**Subject:** FPL requested rate hikes

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Filing complaint, about FPL propose rate increase of 9 billion, over 4 years.

FPL energy renewable investment is a total disaster, solar farms, battery storage, are extremely expensive, and dependent on Chinese materials, whose quality and dependability are questionable at best.

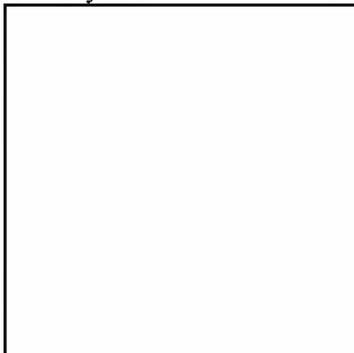

Rates are high as is, and FPL is requesting higher rates yet, where are the savings, to be generated from these investments.

Projected cap x of 53 billion, 43 billion is renewables, that generate the same power generation, that the non-renewables ( total Cap x of 10 billion ), generate.

This makes no sense at all, invest in natural gas, nuclear, and other fuels.

Don't bury Florida customers with these rates hikes, to appease special interest's groups.

Thank you

**Tony Alvarez**
