

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Investigation into the establishment of operations support systems permanent performance measures for incumbent local exchange telecommunications companies. (VERIZON FLORIDA TRACK)

DOCKET NO. 000121C-TP
ORDER NO. PSC-07-0917-PAA-TP
ISSUED: November 14, 2007

The following Commissioners participated in the disposition of this matter:

LISA POLAK EDGAR, Chairman
MATTHEW M. CARTER II
KATRINA J. McMURRIAN
NANCY ARGENZIANO
NATHAN A. SKOP

NOTICE OF PROPOSED AGENCY ACTION
ORDER APPROVING REVISIONS TO
VERIZON'S PERFORMANCE MEASUREMENT PLAN

BY THE COMMISSION:

NOTICE is hereby given by the Florida Public Service Commission that the action discussed herein is preliminary in nature and will become final unless a person whose interests are substantially affected files a petition for a formal proceeding, pursuant to Rule 25-22.029, Florida Administrative Code.

I. Case Background

Docket No. 000121C-TP was opened to develop a wholesale permanent performance measurement plan for Verizon Florida. The purpose of the plan is to ensure CLECs receive nondiscriminatory access to Verizon operations support systems (OSS) and to establish a standard against which CLECs and this Commission can measure performance over time to detect and correct any degradation of service provided to CLECs.

By Order No. PSC-03-0761-PAA-TP, issued June 25, 2003, we approved a Joint Partial Settlement Agreement (the stipulation) between Verizon and CLECs to adopt wholesale permanent performance measures in Florida. Verizon's Florida Performance Measurement Plan, filed in Docket 00021C-TP, is based on Verizon's California performance measurement plan and is the result of the stipulation entered into by parties to FPSC Docket No. 000121C-TP. The stipulation further identifies a process for the flow through of changes ordered by the California Public Utilities Commission to the measures in effect in Florida.

DOCUMENT NUMBER-DATE

10274 NOV 14 5

FPSC-COMMISSION CLERK

Accordingly, parties to the stipulation agreed that should the California Public Utilities Commission order additions, deletions, or modifications to Verizon's Performance Measurement Plan, the following should occur:

Not more than ten calendar days after the date of the final order of the California Public Utilities Commission, Verizon shall provide written notice of the additions, deletions, and/or modifications to the Florida Public Service Commission and to all CLECs with which it has an interconnection agreement.

Not more than 15 calendar days after the date of the written notice described in Paragraph 1, any affected party may notify the Commission and Verizon in writing of any objections to the additions, deletions, and/or modifications ordered by the California Public Utilities Commission.

If no party provides written notice of an objection within the 15-day window, then Verizon shall implement the changes to the OSS Performance Plan in Florida in accordance with the schedule established by the CPUC, and Staff shall recommend that the FPSC issue a Proposed Agency Action to adopt the changes effective as of the implementation date set forth in the CPUC Order.

If one or more parties provide written notice of an objection within the 15-day window, then the FPSC shall resolve the objection, and Verizon shall implement the FPSC's Order in accordance with the implementation date specified in that Order.

In this Order we approve revisions to Verizon's Florida Performance Measurement Plan that were approved by the California Public Utilities Commission on September 6, 2007. The summary of the revisions and a redline version of the Plan approved by the California Public Utilities Commission are provided in Attachments 1 and 2. Verizon filed notice of the changes on September 17, 2007. The 15-day window for parties to object to Verizon's proposed changes expired on October 3, 2007. No comments or objections were received.

II. Jurisdiction

We are vested with jurisdiction over this matter pursuant to Sections 364.01(3) and (4)(g), Florida Statutes. Pursuant to Section 364.01 (3), Florida Statutes, the Florida legislature has found that regulatory oversight is necessary for the development of fair and effective competition in the telecommunications industry. To that end, Section 364.01 (4) (g), Florida Statutes, provides, in part, that this Commission shall exercise its exclusive jurisdiction in order to ensure that all providers of telecommunications service are treated fairly by preventing anti-competitive behavior. Furthermore, it is noted that the FCC has encouraged the states to implement performance metrics and oversight for purposes of evaluating the status of competition under the Telecommunications Act of 1996.

III. Analysis

Verizon's September 17, 2007 filing in Docket No. 000121C-TP contains the Final Order adopted by the California Public Utilities Commission, a revised edition of Verizon's Performance Measurement Plan, a redline version of the revised Performance Measurement Plan, and a summary of the redline changes.

The revisions approved in the California Public Utilities Commission's Final Order primarily fall into the following categories: (i) the adoption of a JPSA for Verizon only;¹ (ii) the agreement to formatting changes to match Verizon's format in several other states; and (iii) the agreement to remove unbundled network elements (UNEs) from Verizon's Performance Measurement Plan that have been delisted per the Triennial Review Order (TRO) and Triennial Review Remand Order (TRRO).

The process for implementing changes to Verizon's Florida Performance Measurement Plan is identified in the May 2003 Joint Motion approved by the FPSC. The stipulating parties agreed that Verizon shall provide written notice to the FPSC of all California ordered changes no more than 10 calendar days after receiving the California Public Utilities Commission's Final Order. Furthermore, within 15 days after the date of the written notice, any affected party must notify the FPSC and Verizon in writing of any objections to changes ordered by the California Public Utilities Commission. Verizon has complied with the ten-day window to notify the FPSC of its proposed revisions, and, to date, no objections were filed in Docket 000121C-TP.

We have reviewed Verizon's redline version of the revised Performance Measurement Plan and find that the proposed changes are necessary and serve the public interest in providing non-discriminatory access to Verizon's OSS systems.

Accordingly, we hereby approve Verizon's Florida revisions to the Performance Measurement Plan as shown in Attachment 1 and summarized in Attachment 2. The implementation of the revisions to Verizon's Florida Performance Measurement Plan shall become effective beginning with the March 2008 data month to enable simultaneous implementation of changes with Verizon's California Performance Measurement Plan.

This docket shall remain open to conduct periodic reviews of Verizon's Performance Measurement Plan and to complete any initial third-party audit outlined in Order No. PSC-03-0761-PAA-TP.

¹ Prior to 2004, the JPSA was a single document that applied to both AT&T California (then SBC California) and Verizon, even though not all measures were used by each company and the standards developed for like measures could vary between companies. In 2004, it was agreed to have a separate JPSA for each company, because AT&T California, Verizon, and many CLECs were multi-state companies with operations in the same states.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that Verizon's Florida revisions to the Performance Measurement Plan as shown in Attachment 1 and summarized in Attachment 2 are hereby approved as set forth in the body of this Order.

ORDERED that the provisions of this Order, issued as proposed agency action, shall become final and effective upon the issuance of a Consummating Order unless an appropriate petition, in the form provided by Rule 28-106.201, Florida Administrative Code, is received by the Commission Clerk, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, by the close of business on the date set forth in the "Notice of Further Proceedings" attached hereto. It is further

ORDERED this docket shall remain open to conduct periodic reviews of Verizon's Performance Measurement Plan and to complete any initial third-party audit outlined in Order No. PSC-03-0761-PAA-TP.

By ORDER of the Florida Public Service Commission this 14th day of November, 2007.

ANN COLE
Commission Clerk

(S E A L)

AJT

NOTICE OF FURTHER PROCEEDINGS OR JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing that is available under Section 120.57, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing will be granted or result in the relief sought.

Mediation may be available on a case-by-case basis. If mediation is conducted, it does not affect a substantially interested person's right to a hearing.

The action proposed herein is preliminary in nature. Any person whose substantial interests are affected by the action proposed by this order may file a petition for a formal proceeding, in the form provided by Rule 28-106.201, Florida Administrative Code. This petition must be received by the Office of Commission Clerk, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, by the close of business on December 5, 2007.

In the absence of such a petition, this order shall become final and effective upon the issuance of a Consummating Order.

Any objection or protest filed in this/these docket(s) before the issuance date of this order is considered abandoned unless it satisfies the foregoing conditions and is renewed within the specified protest period.

CA JPSA

Introduction

On October 9, 1997, the Commission issued an order instituting a rulemaking proceeding and investigation (hereinafter, the "OSS OIL") to accomplish several goals, including the determination of reasonable standards of OSS performance for Pacific and GTE, the development of a mechanism that will allow the Commission to monitor improvements in OSS performance, and the assessment of the best and fastest method of ensuring compliance if standards are not met, or improvement is not shown¹.

Pursuant to the Commission's issuance of the OSS OIL, the Settling Parties entered into lengthy and detailed negotiations to establish a set of performance measures consistent with the Commission's stated goals.¹ The Settling Parties filed a Joint Motion for approval of the JPSA on January 7, 1999, and filed motions on the remaining open issues on January 8, 1999. The Commission issued a decision approving the original JPSA and resolving most of the remaining open issues on August 5, 1999. D.99-08-020.

The JPSA, as originally approved by the Commission in August 1999, called for periodic reviews. Numerous meetings were held between the ILECs and CLECs to negotiate and resolve issues that have arisen over the past year. This iteration of the JPSA is a direct result of those collaborative sessions.

The Commission staff has strongly encouraged CLECs and ILECs to stipulate to a resolution in this proceeding. This partial settlement agreement represents such a stipulation by the parties. This partial settlement report addresses the following:

- the performance measurements
- the formulas for the same
- the levels of disaggregation
- the analogs for the service group types (a level of disaggregation)
- other analogs and the benchmarks
- auditing and reporting
- review procedures

¹ A full history of the parties' negotiations and the basis for the development of the measures and standards contained in the JPSA is set forth in the Settling Parties' Joint Motion filed in this docket on January 7, 1999, and is incorporated by reference herein.

Attachment 1

CA JPSA

Executive Summary

Performance Measures Development Process

The Telecommunications Act of 1996 and the FCC's implementing rules require Verizon to provide CLECs with nondiscriminatory access to OSS. In the August 1996 Local Competition First Report and Order, the FCC commented, generally, that ILECs must provide CLECs with access to the pre-ordering, ordering, provisioning, billing, repair, and maintenance OSS sub-functions pursuant to the Act such that CLECs are able to perform such OSS sub-functions in "substantially the same time and manner" as the ILECs can for themselves². The FCC's 271 decisions have analyzed the nondiscriminatory access requirements of §251(c) to a Bell Operating Company's (BOC's) §271 application, and clarified that for those OSS subfunctions with retail analogs, a BOC "must provide access to competing carriers that is equal to the level of access that the BOC provides to itself, its customers or its affiliates, in terms of quality, accuracy and timeliness."³ The FCC further clarified that for those OSS functions with no retail analog, a BOC must offer access sufficient to allow an efficient competitor "a meaningful opportunity to compete."⁴

Initially, some of the interconnection agreements contained performance measures. In late 1997, the California Public Utilities Commission (CPUC) initiated OSS OII/OLR Docket 97-10-016 and 97-10-017 to address monitoring the performance of Operations Support Systems (OSS). The three stated goals of the Commission's OSS/OII proceeding are:

- "to determine reasonable standards of performance for Pacific Bell (Pacific) and GTE California Incorporated (GTEC) in their Operations Support Systems (OSS),

² See, Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, CC Docket No. 96-98, First Report and Order, 11 FCC Red 15499, 15763-64 [¶518] (1996) ("Local Competition First Report and Order"), *aff'd in part and vacated in part sub nom. Competitive Telecommunications Ass'n v. FCC*, 117 F.3d 1068 (8th Cir. 1997) and *Iowa Utilities Bd. v. FCC*, 120 F.3d 753 (8th Cir. 1997), modified on reh'g, No. 96-3321 (Oct. 14, 1997) (Rehearing Order), petition for cert. granted, 118 S. Ct. 879 (1998).

