4. Service: We are a proven vendor, and well respected at MIA.

#### 2.2.2 Weaknesses

1. Costs: The competition has better economics for both boxes and telco services. Their per-unit costs of selling are quite low as compared to MDAD. They aren't offering what we offer in terms of knowledgeable selling, but their cost per dollar of sales are much lower.
2. Price and volume: The other players pushing boxes can afford to sell for less. Their base line costs are less and they have volume buying with the main vendors.
3. Brand power: Take one look at their full-page advertising in most local publications, their name recognition through television advertising, and their local sponsorship of events. We can't match that. We don't have the name that flows into big time advertising.

## Miami Airport Communications Services \_ MACS

---

### 2.2.3 Opportunities

1. Temporary Service: With the vast amount of construction going on, it may be beneficial for organizations to rent equipment on a short term basis.
2. CUTE: More airlines are recognizing the value of CUTE services at other airports. They are additional services from SITA that we need to pursue for MIA to increase our sales position with the larger airlines.
3. Equipment Sales: Some tenants will never rent equipment, they will only purchase capital items either with cash or through leasing. The opportunity exists for MACS to sell equipment to tenants. We may decide to accomodate them.
4. Service: As our target market installs equipment purchased from us or other vendors, we are in a great position to service the equipment with very little incremental costs. Our business model focuses on service.
5. Network Access Service: MACS should explore selling T-1, PRI and DSL type services to airport tenants. The issue should not just be pricing, but the opportunity to sell the service as a fully redundant network. That is something other providers can not offer at a reasonable price.

### 2.2.4 Threats

1. Economic Conditions: The economic conditions brought about with the recession and the September 11th attack has generated an overall downturn in the travel industry.
2. The lower price competitors: Most competitors will be in the position to offer both equipment and services at a lower price.
3. Rental Customer Defections: As rental contracts expires, some customers will not want to renew the rentals at the current rate. They feel they have paid enough to purchase the equipment, and the additional concept of continuing to pay for cable is not appealing.

*How do we  
propose fixing this!*

## 2.3 Competition

Our long tenure at MIA indicate that our SATS customers consider price but they would buy based on quality customer support and service if the offerings were positioned correctly. Price is the message they're exposed to again and again; they have been trained to shop on price. We have very good indications that many would willingly pay 5-10% more for a relationship with a long-term vendor who provides quality service and support. They end up in the box-pusher/service provider channels because they aren't aware of the alternatives that in the past we have not be willing to offer.

Service availability is also very important. The tenants tend to want immediate solutions to problems. Consequently, they can be subjected to high-pressure, undertrained salespeople who may not be able to factor in all of a customer's needs and make promises that are not delivered.

The CUTE buyers understand the concept of service and support, and are more likely to pay for it when the offering is clearly stated.

There is no doubt that we compete more against all the service providers (BellSouth, Worldcom, etc.) than against other box pushers. We need to effectively campaign against the idea that businesses should buy equipment from vendors that don't needed onsite service, support, and training.

## 2.4 Products Offered

In SATS, we support one main line today, rental of voice and data equipment.

We need to expand these offerings to include three main lines:

- \*Purchase of voice and data equipment, either with cash or leasing.
- \*Maintenance of voice and data equipment within standard product lines regardless of the purchasing location or vendor
- \*New service rates for ports and cabling infrastructure.

In CUTE, we offer a package that includes both the terminal equipment and the necessary software. We need to investigate other options of pricing for usage, perhaps on a per ticket basis. We also need to investiagte offering a different wireless product suite to customers.

In all cases, customers can receive training on a going forward basis for a price. We offer all move, add and change services for both voice and data.

*Pedro  
- want  
Orlando's  
pricing  
structure.*

### 2.5 Keys to Success

The main key to success with SATS and CUTE customers is positioning the service clearly. Many potential buyers would prefer our offering to the competition if only they possessed adequate information to conduct a value-added cost/benefit analysis placing a high value on service and redundancy.

Word of mouth is critical in this segment. We will have to make sure that once we gain a customer, we never lose them. To help accomplish this, we must work to reinvigorate relationships through successful contact marketing, among other means. We must always remember to sell the MACS services, not the final product. They have to understand they are taking on a relationship with MACS, not just buying boxes.

### 2.6 Critical Issues

1. The most obvious critical issue is whether we can get over the price-oriented competition and sell our customers the idea of comparing us for the security and reliability we offer. Will our customers be willing to pay for what they need, or will they be led astray by the price-oriented positioning?
2. The second critical issue is whether or not we can redefine our business to emphasize the service and support our customers ultimately need. Can we stop focusing on price and selling equipment as a "me too"? We need to make that happen.
3. Issue number three is fulfilling the promise. None of what we're saying is any good unless we can deliver on it. Do we provide excellence in training, fulfillment, installation, and customization? We're promising to be a superior service provider. Are we?
4. Flexibility. In the past, we have not been flexible with our offerings or our pricing. We must, to a certain extent, view customers on one by one basis and assist them in solving their business problems.

### 3.0 Marketing Strategy

MACS will change its focus to differentiate itself from competitors and improve the business by satisfying the real need of the SATS and CUTE customers for reliable information technology including hardware and all related services.

### 3.1 Mission

MACS is built on the assumption that the management of local business units views information technology for business like legal advice, accounting, graphic arts, and other bodies of knowledge, in that it is not inherently a do-it-yourself prospect. Smart business people who aren't communications experts need to find quality vendors of reliable hardware, software, service, and support. They need to use these quality vendors as they use their other professional service suppliers, as trusted allies.

MACS is such a vendor. It serves its clients as a trusted ally, providing them with the loyalty of a business partner and the economics of an outside vendor. We make sure that our clients have what they need to run their businesses as well as possible, with maximum efficiency and reliability and to focus on their core strengths. Most of our tenants applications are mission critical, so we give our clients the assurance that we will be there when they need us.

### 3.2 Marketing Objectives

We need to focus our offerings on any airport tenant as the key market segment we should own. This means any tenant at any property owned by MDAD and leased to customers. Our values - training, installation, service, support, knowledge - are more clearly differentiated in this segment.

As a corollary, the CUTE market is also appropriate. We want to compete for all airlines regardless if they have in house systems by offering additional services they may not be able to employ due to their corporate limitations.

### 3.3 Financial Objectives

1. Increase our customer base by 45% over a five year period.
2. Increase sales revenues by 38% over a five year period.
3. Increase our CUTE offering to 50% of the total revenues.

*How if they are only here for 18 months*

### 3.4 Target Markets

*yes*

We cannot survive just waiting for the customer to come to us. Instead, we must get better at attracting the specific tenants whose needs match what we have to offer. Focusing on tenants prior to their arrival at MIA is the key to our future.

Therefore, we need to finely craft our marketing message and our product offerings. We need to develop our message, communicate it, and make good on it.

### 3.5 Positioning

For tenants who need reliable systems and can't afford their own full-time support employees, MACS is their strategic voice and data ally. Unlike the our competitors that sell equipment and telco services, MACS is an ally to our clients' businesses, and offers them a full range of services from installation to maintenance, support, and training. One single point of contact for any communication issue.

For CUTE customers we offer the flexibility of gate information, consistent pricing, and emergency service not offered by anyone in the area.

### 3.6 Marketing Strategy Pyramid

We must differentiate ourselves from the competition. We need to establish our business as a clear and viable alternative for our target market, to the price-only kind of buying. We do this by promoting our value added resources.

We've developed two strategy pyramids, each based on one main fundamental strategy. The first strategy is about focusing on service and support, and the second strategy is about focusing on customer relationships instead of products. Each is explained in greater detail.

### 3.6.1 Focus on Service and Support

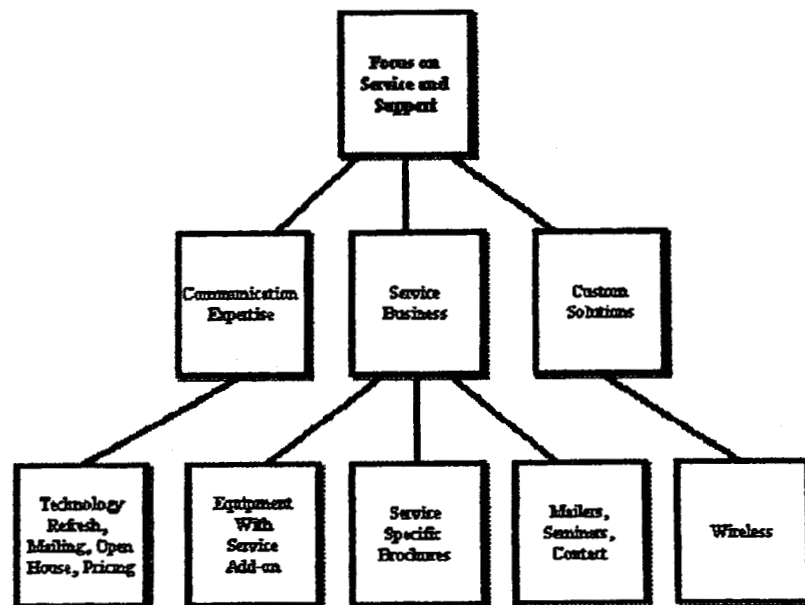

Our first pyramid, shown in the following illustration, is under the main strategy point of focusing on service and support instead of brand names and equipment.

As the illustration shows, our first tactic under that strategy is related to communicating expertise. The information highway is booming and reliability is key everywhere in our target market. Our competitors simply can't match us for going to our customers' locations and solving their communications problems. This is an excellent example of something we can give that our competitors can't, and our customers want. Our specific programs for this tactic include our technology refresh program, regular mailers to our customers, semi-annual open houses, and our revised pricing options

Our second tactic is to service as a line of business. Programs include, <sup>ins</sup> sell equipment to the customer with service add on, and developing sales and marketing programs intended to sell this type of service as the core of our business. This includes more mailers, a new price list, and program outlines and materials.

Finally, the third tactic is providing custom solutions. This generally links to our growing experience with applications that our customers utilize. Our only current sales and marketing program for this will be the airport wireless network for our customer's customer, the passenger.

### 3.6.2 Focus on Relationships

Our second pyramid, shown in the following illustration, is under the main strategy point of focusing on customer relationships. We need to be strategic allies to our customers and be their experts in communications systems, in a way that none of our competitors can ever hope to match.

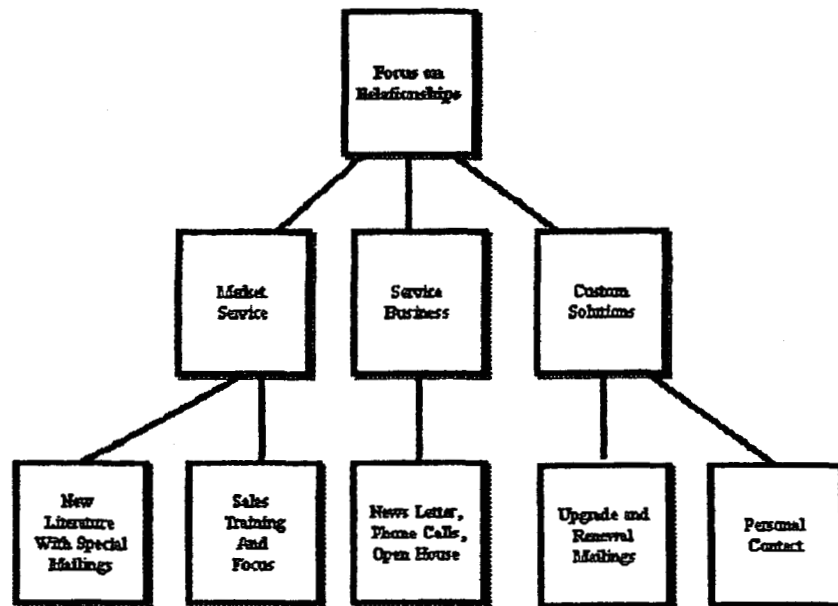

This second pyramid has three main tactics:

The first tactic shown is about marketing the services, not the product. We all know what that means, that we should be emphasizing the relationship with us at MACS, instead of the brand-name on the packages such as BellSouth or Worldcom. We can't sell the brand names better than the others, but we can sell ourselves and the important differences we offer. Related programs include the complete re-creation of our company literature, additional sales training, and special mailers to our customers.

The second tactic is to make sure we have more customer contact. We can't afford to sit back like a large competitor and wait for our customers to come to us. We need to send mailings, emails, and telephone calls to make sure things are going right for them. Do they need additional voice or data services? A lot of customers do, and they're grateful for our reminders. Programs for this tactic include regular news letters about technology, open houses, and end user training. Being proactive will give us an edge over our competitors.

The third and final tactic is maintain our customer base. We work hard to find our customers, and our financial analysis shows that the most economic way to increase revenue is by focusing on our existing customers instead of finding new customers. That's new products, upgrades, and additional services. Planned programs for this tactic include upgrade mailings, service contract mailings, and personal contact.

### **3.7 Marketing Mix**

A core element of our marketing strategy is a change in the marketing mix. In terms of promotion, we need to sell our company as a differentiated strategic ally, not just our products. In price, we need to remain slightly higher than the competition and we need to be able to defend that. Our product marketing has to recognize more that our service and our relationship is the key to our future product marketing. We sell a relationship more than products.

