Subject: No more raises for FPL – Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

As a Florida resident and consumer, I know the value of my hard-earned money. I also know that the power and light I pay for every month is a lifesaver, especially during these extreme heat waves that are becoming all too common.

Florida Power & Light (FPL) wants to raise my rates by hundreds a year and make working residents like me foot the bill for their profits and executive bonuses. Reporting has shown that 50 cents of every dollar is going to profit, not keeping the power on. Additionally, from March 2024 to February 2025, FPL shut off 1.216 M residential customers for non-payment — about a fifth of all their residential customers.

The Office of Public Counsel—the watchdog for consumers—submitted expert testimony showing FPL is inflating the numbers and should cut rates by \$620 million, not raise them.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

I refuse to pay FPL any more than what they're currently charging me. FPL is a racket!

Many of our residents cannot afford rent, utilities and groceries as it is. More and more people are also having heat strokes as climate change increases temperatures across the globe and right here at home in Florida.

FPL's rate increase hundreds will make people choose between paying their light bill and putting food on the table. So many people I know have already left the state because they cannot afford to live here. This impacts our economy and work force. FPL's rate increase will only benefit executive who will get paid even more and receive bonuses.

This is a matter of life or death. I am not being dramatic. FPL shut offs for nonpayment can result in people dying doing days of increases heat or for elderly folks or those who rely on ventilators or other machines.

The Office of Public Counsel submitted expert testimony showing FPL is inflating the numbers and should cut rates by \$620 million, not raise them.

Please reject FPL's request and prioritize customers' well-being and survival.