³ See *In the Matter of Application by Bell Atlantic New York for Authorization Under Section 271 of the Communications Act to Provide In-Region, InterLATA Service in the State of New York*, CC Docket No. 99-295. See also, *In the Matter of Application of Ameritech Michigan Pursuant to Section 271 of the Communications Act of 1934, as amended, To Provide In-Region, InterLATA Services In Michigan*, Memorandum Opinion and Order, 12 FCC Red 20543, 20618-19 [¶139] (1997) (*Ameritech Michigan Order*), writ of mandamus issued sub nom. *Iowa Utils. Bd. v. FCC*, No. 96-3321 (8th Cir. Jan. 22, 1998). ("*Ameritech Opinion*"); see also, *In the Matter of Application of BellSouth Corporation, et al., for Provision of In-Region, InterLATA services in Louisiana* ("*BellSouth Louisiana II Opinion*") CC Docket No. 98-121, FCC 98-271 (10-13-98), paragraph 87 (citing *Ameritech Opinion* at 12 FCC Red 20618-19). See also, *Ameritech Opinion* at ¶131, wherein the FCC makes the following statement regarding application of the §251(c) requirements to a BOC's §271 application:

"Because the duty to provide access to network elements under section 251(c)(3) and the duty to provide resale services under section 251(c)(4) include the duty to provide nondiscriminatory access to OSS functions, an examination of a BOC's OSS performance is necessary to evaluate compliance with section 271(c)(2)(B)(ii) and (iv)."

⁴ See *In the Matter of Application by Bell Atlantic New York for Authorization Under Section 271 of the Communications Act to Provide In-Region, InterLATA Service in the State of New York*, CC Docket No. 99-295. See also, *Ameritech Opinion* at 12 FCC Red at 20619 [¶141]; See also, *BellSouth Louisiana II Opinion* at ¶87 (citing *Ameritech Opinion* at 12 FCC Red at 20619).

Attachment 1

CA JPSA

- to develop a mechanism that will allow the Commission to monitor improvements in the performance of OSS, and
- to assess the best and fastest method of ensuring compliance if standards are not met or improvement is not shown. A subset of the third goal will be to provide appropriate compliance incentives under Section 271 of the Telecommunications Act of 1996, which applies solely to Pacific for the prompt achievement of OSS improvements.⁵

The scope of the proceeding included measures, reporting, comparative analogs, benchmarks, statistical tests, audits and incentives. This report is not intended to address statistical tests and incentives.

Major Categories

Measurements developed to help assess the provision of non-discriminatory access to OSS and other services, elements or functions were combined into the following broad categories:

• **Pre-Ordering**

Pre-ordering activities relate to the exchange of information between the ILEC and the CLEC regarding current or proposed customer products and services, or any other information required to initiate ordering of service. Pre-ordering encompasses the critical information needed to submit a provisioning order from the CLEC to the ILEC. The pre-order measurement reports the timeliness with which pre-order inquiries are returned to CLECs by the ILEC. Pre-ordering query types include:

- Address Verification/Dispatch Required
- Request for Telephone Number
- Request for Customer Service Record
- Service Availability
- Service Appointment Scheduling (due date)
- Loop Qualification
- PIC
- Facility Availability
- Rejected/Failed Inquiries

• **Ordering**

Ordering activities include the exchange of information between the ILEC and the CLEC regarding requests for service. Ordering includes: (1) the submittal of the service request from the CLEC, (2) rejection of any service request with errors and (3) confirmation that a valid service request has been received and a due date for the request assigned. Ordering performance measurements report on the timeliness with which these various activities are completed by the ILEC. Also captured within this category is reporting on the number of CLEC service requests that automatically generate a service order in the ILECs' service order creation system.

⁵ Order Instituting Rulemaking on the Commission's Own Motion into Monitoring Performance of Operations Support Systems (R.97-10-016), and Order Instituting Investigation on the Commission's Own Motion into Monitoring Performance of Operations Support Systems (I.97-10-017), October 9, 1997.

Attachment 1

CA JPSA

- **Provisioning**

Provisioning is the set of activities required to install, change or disconnect a customer's service. It includes the functions to establish or condition physical facilities as well as the completion of any required software translations to define the feature functionality of the service. Provisioning also involves communication between the CLEC and the ILEC on the status of a service order, including any delay in meeting the commitment date and the time at which actual completion of service installation has occurred. Measurements in this category evaluate the quality of service installations, the efficiency of the installation process and the timeliness of notifications to the CLEC that installation is completed or has been delayed.

- **Maintenance**

Maintenance involves the repair and restoral of customer service. Maintenance functions include the exchange of information between the ILEC and CLEC related to service repair requests, the processing of trouble ticket requests by the ILEC, actual service restoral and tracking of maintenance history. Maintenance measures track the timeliness with which trouble requests are handled by the ILEC and the effectiveness and quality of the service restoral process.

- **Network Performance**

Network performance involves the level at which the ILEC provides services and facilitates call processing within its network. The ILEC also has the responsibility to complete network upgrades efficiently. Network performance is evaluated on the quality of interconnection and the timeliness of network upgrades (code openings) the ILEC completes on behalf of the CLEC.

- **Billing**

Billing involves the exchange of information necessary for CLECs to bill their customers, to process the end user's claims and adjustments, to verify the ILEC's bill for services provided to the CLEC and to allow CLECs to bill for access. Billing measures have been designed to gauge the quality, timeliness and overall effectiveness of the ILEC billing processes associated with CLEC customers.

- **Collocation**

ILECs are required to provide to CLECs available space as required by law to allow the installation of CLEC equipment. Performance measures in this category assess the timeliness with which the ILEC handles the CLEC's request for collocation as well as how timely the collocation arrangement is provided.

- **Data Base Updates**

Database updates for directory assistance/listings and E911 include the processes by which these systems are updated with customer information, which has changed due to the service provisioning activity. Measurements in this category are designed to evaluate the timeliness and accuracy with which changes to customer information, as submitted to these databases, are completed by the ILEC.

- **Interfaces**

Attachment 1

CA JPSA

ILECs provide the CLECs with choices for access to OSS pre-ordering, ordering, maintenance and repair systems. Availability of the interfaces is fundamental to the CLEC being able to effectively do business with the ILEC. Additionally, in many instances, CLEC personnel must work with the service personnel of the ILEC. Measurements in this category assess the availability to the CLECs of systems and personnel at the ILEC work centers.

Auditing and Review Procedures

The parties have agreed to the procedures for auditing and review. Descriptions of these procedures ~~can~~ be found in Sections III and IV are provided in the Auditing or Review Procedures chapter.

Note. This Executive Summary is intended to provide a general background regarding parties' negotiations of the OSS performance measures. The statements contained in the Executive Summary are not intended to be legally binding on the parties and shall not be used for such purposes.

Attachment 1

CA JPSA

Reservation of Rights

These reservations of rights do not negate the parties agreement regarding performance measures and standards as reflected in this settlement agreement.

Incorporating the performance measures into the interconnection agreements raises several complex issues. The Commission has indicated it will rule on this matter in a subsequent decision.

ILECs

By agreeing to the performance measures contained in the Joint Partial Settlement Agreement, ILECs:

- do not make any admission regarding the propriety or reasonableness of establishing performance penalties;
- reserve the right to contest the level of disaggregation for purpose of assessing penalties;
- reserve the right to contend that any resulting penalties should be viewed as liquidated damages and as the exclusive remedy for any failure of performance; and,
- do not admit that an apparent less-than-parity condition reflects discriminatory treatment without further factual analysis.

CLECs

- By executing this Agreement, CLECs do not agree with, endorse, or otherwise concur in the terms of ILECs' reservation of rights.
- CLECs reserve the right to contend that ILEC compliance with the performance measures and standards in the Agreement does not conclusively demonstrate ILEC compliance with the Telecommunications Act of 1996.
- CLECs reserve the right to contend that ILEC compliance with the performance measures and standards does not conclusively demonstrate the existence of an open competitive local market.

CA JPSA

General Exclusions

Test IDs/Transactions

Test IDs are excluded from all Carrier to Carrier metric calculations. Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers are excluded from the metrics.

Verizon Affiliate Reporting

Verizon affiliate reporting (including Data Services Network Operations (DSNO) formerly known as VADI) is always excluded from CLEC aggregate data for all metrics.

Internally generated LSRs/ASRs and Service Orders

Internally Generated LSRs/ASRs are excluded from the Ordering metrics.

Internally Generated Service Orders are excluded from the Provisioning metrics.

Unbundled Network Elements (UNE)

Except for Billing measures BI-2, BI-3, BI-6, BI-7 and BI-8, UNE products do not include Wholesale Advantage (formerly UNE-P) or Line Sharing transactions.

NOTES:

+ *Not all measures apply to both ILECs.*

1. These performance measures are not intended to create, modify or otherwise affect parties' rights and obligations. The existence of any particular performance measure, or the language describing that measure, is not evidence that the CLECs are entitled to any particular manner of access, that these measures relate solely to access to OSS, or is it evidence that the ILEC's obligations are limited to providing any particular manner of access. The parties' rights and obligations to such access are defined elsewhere, including the relevant laws, FCC and CPUC decisions/regulations, tariffs, and interconnection agreements.
2. Details regarding implementation schedules for new measures are ~~documented in Section VIII (Implementation Schedules)~~ provided in Implementation Schedule chapter.