### 3.8 Marketing Research

Research is an integral step in developing any marketing plan. We definitely need to know more about our customers. In the past we've been too distant, and perhaps too quick, to just guess about our customers, rather than conducting real research. For this plan we need to develop two new lines of market research:

1. Primary research on our own customer base. This doesn't have to be elaborate, but we do need to know more about our existing customers. Random telephone calls, through-the-mail surveys, and on site surveys may be appropriate. What do our customers think about us? How do they grade our services?
2. Secondary research on the Internet and in published magazines, etc. We think it's time to establish a process for going through published research to find out what's available about buying patterns and demographics, business needs, etc., for our main target users. We think there is a lot of information already available on these types, and much of it is readily available for a little bit of research.

#### 4.0 Financials

As the following details show, we need to improve our the number of customers and gross revenues. The business has been trending downward because we've been caught in price competition and current economic conditions. We need to reverse that trend.

#### 4.1 Sales Forecast

The \$2,231,000 sales forecast is shown in detail in the tables and charts below. This represents a modest 9% increase over the present year. We believe it is a conservative forecast, and we are sure we can make our numbers this year as a result of more effective marketing.

The data shows that we are not able to attribute our sales in any significant way to our sales and marketing program.

This doesn't indicate a problem with the plan or our implementation; it is just a fact of life. Much of our marketing activity generates sales in ways that don't allow us the luxury of tying it back directly to a specific program.

## 5.0 Controls

1. Tracking and follow-up: Will we have the discipline, as an organization, to track results of the marketing plan and make sure that we implement?
2. Market segment focus: How can we be sure we have the discipline to maintain the focus?
3. Saying no: Can we say no to special deals that take us away from the target focus? Can we say no to unprofitable deals? Should we say no to profitable deals?

## 5.1 Implementation

*When will I see A flyer.*

Bill is in charge of the overall plan which includes the new services promotional flyer. We will be sending this out to all tenants. This is an all-year ongoing project so we don't list specific dates, just starting in April and ending at the end of November. Bill is also responsible managing the marketing plan.

- Holly, as Sales Support Consultant, will have some specific programs as well as the sales goals. We expect to see an increase in site visits by the end of May, and at least three new accounts by the end of the following month. Holly will also be managing any mailing programs we implement, with several specific milestones included.
- Sherri, as Network Consultant, will be managing any seminar programs we design for prospective clients. Sherri will also be responsible for keeping both the internal and external price lists up to date and investigating, from a technical perspective, any new product offering we may decide to pursue.

### 5.2 Marketing Organization

MACS is a small service of MDAD.

Bill, Account Manager, is responsible for general management. He specifically is responsible for sales and marketing as the lead of the organization.

Holly, our Sales Support Consultant, is responsible for managing the in-house calls, service requests, and customer contacts. We will also put any mailing programs under Holly because they must be carefully coordinated with the follow-up by either marketing or operations.

Sherri, our Network Consultant, will be responsible for marketing programs including price lists, sales literature, MDAD pricing, technical support, new product review, etc.

### **5.3 Contingency Planning**

1. We need to watch our results very carefully. We may need to overall the way we offer products and the type of services we offer. It isn't a bad option, to think that we might be able to avoid the straight competition with the major players by focusing more on our true value.
2. It's possible that the value-added position without hardware rentals could be a better way to go. We have to watch how the customer react and the possible rental revenue decline.

**HOME                      RULE  
AMENDMENT      ARTICLE  
VIII, SECTION 11 FLORIDA  
CONSTITUTION      1885  
ARTICLE VIII, SECTION 6  
FLORIDA CONSTITUTION  
1968**

**DADE COUNTY, HOME RULE CHARTER.**

(1) The electors of Dade County, Florida, are granted power to adopt, revise, and amend from time to time a home rule charter of government for Dade County, Florida, under which the Board of County Commissioners of Dade County shall be the governing body. This charter:

(a) Shall fix the boundaries of each county commission district, provide a method for changing them from time to time, and fix the number, terms and compensation of the commissioners, and their method of election.

(b) May grant full power and authority to the Board of County Commissioners of Dade County to pass ordinances relating to the affairs, property and government of Dade County and provide suitable penalties for the violation thereof; to levy and collect such taxes as may be authorized by general law and no other taxes, and do everything necessary to carry on a central metropolitan government in Dade County.

(c) May change the boundaries of, merge, consolidate, and abolish and may provide a method for changing the boundaries of, merging, consolidating and abolishing from time to time all municipal corporations, county or district governments, special taxing districts, authorities, boards, or other governmental units whose jurisdiction lies wholly within Dade County, whether such governmental units are created by the Constitution or the Legislature or otherwise, except the Dade County Board of County Commissioners as it may be provided for from time to time by this home rule charter and the Board of Public Instruction of Dade County.

(d) May provide a method by which any and all of the functions or powers of any municipal corporation or other governmental unit in Dade County may be transferred to the Board of County Commissioners of Dade County.

(e) May provide a method for establishing new municipal corporations, special taxing districts, and other governmental units in Dade County from time to time and provide for their government and prescribe their jurisdiction and powers.

(f) May abolish and may provide a method for abolishing from time to time all offices provided for by Article VIII, Section 6, of the Constitution or by the Legislature, except the Superintendent of Public Instruction and may provide for the consolidation and transfer of the functions of such offices, provided, however, that there shall be no power to abolish or impair the jurisdiction of the Circuit Court or to abolish any other court provided for by this Constitution or by general law, or the judges or clerks thereof although such charter may create new courts and judges and clerks thereof with jurisdiction to try all offenses against ordinances passed by the Board of County Commissioners of Dade County and none of the other courts provided for by this Constitution or by general law shall have original jurisdiction to try such offenses, although the charter may confer appellate jurisdiction on such courts, and provided further that if said home rule charter shall abolish any county office or offices as authorized herein, that said charter shall contain adequate provision for the carrying on of all functions of said office or offices as are now or may hereafter be prescribed by general law.

(g) Shall provide a method by which each municipal corporation in Dade County shall have the power to make, amend or repeal its own charter. Upon adoption of this home rule charter by the electors this method shall be exclusive and the Legislature shall have no power to amend or repeal the charter of any municipal corporation in Dade County.

(h) May change the name of Dade County.

(i) Shall provide a method for the recall of any commissioner and a method for initiative and referendum, including the initiation of and referendum on ordinances and the amendment or revision of the home rule charter, provided, however, that the power of the Governor and Senate relating to the suspension and removal of officers provided for in this Constitution shall not be impaired, but shall extend to all officers provided for in said home rule charter.

(2) Provision shall be made for the protection of the creditors of any governmental unit which is merged, consolidated, or abolished or whose boundaries are changed or functions or powers transferred.

(3) This home rule charter shall be prepared by a Metropolitan Charter Board created by the Legislature and shall be presented to the electors of Dade County for ratification or rejection in the manner provided by the Legislature. Until a home rule

charter is adopted the Legislature may from time to time create additional Charter Boards to prepare charters to be presented to the electors of Dade County for ratification or rejection in the manner provided by the Legislature. Such charter, once adopted by the electors, may be amended only by the electors of Dade County and this charter shall provide a method for submitting future charter revisions and amendments to the electors of Dade County.

(4) The County Commission shall continue to receive its pro rata share of all revenues payable by the state from whatever source to the several counties and the State of Florida shall pay to the Commission all revenues which would have been paid to any municipality in Dade County which may be abolished by or in the method provided by this home rule charter; provided, however, the Commission shall reimburse the comptroller of Florida for the expense incurred, if any, in the keeping of separate records to determine the amounts of money which would have been payable to any such municipality.

(5) Nothing in this section shall limit or restrict the power of the Legislature to enact general laws which shall relate to Dade County and any other one or more counties in the State of Florida or to any municipality in Dade County and any other one or more municipalities of the State of Florida, and the home rule charter provided for herein shall not conflict with any provision of this Constitution nor of any applicable general laws now applying to Dade County and any other one or more counties of the State of Florida except as expressly authorized in this section nor shall any ordinance enacted in pursuance to said home rule charter conflict with this Constitution or any such applicable general law except as expressly authorized herein, nor shall the charter of any municipality in Dade County conflict with this Constitution or any such applicable general law except as expressly authorized herein, provided however that said charter and said ordinances enacted in pursuance thereof may conflict with, modify or nullify any existing local, special or general law applicable only to Dade County.

(6) Nothing in this section shall be construed to limit or restrict the power of the Legislature to enact general laws which shall relate to Dade County and any other one or more counties of the State of Florida or to any municipality in Dade County and any other one or more municipalities of the State of Florida relating to county or municipal affairs and all such general laws shall apply to Dade County and to all municipalities therein to the same extent as if this section had not been adopted and such general laws shall supersede any part or portion of the home rule charter provided for herein in conflict therewith and shall supersede any provision of any ordinance enacted pursuant to said charter and in conflict therewith, and shall supersede any provision of any charter of any municipality in Dade County in conflict therewith.

(7) Nothing in this section shall be construed to limit or restrict the power and jurisdiction of the Railroad and Public Utilities Commission or of any other state agency, bureau or commission now or hereafter provided for in this Constitution or by general law and said state agencies, bureaus and commissions shall have the same powers in Dade County as shall be conferred upon them in regard to other counties.

(8) If any section, subsection, sentence, clause or provision of this section is held invalid as violative of the provisions of Section 1, Article XVII of this Constitution the remainder of this section shall not be affected by such invalidity.

(9) It is declared to be the intent of the Legislature and of the electors of the State of Florida to provide by this section home rule for the people of Dade County in local affairs and this section shall be liberally construed to carry out such purpose, and it is further declared to be the intent of the Legislature and of the electors of the State of Florida that the provisions of this Constitution and general laws which shall relate to Dade County and any other one or more counties of the State of Florida or to any municipality in Dade County and any other one or more municipalities of the State of Florida enacted pursuant thereto by the Legislature shall be the supreme law in Dade County, Florida, except as expressly provided herein and this section shall be strictly construed to maintain such supremacy of this Constitution and of the Legislature in the enactment of general laws pursuant to this Constitution.

# **MIAMI-DADE COUNTY HOME RULE CHARTER**

## **PREAMBLE**

We, the people of this County, in order to secure for ourselves the benefits and responsibilities of home rule, to create a metropolitan government to serve our present and future needs, and to endow our municipalities with the rights of self determination in their local affairs, do under God adopt this home rule Charter.

## CITIZENS' BILL OF RIGHTS

- (A). This government has been created to protect the governed, not the governing. In order to provide the public with full and accurate information, to promote efficient administrative management, to make government more accountable, and to insure to all persons fair and equitable treatment, the following rights are guaranteed:

1. **Convenient Access.** Every person has the right to transact business with the County and the municipalities with a minimum of personal inconvenience. It shall be the duty of the County Manager and the Commission to provide, within the County's budget limitations, reasonably convenient times and places for registration and voting, for required inspections, and for transacting business with the County.

2. **Truth in Government.** No County or municipal official or employee shall knowingly furnish false information on any public matter, nor knowingly omit significant facts when giving requested information to members of the public.

3. **Public Records.** All audits, reports, minutes, documents and other public records of the County and the municipalities and their boards, agencies, departments and authorities shall be open for inspection at reasonable times and places convenient to the public.

4. **Minutes and Ordinance Register.** The Clerk of the Commission and of each municipal council shall maintain and make available for public inspection an ordinance register separate from the minutes showing the votes of each member on all ordinances and resolutions listed by descriptive title. Written minutes of all meetings and the ordinance register shall be available for public inspection not later than 30 days after the conclusion of the meeting.

5. **Right to be Heard.** So far as the orderly conduct of public business permits, any interested person has the right to appear before the Commission or any municipal council or any County or municipal agency, board or department for the presentation, adjustment or determination of an issue, request or controversy within the jurisdiction of the governmental entity involved. Matters shall be scheduled for the convenience of the public, and the agenda shall be divided into approximate time periods so that the public may know approximately when a matter will be heard. Nothing herein shall prohibit any governmental entity or agency from imposing reasonable time limits for the presentation of a matter.

6. **Right to Notice.** Persons entitled to notice of a County or municipal hearing shall be timely informed as to the time, place and nature of the hearing and the legal authority pursuant to which the hearing is to be held. Failure by an

individual to receive such notice shall not constitute mandatory grounds for cancelling the hearing or rendering invalid any determination made at such hearing. Copies of proposed ordinances or resolutions shall be made available at a reasonable time prior to the hearing, unless the matter involves an emergency ordinance or resolution.

7. **No Unreasonable Postponements.** No matter once having been placed on a formal agenda by the County or any municipality shall be postponed to another day except for good cause shown in the opinion of the County Commission, the municipal council or other governmental entity or agency conducting such meeting, and then only on condition that any person so requesting is mailed adequate notice of the new date of any postponed meeting. Failure by an individual to receive such notice shall not constitute mandatory grounds for cancelling the hearing or rendering invalid any determination made at such hearing.

8. **Right to Public Hearing.** Upon a timely request of any interested party a public hearing shall be held by any County or municipal agency, board, department or authority upon any significant policy decision to be issued by it which is not subject to subsequent administrative or legislative review and hearing. This provision shall not apply to the Law Department of the County or of any municipality, not to any body whose duties and responsibilities are solely advisory.

