Subject: Utilities Inc. Florida Docket# 20160101 RATE Increase request

I just want to voice my opinion on the rate increase proposal. **I'm opposed to the rate increase!**

The government has let this constitutional republic fall into a black hole of DEBIT. Constant rate increases from all around.

Lack of jobs, people having trouble finding jobs and being downsized of a job.

If retired lack of income that was expected isn't happening.

We the people are getting squeezed. Most of the people making the decisions don't live in the real world.

I suggest you take a look around at the situations of everyday people. Between the laws and regulations you approve you are putting another nail in our coffins.

When will all this greedy madness stop?