CA JPSA

Pre-Ordering Performance

Attachment 1

CA JPSA

Function:
PO-1 Response Time OSS Pre-Ordering Interface (formerly PM 1)
Definition:
<p>This measure captures the response interval for each pre-ordering query. It is determined by computing the elapsed time from the ILEC receipt of the query from the CLEC, whether or not syntactically correct, to the time the ILEC returns the requested data to the CLEC.</p> <ul style="list-style-type: none"> • Address Verification/Dispatch Required • Request for Telephone Number • Request for Customer Service Inquiry (Mechanized and Manual) • Service Availability • Service Appointment Scheduling (due date) • Rejected/Failed inquiries • Timeouts (included in query interval and also reported separately on a diagnostic basis) • Loop qualification <ul style="list-style-type: none"> ◦ Loop Qual (Mechanized) <p>Business Rules:</p> <ul style="list-style-type: none"> • Pre-order query transaction time intervals are measured as total transaction time. • Fully electronic pre-order query response times will be measured for the WISE and CORBA systems. • Excludes non-business days. • Elapsed time for fully electronic sub-measures tracked during published system hours. • Mechanized Loop Qualification is measured in seconds. • Verizon does not report Legacy Retail System Transaction Time for rejected/failed inquiries. • Pre-Order Query Transaction Time will be reported and tracked diagnostically for rejected/failed inquiries. • Time-outs -- A time-out is a query for which the requested information or an error message is not provided within 60 seconds. • <u>Verizon Retail data is based on CQEE data.</u> <p>Notes:</p> <ul style="list-style-type: none"> • The numerator and denominator of the sub-measures in this measure capture all queries completed in the reporting period. • Verizon will supply all available loop qualification data, however Verizon will not support manual engineering query for loop qualification. • The additional 5 seconds for mechanized preorder queries (other than mech. Loop Qual) allow for variations in functionality and additional security requirements of the interface. • Timeouts will be included in the query interval and also will be reported diagnostically until next Performance Measurement Review. Based on reported time out data, a determination will be made regarding whether to exclude time outs. • Products are reported by query type and by interface type, including fax. • <u>The published system hours can be found on the following URL:</u> http://www.22.verizon.com/wholesale/clecsupport/content/1_wise-wise_apps-wise_availability.00.html <p>Exclusions:</p> <ul style="list-style-type: none"> • CS1 requests (both manual and mechanized) for greater than 30 working telephone numbers. • Rejected manual requests • Any transaction, where the batch transmission from a CLEC includes greater than 200 items in a single transmission. "Batch transmission" means a group of orders that are "batched" together and sent in a single transmission simultaneous, not serial transmission of all orders in a group to the gateway. • Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers. • <u>Electronic pre-order query response times that originate outside the published system hours.</u>

Ordering Performance

Attachment 1

CA JPSA

<p>Function: OR-1 FOC/LSC Notice Timeliness (Order Confirmation Timeliness) (formerly PM 2)</p>
<p>Definition: Percentage of valid service requests confirmed within the agreed upon timeframes as specified in the <i>Measurable Performance Standards</i>.</p>
<p>Business Rules: For manually handled request:</p> <ul style="list-style-type: none"> • Business day is defined as Monday through Friday, excluding weekends and Verizon published holidays. Business day hours and holidays are published on the Verizon web site. • The start time for requests received after the end of the day Friday, or end of day preceding a holiday, business day will be the beginning of the next business day. • Elapsed time for fully electronic sub-measures is tracked during system hours. • For LSR driven order activity, CLECs can order an unlimited number of lines or orders without the lines or orders being treated as a project. However, should the CLEC designate their order activity as a project or request other project-type special handling, the results are excluded from this measure. • For ASR driven order activity (including interconnection trunks, dedicated transport and EELs), CLECs can order an unlimited number of lines/trunks or orders without the lines/trunks or orders being treated as a project. However, should the CLEC designate their order activity as a project or request other project-type special handling, the project standards noted above will apply. • Elapsed time calculated in hours or days. • For PONs that the CLEC designates as related (RPONs) only, RPONs which are not provided confirmation until all RPONs are received, the FOC/LSC time stamp used for receipt of all these RPONs will be the date/time of the last RPON received. The FOC/LSC returned date/time would be the actual returned date/time of each RPON. <p>Notes:</p> <ul style="list-style-type: none"> • Excluded data will be made available upon request through the raw data/excluded data process. • Reported by service group type and flow through and non-flow through (Stand-Alone Directory Listings included)
<p>Exclusions:</p> <ul style="list-style-type: none"> • Non – business days. • Delays caused for customer reasons. • Any transaction, where the batch transmission from a CLEC includes greater than 200 items in a single transmission. • Non stand-alone records for Directory Assistance/Directory Listing. • Test CLECs. • LSR orders identified by CLEC as a project or where the CLEC has requested other project-type special handling. • Affiliate data will be excluded from all CLEC aggregate performance (in all measures). • Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers.
<p>Performance Standards:</p>

Function:
OR-2 Reject Timeliness (formerly PM 3)
Definition:
The percentage of orders rejected within the agreed-upon timeframes as specified in the <u>Measurable Performance Standards</u>
Business Rules:
<ul style="list-style-type: none"> • Elapsed time for fully electronic sub-measures tracked during system hours • For manually handled requests: • Calculation of requests received after the end of the business day starts at the beginning of the next business day. Business day is defined as published hours of operation for the ILEC. • Business day hours and holidays are published on the Verizon web site. • The start time for requests received after the end of Friday, or end of day preceding a holiday, business day will be the beginning of the next business day. • For LSR driven order activity, CLECs can order an unlimited number of lines or orders without the lines or orders being treated as a project. However, should the CLEC designate their order activity as a project or request other project-type special handling, the results are excluded from this measure. • For ASR driven order activity (including interconnection trunks, dedicated transport and EELs), CLECs can order an unlimited number of lines/trunks or orders without the lines/trunks or orders being treated as a project. However, should the CLEC designate their order activity as a project or request other project-type special handling, the project standards noted above will apply. • For PONs that the CLEC designates as related (RPONs) only, RPONs which are not provided confirmation until all RPONs are received, the FOC/LSC time stamp used for receipt of all these RPONs will be the date/time of the last RPON received. The Reject returned date/time will be the actual returned date/time of each RPON. • Elapsed time calculated in hours.
Notes:
<ul style="list-style-type: none"> • Excluded data will be made available upon request through the raw data/excluded data process. • Reported by flow through and non-flow through.
Exclusions:
<ul style="list-style-type: none"> • Non – business days. • Delays caused for customer reasons. • Any transaction, where the batch transmission from a CLEC includes greater than 200 items in a single transmission. • Non stand-alone records for Directory Assistance/Directory Listing. • Test CLECs. • Affiliate data will be excluded from all CLEC aggregate performance (in all measures). • Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers. • LSR orders identified by CLEC as a project or where the CLEC has requested other project-type special handling.

PR-4 Missed Appointments (formerly PM 11, PM 11A and PM 14)
Definition:
PR-4-01 Percent Due Dates Missed measures the percent of new, move and change orders (and additionally, LNP disconnect orders) where installation was not completed by the due date.
PR-4-02 Held Order Interval measures the time period that service orders are not completed by the original due dates for all ILEC reasons (including lack of facilities).
PR-4-16 Loop Acceptance Testing (LAT) Not Completed On Time measures the percent Loop Acceptance Tests not completed on or before due date due to ILEC reasons.
Business Rules:
<ul style="list-style-type: none"> • For PR-4-01, Due date is defined as either original due date or final due date if the original due date was missed due to customer reasons. • PR-4-02 includes LNP Disconnect Orders. • Results for UNE Subloops and Dark Firms will be tracked diagnostically • UNE Loop (DSL Capable) will include DSL and ISDN capable loops. • For PR-4-16: <ul style="list-style-type: none"> • Loop Acceptance Test is where an ILEC Technician (Frame/Field as appropriate) is requested via an LSR to complete a Loop Acceptance Test • Loop Acceptance Test is not completed on or before due date • The ILEC Technician will contact the CLEC. • The Tech will complete a series of tests with the CLEC to ensure a good loop is delivered (i.e., connectivity, meets xDSL parameters)
Notes:
<ul style="list-style-type: none"> • For PR-4-01 and PR-4-02, ILECs will provide disaggregation by Missed Appointment reason codes as diagnostic data upon raw data request. • The analog for UNE Loop xDSL capable will be Retail ISDN BRI until the Verizon affiliate or separate division (following reintegration) offers a UNE Loop xDSL capable product. The analog for Line Sharing will be line sharing as provided by the Verizon affiliate or separate division (following reintegration), as applicable. • For PR-4-01 and PR-4-02, excluded data will be made available upon request through the raw data/excluded data process. • For PR-4-01, orders for UNE Loop xDSL capable with grandfathered circuit identifiers will be included in the submeasure for UNE Loop xDSL capable (non-conditioned). • For PR-4-02 Interconnection Trunks, current measurable standard for Verizon at parity to be reviewed and benchmarks considered at next performance review. • PR-4-01 reported by service group type and Field Work/No Field Work as appropriate. • PR-4-02 reported by service group type. • PR-4-16 measure to be implemented with a 5% standard no later than the January 2004 report month.
Exclusions:
<ul style="list-style-type: none"> • For PR-4-01, customer caused misses are excluded from the numerator • For PR-4-02 and PR-4-16, customer caused missed. • For UNE loop services, feature only orders are excluded from the retail analog • For PR-4-01, Record only and ILEC official orders • Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers • For PR-4-16, orders where LAT not requested

- provisioning troubles.
- Include LNP Disconnect Orders (PR-6-04 only)
- For PR-6-06, provisioning failure data will be tracked for individual network database failures - failures to provision between the ILEC LSMS and LNP network databases (STP or SCP)

Notes:

- For PR-6-01, the analog for UNE Loop xDSL capable will be Retail ISDN BRI until the Verizon affiliate or separate division (following reintegration) offers a UNE Loop xDSL capable product. ~~The analog for line sharing will be line sharing as provided by the Verizon affiliate or separate division (following reintegration), as applicable.~~
 - For PR-6-01 and PR-6-02, ILECs will provide disaggregation by Maintenance Disposition code as diagnostic data upon raw data request.
 - For PR-6-01, the analog for UNE Loop xDSL capable will be Retail ISDN BRI until the Verizon affiliate or separate division (following reintegration) offers a UNE Loop xDSL capable product. ~~The analog for line sharing will be line sharing as provided by the Verizon affiliate or separate division (following reintegration), as applicable.~~
 - Excluded data will be made available upon request through the raw data/excluded data process.
 - PR-6-01 reported by service group type.
 - PR-6-02 reported by service group type (including LNP) and Field Work/No Field Work as appropriate.
 - ~~PR-6-04 and PR-6-06 reported by service group type and by affecting service and out-of-service~~
- * The period of 7/30 calendar days following the completion of a non-special/special service order will be call the 7/30 day tracking interval.
** The N, T and C non-special/special service orders whose 7/30 day tracking interval end during the reporting period will be called the relevant service orders for the period.