At any zoning or other hearing in which review is exclusively by certiorari, a party or his counsel shall be entitled to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts. The decision of any such agency, board, department or authority must be based upon the facts in the record. Procedural rules establishing reasonable time and other limitations may be promulgated and amended from time to time.

9. **Notice of Actions and Reasons.** Prompt notice shall be given of the denial in whole or in part of a request of an interested person made in connection with any County or municipal administrative decision or proceeding when the decision is reserved at the conclusion of the hearing. The notice shall be accompanied by a statement of the grounds for denial.

10. **Managers' and Attorneys' Reports.** The County Manager and County Attorney and each City Manager and City Attorney shall periodically make a public status report on all major matters pending or concluded within their respective jurisdictions.

11. **Budgeting.** In addition to any budget required by state statute, the County Manager shall prepare a budget showing the cost of each program for each budget year. Prior to the County Commission's first public hearing on the proposed

budget required by state law, the County Manager shall make public a budget summary setting forth the proposed cost of each individual program and reflecting all major proposed increases and decreases in funds and personnel for each program, the purposes therefore, the estimated millage cost of each program and the amount of any contingency and carryover funds for each program.

12. **Quarterly Budget Comparisons.** The County Manager shall make public a quarterly report showing the actual expenditures during the quarter just ended against one quarter of the proposed annual expenditures set forth in the budget. Such report shall also reflect the same cumulative information for whatever portion of the fiscal year that has elapsed.

13. **Adequate Audits.** An annual audit of the County and each municipality shall be made by an independent certified public accounting firm in accordance with generally accepted auditing standards. A summary of the results, including any deficiencies found, shall be made public. In making such audit, proprietary functions shall be audited separately and adequate depreciation on proprietary facilities shall be accrued so the public may determine the amount of any direct or indirect subsidy.

14. **Regional Offices.** Regional offices of the County's administrative services shall be maintained at locations in the County for the convenience of the residents.

15. **Financial Disclosure.** The Commission shall by ordinance make provision for the filing under oath or affirmation by all County and municipal elective officials, candidates for County and municipal elective offices, such employees as may be designated by ordinance, and such other public officials, and outside consultants who receive funds from the County or municipalities, within the County and who may legally be included, of personal financial statements, copies of personal Federal income tax returns, or itemized source of income statements. Provision shall be made for preparing and keeping such reports current from time to time, and for public disclosure.

Under the supervision of the Manager and with the advice of the Planning Advisory Board elsewhere provided for in this Charter, the planning director shall among other things:

1. Conduct studies of county population, land use, facilities, resources, and needs and other factors which influence the county's development, and on the basis of such studies prepare such official and other maps and reports as, taken together, constitute a master plan for the welfare, recreational, economic, and physical development of the county.
2. Prepare for review by the Planning Advisory Board, and for adoption by the Board of County Commissioners, zoning, subdivision and related regulations for the unincorporated areas of the county and minimum standards governing zoning, subdivision, and related regulations for the municipalities; and prepare recommendations to effectuate the master plan and to coordinate the county's proposed capital improvements with the master plan.
3. Review the municipal systems of planning, zoning, subdivision, and related regulations and make recommendations thereon with a view of coordinating such municipal systems with one another and with those of the county.

**SECTION 4.08. BOARDS.**

A. The Board of County Commissioners shall by ordinance create a Planning Advisory Board, a Zoning Appeals Board, and such other boards as it may deem necessary, prescribing in each case the number, manner of appointment, length of term,

and advisory or quasi-judicial duties of members of such boards, who shall serve without compensation but who may be reimbursed for necessary expenses incurred in official duties, as may be determined and approved by the Board of County Commissioners.

B. The Board of County Commissioners may by ordinance provide for the expansion of the City of Miami Water and Sewer Board to an agency county-wide in scope and authority, with the power to acquire, construct and operate water and sewer systems within the incorporated and the unincorporated areas of Dade County, which agency shall be known as the Miami-Dade Water and Sewer Authority. The Miami-Dade Water and Sewer Authority shall have the responsibility to develop and operate a county-wide water and sewer system for the purpose of providing potable water, sewage collection and disposal and water pollution abatement to the citizens of Dade County.

C. Dade County shall retain all its powers, including but not limited to that of eminent domain, in relation to the creation of a county-wide water and sewer system, for the purpose of cooperating with the Miami-Dade Water and Sewer Authority.

### **MUNICIPALITIES**

#### **SECTION 5.01. CONTINUANCE OF MUNICIPALITIES.**

The municipalities in the county shall remain in existence so long as their electors desire. No municipality in the county shall be abolished without approval of a majority of its electors voting in an election called for that purpose. The right of self determination in local affairs is reserved and preserved to the municipalities except as otherwise provided in this Charter.

#### **SECTION 5.02. MUNICIPAL POWERS.**

Each municipality shall have the authority to exercise all powers relating to its local affairs not inconsistent with this Charter. Each municipality may provide for higher standards of zoning, service, and regulation than those provided by the Board of County Commissioners in order that its individual character and standards may be preserved for its citizens.

#### **SECTION 5.03. MUNICIPAL CHARTERS.**

A. Except as provided in Section 5.04, any municipality in the county may adopt, amend, or revoke a charter for its own government or abolish its existence in the following manner. Its governing body shall, within 120 days after adopting a resolution or after the certification of a petition of ten percent of the qualified electors of the municipality, draft or have drafted by a method determined by municipal ordinance a proposed charter amendment, revocation, or abolition which shall be submitted to the electors of the municipalities. Unless an election occurs not less than 60 nor more than

120 days after the draft is submitted, the proposal shall be submitted at a special election within that time. The governing body shall make copies of the proposal available to the electors not less than 30 days before the election. Alternative proposals may be submitted. Each proposal approved by a majority of the electors voting on such proposal shall become effective at the time fixed in the proposal.

B. All municipal charters, amendments thereto, and repeals thereof shall be filed with the Clerk of the Circuit Court.

#### **SECTION 5.04. CHANGES IN MUNICIPAL BOUNDARIES.**

A. The planning director shall study municipal boundaries with a view to recommending their orderly adjustment, improvement, and establishment. Proposed boundary changes may be initiated by the Planning Advisory Board, the Board of County Commissioners, the governing body of a municipality, or by a petition of any person or group concerned.

B. The Board of County Commissioners, after obtaining the approval of the municipal governing bodies concerned, after hearing the recommendations of the Planning Advisory Board, and after a public hearing, may by ordinance effect boundary changes, unless the change involves the annexation or separation of an area of which more than 250 residents are electors, in which case an affirmative vote of a majority of those electors voting shall also be required. Upon any such boundary change any conflicting boundaries set forth in the charter of such municipality shall be considered amended.

C. No municipal boundary shall be altered except as provided by this Section.

#### **SECTION 5.05. CREATION OF NEW MUNICIPALITIES.**

The Board of County Commissioners and only the Board may authorize the creation of new municipalities in the unincorporated areas of the county after hearing the recommendations of the Planning Advisory Board, after a public hearing, and after an affirmative vote of a majority of the electors voting and residing within the proposed boundaries. The Board of County Commissioners shall appoint a charter commission, consisting of five electors residing within the proposed boundaries, who shall propose a charter to be submitted to the electors in the manner provided in Section 5.03. The new municipality shall have all the powers and rights granted to or not withheld from municipalities by this Charter and the Constitution and general laws of the State of Florida. Notwithstanding any provision of this Charter to the contrary, with regard to any municipality created after September 1, 2000, the pre-agreed conditions between the County and the prospective municipality which are included in the municipal charter can only be changed if approved by an affirmative vote of two-thirds (2/3) of the members of the Board of County Commissioners then in office, prior to a vote of qualified municipal electors.

**SECTION 5.06.        CONTRACTS WITH OTHER UNITS OF  
GOVERNMENT.**

Every municipality in this county shall have the power to enter into contracts with other governmental units within or outside the boundaries of the municipality or the county for the joint performance or performance by one unit in behalf of the other of any municipal function.

**SECTION 5.07.        FRANCHISE AND UTILITY TAXES.**

Revenues realized from franchise and utility taxes imposed by municipalities shall belong to municipalities.

#### **INITIATIVE, REFERENDUM, AND RECALL**

#### **SECTION 7.01. INITIATIVE AND REFERENDUM.**

The electors of the county shall have the power to propose to the Board of County Commissioners passage or repeal of ordinances and to vote on the question if the Board refuses action, according to the following procedure:

1. The person proposing the exercise of this power shall submit the proposal to the Board which shall without delay approve as to form a petition for circulation in one or several copies as the proposer may desire.
2. The person or persons circulating the petition shall, within 60 days of the approval of the form of the petition, obtain the valid signatures of voters in the county in numbers at least equal to four percent of the registered voters in the county on the day on which the petition is approved, according to the official records of the County Supervisor of Elections. In determining the sufficiency of the petition, no more than 25 percent of the valid signatures required shall come from voters registered in any single county commission district. Each signer of a petition shall place thereon, after his name, the date, and his place of residence or precinct number. Each person circulating a copy of the petition shall attach to it a sworn affidavit stating the number of signers and the fact that each signature was made in the presence of the circulator of the petition.
3. The signed petition shall be filed with the Board which shall within 30 days order a canvass of the signatures thereon to determine the sufficiency of the signatures. If the number of signatures is insufficient or the petition is deficient as to form or compliance with this Section, the Board shall notify the person filing the petition that the petition is insufficient and has failed.

4. The Board shall within 30 days after the date a sufficient petition is presented either:

(a) Adopt the ordinance as submitted in an initiatory petition or repeal the ordinance referred to by a referendary petition, or

(b) Submit the proposal to the electors in impartial and concise language and in such manner as provides a clear understanding of the proposal.

5. If the Board determines to submit the proposal to the electors, the election shall be held either:

(a) In the next scheduled county-wide election, or

(b) If the petition contains the valid signatures in the county in numbers at least equal to eight percent of the registered voters in the county, the election shall take place within 120 days after the date the petition is presented to the Board, preferably in an election already scheduled for other purposes, otherwise in a special election. The result shall be determined by a majority vote of the electors voting on the proposal.

6. An ordinance proposed by initiatory petition or the repeal of an ordinance by referendary petition shall be effective on the day after the election, except that:

(a) Any reduction or elimination of existing revenue or any increase in expenditures not provided for by the current budget or by existing bond issues shall not take effect until the beginning of the next succeeding fiscal year; and

(b) Rights accumulated under an ordinance between the time a certified referendary petition against the ordinance is presented to the Board and the repeal of the ordinance by the voters, shall not be enforced against the county; and

(c) Should two or more ordinances adopted at the same election have conflicting provisions, the one receiving the highest number of votes shall prevail as to those provisions.

7. An ordinance adopted by the electorate through initiatory proceedings shall not be amended or repealed by the Board for a period of one year after the election at which it was adopted, but thereafter it may be amended or repealed like any other ordinance.

1. The Clerk of the Circuit Court shall approve the form of the petition.
2. The person or persons circulating the petition must obtain signatures of electors of the county, district, or municipality concerned in numbers at least equal to four percent of the registered voters in the county district or municipality on the day on which the petition is approved, according to the official records of the County Supervisor of Elections.
3. The signed petition shall be filed with and canvassed and certified by the Clerk of the Circuit Court.
4. The Board of County Commissioners must provide for a recall election not less than 45 nor more than 90 days after the certification of the petition.
5. The question of recall shall be placed on the ballot in a manner that will give the elector a clear choice for or against the recall. The result shall be determined by a majority vote of the electors voting on the question.
6. If the majority is against recall the officer shall continue in office under the terms of his previous election. If the majority is for recall he shall, regardless of any defect in the recall petition, be deemed removed from office immediately.
7. No recall petition against such an officer shall be certified within one year after he takes office nor within one year after a recall petition against him is defeated.
8. Any vacancy created by recall in the offices of Sheriff or Constables shall be filled for the remaining term by appointment by the Board of County Commissioners, or the Board may require the office to be filled at the next regular election or at a special election called for that purpose.

BellSouth is incorrect in its communication to you, that the Miami-Dade County (the "County") Home Rule Charter (the "Charter") prohibits the Miami-Dade Aviation Department ("MDAD") from pursuing revenue opportunities as they relate to telecommunications.

Article - 1, § 1.01(A) grants enumerated powers to the Board of County Commissioners (the "Board") as the legislative and governing body of the County. Specifically subsection 14 allows the Board to "[r]egulate, control, take over, and grant franchises to, or itself operate gas, light, power, telephone, and other utilities, sanitary and sewage collection and disposal systems, water supply, treatment, and service systems, and public transportation systems, ...." Subsubsection (b) of subsection 14 provides however, that "[t]he county shall not operate a light, power, or *telephone utility to serve any territory in the county which is being supplied with similar service ....*" (emphasis added).

The provision of telecommunications, data network, and shared tenant services to the tenants at Miami International Airport ("MIA") does not constitute the operation of a telephone utility to serve a territory, prohibited by the Charter unless passed by majority vote of the County electorate. First, the County is not operating a public utility. Second, MIA is not a territory, but property owned and operated by the County as an international airport, which consists of a terminal, buildings, and facilities. Last, the provided shared airport services have no similar service equivalent. The County leases certain areas within the terminal, as well as various buildings. The County provides telecommunications, data network, and shared airport services to MDAD and its MIA tenants, necessary for those entities to operate efficiently. MDAD may charge MIA tenants for such services, and may pursue revenue opportunities as said opportunities relate to telecommunications.

