Subject: FP&L IS WAY TOO GREEDY!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am hoping to make a point to the PSC (*Public Service Commission?*) that you people REALLY MUST TELL FP&L that enough is enough! They are constantly wanting more and more income, while Floridians are struggling to make ends meet.

The business they are engaged in is one they took on themselves and are making loads of money, yet they keep wanting us to pad their bank accounts! Articles I read reflect a much lower average monthly electric bill than what we have been paying for the last 30 years here. My bill is usually from \$250-\$300 a month! There is no reason whatsoever we should have to keep giving FP&L more money to do the job they are set up for doing. Their income will raise with extreme hot heat and more and more people coming to Florida to live. They should operate as any business would by investing their income to strengthen the grid which is what we would expect. Why should Floridians be expected to pump up their coffers so their investors are kept happy. Our retirements and floundering, but we are expected to "just deal with it". Meanwhile FP&L spends enormous amounts of money on TV, radio and print ads patting themselves on the back.

There HAS to be some stopping point and PLEASE PSC: JUST SAY "NO" TO FP&L.

Thank you for your time.