Exclusions:

- CPE and IEC/CLEC caused troubles
- Troubles associated with inside wire
- Subsequent reports.
- Message Reports (circuit reports for which ILEC has no records)
- ILEC employee generated reports
- For PR-6-01, cancelled tickets
- For PR-6-02, tickets cancelled by customer/CLEC or where ticket has been opened on the wrong TN or circuit ID.
- Any test transactions not submitted in connection with the pre-ordering, ordering, provisioning or maintenance of actual customers.
- For PR-6-01 and PR-6-02, Trouble Reports Received on the Due Date ~~for orders other than new installations~~
- For PR-6-04, for UNE loops, feature only orders are excluded from retail analog.
- For PR-6-06, total failures from the NPAC to all LSMS systems.

Function:
PR-7 Jeopardy Reports (formerly PM 5 and PM 6)
Definition:
PR-7-01 measures the percentage of total orders processed for which the ILEC notifies the CLEC that the work will not be completed as committed on the original FOC.
PR-7-02 measures the percentage of jeopardy/missed commit notices that were sent by the required interval. The jeopardy/missed commit notice interval will be tracked as the interval between the pre-existing committed order completion date and time (communicated via the FOC) and the date and time the ILEC issues a notice to the CLEC indicating an order is in jeopardy of missing the due date (of the due date/time has been missed).
Assignment: Jeopardies identified during the initial assignment process.
Installation: Jeopardies identified during the installation process prior to due time.
Business Rules:
<ul style="list-style-type: none"> Raw data will include jeopardy codes. Results for UNE Subloop and Dark Fiber will be tracked diagnostically. UNE Loop IDSL Capable will include IDSL and ISDN capable loops Include LNP Disconnect Orders For PR-7-02, Verizon tracks assignment jeopardies by due date only for business days, with installation jeopardies and notifications of missed commitments tracked by business days/clock hours.
Notes:
<ul style="list-style-type: none"> The analog for UNE Loop xDSL capable will be Retail ISDN BRI until the Verizon affiliate or separate division (following reintegration) offers a UNE Loop xDSL capable product. The analog for Line Sharing will be line sharing as provided by the Verizon affiliate or separate division (following reintegration), as applicable. Excluded data will be made available upon request through the raw data/excluded data process. For PR-7-02, if the ILECs' policy regarding jeopardy notices to their Retail customers changes, this measure should be evaluated for parity analogs. For PR-7-02, jeopardies issued on the due date are considered either installation or notifications of missed commitments. Reported by service group type
Exclusions:

Function:			
NP-1 Percent Blocking on Common Trunks (formerly PM 24 and PM 25)			
Definition:			
NP-1-02 measures the percent of common and shared transport trunk groups exceeding 2% blockage.			
NP-1-04 measures the percent of final dedicated interconnection trunk groups exceeding 2% blockage.			
Business Rules:			
<ul style="list-style-type: none"> For NP-1-02, Verizon reports provided 45 days after close of data month. For NP-1-02, ILEC will make available, upon CLEC request, detailed information for all trunk groups not meeting 2% blocking level with the monthly report Only measured on trunks where ILEC has outgoing traffic to CLECs, and where ILEC controls trunk capacity. Applies to those trunks where the ILEC has augmentation control. 			
Notes:			
<ul style="list-style-type: none"> For NP-1-04, only measured on trunks where ILEC has outgoing traffic to CLECs and where ILEC controls trunk capacity. For NP-1-04, Verizon reports provided 45 days after close of data month. For NP-1-04, applies to those trunks where the ILEC has augmentation control NP-1-02 reported by total trunk groups. NP-1-04 reported by total trunk groups, ILEC end office to CLEC end office and ILEC tandem to CLEC end office For NP-1-04, Verizon will electronically notify CLECs (operational trunk staffs) of the following situations for blocked trunks. The notification states that Verizon identified a blocked trunk group due to CLEC reasons, and that the trunk group will be excluded from Verizon performance. Verizon will make the exclusion automatically unless the CLEC responds back within two business days with documentation indicating that Verizon's information is inaccurate. 			
Exclusions:			
<ul style="list-style-type: none"> For NP-1-04, blocking failures caused by the CLEC not completing growth trunk provisioning by scheduled due date. For NP-1-04, trunks are provisioned as two-way trunks For NP-1-04, blocking due to CLEC putting trunks in a "make busy" state or other network problems under CLEC's control. Instances where CLEC does not take action upon receipt of an ASR within 4 business days (or in time frame specified in the ICA) when Call Blocking situation is identified by the ILEC. Instances where CLEC does not take action within 10 days (or in the time frame specified in the ICA) upon receipt of an ASR when pre-service occupancy of 75% or greater is identified by the ILEC.

CAJPSA

Function:					
BI-1 Usage Timeliness (formerly PM 28)					
Definition:					
This measure captures the elapsed time between the recording of usage data by the switch, generated either by CLEC retail customers or access usage associated with CLEC customers, and the time when the data set, in a compliant format, is sent/made available to the CLEC.					
Business Rules:					
<ul style="list-style-type: none"> This measure assumes a daily transmission of usage to the CLEC. If a CLEC chooses other than a daily transmission, the measurement still applies based on transmission availability data/time. 					
Notes:					
<ul style="list-style-type: none"> Verizon bills local/toll through CBSS billing systems. Access usage is billed out of CABS. UNE Platform can contain both elements and will be reported separately, if applicable. For mechanized media other than the CLEC mailbox option, the date captured is the date the file is delivered (made available) to the CLEC's mainframe or server. For all other media, the date captured is the date the file is sent to the CLEC. 					
Exclusions:					
<ul style="list-style-type: none"> Results for exiting CLECs. This may include, but is not limited to, service disconnects and adjustments of dollars billed in previous months. Exiting CLEC to be determined by CLEC notice to ILEC, business to business communications, notice to ILEC by the CPUC, FCC or by court decree. Results for OS/DA billing other than those associated with end user services such as UNE-P and resale.

Collocation Performance

Attachment 1

CA JPSA

Function:
NP-2 Percent On Time to Respond to a Collocation Request (formerly PM 40 and PM 41))
Definition:
NP-2-01 measures the percent of CLEC collocation requests that are responded to on time by the ILEC.
NP-2-05 measures the interval it takes an ILEC to complete (build) a collocation arrangement.
Business Rules:
<ul style="list-style-type: none">• For NP-2-01, includes all new and augment requests.• For NP-2-01, if the CLEC makes a change to size, location, additional AC or DC or HVAC, in their application within or after the applicable standard, the clock is restarted from the revised application receipt date.• Following are the types of changes that trigger the restarting of the 10 day clock:<ul style="list-style-type: none">○ Power Upgrades - Increasing the DC power by adding a generator, rectifiers, batteries; changing power feeds; or installing a new service entrance from the electrical utility.○ HVAC Upgrades - Changing the existing cooling unit to a larger one; adding an additional cooling unit; or replacing the existing HVAC duct system to obtain additional capacity from existing units.○ Major Building Modifications - Construction activity that is required to convert space that is not suitable for housing telecommunications equipment (administrative and unconditioned space) into space that is suitable for telecommunications equipment and meets local building code. Examples of Major Building Modifications construction activities are as follows:<ul style="list-style-type: none">• Asbestos abatement on a room or floor of a building• Construction of new interior partitions (walls) and doors to accommodate new HVAC system• Construction required to accommodate restroom access or modifications per code.• Construction or modification of building to facilitate proper emergency egress from the space per code.• Electrical wiring of space per code requirements.• For NP-2-05, interval begins when ILEC approves the application and has received, from CLEC, financial payment or bond.• <u>For NP-2-05, if a CLEC delays the collocation installation, the collocation interval shall be increased by the number of days of CLEC delay (resulting in an adjusted interval). If the ILEC completes the requisite installation by the adjusted interval, it will have met its obligation.</u>• For NP-2-05, interval begins when ILEC approves the application and has received, from CLEC, financial payment or bond.• For NP-2-05, the request is complete when the ILEC sends a notice, in a form agreed upon by both parties, along with CFA/APOT information, advising that the collocation arrangement is complete and ready for CLEC occupancy.• <u>For NP-2-05, when an extended interval has been mutually negotiated, the extended interval will be tracked. If the extended interval is met, the order commitment will be counted as met. If the extended interval is missed, the order commitment will be counted as missed.</u>
Notes:
<ul style="list-style-type: none">• For NP-2-01, interval to begin upon receipt of valid request per published ILEC collocation guidelines.• Verizon will provide email notice to OSS OII Performance Measures service list of proposed tariff changes affecting the intervals in this measure. The subject line of the notice must say "JPSA Affecting Tariff Change."
Exclusions:

CA JPSA

Interface Performance

Attachment 1

CA JPSA

<p>Function: PO-2 Percent of Time Interface is Available (OSS Interface Availability) (formerly PM 42)</p>
<p>Definition: Measures percent of time OSS Interface is available compared to scheduled availability.</p> <p>WPTS (Nationwide): This is a measure of WPTS OSS availability based upon Scheduled Availability. Scheduled Availability is as follows:</p> <ul style="list-style-type: none"> • Prime Time: 07:00:00 to 08:21:00:00:00 EST Monday through Saturday, <i>excluding</i> major Holidays. <p>Major Holidays include: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.</p> <p>For WPTS, Verizon calculates the PO-2 OSS Availability metric by combining CLEC reported outages (received via the Wholesale Customer Care Center (WCCC) with EnView reported outages. Verizon measures CLEC reported outages based on actual reported time frames as well as any outages captured by EnView (and not reported by CLECs).</p> <p>The Wholesale Customer Care Center receives OSS availability trouble reports from CLECs, and logs each trouble into a tracking system. Verizon reviews data from the tracking system each week to determine which troubles were interface outages, and thus included in the PO-2 calculation. This data is supplemented with outages captured by EnView to calculate the final metric results.</p> <p>Business Rules:</p> <ul style="list-style-type: none"> • Outage hours are obtained from outage reports • Any change requests for extended availability during the reporting period are added to the scheduled hours. • WPTS: The EnView methodology is as follows: EnView is used as an alarm for system availability and supplements CLEC reported outages. If no CLEC reported an outage, but En View detected and outage, the EnView outage is included as if the entire CLEC population experienced the outage. • WPTS: EnView measurement of the EDI, CORBA and Web GUI aka LSI/W interfaces availability is as follows: The mechanized OSS interface availability process is based on the transactions created by the EnView Robots. The program determines whether the EnView transactions were successful or unsuccessful, or if no transactions were issued (not polled). Transactions are processed by transaction type separately for each interface type and OSS. The hours of the day are divided into six (6) minute measurement periods. <p>Notes:</p> <ul style="list-style-type: none"> • Verizon captures data on a nationwide basis and reports national results at a state level. • ILECs will agree to document any calculation of partial availability. • Reported by interface type for all interfaces accessed by CLECs (e.g., pre-ordering, ordering, and maintenance) e., WISE, EDI
<p>Exclusions:</p> <p>For WPTS: Not applicable if CLECs are not using WPTS in the state. The following exclusions apply:</p> <ul style="list-style-type: none"> • Troubles reported but not found in VZ's systems. • Troubles reported by a CLEC that were not reported to VZ's designated trouble reporting center. • Scheduled interface outages for major system releases where CLECs were provided with advanced notification of the downtime in compliance with VZ Change Management Guidelines.
<p>Performance Standard: Standard - 99.50% (for all interfaces)</p>

Reporting Process

Except as otherwise provided, performance reports will be provided to the CLECs and the Public Utilities Commission by the twentieth calendar day of the month succeeding the reporting period. The reporting period is the calendar month, unless otherwise noted. Reporting will be activity based, i. e. where there is reportable data for the CLEC.