## RECOMMENDATION

5-21-03 LWS

It is recommended that the Board of County Commissioners (the "Board") approve the attached resolution waiving the competitive bid requirements of Administrative Order No. 3-2 related to the procurement of commodities and services and approve in principle the non-exclusive "Telecommunications, Data Network, and Shared Airport Tenant Services" management agreement ("Agreement") between Miami-Dade County, (the "County") and NextiraOne, LLC<sup>1</sup> ("Nextira"), substantially in the form attached hereto, which provides for: 1) the acquisition of, in accordance with the principles delineated in the Agreement, title to all telecommunications network, data network, and common use terminal equipment ("CUTE") infrastructure, software, licenses, permits, and other assets as described in Schedule A to the Equipment Lease and Maintenance agreement ("ELM Agreement") and Schedule E to the Shared Airport Tenant Services agreement ("SATS Agreement"), as of February 6, 2002 for the acquisition price of \$6,450,000 which will be amortized at five (5) percent over five (5) years; 2) resolution of various claims arising out of the ELM Agreement and SATS Agreement; 3) assignment to the County all existing tenant SATS and CUTE agreements entered into by Centel or its successors or assigns with tenants at Miami International Airport ("MIA") or the County's other owned or operated general aviation airports; and, 4) Nextira to become the interim telecommunications infrastructure manager, to provide for the design, installation, maintenance, repair, management, and operational support services for all voice and data network infrastructure for the Miami-Dade Aviation Department ("MDAD") and shared airport tenant services customers at MIA and the General Aviation Airports ("GAAs") until a new provider is selected, but for no longer than a period of twenty-four (24) months.

In addition, it is recommended that the Board approve the attached resolution authorizing the County to make direct purchases of the following equipment: (i) wiring, (ii) cabling, (iii) fiber optic cables and equipment, (iv) telecommunications equipment, (v) telephone and data network equipment, (vi) software, and (vii) material and supplies, necessary to maintain, support, operate, and expand the telecommunications, data network, and shared airport tenant services at the County airport systems facilities. Under this system the County will purchase directly, certain commodities as indicated by Nextira and be exempt from paying state sales taxes and mark-up

<sup>1</sup> NextiraOne, LLC is the successor or assignee of Centel's rights and obligations (via Williams Communications Solutions, LLC) under both the ELM Agreement and the SATS Agreement.

costs on these purchases. It is also recommended that the Board authorize, in accordance with Ordinance No. 99-63, the inclusion of a random audit provision, including the one quarter (1/4) of one percent assessment, in the Agreement. It is further recommended that the County Manager be authorized to execute the Agreement.

### **BACKGROUND**

The County is currently under contract with Nextira. Nextira leases to the County, and manages, operates and maintains all the telecommunications infrastructure and services serving MIA and the GAAs at an approximate annual cost of \$7,300,000. MDAD's agreement with Nextira expires on February 6, 2002.

### **NEGOTIATIONS**

In July 2001, the Board approved Resolution No. R-852-01, approving a professional services agreement between the County and ResAvia. ResAvia is providing specialized technical and negotiation services to resolve the various claims arising out of the ELM Agreement and SATS Agreement entered into between the County and Nextira, and to negotiate a buy-out and new agreement with Nextira to allow MDAD an opportunity to finalize its long term voice and data telecommunications strategy.

### **INTERIM MANAGER FOR TELECOMMUNICATIONS INFRASTRUCTURE**

MDAD is simultaneously working to develop a request for proposal ("RFP") to award a contract to a service provider to serve as the manager of the telecommunications infrastructure. Due to time constraints, the County will not be able to award this contract before February 6, 2002, when the Nextira contract expires. To assure the uninterrupted operation of the County airports, ResAvia, MDAD and the County Attorney's Office negotiated a proposed management agreement type contract (the "Agreement") with Nextira, to retain it as manager of the installed telecommunications infrastructure based upon County ownership of the equipment as further described below:

**PROJECT LOCATION:**

Miami International Airport and General Aviation Airports

**PROJECT DESCRIPTION:**

Provides for the operations, management, maintenance, service, support and equipment and supplies of the telecommunications and data, infrastructure, hardware and software systems for the MDAD and the shared airport tenant services customers at Miami International Airport and the General Aviation Airports. The scope of services includes the management of the shared airport tenant services for the County, including CUTE, to tenants and users at the Airport. In addition, Nextira will be

2

required to implement a transition program, one hundred and twenty (120) days prior to the expiration of the term of this Agreement, to ensure that either the new vendor selected as a result of the RFP process or MDAD's operating and maintenance personnel are trained in all aspects of the telecommunications and data infrastructure.

**FIRM:**

NextiraOne, LLC

**LOCATION OF FIRM:**

Houston, Texas

**TERM OF AGREEMENT:**

The Agreement shall be for a duration of twenty-four (24) months. The County may terminate the Agreement with or without cause on thirty (30) days written notice to Nextira, provided however, the Agreement shall have a minimum term of eighteen (18) months unless terminated earlier for cause.

**AMOUNT OF AGREEMENT:**

**Compensation to the Contractor**

**One-Time Acquisition Price:**

Acquisition of the telecommunications, data network, and CUTE infrastructure, software licenses, permits, and other assets in Schedule A to the ELM Agreement and Schedule E to the SATS Agreement of \$6,450,000 which will be amortized at five (5) percent over five (5) years.

**Fixed Management Fee:**

This Agreement provides for a fixed management fee of \$6,144,067 for the first year, which includes overhead and profit, staff transition costs, vendor agreements and spare parts carrying charge.

The compensation for the second year is based on this Management Fee as adjusted by the budgeting process that incorporates the requirements of the Capital Improvement Program (CIP) and the change in the Consumer Price Index (CPI) for the salaries of the personnel.

Variable Costs:

The Agreement also provides for the variable costs, when authorized by the Department, and includes: 1) the procurement of parts, materials and software (\$2,680,000), 2) On-call after hour services (\$273,000), and 3) subcontractor services for wiring installation and maintenance, as necessary (\$899,415).

SATS Revenue:

Per the SATS Agreement, last year MDAD received \$267,000 which was based on ten (10) percent of gross revenues. Under this new Agreement, MDAD will receive all SATS gross revenues which last year was \$2,670,024. This revenue is expected to increase based on new marketing initiatives presently under development.

Compensation to the County

The Contractor will pay to the County the sum of \$110,000, on February 6, 2002, on account of excess space occupied without lease by the Contractor in Building 3030 at MIA for the period from November 1, 1997 to and including February 6, 2002.

**RECOMMENDED CONTRACT MEASURES:**

**USING AGENCY:**

Miami-Dade Aviation Department

**FUNDING SOURCE:**

Miami-Dade Aviation Department Operating Budget for Consulting Services and Aviation Revenue Bonds.

**APPROVED FOR LEGAL SUFFICIENCY:**

**CONTINGENCY PLAN**

As reported to the Board at its December 18, 2001 meeting, in the event that the negotiations with Nextira fail and no agreement is reached by the contract expiration date, the Department has a contingency plan to assure continuity in the provision of telecommunication services.

**SUMMARY**

In summary, our preferred outcome is a negotiated buyout of the telecommunications equipment and infrastructure, retaining Nextira for a limited time to act as manager of the telecommunications infrastructure, and obtaining a long-term contract for telecommunications infrastructure management through a competitive request for proposal. In addition, the above recommendation begins the implementation of MDAD's long-term, cost-effective strategy to enable better management and control of our telecommunications infrastructure. In the alternative, MDAD has a plan to continue services without Nextira while procurement processes and legal remedies are undertaken.

### **C. CUTE Network**

The CUTE network consists of 175-200 CUTE terminals and network, the airline terminal emulators, an interconnecting network and wide area network links to airline reservation system host computers, includes preventive maintenance on CUTE printers.

### **3. Future Plans<sup>2</sup>**

Exhibit 1 identifies all Equipment at locations to be maintained and Services to be provided under this Agreement, if and when the future expansions and projects described therein are implemented and ready to receive the services. Based upon County requirements, new Equipment or locations may be added. As new Equipment items or locations are added to the MDAD telecommunications infrastructure, the items will automatically become

---

<sup>2</sup> It is not expected that these services will be implemented during the term of this Agreement.

Dated 1/24/02

a part of this Agreement upon written mutual agreement of both the County's Project Manager and the Contractor.

Future planned expansions or projects at this time that may impact the services requested are:

A. The Premises Distribution System ("PDS").

This is a planned cabling/distribution system that runs throughout the Airport. The PDS will provide a new cabling infrastructure, required for ~~all telecommunications~~ systems to effectively communicate. It will also provide the physical connections for access to existing legacy systems, the wide area network, and the Internet. The PDS will consist of single-mode and multi-mode fiber optic cabling; copper cabling (enhanced Category 5 UTP) and possibly infrared, wireless or other distribution materials/media such as, color spectrum fiber optic switches. The PDS will utilize Information Management Outlets ("IMOs"), which consist of two (2) voice and two (2) data jacks (all RJ-45 modular jacks). In addition, the PDS will be designed to accommodate the Department's anticipated future growth requirements. The scope of work includes the management of the proposed PDS and the associated cable management system. The scope of work includes the data entry of "as built", or other drawings or documentation information into the cable management system as on-going work identifies the information.

Note: Some cable conduit and cable trays required to install the PDS cabling will be installed and will be utilized wherever possible. Certain applications will arise where the Contractor will be required to install new raceways and cables. All new work shall require prior approval from MDAD.

B. Network Management System

The scope of work will include the management of the data network utilizing a standard Network System Manager ("NSM"). The existing NSM is hosted on a SUN Microsystems workstation using HP's OpenView software. The NSM monitors all network components using standard SNMP applications. An audit trail of system operations and configuration changes shall be maintained by the Contractor using the NSM. The Contractor may be required to provide the following network management functions using the NSM applications:

- i) Fault management.
- ii) Configuration management.
- iii) Performance monitoring management.
- iv) Accounting management.
- v) Security management.

Dated 1/24/02

All network components shall be SNMP manageable and conform to RFC 1157. Online system health monitoring shall be provided for verifying the health status of major network components and to support software and hardware maintenance activities.

**C. Security Network**

MIA will be implementing a new security network system ("NSNS"). The NSNS is composed of a high speed fiber optic based ATM network, fifteen (15) (expanding to 22) equipment rooms, CCTV and Intercom switching equipment, and CCTV and Intercom recording equipment. The rooms will be linked via a new security network. In the future this network will be expanded to accommodate interface with the future PDS. The PDS will provide CAT5e cabling from the network hubs located in these rooms to all devices requiring an IP address and network connection. The Contractor shall take over the management, maintenance, and operations responsibility, unless directed otherwise by MDAD, once the three (3) year management and operation contract with the NSNS Manager is over.

The main backbone of the New Security Network system will be comprised of multiple fiber optic loops, which will create multiple distinct data areas in the Main Terminal area. A main loop will run through the main Terminal through the equipment rooms. The main loop will have a four (4) room ATM configuration (rooms C4121, B3017, A3129, and H1472) with an OC-48 data rate. The ATM shelves in the four (4) equipment rooms will connect to switches at an OC-12 (ATM) data rate. The switches in the remaining eleven (11) equipment rooms (H3730, G1107, G1764, F1540, F1770, E1502, E1803, S1558, D3917, A3820, and A3105) will be capable of connecting to multiple network protocols (i.e., FDDI, ATM, and Ethernet). Two (2) separate backbone loops (a primary OC-12 backbone and a secondary OC-12 backbone) will connect the eleven (11) rooms to the four (4) OC-48 equipment rooms via separate diverse routes.

**D. Wireless Network**

In conjunction with the PDS, wireless antennas located approximately three hundred (300) feet apart will be located throughout the Terminal at MIA. This system will improve the use of ~~cellular phones~~ throughout the terminal areas. The new technology plans of tenant airlines are envisioning more wireless customer service devices similar to what rental car companies use today when checking in cars. The CIP may require wireless CUTE and FIDS to be movable for changing locations under construction. Airlines are anticipating that their customer base will increase the use of wireless Internet devices for telecommuting while in airports and on airplanes. All of this points to the need to put in a system in the terminal that will handle the wireless traffic and place MDAD in the position of controlling this part of the telecommunications infrastructure. The Contractor will have to interface with the Wireless System provider to provide network services via the PDS and interfaces with the network backbone and other service providers.

E. The scope of work may also include the management of approximately four

Dated 1/24/02

thousand (4000) new stations (to be installed in a new or existing equipment room) if American Airlines becomes a SATS customer.

#### 4. Description of Services to be Provided

The services to be provided by the Contractor may include, but may not be limited to the following:

##### **~~1. Move, Add and Change Service ("MAC")~~**

##### **i) Move, Add and Change Services will include, but shall not be limited to:**

Contractor's technicians are not authorized to perform MAC work unless these work orders have been properly submitted to Contractor. Depending on the size of the request, Contractor personnel may be required to perform surveys in order to facilitate the requested work. The Contractor is solely responsible for scheduling all work directly with the MDAD or SATS customer under the direction of MDAD Telecommunications who may periodically escalate various work orders or priorities associated with different requests. The Contractor shall also coordinate access issues directly with the MDAD or SATS customer. The Contractor shall assign personnel with project management skills to large scale MAC projects and/or larger tenants to facilitate the timely completion of the Contractor's portion of the work.

