**Ms. Ellen Plendl,                      FPSC Admin Office**

**Good Day !**

**Ref : The Unwarranted FPL Monthly Charge Since The Year 2022.**

**FPL Account No. 26582    57510**

**Over the preceding several years FPL has been able to not only punish our household, but to also**

**monetarily penalize our household as well for our Lower monthly consumption of KWH.**

**The unwarranted charge is due to terminate next month, and if it does not Legal Action will be taken**

**against FPL ( Trust Me ! )<<<<,**

**In the interim it is still difficult to fathom as to how both the FPSC and also the OPC were able to**

**irresponsibly allow FPL to mislead them into thinking that the general public would not object to**

**being monetarily penalized every month ? .<<<<<**

**Instead of being rewarded, praised, and also commended for our Lower Consumption of KWH**

**the Contrary has occurred by FPL ?**

**In Summation:**

***This Dishonest, and also Greedy Conglomerate deserves No Mercy Ladies & Gentlemen  
! <<<<<***

***Thank You.***

Thanks Ellen.

Can you please advise what portion of this rate increase is due to FPL using new solar power generated electricity instead of conventional power sources?

Solar panels do NOT generate power 24/7.

Where are these FPL solar panels made?

I look forward to hearing from you.

Sincerely,

Aodan.

Dear Aodan:

The Governor's office forwarded a copy of your correspondence regarding Florida Power & Light Company (FPL) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

On November 20, 2025, the FPSC approved a settlement agreement between Florida Power & Light Company (FPL) and participating intervenors. The agreement establishes a four-year rate plan effective January 1, 2026, through December 31, 2029.

Under the settlement, FPL will implement an increase in rates and charges designed to generate \$945 million in additional annual revenues beginning January 1, 2026, a reduction of approximately 39% from its original request. An additional increase to generate \$705 million annually will take effect January 1, 2027, representing a 24% reduction from the as-filed case.

The approved settlement includes robust customer protections, expanded financial assistance programs, and continued investment in the reliability and resilience of Florida's electric grid.

Commissioners considered testimony from all intervening parties, including consumer advocates, environmental groups, large industrial users, retail businesses, electric vehicle charging providers, and federal agencies, including the Office of Public Counsel, Florida Rising, and Florida Industrial Power Users Group.

With the reduced revenue requirements and the expiration of the storm recovery surcharge, typical residential bills starting in January 2026 will be:

- **Peninsular Florida:** \$136.64 for 1,000 kWh — a \$2.50 increase from current levels.
- **Northwest Florida:** \$141.36 for 1,000 kWh — a \$2.24 decrease from current levels.

These estimates include all components of electric service, including fuel, cost-recovery clauses, and Gross Receipts Tax.

We appreciate you sharing your views and will add your correspondence to Docket 20250011.

If you have any questions, please contact me at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Ellen Plendl