For those measures where results appear to be statistically less than parity or not meeting the benchmark level, the ILEC will perform analysis of the data if requested by the CLEC. This analysis will detail the underlying causes contributing to the reported performance results. The ILEC will supply this analysis to the requesting CLEC within thirty days of website publication of the monthly results or within thirty days of the CLEC's request, whichever is later.

Authorized users will have access to monthly reports through an interactive website. Each CLEC will have access to its own data, aggregate CLEC data, ILEC data and ILEC Affiliate data. ILEC Affiliate data will be reported, at a minimum, separately for the ILEC Data subsidiary and all other ILEC Affiliates (in the aggregate). The ILECs will report performance measurements for transactions with their affiliates and make those data available to all CLECs who have filed non-disclosure documents like those filed by SBC/California and Verizon with regard to CLEC data. The Public Utilities Commission will have access to reports for all entities, including ILEC Affiliate data. ILEC Affiliate data will not be included in CLEC aggregate data.

In addition to the performance measure results themselves, the raw data supporting the results, for the current and prior month, will be available to the CLECs and the Public Utilities Commission. Additional raw data will be available where measure results have been changed and the raw data has been affected. Raw data will be archived for a period of 24 months to provide an adequate audit trail and will be retained with sufficient detail so that CLECs can reasonably reconcile the data captured by the ILEC (for the CLEC) with its own internal data. ILEC will provide data that comprise the results and are readily available from systems that provide the reportable data. Furthermore, data that relates to the ILEC's own performance would be retained, at a consistent level of disaggregation comparable to that reported for the CLECs. ILEC will provide PON information associated with Ordering and Provisioning measures. CLECs should request raw data on an as-needed basis. SBC/California will produce the current and prior months' raw data within one business day. Raw data requests for previous months will be provided in a negotiated interval. Verizon will provide the requested data within 30 days.

Attachment 1

CA JPSA

Auditing

Initial Audit:

(See prior versions of the JPSA for discussion on Initial Audit).

Annual Audits:

A comprehensive Annual Audit will be conducted of the ILECs' reporting procedures and reportable data. The Annual Audit will include all systems, processes and procedures associated with the production and reporting of performance measurement results, except as noted below. A Joint Steering Committee ("Committee") comprised of ILEC and CLEC representatives will be responsible for:

1. Jointly defining the Request for Proposal;
2. Jointly selecting a third party auditor;
3. Determining the scope and timing of the Annual Audit;
4. Providing guidance to the auditor, as requested; and
5. Reviewing the auditor's compliance with the Request for Proposal.

The Committee will convene every ~~six~~ twelve months to discuss and determine the timing and scope of any Annual Audit. Provided, any party may request that the committee convene before the 12th month but not earlier than the 6th month following the last meeting of the committee, to discuss whether an Annual Audit is necessary. In such event, the party seeking the earlier meeting will be responsible for calling the meeting, providing a conference call-in number and/or meeting location, and providing all legal notices applicable thereto. In the event that the Committee cannot agree on defining the Request for Proposal, selecting an auditor, or determining the scope or timing of the Annual Audit, the parties agree to submit their disputes to the American Arbitration Association ("AAA") for expedited resolution. The AAA shall have discretion to award arbitration costs, excluding attorneys' fees, to the prevailing party.

At its completion, the ILEC shall submit its annual comprehensive audit to the Commission, and distribute copies (which include only non-proprietary information) to parties on the OSS OII service list.

No Annual Audit shall commence within 12 months of the commencement of the previous Annual Audit. Notwithstanding any other provisions herein, the scope of the Annual Audit shall not exceed the previous 12 months. In addition, at least one comprehensive Annual Audit will be conducted every three years.

The costs of the Annual Audit will be divided 50% to the ILEC and 50% to the CLECs, in the proportion of each individual CLEC's volume to the aggregate CLEC volume. Volume for purposes of this allocation will be the number of local exchange lines, interconnection/interoffice trunks ("trunks"), circuits, and UNEs (as reported in the denominator of Measure 19, the "Customer Trouble Report Rate" measure) in service in the third reported month prior to the commencement of the Annual Audit. In order to assign weight to the different local exchange lines/trunks/circuits and UNEs reported in Measure 19, the Committee shall develop and approve a conversion table based on a standard unit of weight, likely using a DS-0 equivalency, including appropriate consideration for collocation; provided, the ILEC shall not in any event have an obligation to provide data or perform calculations that are not part of its normal data reporting systems.

Attachment 1

CA JPSA

The estimated cost of the Annual Audit (based on the chosen vendor's response to the Request for Proposal) will be paid into escrow by the ILEC and the CLECs a reasonable period of time before the commencement of the Annual Audit and shall be a prerequisite for the commencement of the Annual Audit. Any disputes regarding payments owed by the respective CLECs for the Annual Audit shall be submitted to the American Arbitration Association ("AAA") for expedited resolution. The AAA shall have discretion to award arbitration costs, excluding attorneys' fees, to the prevailing party.

In the case of Verizon, when the Annual Audit is performed at the national level for systems, processes and procedures associated with the production and reporting of performance measurement results, the Annual Audit cost in California associated with the audit of Verizon's national systems, processes and procedures shall be determined on a pro-rated basis as follows: The California portion shall be based on the volume of CLEC activity in California as compared to the total CLEC volume in all Verizon states. Volume for purposes of this allocation will be the number of local exchange lines, trunks, circuits, and UNEs (as reported in Measure 19) in service in third reported month prior to the commencement of the Annual Audit. Audit costs specific to California shall be shared by Verizon and the CLECs as set forth in the paragraph above.

Mini - Audits:

In addition to an annual audit, SBC/California, Verizon and CLECs agree that the CLECs would have the right to mini-audits of individual performance measures/sub-measures during the year. When a CLEC has reason to believe the data collected for a measure is flawed or the reporting criteria for the measure is not being adhered to, it has the right to have a mini-audit performed on the specific measure/sub-measure upon written request (including e-mail), which will include the designation of a CLEC representative to engage in discussions with the ILEC about the requested mini-audit. If, 30 days after the CLEC's written request, the CLEC believes that the issue has not been resolved to its satisfaction, the CLEC will commence the mini-audit upon providing the ILEC with 5 business days advance written notice. Each CLEC is limited to auditing three single measures/sub-measures during the audit year. The Mini-audit year will be based on a calendar year. Mini-audits cannot be requested by a CLEC while an Annual Audit is being conducted (i.e. before completion).

Mini-Audits may be requested for months including and subsequent to the month in which an Annual Audit was initiated.

Mini-Audits will include all systems, processes and procedures associated with the production and reporting of performance measurement results for the audited measure/sub-measure. Mini-Audits will include two (2) months of data, and all parties agree that raw data supporting the performance measurement results will be available monthly to CLECs as described in the Reporting Process section (~~Section 11c~~) of this agreement.

No more than three (3) Mini-Audits will be conducted simultaneously unless more than one CLEC wants the same measure/sub-measure audited at the same time, in which case, Mini-Audits of the same measure/sub-measure shall count as one Mini-Audit for the purposes of this paragraph only.

Mini-Audits will be conducted by a third party auditor, selected by the same method as the selection of the auditor for the Annual Audit. The CLEC will pay for the costs of the third party auditor conducting the Mini-Audit unless the ILEC is found to be "materially" misreporting or misrepresenting data or to have non-compliant procedures, in which case, the ILEC would pay for the costs of the third party auditor. Parties agree that the issue of whether the ILEC is "materially" at fault will be based on the parameters of failure to perform: "materiality" at fault

Attachment 1

CA IPSA

means that a reported successful measure changes as a consequence of the audit to a missed measure, or there is a change from an ordinary missed measure to another category, if such exists. Each party to the Mini-Audit shall bear its own internal costs, regardless of which party ultimately bears the costs of the third party auditor.

If, during a Mini-Audit, it is found that for more than 50% of the measures in a major service category the ILEC is "materially" at fault (i.e., a reported successful measure changes as a consequence of the audit to a missed measure, or there is a change from an ordinary missed measure to another category, if such exists), the entire service category will be re-audited at the expense of the ILEC. The major service categories for this purpose are:

- Pre-Ordering
- Ordering
- Provisioning
- Maintenance
- Network Performance
- Billing
- Database Updates
- Collocation
- Interfaces

Each Mini-Audit shall be submitted to the CLEC involved and to the Commission as a proprietary document subject to the applicable protection afforded by Commission General Order No. 66 C and California Public Utilities Code Section 583.

The ILEC will provide notification to the CLECs of any Mini-Audit requested when the request for the audit is made.

CA JPSA

Review Procedures

As experience is acquired under this Partial Settlement Agreement with the new performance measurements and underlying business processes, the Parties expect to learn which measurements set forth in Section II may not have been properly defined or are more or less useful than others. The Parties also expect that experience will show whether new measurements are needed or whether certain existing measurements are not needed or require modification. Accordingly, the Parties agree to reconvene on or around January 17, 2004 to review the effectiveness of and modifications to the performance measurements approved by the Commission in this proceeding. The parties will conclude the review within 90 days of its commencement and will submit the revisions to the Partial Settlement Agreement to the Commission within the 90-day review period. In the event the Parties cannot agree on any addition, deletion or modification, they will jointly submit such dispute for resolution by the CPUC.

If, prior to the agreed-upon review date, there is consensus that one or more measures are not effective, the parties will schedule meetings to discuss modifying the measure(s) or process(es). If there is no consensus, any individual party seeking formal review by the CPUC shall give notice to the other parties of its intent to do so. The party will also describe the action it intends to take and the reason(s) for its proposed actions.