##### **iii) Installation Time Intervals**

Routine additions, deletions and relocations (also known as moves, adds, and changes) shall meet the following standards depending on their number, assuming that conduit, power, and other required facilities are existing at the time of the work order. Non-reimbursable MAC coverage shall be provided between 8:00 A.M. and 5:00 P.M., Monday through Friday, excluding

Dated 1/24/02

**Contractor Holidays.**

<b><u>No. of MACs</u></b>	<b><u>Response Time</u></b>
1 to 5	one (1) business day from receipt of work order
6 to 10	four (4) business days from the date of the work order
11 to 50	seven (7) business days from the date of the work order
Over 50	individual case basis to be mutually negotiated

At a minimum, the Contractor is expected to keep staffing levels and technicians on hand to meet the above completion requirements. The Contractor is responsible for directly coordinating with the customer and/or local service provider until the MAC is complete.

**iv) Priority Changes**

Priority moves, adds and changes are those that are designated a "Priority" by MDAD in accordance with the Prioritizing of Work subarticle of this Agreement. Priority work must have written justification and be approved by the Project Manager. Priority work orders will supersede other work orders and will be worked on and completed as soon as possible by the Contractor.

The due date for routine work orders will be adjusted for delays caused by priority work orders. For all conflicts of schedule, MDAD will be the final authority on the final timing and have responsibility for the resulting impact on other work and Equipment. Contractor shall notify MDAD of known potential impacts of priority changes.

**B. Maintenance and Trouble Resolutions**

**i) Existing Network Infrastructure**

The Contractor shall provide a complete operation and maintenance plan for all elements of the MDAD telecommunications network. This work shall include all components of inside plant, outside plant, active and passive electronic equipment, and ancillary equipment that is part of the telecommunications infrastructure currently serviced by Contractor and any additional Equipment added as provided hereinafter. Contractor shall also provide maintenance for all Systems and Sub-Systems in place as of February 6, 2002 (the "Existing System"), as well as any and all additional Systems, Sub-Systems, Equipment, or switches or products added in the future, when requested by the County. As to additional Systems, Sub-Systems and other Equipment that are added, maintenance for these items shall be under this Agreement upon the acceptance by County of the relevant System, Sub-System or additional Equipment and shall be compensated for in accordance with the Payments and Cost Reimbursements article of this Agreement.

**ii) Levels of Performance**

The Contractor for the telecommunications infrastructure operations and maintenance shall guarantee specific levels of performance and availability for each segment of the network. The Contractor is not responsible for degradation of performance due to the actions of a third party vendor not under the control of the Contractor, or due to the County's reduction in Contractor's staff. These segments and their required level of availability are as follows:

a.	Voice Circuits	99.98%
b.	Data Circuits (Point-to-Point )	99.98%
c.	LAN Circuits	99.98%

Availability shall be calculated on a monthly basis. Availability shall be calculated based on the following formula:

$$\text{Availability} = \frac{\text{Available Time} - \text{Downtime}}{\text{Available Time}} \times 100$$

where:

**Available Time:** The number of circuits of a given type multiplied by the number of hours in the month.

**Downtime:** The sum in hours of all circuit outages or performance degradation commencing when the trouble is reported and ending when the

Dated 1/24/02

trouble ticket is completed and closed out. For aggregate services such as T1 circuits downtime shall be the sum of the outage duration times the number of active channels (24) contained in the aggregate circuit. LAN downtime shall be the outage duration times the number of ports, which are reported as out of service or suffering from degraded operation.

iii) Preventive Maintenance

The Contractor shall perform all the preventive maintenance as specified by the equipment manufacturers. A quarterly report shall be submitted to MDAD detailing the preventive maintenance performed in the previous quarter and specifying the preventive maintenance planned for the upcoming quarter.

Preventive maintenance shall include, but is not limited to:

- a. Visually inspect batteries condition and voltages.
- b. Check power supplies voltages.
- c. Routine replacement of lamps, indicators, protectors, and other components which may fail through normal use.
- d. Perform annual trunk traffic studies and implement corrective action if required.
- e. Perform annual voice mail port utilization study and configuration.
- f. Inspect cabinets.
- g. Periodic cleaning of filters.
- h. Perform database dumps and reviews quarterly and perform corrective procedures if needed.

iv) Preventive Maintenance Plan

The Contractor shall develop a comprehensive routine and preventive maintenance plan, which includes each of the following elements:

- a. Each element of voice or network systems equipment, shall be monitored for performance on a continuous basis. In addition to reporting of failed equipment, thresholds shall be established to report traffic problems or abnormal latency. Statistics will also be required for management reports that outline system capacities and utilization levels.
- b. Regular periodic performance testing shall be provided for each element of active electronic equipment, which is not continuously monitored. This periodic testing shall be performed in accordance with manufacturer's published preventive maintenance procedures. Where no published preventive maintenance plan exists, measures, which are acceptable to MDAD Telecommunications, shall be implemented. The Contractor shall make special provisions (whether

Dated 1/24/02

self-performed or via subcontract) to clean optical fiber connectors, battery cable terminations and other connections, which require periodic cleaning to avoid performance degradation.

**Note:** Each telecommunications equipment room shall be provided with periodic cleaning to ensure an environment, which is suitable for the equipment. This cleaning (whether self-performed or via subcontract) shall ensure a dust free environment, removal of debris and cleaning of equipment, cabling and terminations for the two (2) Core Rooms.

- c. The preventive maintenance plan shall include routine replacement of lamps, indicators, protectors, batteries, DC power plant equipment, 48VDC powered inverters and other components, which may fail through normal use. The preventive maintenance plan shall not include requirements for replacement of equipment room lighting components, air conditioning filters, ceiling tiles and other components, which are part of the building and are not related to the network itself. The preventive maintenance plan shall require that these latter items be reported to MDAD Facilities Maintenance if found to be defective or in need of repair. The preventive maintenance plan shall include operation and maintenance of DC plant in IDF rooms that support switching equipment.
- d. The operations and maintenance plan shall include provisions for non-scheduled maintenance and repair of equipment that may fail or degrade during normal operation.

v) **Problem Reporting and Escalation**

The Contractor will be responsible for maintaining coverage in accordance with this article in the Agreement, of the CRC for MDAD or SATS customers at the Airport, in order to coordinate repair services. The Contractor shall issue service tickets in order to track repair requests, contact the assigned personnel, and respond to perform such repairs for major or minor failures in accordance within the time frames in the Response and Repair Time Requirements article of this Agreement. The dispatched personnel will be responsible for having the appropriate repair stock equipment and also for properly returning the equipment for repairs or replacements. The dispatched personnel will be responsible for keeping the CRC informed of problems, and reporting to MDAD a real-time status of repair progress. After hour calls will be routed to a twenty-four (24) hour customer service center or local contact to coordinate repair efforts.

The Contractor's dispatched personnel will coordinate with MDAD, local service provider, or SATS customer as required and MDAD will make the determination as to the type and quantity of resources required to correct the

Dated 1/24/02

problem, if necessary.

Should a major outage be related to the local operating company's network, the Contractor's personnel will act as the County's agent to open a repair ticket with the local exchange company and work on behalf of the County, as commercially reasonable and necessary, to troubleshoot the problem until the major outage is corrected. The Contractor shall also coordinate access issues directly with the user. The County requires the Contractor to propose spare parts levels for the various systems in order that the repairs can be made in a timely fashion based on the classification of the repair as described in the Types of Failures subarticle of this Agreement.

In case of emergency during after hours, Contractor shall proceed to attempt to repair while continuing an attempt to contact MDAD per the escalation notification list to be provided by the Contractor, based on information provided by MDAD.

vi) **Agreements with Vendors**

The Contractor shall maintain maintenance and technical support agreements with vendors associated with the telecommunications systems. The Contractor shall be responsible and pay for all maintenance contracts and support contracts necessary to perform the services outlined in this Agreement (collectively, the "Agreements with Vendors"). The County shall compensate the Contractor in accordance with the Payments and Cost Reimbursement article of this Agreement. The Contractor is solely responsible for hands-on management of the systems. These third party agreements shall include at a minimum, when available from the third party and requested by MDAD:

- a. Post-warranty service agreements;
- b. advanced replacement agreements;
- c. software and hardware revision/update provisions; and
- d. technical support agreements that allow the Contractor to speak directly to engineer/technical support as required.

In the event of an emergency, MDAD reserves the right to take a hands-on approach to fix the problem if the Contractor's personnel are not available. A strict configuration and change management process will be adhered to, which documents all changes to the respective network. The Contractor shall submit a configuration and change management procedural plan on a yearly basis for review and approval by MDAD.

vii) **Types of Failures**

Troubles reported to the Contractor's CRC by the users will fall into two (2)

Dated 1/24/02

categories: a) Major Failures, and b) Minor Failures.

- a. **Major Failures** are those that severely impact the operation of the Airport or severely impede the ability for a Tenant to conduct business at the Airport and shall be defined as an occurrence of any of the following:
  - 1. A failure of the telephone switch, its common equipment or power supplies which renders it or them incapable of performing normal functions for five percent (5%) or more of the stations or trunks.
  - 2. A failure of over five percent (5%) of the trunks or station lines to function.
  - 3. A failure of network components that will render over five percent (5%) of work stations inoperable.
  - 4. An indication of a major alarm condition as defined by the manufacturer in any of the switching or power equipment.
  - 5. Any failure of an individual station identified in Exhibit 2 furnished to Contractor's Project Manager, who has signed a receipt therefor, that impacts the operation of the Airport.
- b. **Minor Failures** are any other failures including a failure of any ancillary equipment such as intercom circuits, paging input arrangement, or any other telecommunications equipment or component.

viii) **Response and Repair Time Requirements**

Based on Trouble classification, the Contractor will respond in the following manner:

- a. **Major Failure**- Immediate response during business hours (Monday-Friday, 7 A.M. – 11 P.M., Eastern Time) and within two (2) hours for off hours (Monday-Friday, 11 P.M – 7 A.M., Eastern Time; and twenty-four (24) hours a day Saturday, Sunday, and holidays).

Contractor must immediately begin remedial maintenance for a major malfunction, which may consist of remote diagnostics during the first fifteen (15) to thirty (30) minutes, after repair notification time by the County to the Contractor, via the Contractor's tracking processes with the appropriate service ticket number, however, if not corrected, the Contractor's personnel must be on-site no less than forty-five (45) minutes during business hours and no less than two (2) hours during off hours from the repair notification

time documented by the County. Any service between 11 P.M. – 7:00 A.M. on weekends and Contractor Holidays will be compensated on a per call basis as described in the compensation article. Contractor shall start immediately and work continuously until the problem is resolved. Contractor will abide with the Problem Reporting and Escalation article of this Agreement, in order to resolve a major outage. Contractor shall make all commercially reasonable efforts to complete repairs within eight (8) hours from the time the County reported the incident and is documented via the Contractor's tracking processes with the appropriate service ticket number. Contractor is responsible for providing the Project Manager with a revised escalation procedure to include all appropriate levels of management with their associated contact numbers at the time this Agreement is executed, and immediately thereafter whenever a change occurs. In the event the Contractor should fail to respond in accordance with the time frames stated herein, the County shall be entitled to liquidated damages in accordance with the Performance and Liquidated Damages article of this Agreement.

b. **Minor Failure** - Response within eight (8) business hours.

Contractor will begin any repair not defined as a major failure as expeditiously as possible, and shall make all commercially reasonable efforts to complete repairs within one (1) business day from the time the County reported the incident and is documented via the Contractor's tracking processes with the appropriate service ticket number. Repairs may be made by a certified technical personnel either through a premise visit or via electronic access through the use of a remote maintenance terminal. However, in all cases, the repair must be confirmed and the status updated by the next business day by notification to the CRC. Contractor shall respond to minor service interruptions within eight (8) business hours and follow an escalation procedure in accordance with the Problem Reporting and Escalation subarticle of this Agreement. In the event the Contractor should fail to respond in accordance with the time frames stated herein, the County shall be entitled to liquidated damages in accordance with the Performance and Liquidated Damages article of this Agreement.

c. **After Hours Coverage, Emergency Service, and Contractor's Required Response Specifications:**

Service for a major failure shall be available twenty-four (24) hours a day, seven (7) days a week, and 365 days per year. In the event the Contractor does not commence repairs for a major failure within two (2) hours after notification, the County shall have the right, at any time thereafter, to notify the Contractor of such nonperformance, and if emergency repairs shall not have commenced within two (2) hours from the time the Contractor's technical personnel arrives on site, then the County shall have the right to call in any qualified and certified service organization to perform the

necessary repairs.

"Respond" is equated to having technical support and/or troubleshooting the problem within aforementioned times. Note that during the troubleshooting process, the Contractor is coordinating directly with the user and/or the local service provider until the problem is resolved.

**ix) System Availability Reporting**

The Contractor shall provide a monthly circuit availability report to MDAD Telecommunications which states the required level of availability for each of the classes of circuits listed in the Levels of Performance subarticle of this Agreement. This report shall include the actual level of availability for each class of circuit, based upon the calculation method listed in Levels of Performance subarticle of this Agreement. The difference between the required level of availability and actual availability for each class of circuit shall be identified in the report.

- h. Special systems such as IVR's.
- i. Future wireless systems.

**xi) Specification Compliance**

If repair requirements arise on existing cable plant that is not installed according to manufacturer or industry specifications, the Contractor is required to provide notice and an estimate to the County to bring such infractions to specification while accomplishing the repair.

The Contractor is liable for circuit continuity, from the local service provider demarcation point to the station jack. In many instances, the Tenant has a Key Service Unit ("KSU") or other devices in the middle of this cable path and the existing cable records may or may not have records showing these outlets. Under these circumstances, the Contractor is expected to document any non-specification issues, provide notice to MDAD and jointly work with

Dated 1/24/02

MDAD and/or the Tenant to upgrade this infrastructure to County specification and document said upgrade in the cable records. The Tenant will incur the expense of bringing such facilities up to County specification.

xii) Coverage

The provider shall have adequate resources to provide the following: 1) On-site manned call receipt function 7:00 A.M. – 6:00 P.M. Monday through Friday, except Contractor Holidays; 2) Remote call receipt function 6:00 P.M. – 7:00 A.M. weekdays, and 24 hours on weekends and Contractor Holidays; 3) Technical staff on-site 7:00 A.M. – 11:00 P.M. Any material changes to those requirements shall be subject to the approval of MDAD as provided herein.

xiii) Prioritizing of Work

The Contractor's technical personnel will be dispatched on jobs in a "first in-first out" fashion as long as the user deadline can be met. MDAD will review and authorize all work orders and reserves the right to prioritize various activities that the Contractor undertakes in order to meet deadlines. MAC activity will take a lower priority to repair activities pending the circumstances surrounding the given situation. The County reserves the right to mandate that the Contractor reallocate resources between 8:00 a.m. and 5:00 p.m., Monday through Friday (excluding Contractor Holidays), on a daily basis to deal with the various repair or MAC requests. The Manager or Project Manager has the authority to instruct and/or authorize work. In situations where emergency intervention is required, the County reserves the right to change configuration settings in systems, as coordinated with the Contractor.

xiv) Equipment Failure

If any Equipment malfunction is determined by the Contractor to be the fault of any other company, the County will so notify said company and request appropriate repairs and alterations. The County, Contractor, and the other company, if pertinent, must mutually determine the point of failure and the party responsible for payment. Notwithstanding the foregoing, if there is an emergency, the Contractor shall repair same in accordance with the Problem and Reporting Escalation subarticle in this Agreement and if during off hours or a weekend or Contractor Holidays, the County shall compensate the Contractor as provided herein and seek reimbursement from the other company. If the Equipment malfunction is associated with the Contractor's failure to install the Equipment properly or according to the Manufacturer's

Dated 1/24/02

specifications, the Contractor shall pay all costs.

xv) **Maintenance of Equipment, Systems, or Sub-systems Purchased from Others**

In the event the County adds or purchases equipment, systems or sub-systems from other contractors or vendors, the County shall timely notify the Contractor in writing of the installation of said equipment, systems or sub-systems. After installation, and unless otherwise notified by the County, the Contractor will be responsible for maintaining the equipment, systems, or sub-systems, pursuant to the Scope of Services article of this Agreement

C. **Project Management Services**

- i) The telecommunications infrastructure at MIA will continue to expand and evolve with new development at the airport. This evolution involves design and construction projects, some are exclusively limited to telecommunications systems, and others involve a multi-discipline effort. Both types of projects may require management of the telecommunications portion of the project by the Contractor as part of this work. For such projects, the Contractor will also provide consulting and project management services.

Project Management services will include, but shall not be limited to:

- (a) Needs Assessment.
  - (b) Design telecommunications systems to meet user requirements.
  - (c) Design Inside/Outside Plant and network changes and extensions.
  - (d) Competitively bid sub-contracts for execution of this work.
  - (e) Manage telecommunication construction related activities and coordination with related work contractors.
  - (f) Update MDAD as-built CAD drawings for the managed infrastructure.
- ii) New projects will be authorized, on a work order basis by the Manager or agent authorized in writing by the Manager. Each authorization will be accompanied by a written scope of work, and conceptual drawing where appropriate. No projects are to be undertaken without this authorization. In the case of new buildings where services do not exist, or additional services to existing buildings, the County will either provide the contractor with conduit or a suitable path to access the service demarcation point, or have the selected contractor provide such conduit at a cost approved in writing by the County. If, at the request of the County, the contractor provides the conduit, the County will reimburse the contractor for the approved cost of providing

Dated 1/24/02

the conduit. Upon the request of the County and advice as to the work to be performed by the contractor, the Contractor shall manage same in accordance with clause (i) above.

- iii) Once a project has been authorized, the Contractor shall execute and coordinate the design and estimate the cost of construction. On projects that involve only the telecommunications systems, the design shall be coordinated with MDAD Telecommunications. On multi-discipline projects this coordination shall include designers of other disciplines or other MDAD Divisions that may be involved in the project. Design and estimating services may be provided directly by the Contractor or under a sub-contract agreement with a qualified telecommunications design firm. MAC or day-to-day operation of the system shall not be affected as a result of the Contractor's role in new projects.
- iv) All design work performed under the awarded contract shall be in full compliance with MDAD, EIA/TIA, BICSI and other applicable standards. Drawing files for existing portions of the system shall be obtained from MDAD staff. These drawings shall be modified and supplemented as required to include the new work. These drawings are to be supplemented with specifications, standards and other information to form a competitive bid package for the work. In all cases, new work shall be specified to be uniform with existing installations and equipment of similar nature at MIA. Any deviation or changes must be approved in advance by the MDAD Telecommunications Section.
- v) Subcontractors shall only be used, subject to prior written approval from the Department, when the Contractor's existing work force is unable to perform project management services within established time frames.

2. **Management Fee**

a) **Basic Scope of Services**

Except for the compensation for project management services and reimbursements, the Contractor shall be paid a management fee (the "Management Fee") to provide for all of the operations, management, maintenance, service, support and

Dated 1/24/02

procurement services, including all Agreements with Vendors associated with the telecommunications systems provided in Exhibit 5, of the telecommunications and data network infrastructure, hardware and software systems as herein described in this Agreement. This Management Fee shall include the Contractor's profit and overhead for these services, a staff transition cost for the first year of this Agreement, and a spare parts carrying charge.

1. The County shall pay to the Contractor, as consideration for managing and providing the services required herein, an annual Management Fee of \$6,144,067 payable in arrears and in equal monthly payments of \$512,005.58, upon billing by the Contractor in accordance with this article. The payments for any partial month shall be prorated.

Such Management Fee may be increased only when the existing work force is unable to perform the services without a degradation in the System, and under the following circumstance for additional services rendered:

If, as a result of the County's Capital Improvement Program ("CIP"), the Services provided by the Contractor hereunder increases, and/or when otherwise approved in accordance with this Agreement (for example changes in employees' expenses), the County shall increase the monthly Management Fee in an amount commensurate to the increase in the Contractor's Services. If the Contractor believes that additional personnel are needed to perform the Services, or that Agreements with Vendors need to be added, or that existing Agreements with Vendors need to be changed, the Contractor shall submit a proposal request that includes justification and a cost proposal to the County, and the County may increase the monthly Management Fee accordingly.

The County reserves the right to review the Contractor's operations and if the System requirements increase or decrease, the County may, subject to subarticles 9.1 and 11.3, correspondingly increase or reduce the Management Fee based upon an addition or reduction in the Contractor's staffing requirements, or change in Agreements with Vendors. The Contractor shall calculate changes in the Management Fee by using the base salary of the employee according to job classification ("Direct Salaries") as reported to the Director of the United States Internal Revenue Services, times a 2.73 multiplier of such Direct Salaries and taking into account changes in Agreements with Vendors. The 2.73 multiplier is all inclusive, and compensates Contractor for all expenses directly or indirectly related to that employee's compensation, including but not limited to, social security, medicare, health insurance, unemployment, all benefits, and National Technical Resource Center ("NTRC"), and associated facilities provided to the employee such as vehicles, office equipment, office supplies, furnishing,

Dated 1/24/02

and test equipment, plus all Contractor's overhead and profit; all of which items are included in the lump sum Management Fee.

2. The above Management Fee includes the Agreements with Vendors compensated by the agreed fixed dollar amount plus fourteen percent (14%).
3. Spare parts carrying charge equal to ten percent (10%) times the Spare Parts cost calculated and payable monthly.
4. The Management Fee will be adjusted to reflect a four percent (4%) increase in the salaries of the Contractor's personnel for the second year. The Management Fee may be adjusted based upon the total value of the Spare Parts Inventory.

**b) Project Management Services**

When subcontracting is required, authorized in accordance with the Scope of Services article of this Agreement, and the Contractor has competitively bid out the work order(s), the Contractor agrees to an agreed fixed dollar amount of compensation (the sum of the lowest responsive and responsible subcontractor bids) plus fourteen percent (14%) of the price of the subcontractor work, as compensation for the Contractor's management of the work supplied.

The County shall have no obligation to pay the Contractor any additional sum in excess of this lump sum amount, except for a change and/or modification to work order(s) approved and executed in writing by the County and the Contractor.

All Services undertaken by the Contractor before the County's approval of the respective work order shall be performed at the Contractor's sole risk and expense.

- e. **The Management Fee described above already incorporates the payment of regular hours of all personnel. For the payment of approved overtime, however, the reimbursement to the Contractor will be paid in the amounts provided in clause (d) above, and shall be based upon the chargeable rate for that employee times one and one-half (1.5) for work performed after hours Monday through Sunday and 2.0 for work performed on Contractor Holidays. All cash losses or losses from employee theft shall be the responsibility of and be reimbursed by the Contractor.

**ARTICLE 13**  
**SOFTWARE LICENSE**

The County and the Contractor recognize that title to and ownership of the existing Equipment used in connection with the ELM Agreement or to provide services pursuant to the SATS Agreement as described on Schedule A to the ELM Agreement and Schedule E to the SATS Agreement, as of February 6, 2002 is held by and in the County and that such Equipment is computer hardware and software used for telecommunications and data network purposes. The Contractor has assigned all of its software licenses and permits (collectively, the "Licensed Software") to the County, which are assignable.

**1. Joint Obligations**

- a. The County will keep the Software licenses for the Equipment in full force and effect during the term of this Agreement. Contractor will do nothing on its part during the term of this Agreement that will cause such license(s) to be terminated by the licensor or diminish the County's rights to use such license(s) in accordance with the terms and conditions as set forth in the Licensed Software.

**b. Contractor's Warranty and Maintenance Obligations Unaffected**

Nothing contained in this article shall diminish, extinguish, or relieve the Contractor from its responsibilities and obligations to provide maintenance pursuant to this Agreement, including, but not limited to, providing maintenance for the Licensed Software, and the payment of any and all costs for such license maintenance to the licensor, or others as may be required. Contractor's right to maintain the Equipment is conditioned and contingent upon the County's having valid licenses for the Software, or other software, pertaining to such Equipment.

- c. Certain software suppliers license on a nonexclusive basis to the Contractor, and the Contractor also develops software or has software developed for it by third parties. All such software is and will remain the property of Contractor or its third party suppliers. Contractor, with respect to the software it develops, and to the

Dated 1/24/02

extent authorized under the supplier licenses, grants the County, for such software a personal, nontransferable and nonexclusive sublicense to use the software (including related documentation), for the life of the particular System or Equipment to which such software is related, solely to maintain, use and operate such System for which the software is initially furnished, provided the County:

- (ii) uses the software solely for County's governmental and business purposes in the operation of the Equipment or any new Equipment provided by the Contractor which are part of the System;
- (iii) does not copy or reproduce any of the software without the Contractor's consent, except to the extent necessary for (A) archival and back-up purposes and (B) the operation and/or use of the System to the extent allowed or authorized by the Contractor or third party licenses, and except as allowed by law, does not attempt to develop any source code from the software, nor reverse engineer, decompile, disassemble, reverse translate, or otherwise translate the software into human readable form; and
- (iv) returns to the Contractor or erases or destroys any software and any media being recycled or discarded upon the expiration of the licenses granted hereunder.

## **2. County to Execute License Agreements**

The County understands that suppliers of software including the Contractor may require the County to execute license agreements in order to use the software. Contractor understands that the County is a governmental entity and may not be able to execute such an agreement, as a matter of law or administrative policy among other things, because of the terms and provisions contained therein. In the event Equipment to be supplied by the Contractor requires the County to execute a separate software license agreement, whether with the Contractor or a third party supplier of such software, then the Contractor will notify the County of such circumstances, and provide the County with a copy of the software license agreement. Contractor will not provide the County with any Equipment, System or Sub-System where the operation or use thereof is contingent upon the executed license agreement, unless and until the County has informed the Contractor that the County is willing and able to execute such license agreement.

All things not expressly mentioned in this Agreement, necessary to either enforce or carrying out its purpose and intent are implied, and the Parties shall perform the same as though they were specifically mentioned, described and delineated.