Attachment 1

CA JPSA

Definition of Terms

TERM	DEFINITION
Automatic Location Information (ALI)	The feature of E911 that displays at the Public Safety Answering Point (PSAP) the street address of the calling telephone number. This feature requires a data storage and retrieval system for translating telephone numbers to the associated address. ALI may include Emergency Service Number (ESN), street address, room or floor, and names of the enforcement, fire and medical agencies with jurisdictional responsibility for the address. The Management System (E911) database is used to update the Automatic E911 Location Information databases.
Basic Hot Cut	Basic Hot Cuts include Coordinated Conversions and Coordinated Hot Cuts.
Batch Hot Cut	The live transfer of a VZ provided dial tone customer to a CLEC Loop. Verizon Technicians complete cross-wire work. Verizon provides notice to NPAC for Port activation. Batch hot cuts are scheduled on a wire center basis and not on fixed intervals. A "Batch" may include multiple CLECs' orders. Batch Hot Cuts must be identified on the LSR according to published business rules.
Cageless Collocation	Shall have meaning set forth in FCC 1 st Report and Order on Deployment of Wireline Services Offering Advanced Telecommunications Capability or any future, assoc. orders.
Call Blocking	A condition on a telecommunications network where, due to a maintenance problem or an over capacity situation in a part of the network, some or all originating or terminating calls cannot reach their final destinations. Depending on the condition and the part of the network affected, the network may make subsequent attempts to complete the call or the call may be completely blocked. If the call is completely blocked, the calling party will have to re-initiate the call attempt.
Code Opening	Process by which new NPA/NXXs (area code/prefix) are defined, through software translations to network databases and switches, in telephone networks. Code openings allow for new groups of telephone numbers (usually in blocks of 10,000) to be made available for assignment to an ILEC's or CLEC's customers, and for calls to those numbers to be passed between carriers.
Common Channel Signaling System ? (CCSS?)	A network architecture used to for the exchange of signaling information between telecommunications nodes and networks on an out-of-band basis. Information exchanged provides for call set-up and supports services and features such as CLASS and database query and response.
Common Transport <u>Trunk Groups</u>	Trunk groups between tandem and end office switches that are shared by more than one carrier, often including the traffic of both the ILEC and several CLECs.
Completion	The time in the order process when the service has been provisioned and service.
Completion Notice	A notice the ILEC provides to the CLEC to inform the CLEC that the requested service order activity is complete.

Attachment 1

CA JPSA	
TERM	DEFINITION
Coordinated Customer Conversion	Orders that have a due date negotiated between the ILEC, the CLEC, and the customer so that work activities can be performed on a coordinated basis under the direction of the receiving carrier.
Coordinated Hot Cut	The live transfer of a VZ provided dial tone customer to a CLEC Loop. Verizon Technicians complete cross-wire work either on an open telephone bridge, or by contact before and after the cut with the CLEC. Port is activated by CLEC. Orders have a due date negotiated between the ILEC, the CLEC, and the customer so that work activities can be performed on a coordinated basis under the direction of the receiving carrier. Coordinated Hot Cuts are applicable to Basic Hot Cut process.
Customer Requested Due Date	A specific due date requested by the customer which is either shorter or longer than the standard interval or the interval offered by the ILEC.
Customer Trouble Reports	A report that the carrier providing the underlying service opens when notified that a customer has a problem with their service. Once resolved, the disposition of the trouble is changed to closed.
Dedicated Transport	A network facility reserved to the exclusive use of a single customer, carrier or pair of carriers used to exchange switched or special, local exchange, or exchange access traffic.
Delayed Order	An order which has been completed after the scheduled due date and/or time.
Designed Services	Designed services are services requiring engineering intervention.
Directory Assistance Database	A database that contains subscriber records used to provide live or automated operator-assisted directory assistance, including 411, 555-1212, NPA-555-1212.
Directory Listings	Subscriber information used for DA and/or telephone directory publishing, including name and telephone number, and optionally, the customer's address.
DS-0	Digital Service Level 0. Service provided at a digital signal speed commonly at 64 kbps, but occasionally at 56 kbps.
DS-1	Digital Service Level 1. Service provided at a digital signal speed of 1.544 Mbps.
DS-3	Digital Service Level 3. Service provided at a digital signal speed of 44.736 Mbps.
Due Date	The date provided on the FOC the ILEC sends the CLEC identifying the planned completion date for the order.
End Office Switch	A switch from which an end users' exchange services are directly connected and offered.
Firm Order Confirmation (FOC)	Notice the ILEC sends to the CLEC to notify the CLEC that it has received the CLEC's service order, created a service request, and assigned it a due date.
Flow-Through	The term used to describe whether a LSR electronically is passed from the OSS interface system to the ILEC legacy system to automatically create a service order. LSRs that do not flow through require manual intervention for the service order to be created in the ILEC legacy system.

Attachment 1

CA JPSA

TERM	DEFINITION
Held Order	An order for which the ILEC has issued a FOC, but whose due date has passed without it being completed.
High-Bandwidth Line-Sharing LNE	The frequency range above the voiceband on a copper loop facility that is being used to carry analog circuit-switched voiceband transmissions.
Hot Cut	The live transfer of a VZ provided dial tone customer to a CLEC Loop. Basic - (Coordinated Conversion or Coordinated Hot Cut) Batch - (Coordinated Conversion) Large job - (Coordinated Conversion)
Installation	The activity performed to activate a service.
Installation Troubles	A trouble, which is identified after service order activity and installation, has completed on a customer's line. It is likely attributable to the service activity (within a defined time period).
Inside Wiring	The telecommunications wiring located at a customer's premises that extends beyond the demarcation point.
Interconnection Trunks	A network facility that is used to interconnect two switches generally of different local exchange carriers.
Interface Outage	A planned or unplanned failure resulting in the unavailability or access degradation of a system.
Jeopardy	A failure in the service provisioning process which results potentially in the inability of a carrier to meet the committed due date on a service order.
Jeopardy Notice	The actual notice that the ILEC sends to the CLEC when a jeopardy condition has been identified.
Lack of Facilities	A shortage of cable facilities identified after a due date has been committed to a customer, including the CLEC. The facilities shortage may be identified during the inventory assignment process, or during the service installation process. If no facilities are available, the ILEC will issue a jeopardy.
Large Job Hot Cut	A Coordinated Hot Cut specified on the LSR as a large job. Intervals for Large Jobs are negotiated and may occur over multiple days. Large Jobs are specified by a CLEC and include multiple orders within the same central office.
Local Exchange Routing Guide (LERG)	A Bellcore master file that is used by the telecom industry to identify NPA-NXX routing and homing information, as well as network element and equipment designations. The file also includes scheduled network changes associated with activity within the North American Numbering Plan (NANP).
Local Exchange Traffic	Traffic originated on the network of a LEC in a local calling area that terminates to another LEC in a local calling area.
Local Number Portability	A network technology which allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting."
Local Service Confirmation	OFB term for a FOC
Mechanized Bill	A bill that is delivered via electronic transmission.

Attachment 1

CA JPSA

TERM	DEFINITION
Meet Point Billing	A billing arrangement used when two or more LECs jointly provide access to and from an interexchange carrier (IEC) for inter LATA traffic. This arrangement can be Single Bill, where one LEC bills the IEC on behalf of both LECs and remits payment to the other LEC or Multiple Bill, where each LEC bills their portion directly to the IEC.
Missed Commitment Notification	A notice from ILEC to inform CLEC that the committed due date on an order has been missed.
Non-Designed Services	Services that do not require inventoried equipment and/or facilities. Non-Designed Services include, but may not be limited to the following: 1-Wire Loop Non-Designed Products - Non-Design 2-Wire Loop, 2-Wire ISDN BRI Capable, Non-Designed ADSL Capable 2-Wire Loops, Non-Designed ADSL Capable 2-Wire Loops, Line Sharing, and LNF Platform Simple Non-Designed Products - G.P.L.A.T. 2-Wire Analog, Loop Start, L.P.L.A.T. 2-Wire Analog, Ground Start
Non-Recurring Charge	A rate charged for a product or a service that is assessed on a one time basis.
NXX, NXX Code or Central Office Code	The three digit switch entity indicator that is defined by the "D", "E", and "F" digits of a 10-digit telephone number within the NANP. Each NXX Code contains 10,000 station numbers.
Permanent Number Portability (also known as Local or Long Term Number Portability)	A network technology which allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting".
Physical Collocation	Shall have the meaning set forth in 47 C.F.R. Section 51.5.
Plain Old Telephone Service (POTS)	Refers to basic 2-wire analog residential and business services. Can include feature capabilities (e.g., CLASS features).
Projects	Service requests that exceed the line size and/or level of complexity which would allow for the use of standard ordering and provisioning processes. Generally, due dates for projects are negotiated, coordination of service installations/changes is required and automated provisioning may not be practical.
Provisioning Troubles	A trouble report that is opened for a customer's existing or new service for a trouble identified between the time of the service order creation to the time of order completion. Provisioning troubles that are associated with a CLECs customers include troubles that occur and are reported during the conversion of an ILEC customer to a CLEC.
Query Types	Pre-ordering information that is available to a CLEC that is categorized according to standards issued by OBF, the FCC and/or the CPUC.
Recurring Charge	A rate charged for a product or service that is assessed each successive billing period.