The Contractor shall furnish all labor, materials, tools, supplies, and other items required to perform the work and Services that are necessary for the completion of this Agreement. All work and Services shall be accomplished at the direction of and to the satisfaction of the County's Project Manager.

The Contractor acknowledges that the County shall be responsible for making all policy decisions regarding the Scope of Services. The Contractor agrees to provide input on policy issues in the form of recommendations. The Contractor agrees to implement any and all changes in providing Services hereunder as a result of a policy change implemented by the County. The Contractor agrees to act in an expeditious, fiducial, and fiscally sound manner in providing the County with input regarding the time and cost to implement said changes and in executing the activities required to implement said changes.

The Contractor shall not have liability for the immediate or long-term effects of matters related to any action or inaction by the Department. Further, if a lawsuit is brought against the Contractor, by a third party that is neither an employee, agent, nor supplier of the Contractor, and the claim is based upon the Contractor's action or inaction which occurs based upon the Department's action or inaction under this Agreement, then the Contractor may bring a Third-Party claim against the County.

#### **ARTICLE 15** **MANNER OF PERFORMANCE**

The Contractor shall provide the Services described herein in a competent and professional manner satisfactory to the County in accordance with the terms and conditions of this Agreement. The County shall be entitled to a satisfactory performance of all Services described herein and to full and prompt cooperation by the Contractor in all aspects of the Services. At the request of the County the Contractor shall promptly remove from the project any Contractor's employee, subcontractor, or any other person performing Services hereunder. The Contractor acknowledges that such removal of any of its employees does not require the termination or demotion of any employee by the Contractor.

The Contractor represents that based upon its initial staffing recommendation, it will employ, maintain and assign to the performance of the Services a sufficient number of competent and qualified professionals and other personnel to meet the initial requirements

Dated 1/24/02

under this Agreement. The Contractor agrees to adjust its personnel staffing levels or to replace any of its personnel if so directed upon reasonable request from the County, should the County make a determination, in its sole discretion, that said personnel staffing is inadequate or inappropriate, or that any individual is not performing in a manner consistent with the requirements for the position.

The Contractor warrants and represents that its personnel have the proper skill, training, background, knowledge, experience, rights, authorizations, and licenses as necessary to perform the Services described herein.

The Contractor shall at all times cooperate with the County, and coordinate its work efforts and those of its subcontractors, to most effectively and efficiently maintain the progress in performing the Services. Similarly, the County shall at all times cooperate with the Contractor and coordinate its work efforts, and those of the County's independent contractors, to most effectively and efficiently maintain the progress in the Contractor's performance of its Services.

The Contractor shall comply with all provisions of all Federal, State and County laws, statutes, ordinances, and regulations that are applicable to the performance of this Agreement.

#### **ARTICLE 16** **TERM OF AGREEMENT**

The Agreement shall become effective on the date written on page 1 and shall be for a duration of twenty-four (24) months. The County may terminate the Agreement with or without cause on thirty (30) days written notice to the Contractor, provided however, that the Agreement shall have a minimum term of no less than eighteen (18) months unless terminated earlier for cause.

#### **ARTICLE 17** **CONTRACTOR REPRESENTATIONS AND WARRANTIES**

The Contractor represents and warrants it shall transfer the unencumbered title to all telecommunications, data, and CUTE infrastructure, software, licenses, permits, and other assets used in connection with the ELM Agreement or to provide services pursuant to the SATS Agreement as described on Schedule A to the ELM Agreement and Schedule E to the SATS Agreement, as of February 6, 2002. For purposes of this Agreement, the Parties recognize that due to the complexity of the network and the many thousands of items contained therein, Schedules A and E do not include every item and may include some items which are not present.

The Contractor represents and warrants it shall assign to the County all of its rights under a license/agreement entered into between WilTel Communications LLC and Societe Internationale de Telecommunications Aeronautique ("SITA") dated August 6, 1997. At MDAD's option, the Contractor shall, rather than deliver an assignment of its rights,

Dated 1/24/02

terminate its license arrangements with SITA, at the Contractor's expense. The assignment of the SITA license is subject to SITA's consent.

The Contractor represents and warrants the Assets are in good working order, as of February 6, 2002, subject to normal wear and tear. The Contractor indemnifies the County for those assets that are not in good working order, subject to normal wear and tear.

The Contractor shall indemnify the County with respect to any prospective or outstanding claims, set off, or payments due, with respect to its operation of the Shared Airport Tenant Services and CUTE systems up to and including February 6, 2002.

The Contractor represents and warrants that all permits and software licenses necessary for the operation of all elements of the telecommunications, data, CUTE, and shared tenant services systems will, at MDAD's option, be issued or assigned to the County. MDAD will pay any transfer fees associated with the transfer of such permits and licenses excluding the Contractor's own costs.

#### **ARTICLE 18**

#### **PROJECT MANAGER AND RESOLUTION OF DISPUTES**

- c) The Contractor shall be bound by the determinations or orders specifically authorized under this Agreement and shall promptly obey and follow every order of the Project Manager specifically authorized under this Agreement, including the withdrawal or modification of any previous order and regardless of whether the Contractor agrees with the Project Manager's determination or order. Where orders are given orally, they will be issued in writing by the Project Manager as soon thereafter as is practicable.
- d) The Contractor must first seek to resolve every difference concerning the Agreement with the Project Manager, for a period of thirty (30) days or such longer period as agreed upon by the Parties, which shall be a condition precedent to any

Dated 1/24/02

lawsuit permitted hereunder. In the event the Contractor seeks to contest an issue or difference for which there has been administrative review by the Project Manager, such subsequent lawsuit shall be considered a *de novo* proceeding.

## **ARTICLE 19**

## **ARTICLE 20**

### **SUBCONTRACTUAL RELATIONS**

If the Contractor will cause any part of this Agreement to be performed by a subcontractor,

Dated 1/24/02

the provisions of this Agreement will apply to such subcontractor and its officers, agents and employees in all respects as if it and they were employees of the Contractor; and the Contractor will not be in any manner thereby be discharged from its obligations and liabilities hereunder, but will be liable for all acts, omissions, or negligence of the subcontractor, its officers, agents, and employees, as if they were employees of the Contractor. The services performed by the subcontractor will be subject to the provisions hereof as if performed directly by the Contractor.

The Contractor, before making any subcontract for any portion of the Services, will state in writing to the County the name of the proposed subcontractor, the portion of the Services that the subcontractor is to do, the place of business of such subcontractor, and such other information as the County may require. The County has the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved or debarred by the County.

Before entering into any subcontract hereunder, the Contractor will inform the subcontractor of all provisions and requirements of this Agreement relating either directly or indirectly to the Services to be performed. Such services performed by such subcontractor will strictly comply with the requirements of this Agreement.

In order to qualify as a subcontractor satisfactory to the County, in addition to the other requirements herein provided, the subcontractor must be prepared to prove to the satisfaction of the County that it has the necessary facilities, skill and experience, license(s), and ample financial resources to perform the Services in a satisfactory manner. To be considered skilled and experienced, the subcontractor must show to the satisfaction of the County that it has satisfactorily performed services of the same general type that is required to be performed under this Agreement.

All subcontractors are required to protect the confidentiality of the County and County's proprietary and confidential information. Contractor shall furnish to the County copies of all subcontracts between the Contractor and subcontractors hereunder.

The Contractor shall, where agreed to by the subcontractor, insert a clause for the benefit of the County within each respective subcontract, which permits the County to request completion of performance by the subcontractor of its obligations under the contract. Contractor agrees that the County shall be permitted to request completion of performance by the subcontractor of its obligations under the subcontract, in the event that the Contractor is in breach of its obligations, and the option to pay the subcontractor directly for the performance by such subcontractor. Should either the Contractor or subcontractor(s) violate the terms of this article, the County may order all or any part of the subcontract work stopped, and may elect to complete the work itself or enter into an agreement with a third party to have the work completed. The Contractor's obligation to reimburse the County for the cost to complete the work, will only exist to the extent that said cost exceeds the

Dated 1/24/02

amount which would have been payable to the Contractor in connection with the work which was stopped. The excess cost to complete the work may be deducted from any unpaid balance payable to the Contractor. If there exists no unpaid balance, or if the completion cost is in excess of the unpaid balance, the Contractor shall reimburse the County for this sum, plus any costs of collection. The Contractor shall be entitled to be paid for work performed to the time the work was stopped by the County. Notwithstanding, the foregoing shall neither denote, connote, nor convey any obligation or liability on the part of the County to any subcontractor.

**NOTHING CONTAINED IN THIS AGREEMENT SHALL CREATE ANY CONTRACTUAL RELATIONSHIP BETWEEN ANY SUBCONTRACTOR AND THE COUNTY, OR ANY OBLIGATION ON THE PART OF COUNTY TO PAY ANY SUMS TO ANY SUBCONTRACTOR.**

#### **ARTICLE 21** **ASSIGNMENT**

Neither this Agreement nor any interest herein shall be assigned, or transferred by either party without prior written consent of the other party and said consent shall not be unreasonably withheld.

The Contractor has assigned all of its SATS Airport rental and CUTE agreements, software license(s), and permits to the County as fully described in Exhibit 6 of this Agreement.

##### **1. Contracts Assignable**

If such contracts, purchase agreements and purchase orders contain language acceptable to the Department, reflecting that they are assignable as provided herein, then upon such assignment, the Contractor shall be relieved from any further responsibility to the County under such contracts, agreements and orders, provided however, that the Contractor shall be liable for and shall indemnify the County with respect to any prospective or outstanding claims, set off, or payments due, with respect to said contracts, agreements, and orders which accrued prior to such assignment to the County.

No elected or appointed officer or official, director, employee, agent or other Contractor of the County, or of the State of Florida (including elected and appointed members of the legislative and executive branches of government), or a member of the immediate family or household of any of the aforesaid:
  - i) is interested on behalf of or through the Contractor directly or indirectly in any manner whatsoever in the execution or the performance of this Agreement, or in the Services, supplies or work, to which this Agreement relates or in any portion of the revenues; or
  - ii) is an employee, agent, advisor, or consultant to the Contractor or to the best of the Contractor's knowledge any subcontractor or supplier to the Contractor.
- (b) Neither the Contractor nor any officer, director, employee, agency, parent, subsidiary, or affiliate of the Contractor shall have an interest which is in conflict with the Contractor's faithful performance of its obligation under this Agreement; provided however, that the County, in its sole discretion, may consent in writing to such a relationship, provided the Contractor provides the County with a written notice, in advance, which identifies all the individuals and entities involved and sets forth in detail the nature of the relationship and why it is in the County's best interest to consent to such relationship.
- (c) The provisions of this article are supplemental to, not in lieu of, all applicable laws with respect to conflict of interest. In the event there is a difference between the standards applicable under this Agreement and those provided by statute, the stricter standard shall apply.

Dated 1/24/02

- (d) In the event the Contractor has no prior knowledge of a conflict of interest as set forth above and acquires information which may indicate that there may be an actual or apparent violation of any of the above, the Contractor shall promptly bring such information to the attention of the Project Manager. Contractor shall thereafter cooperate with the County's review and investigation of such information, and comply with the instructions the Contractor receives from the Project Manager in regard to remedying the situation.

**ARTICLE 35**  
**MISCELLANEOUS PROVISIONS**

**1. Binding Effect**

The terms, conditions and covenants of this Agreement shall inure to the benefit of and be binding upon the Parties hereto and their successors and assigns. This provision shall not constitute a waiver of any conditions prohibiting assignment or subletting.

**2. Contractor Limitation of Liability**

- a) The Contractor and its subcontractors shall not be liable for:
- (i) any indirect, incidental, consequential except as it pertains to SATS revenues, special or exemplary damages;
  - (ii) any damages of any kind resulting from unauthorized use of or intrusion into the system, including total fraud. This provision applies to all claims whether based upon breach of warranty, breach of contract, negligence, strict liability in tort where any other legal theory, and regardless of whether the Contractor or its subcontractors have been advised of the possibility of such damage or loss, except for damages resulting if the Contractor or its subcontractors fail to take explicit remedial action based upon the directive of the Department.
- b) If a voice system or any other component thereof supports voice over IP protocol (telephony or transmission control protocol/internet protocol), the County may experience certain compromises in performance, liability and security, even when the System is in good working order. These compromises may become more acute if the County fails to follow the Contractor's or the manufacturer's recommendations for configuration, operation and use of the System. The County acknowledges that it is aware of these risks and that it has determined they are acceptable for its application of the System, and the County will not assert any claim against Contractor for such compromises. The County further acknowledges and agrees that the County is solely responsible for:
- (i) ensuring that its network and systems are adequately secured against unauthorized intrusion; and

Dated 1/24/02

- (ii) backing up its data and files.

### **3. Other County Rights**

- a) Contractor shall be liable for any physical damage it causes to the system. This liability is limited to: (i) the Contractor's repair of the system or component thereof, or if the system or component cannot be repaired, replacement with a comparable system or component; and (ii) any other such damages to the County arising from the physical damage caused by the Contractor.
- b) The County may also bring any suit or proceeding for specific performance or for an injunction.