Attachment 1

CA JPSA

TERM	DEFINITION
Reject	A status that can occur to a CLEC submitted local service request (LSR) when it does not meet certain criteria. There are two types of rejects, syntax, which occur if required fields are not included in the LSR, and content, which occur if invalid data is provided in a field. A rejected service request must be corrected and re-submitted before provisioning can begin.
Repeat Report	Any trouble report that is a second (or greater) report on the same telephone number/circuit ID and at the same premises Address within 30 days. The original report can be any category, including excluded reports, and can carry any disposition code.
Service Group Type	The designation used to identify a category of similar services, e.g., UNE loops
Service Order	The work order created and distributed in ILECs systems and to ILEC work groups in response to a complete, valid service request.
Service Order Type	The designation used to identify the major types of provisioning activities associated with a service request.
Service Request	The transaction sent from the CLEC to the ILEC to order services or to request a change(s) be made to existing services.
Specials	Services that require engineering design intervention. Designed services include, but may not be limited to the following: Resale Specials, Designed Products - ISDN - BRI, DID, Centrex, PBX, ISDN-PRI, Advanced Services, DID Resale PBX (trunk), Advanced Intelligent Service, UNE Loop Designed Products - Designed 2-Wire Loop, 2-Wire ISDN BRI Capable, Designed 4-Wire Loop, ISDN Capable 4-Wire Loops, DSL Wire Loops, 56kpbs capable 4-Wire Loops and UNE Platform Complex Designed Products - UPLAT - BRI-ISDN, UPLAT - DS-1-DIS, UPLAT - DS-1-DOD, UPLAT - DS-1-DIOD, UPLAT - DS-1-Direct Interface, UPLAT - ISDN - PRI-23-B-D, UPLAT - ISDN - BRI-24B.
Standard Interval	The interval that the ILEC quotes to its customers with respect to how long it will take to provision a service request. These intervals are standardized by specific service type and type of service modification requested. ILECs publish these standard intervals in documents used by their own service representatives as well as ordering instructions provided to CLECs. POTS services do not have standard intervals; their installation intervals are based on force available and workload. They may change as frequently as twice a day.
Subsequent Reports	A trouble report that is taken on a previously reported trouble prior to the date and time the initial report has a status of "cleared".
Summarized Charges	Billing charges that are aggregated on the bill, rather than individually itemized, e.g., local usage minutes on resale or retail calls, which are listed on the bill as "xx" minutes with no call detail.
Tandem Switch	Switch used to connect and switch trunk circuits between and among Central Office switches.

Attachment 1

CA JPSA

TERM	DEFINITION
Time to Restore	The time interval from the receipt, by the ILEC, of a trouble report on a customer's service to the time service is fully restored to the customer.
To Be Called Cut	A type of coordinated customer conversion, which involves the CLEC calling the ILEC to signal the ILEC that it should start the customer conversion. (Pacific Bell term)
Trouble Cause Code	A code identifying the known or suspected cause of a trouble condition.
Trouble Disposition	A code identifying the end result of diagnostic and/or repair activities on a customer trouble report.
Usage Data	Data generated in network nodes to identify switched call data on a detailed or summarized basis. Usage data is used to create customer invoices for the calls.
Usage Records	The individual call records created in a switch to report the date, time, duration, calling and called numbers associated with a given call.
Verizon official (administrative) lines	Verizon official (administrative) lines are lines used by Verizon employees or contractors to conduct official company business.
Virtual Collocation	Shall have the meaning set forth in 47 C.F.R. Section 51.5.

Glossary of Acronyms

ACRONYM	DESCRIPTION
ADSL	Asymmetric Digital Subscriber Line
ALI	Automatic Line Information (for 911/E911 systems)
AS	Affecting Service (type of trouble condition)
ASI	Advanced Services Inc. (data subsidiary of SBC)
ATIS	Alliance For Telecommunications Industry Solutions
BDT	Billing Data Tape
BOS	Billing Output Specifications
BRJ	Basic Rate Interface (type of ISDN service)
CABS	Carrier Access Billing System
CARE	Customer Repair Center (GTE)
CBSS	Customer Billing Service System (GTE)
CESAR	Carrier Enhanced System for Access Request
CHC	Coordinated "Hot" Cut
CKT	Circuit
CLEC	Competitive Local Exchange Carrier
CO	Central Office
CORBA	Common Object Request Broker Architecture (Pre-ordering standard)
CPE	Customer Premises Equipment
CPLC	California Public Utilities Commission
CRIS	Customer Record Information System
CSB	Customer Service Bureau (PB retail repair center)
CSR	Customer Service Record
DA	Directory Assistance
dB	Decibel
DID	Direct Inward Dialing
DS0	Digital Service 0
DS1	Digital Service 1
DS3	Digital Service 3
E911 MS	E911 Management System
EAS	Equal Access Service
EDI	Electronic Data Interchange
EMI	Exchange Message Interface
EUCL	End User Carrier Line charge
FDT	Frame Due Time
FOC	Firm Order Confirmation
GTE	General Telephone Company
GTT	Global Title Translations
GUI	Graphical User Interface
HDSL	High-bit-rate Digital Subscriber Line
HICAP	High Capacity Digital Service
IEC	Inter-exchange Carrier
ILEC	Incumbent Local Exchange Carrier
I, N, T, C, M	Service Order Types - I (install-GTE), N(new-PB), T(to or transfer-PB), C(change)and M(move-GTE)
ISDN	Integrated Services Digital Network
IW	Inside Wire
LATA	Local Access Transport Area
LERG	Local Exchange Routing Guide

CA JPSA

ACRONYM	DESCRIPTION
LNP	Local (or Long Term) Number Portability
LOC	Local Operations Center (PB repair and coordination center for CLEC activity)
LSC	Local Service Confirmation or Local Service Center (PB)
LSMS	Local Service Management System
LSR	Local Service Request
MAC	Missed Appointment Code
NDM	Network Data Mover
NOMC	National Open Market Center (GTE)
NPAC	Number Portability Administration Center
NXX	Telephone number prefix
OBF	Ordering and Billing Forum
OOS	Out of service (type of trouble condition)
OSS	Operations Support System
PB	Pacific Bell
PBX	Private Branch Exchange
PICC	Primary Interexchange Carrier Charges
PNP	Permanent Number Portability (same as LNP)
PON	Purchase Order Number
POTS	Plain Old Telephone Service
PRI	Primary Rate Interface (type of ISDN service)
SBC	Southwestern Bell Corporation
SCP	Service Control Point
SDA	Separate Data Subsidiary
SGT	Service Group Type
SORD	Service Order Retrieval and Distribution (PB service order creation system)
SOT	Service Order Type
SS7	Signaling System 7
STP	Signaling Transfer Point
TBCC	To Be Called Call (PB)
TN	Telephone Number
UNE	Unbundled Network Element
VGPL	Voice Grade Private Line
xDSL	(x) Digital Subscriber Line

Jeopardy Missed Appointment Codes

Standard OBF Jeopardy Code	Description
1A	Inter Office Facility Shortage
1B	Scheduling/Work Load
1C	Customer Not Ready
1D	No Loop Available
1E	End User Not Ready
1F	Provider Missed Appointment
1G	No Access to End User Premise
1H	Central Office Freeze
1J	Special Construction
1K	Natural Disaster (Flood, etc.)
1L	Frame Due Time Cannot Be Met
1M	Requested Due Date Is Not Available
1N	Due Date and Frame Due Time Cannot Be Met
1P	Other
1Q	Assignment Problem
1R	Customer Could Not Be Reached at the Can Be Reached Number (CBR)
1S	Building Not Ready, Customer Will Advise
1T	Pole At Site Not Set
1W	Entrance Facilities Required
1X	Not Technically Feasible
1Y	No Central Office Equipment Available
1Z	Other Local Exchange Company Not Ready
2A	CLEC order request error
2B	Work order pending

Verizon has adopted standard OBF jeopardy codes, listed above

09	SERVICE ORDER
10	RECORDS
11	CARRIER (FIELD) OR CONCENCRATOR
12	CENTRAL OFFICE
13	TEST OKAY
15	CAME CLEAR
16	CUSTOMER
17	EXCLUDE
18	REFERRED OUT
19	CPE

Attachment 1

CA JPSA

Implementation Schedule

Upon Commission approval of the 2004 and 2005-2006 Review agreed to changes (submitted by the Settling Parties), the approved changes will be implemented as follows:

To make better use of its Information Technology resources, in 2005 Verizon plans to adopt a process that provides for quarterly updates to its Wholesale measurement systems. At present, Verizon contemplates making updates to its Wholesale measurement systems for the February 2005 data month, for which performance reports will be issued at the end of March 2005. Updates are also proposed for the May 2005 data month, for which performance reports will be issued at the end of June 2005, and for the August 2005 data month, for which performance reports will be issued at the end of September 2005. In order for Verizon to include the revised CA JPSA changes in a quarterly update, Verizon will need to receive a Commission order approving same no later than the 15th day of the second fourth calendar month prior to the calendar month in which the quarterly update is to be implemented. For instance, if on or prior to March 15, 2005 the Commission issues an order approving the revised CA JPSA Guidelines, Verizon will implement the revised CA JPSA Guidelines for the May 2005 October 2005 data month, for which performance reports will be issued at the end of June 2005 November 2005. If between March 16, 2005 and June 15, 2005 the Commission issues an order approving the revised CA JPSA Guidelines, Verizon will implement the revised CA JPSA Guidelines for the August 2005 data month, for which performance reports will be issued at the end of September 2005. This implementation interval will be needed in order to allow Verizon to undertake the complex work of making the system and process changes necessary to perform and report the modified measurements. They It will also allow Verizon to test whether these changes have been properly made.

(END OF APPENDIX III)

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
1	Executive Summary	NA	NA	Under Auditing and Review Procedures section replace language "can be found in sections III and IV" with "are provided in this document."	Ensures consistency with reformatted version.	Administrative Clarification	Agreed	
2	Reservation of Rights	NA	NA	Under ILEC's section 3 rd bullet added word "be" between should and viewed.	Grammatical Correction	Administrative Clarification	Agreed	
3	General Exclusions	NA	NA	Add list of general exclusions.	Clarifies common exclusions for all PMs	Administrative Clarification	Agreed	
4	Performance Metric Number Cross Reference Table	NA	NA	Add Performance Metric Number Cross Reference Table.	Provides reference to new metric numbering.	Administrative Clarification	Agreed	
5	Product Codon	NA	NA	Add Product Code chart.	Provides reference to new product codes.	Administrative Clarification	Agreed	
6	Retail	NA	NA	Add Retail Analog chart.	Provides reference to retail analogs	Administrative Clarification	Agreed	

123

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
7	Performance Metric Number Cross Reference Table	NA	NA	Under Notes section replace language "documented in Section VIII (Implementation Schedules)" with "provided in the Implementation Schedule chapter."	Ensures consistency with reformatted version.	Administrative Clarification	Agreed	
8	1 (PO-1)	Address Verification TN Selection Service Availability Due Date	Calculation, Performance Standard and Business Rules	Replace reference to "Legacy" system with "Retail" in Performance Standard and Business Rules sections.	Language clarification. Legacy systems have been replaced and it is more appropriate to refer to Retail.	Administrative Clarification	Agreed	

111

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
9	1 (PO-1)	Address Verification TN Selection Service Availability Due Date	Notes	Add language to the Notes section indicating that the retail measurement is based on COFEE data.	Requests for Preordering information are processed through Verizon's COFEE (Converged Ordering Front End Engine) and NOCV (National Order Collection Vehicle) systems. For measurement purposes, only COFEE data is included because it is a Client/Server application that works as a GUI to NOCV and is analogous to the wholesale system and process. NOCV is a mainframe system for which a number of different processes are executed to complete a pre-order request. It is not possible to capture timestamps from when a user hits the enter key to when they receive a response, response time can only be approximated.	Administrative Clarification	Agreed