### **4. No Estoppel or Waiver**

No acceptance, order, measurement, payment, or certificate of or by a Party or its employees or agents shall estop the other Party from asserting any right of the ensuing Agreement. There shall be no waiver of the right of a Party to demand strict performance of any of the provisions, terms and covenants of this Agreement, nor shall there be any waiver of any breach, default or non-performance hereof by the other Party unless such waiver is explicitly made in writing by the Party. No delay or failure to exercise a right under the ensuing Agreement shall impair such right or shall be construed to be a waiver thereof. Any waiver shall be limited to the particular right so waived and shall not be deemed a waiver of the same right at a later time, or of any other right under the Agreement.

### **5. Federal Subordination**

This Agreement shall be subordinate to the provisions of any existing or future agreements between the County and the United States of America relative to the operation and maintenance of the Airport, the execution of which has been or may be required as a condition precedent to the expenditure of Federal funds for the development of the Airport. All provisions of this Agreement shall be subordinate to the right of the United States of America to lease or otherwise assume control over the Airport, or any part thereof, during time of war or national emergency for military or naval use and any provisions of this Agreement inconsistent with the provisions of such lease to the United States of America shall be suspended.

### **6. Governmental Authority**

Nothing in this Agreement shall be construed to waive or limit the governmental authority of the County as a political subdivision of the State of Florida.

Dated 1/24/02

7. **Headings**

The headings of the various articles and sections of this Agreement, and its Table of Contents, are for convenience and ease of reference only, and shall not be construed to define, limit, augment or describe the scope, context or intent of this Agreement or any part or parts of this Agreement.

8. **Independent Contractor**

The Contractor shall perform all services described herein as an independent contractor and not as an officer, agent, servant, or employee of the County. All personnel provided by the Contractor in the performance of this Agreement shall be considered to be, at all times, the sole employees of the Contractor under its sole discretion, and not employees or agents of the County.

9. **Intent of Agreement**

This Agreement is for the benefit of the Parties only and does not: (a) grant rights to third party beneficiaries, or to any person; or (b) authorize non-parties to the Agreement to maintain a suit for personal injuries, professional liability, or property damage pursuant to the terms or provisions of the Agreement.

10. **Joint Preparation**

The Parties acknowledge that they have sought and received whatever competent advice and counsel as was necessary for them to form a full and complete understanding of all rights and obligations herein and that the preparation of this Agreement has been their joint effort.

11. **Laws and Regulations**

The Contractor shall comply with the Code of Miami Dade County, Florida (the "Code"), including but not limited to Chapter 25 of the Code, Operational Directives issued thereunder, all laws, statutes, ordinances, resolutions, regulations and rules of the United States of America, State of Florida, or Miami-Dade County, all as may be amended from time to time, and any and all plans and programs developed in compliance therewith which may be applicable to its operations or activities under this Agreement.

12. **Modifications**

This Agreement may be modified and revised by written Amendment duly executed by the Parties hereto. Any oral representation or modifications concerning this Agreement shall be of no force or effect.

14. **Ownership Of Documents**

Any and all reports, photographs, surveys, provided or created in connection with this Agreement are and shall remain the property of the County. In the event of termination of this Agreement, any reports; such as traffic, inventory, switch audit, service and or MAC logs and photographs, surveys, prepared by the Contractor, whether finished or unfinished, shall become the property of the County, and the Contractor shall immediately remit same to the County.

15. **Order Of Precedence**

If there is a conflict between or among the provisions of this Agreement, the order of precedence is as follows: 1) work order, 2) the Scope of Services, and 3) these terms and conditions other than the Scope of Services.

16. **Press Release Or Other Public Communication**

The Contractor shall not issue or permit to be issued any press release, advertisement or literature of any kind that states or suggests that the County endorses the Contractor or the work being performed hereunder, unless the Contractor first obtains the written approval of

Dated 1/24/02

the County. Such approval may be withheld if for any reason the County believes that the publication of such information would be harmful to the public interest or is in any way undesirable. This article shall not preclude the Contractor from including the County as a representative customer. Except as may be required by law, or with the written consent of County, the Contractor and its employees, agents, subcontractors and suppliers will not represent, directly or indirectly, that any product or service provided by the Contractor or such other parties has been approved or endorsed by the County.

**17. Prior Agreements**

The Parties agree that there are no commitments, agreements or understandings concerning the subject matter of this Agreement that are not contained in this document. Accordingly, the Parties agree that no deviation from the terms hereof shall be predicated upon any prior representations or agreements whether oral or written. **No modification, amendment or alteration in the terms or conditions contained herein shall be effective unless set forth in writing in accordance with this Agreement.**

**18. Project Fresh Start**

Project Fresh Start has been abated by the County for fiscal year 2001-2002 by action of the Miami-Dade Board of County Commissioners. The Board reserves the right to reinstate this program in the future; if it does, the County will advise the Contractor of the impact, if any, such action may have on this Agreement.

**19. Rights to be Exercised by Department**

Wherever in this Agreement rights are reserved to the County, such rights may be exercised by the Department. Wherever Department approval is required, it shall not be unreasonably withheld.

**20. Security**

Subject to recommendations from the Contractor as to reasonable and prudent security measures needed and approval by the Department, the Contractor shall be responsible for the security and protection of the facilities, and the equipment, furnishings, commodities and supplies provided under this Agreement, for which the Contractor has managerial responsibilities.

**21. Severability**

If any provision of this Agreement or the application thereof to either party to this Agreement is held invalid by a court of competent jurisdiction, such invalidity shall not affect other provisions of the Agreement which can be given effect without the invalid provision, and to this end, the provisions of this Agreement shall be severable.

Dated 1/24/02

**22. Solicitation**

Except as provided by Section 2-11.1(s) of the Code of Miami-Dade County, Florida, the Contractor warrants that: 1) it has not employed or retained any company or person other than a bona fide employee working solely for the Contractor to solicit or secure this Agreement; and 2) it has not paid, or agreed to pay any company or other person any fee, or commission, gift, or other consideration contingent upon the execution of this Agreement. A breach of this warranty makes this Agreement voidable by the County without liability to the Contractor for any reason.

**23. Survival**

Any obligations of the Contractor and the County which by their terms would continue beyond the termination, cancellation or expiration of this Agreement or any service order shall survive with such termination, cancellation or expiration.

**24. Taxes**

The Contractor acknowledges that the County is a tax exempt entity. The Contractor shall pay all taxes lawfully assessed against its operations at the Airport, provided, however, that the Contractor shall not be deemed to be in default of its obligations under this Agreement for failure to pay such taxes pending the outcome of any legal proceedings instituted in a court of competent jurisdiction to determine the validity of such taxes.

**25. Third Party Beneficiaries**

Neither the Contractor nor the County intend to directly or substantially benefit a third party by this Agreement. Therefore, the Parties agree that there are no third party beneficiaries to this Agreement, and that no third party shall be entitled to assert a claim against either of the Parties based upon this Agreement. The Parties expressly acknowledge that it is not their intent to create any rights or obligations in any third party or entity under this Agreement.

**26. Governing Law; Venue**

This Agreement shall be governed by the laws of the State of Florida. Venue for all actions and claims arising from this Agreement shall be heard in the Circuit Court of the Eleventh Judicial Circuit in and for Miami-Dade County, Florida or in the United States District Court in and for the Southern District of Florida.

Registered Officer/Agent; Jurisdiction: The Contractor shall designate a registered office and a registered agent, as required by Florida Statutes, such designations to be filed with the Florida Department of State in accordance with Florida Statutes. If the Contractor is a natural person, he and his personal representatives hereby submit themselves to the

Dated 1/24/02

jurisdiction of the Courts of this State for any cause of action based in whole or in part on the alleged breach of this Agreement.

**27. Violations of Laws and Regulations**

The Contractor agrees to pay on behalf of the County any penalty, assessment, or fine, issued in the name of the County, or to defend in the name of the County any claim, assessment or civil action, which may be presented or initiated by any agency or officer of the Federal, State or County governments, based in whole or substantial part upon a claim or allegation that the Contractor, its agents, employees or invitee, have violated any law, statute, ordinance, resolution, regulation or rule described in subarticle 8 above or any plan or program developed in compliance therewith.

**28. Responsible Wages And Benefits**

If construction work in excess of one hundred thousand dollars (\$100,000) is required of, or undertaken by the Contractor as a result of this Agreement, the Contractor must pay laborers and mechanics performing work on the project no less than the hourly rates specified in accordance with Section 2-11.16 of the Code of Miami-Dade County, Florida and Administrative Order ("AO") No. 3-24. The Contractor shall fully comply with the requirements of the Code and AO and shall satisfy, comply with, and complete the requirements set forth in this Agreement.

It is also the policy of Miami-Dade County that in all leases of County-owned land which provide for privately funded construction improvements thereon whose construction costs are greater than or equal to \$1 million dollars, any portion of which are financed by any Federal, State or local governmental entity or by bonds issued by such entities, including the Industrial Development Authority ("IDA"), shall comply, including requiring the lessee to require any Contractor constructing such improvements to pay responsible wages to the same extent as if such improvements were County construction. A lessee must pay the County the monitoring fee(s) for the project according to the sliding scale approved by the Board.

This AO does not apply to County construction contracts less than or equal to one hundred thousand dollars (\$100,000) or blanket County contracts designed to consolidate an indeterminate number of individual smaller construction contracts, repair or alteration activities which may be needed over a fixed period of time, provided the overall blanket contract ceiling does not exceed five hundred thousand dollars (\$500,000) and further provided that no individual work order issued under such blanket contract shall exceed twenty-five thousand dollars (\$25,000) per craft, nor does it apply to County construction contracts which are federally funded or otherwise subject to the Davis-Bacon Act, 40 U.S.C. 276 (a). Furthermore, this AO shall not apply to those privately funded projects on County-owned land for construction or alteration of public buildings or public works which are financed solely through private sources, without one dollar (\$1) or more of financing provided through any Federal, State, County or local government entity or bond sources including IDA bonds or similar type bond funding.

Dated 1/24/02

29. Entirety of Agreement

The Parties hereto agree that this Agreement sets forth the entire agreement between the Parties, and there are no promises or understandings other than those stated herein. None of the provisions, terms and conditions contained in this Agreement may be added to, modified, superseded or otherwise altered, except as may be specifically authorized by subarticles 12 and 17 to this article of the Agreement, or by written instrument executed by the Parties hereto.

IN WITNESS WHEREOF, the parties have executed this Agreement effective as of the date first herein above set forth.

All proposers seeking to contract with the County shall, as a condition of award, provide a statement of their subcontracting policies and procedures. Proposers who fail to provide a statement of their policies and procedures may not be recommended by the County Manager for award by the Board of County Commissioners.

The term "local" means having headquarters located in Miami-Dade County or having a place of business located in Miami-Dade County from which the contract or subcontract will be performed.

The term "subcontractor" means a business independent of a Proposer that may agree with the Proposer to perform a portion of a contract.

Failure to comply with this policy may result in debarment.

A bidder or proposer who is awarded the contract shall not change or substitute first tier subcontractors or direct suppliers or the portions of the work to be performed or materials to be supplied from those identified in the listing provided except upon written approval by the County.

**FALSE CLAIMS ORDINANCE AFFIDAVIT**

The purpose of the Miami-Dade County False Claims Ordinance No. 99-152 is to deter persons from knowingly causing or assisting in causing the County to pay claims that are false, fraudulent, or inflated, and to provide remedies for obtaining damages and civil penalties of the County when money is sought or obtained from the County by reason of a false claim. "Claim" means any invoice, statement, request, demand, lawsuit, or action under contract or otherwise for money, property or services made to any employee, officer, or agent of the County, or to any contractor, grantee, or other recipient if any portion of the money, property, or services requested or demanded was issued from or was provided by the County (hereinafter "County funds")

Dear Customer:

On February 6, 2002, the Miami Dade Aviation Department (MDAD) and NextiraOne entered into a Management Services Agreement, whereby NextiraOne manages and operates MDAD's voice, data and CUTE networks. MDAD has acquired the telecommunications infrastructure in our airport from NextiraOne however, NextiraOne will continue to provide design services, installations, and monitoring for all equipment.

Your agreement with NextiraOne has been assigned to Miami-Dade County in accordance with paragraph 27 of which states:

"Accordingly, simultaneously with the effective date of the assignment and in accordance with the Agreement, NextiraOne will no longer be responsible under the Agreement, although it will provide management services regarding the Agreement as and when requested by and on behalf of the County."

The new Agreement ensures uninterrupted performance of the mission critical enterprise network and complex information functions at Miami International Airport (MIA) and the County's General Aviation Airports by the same highly regarded and experienced technicians of NextiraOne. At the same time, it allows for a two (2) year window for the County to proceed with a new competitive procurement process, in which NextiraOne will be invited to participate.

Miami-Dade County also has regained the ability to competitively bid any changes or additions to the system and to purchase equipment directly from outside vendors. If you have any questions, or comments on how this transfer may impact your organization, please contact Maurice Jenkins at (305) 876-0934.

On Friday, March 22, 2002, from 12PM to 2PM, MDAD and NextiraOne will host an open house for all customers at CC-"A", 4<sup>th</sup> floor, room #3.  
Lunch will be provided, please R.S.V.P. to Holly Klaity at (305) 876-7905 if you wish to attend.

Sincerely,

Maurice Jenkins, Manager