Verizon PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)
 Process and Administrative Clarification Changes
 Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
10	1 (PO-1)	All	Exclusions	Modified definition of batch transmission.	Clarification on batch transmission definition.	Administrative Clarification	Agreed	
11	1 (PO-1)	All	Exclusion	Add language for exclusion covered in Business Rules for electronic pre-order query response times that originate outside the published system hours.	Business Rule states "Elapsed time for fully electronic sub-measures tracked during published system hours". The addition of this exclusion will provide further clarification on the exclusion of electronic pre-order query response times sent outside published system hours.	Administrative Clarification	Agreed	Verizon to add web location for published hours in JPSA document.
12	2, 3 (OR-1, OR-2)	All	Definition	Replaced the word "measurable" with "performance."	Provides consistency with new format.	Administrative Clarification	Agreed	

- 126 -

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
13	2 (OR-1)	Standalone Directory Listings	Products (Reported By) Performance Standard	Add Standalone Directory Listings as a distinct product within the Measurable Standard and remove reference to stand alone directory listings in the reported by section.	Standalone Directory Listings are currently reported as a separate product.	Administrative Clarification	Agreed	
14	4 (OR-5)	All	Business Rules	Added the following Business Rules: 1) Includes only confirmed LSRs and 2) Excludes all rejected orders.	Language clarification on current metric calculation.	Administrative Clarification	Agreed	
15	4 (OR-5)	All product subtypes	Notes	Remove second bullet from Notes section regarding system upgrade targeted for May 2003.	System upgrade was implemented. Note is obsolete.	Administrative Clarification	Agreed	
16	4 (OR-5)	All	Products (Reported By)	Consolidate reported product types into Resale and UNE.	Ensures consistency with reporting in East; disaggregation by service type results in low volumes.	Process	Agreed	Agreement reached to disaggregate by Resale, UNE -P, UNE Loop and UNE Other

127

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes
 Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
17	7.8 (PR-2, PR-3)	All	Exclusion Business Rules	Add Projects to list of exclusions; removed following business rule "Verizon will not exclude projects." (This rule is currently documented under PR-2).	Volume of projects with longer intervals is expected to increase. Similar to SBC, Verizon should have this exclusion.	Process	Agreed	
18	7 ((PR-2)	UNE Loop Services	Exclusion	Delete the reference to "SBC/California only" from "For UNE Loop Services, feature-only orders are excluded from retail analog."	This exclusion should apply to both companies, in that it is appropriate to apply the exclusion to Verizon as to SBC/California. Verizon believes this was simply an oversight in the production of the JPSA, in that the exclusion is meant to apply to each Company, but only for UNE Loop services.	Administrative Clarification	Agreed	

- 128 -

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes
 Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
19	7 (PR-2)	UNE subloop and Dark Fiber	Business Rules	Delete the Business Rules bullet "For Verizon, results for UNE subloop and Dark Fiber will be tracked diagnostically."	Duplicate language with Business Rules.	Administrative Clarification	Agreed	
20	7 (PR-2)	Interconnection Trunks	Notes	Remove the following note: "For interconnection trunks, the current measurable standard for Verizon at parity to be reviewed and benchmarks considered for the next performance review."	Verizon's position is that where there is a valid analog, the analog is used for parity performance standard.	Administrative Clarification	Agreed	
21	11A (PR-4-16)	All product subtypes	Business Rules	Add the word "not" to the following business rule: "Loop Acceptance Test is now completed on or before due date."	Ensures consistency with the measure.	Administrative Clarification	Agreed	

- 129 -

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
22	13, 14 (PR-5-05, PR-4-02)	Interconnection Trunks	Notes	Remove the following note: "For interconnection trunks, the current measurable standard for Verizon at parity to be reviewed and benchmarks considered for the next performance review."	Where there is a valid analog, the analog is used for parity performance standard.	Administrative Clarification	Agreed	
23	15, 15A (PR-6-04, PR-6-05)	All	Products (Reported by)	Remove condition to report by service affecting and out of service	Level of disaggregation is not required based on low volumes of activity being reported. It is sufficient and reasonable to measure based on product/service group category. It is irrelevant whether the trouble is service affecting or OOS.	Process	Agreed	

130

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
24	16 (PR-6-01)	All	Exclusions	Modify following exclusion, "Trouble Reports received on the due date for orders other than for new installations" to "Trouble Reports received on the due date."	Trouble reports received on the due date are captured in PR-6-04 (PM15) and would be double counted if also included in PR-6-01 (PM16).	Process	Agreed	
25	17 (PR-6-02)	All	Exclusions	Add exclusion for troubles received on the order due date.	Ensures consistency with PR-6-01 (PM16). Trouble reports received on the due date are captured in PR-6-04 (PM15) and would be double counted if also included in PR-6-02 (PM17).	Process	Agreed	
26	19, 20, 21, 22, 33 (MR-2, MR-3, MR-4, MR-5)	All product subtypes	Definition	Added Network Trouble Disposition Codes to measure definition.	Provides clarification on network troubles.	Administrative Clarification	Agreed

Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
28	19 (MR-2)	UNE Loop xDSL	Notes	Formatted Notes section to separate bullet for Verizon retail analog information: "The analog for UNE Loop xDSL capable will be Retail ISDN BRI until the Verizon affiliate or separate division"	Consistency in documentation.	Administrative Clarification	Agreed	
29	19, 20, 21, 22, 23 MR-2, MR-3, MR-4, MR-5	All product subtypes	Exclusion	Add Exclusion for Verizon's official (administrative) lines.	Verizon official services are handled differently than normal retail service and they should not be included in the normal retail results.	Administrative Clarification	Agreed	Verizon will add the following definition for Verizon official (administrative) lines. "Verizon official (administrative) lines are lines used by Verizon employees or contractors to conduct official company business."
30	20 (MR-3)	NA	Title	Changed title to read, "Percentage of Customer Troubles Not Resolved Within Estimated Time."	Corrects grammar of title.	Administrative Clarification	Agreed

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
35	24 (NP-1-02)	All product subtypes	Business Rules	Under the Business Rules, second bullet, add the words "upon CLEC request", such that the bullet would read: "ILEC will make available upon CLEC request detailed information [continue with current language]...."	This change would just reflect current practice, as today Verizon only makes this information available upon the CLEC's request. As currently worded, the Business Rule suggests some on-going, affirmative duty by the ILEC to provide the information, yet Verizon has always understood that the information should be provided only if it is requested by a CLEC.	Administrative Clarification	Agreed

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
36	25 (NP-1-04)	All product subtypes	Exclusions	The current Exclusions, bullets 3-5, should be adjusted such that the exclusions in the bullets are applicable to both Verizon and SBC/California. Currently, bullet 3 applies to both companies, but bullets 4 and 5 state that they only are applicable to SBC/California. The third bullet should be dropped, and reference in bullets 4 and 5 indicating that they only apply to SBC/California should be deleted.	Ensures consistency with East trunk blockage exclusions and consistency with SBC.	Process	Agreed	Verizon will implement a West notification process similar to that which is to be implemented in the East. Verizon will add the following note to the guidelines, "VZ will electronically notify CLECs (operational trunk staffs), of the following situations for blocked trunks. The notification states that VZ identified a blocked trunk group due to CLEC reasons, and that the trunk group will be excluded from VZ performance. Verizon will make the exclusion automatically unless the CLEC responds back within two business days with documentation indicating that Verizon's information on the condition is inaccurate."

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes
Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
37	28 (BI-1)	All product subtypes	Definition	Modify the measure Definition by adding the words "by the switch" between "data" and "generated", and by clarifying that the end of the measurement period is when the data is "made available" as opposed to being "sent" to the CLEC.	"By the switch" clarifies how the data is generated. Electronic data is not always "sent" to a CLEC. In some cases the data is retrieved by the CLEC after it is "made available."	Administrative Clarification	Agreed	Verizon will add a clarification to the definition section based on media type.
38	28 (BI-1)	UNE IntraLATA and InterLATA combined excluding UNE Platform	Performance Standard	Reformat the Performance Standard and add clarification language to UNE IntraLATA and InterLATA combined, excluding UNE Platform to show exact parity comparisons for the different services that are reported (e.g., Retail Local, Toll, etc.)	This change more accurately describes the parity comparisons applicable to the reported services under this Measure.	Administrative Clarification	Agreed

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
39	28 (BI-1)	Jointly Provided Switched Access	Calculation	Added calculation to accommodate benchmark standard for Jointly Provided Switched Access.	Current formula did not align with a benchmark standard.	Administrative	Agreed	
40	30 (BI-2)	All product subtypes	Definition	Modify the measure Definition by replacing the clause "successful transmission of the associated invoice: with "transmission availability date of the bill."	This change is requested because the ILEC does not "transmit" all electronic bills to CLECs. In some cases, the bill is made available and retrieved electronically by the CLEC.	Administrative Clarification	Agreed.	Verification will add clarification based on media type.

138

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
41	30 (BI-2)	All product subtypes	Performance Standard	Change the Performance Standard from "99% within 10 calendar days" to "98% within 10 business days."	Ensures consistency with East performance standard. This is a national standard used throughout Verizon's operation. There have not been any demonstrated harms to competition or CLEC's by use of this slightly reduced standard. It was also the standard applicable in the FCC measures.	Process	Withdrawn	
42	30 (BI-2)	All product subtypes	Calculation	In the Calculation, replace "transmitted" in both numerator and denominator with "made available."	Electronic data is not always "sent" to a CLEC. In some cases the data is retrieved by the CLEC after it is "made available."	Administrative Clarification	Agreed.	Verizon will add clarification based on media type.

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
43	34 (BI-1)	All product subtypes	Exclusions	Add new exclusion. "Any billing adjustments that result from an agreement between the ILEC and the CLEC, where the adjustments were not completed to correct errors in billing."	Ensures consistency with SPC/California.	Process	Agreed	Verizon will add the following language to the proposed exclusion, "This exclusion does not include adjustments made as a result of a settlement on a bill adjustment claim."
44	31 (BI-6)	All product subtypes	Definition	Modify the measure Definition by replacing "correct bill" with "next available bill."	Ensures consistency with East measure. The "next available bill" is a more accurate description of what is being measured. Usage is delivered on the "next available bill", rather than the "correct bill."	Administrative Clarification	Agreed	
45	31, 32, 33 (BI-6, BI-7, BI-8)	Resale and UNE	Performance Standard	Add "Parity with Retail" to the Performance Standard.	Clarify language on parity comparison for Resale and UNE services.	Administrative Clarification	Agreed	

- 10 -

Attachment 2

Verizon **PROPOSAL FOR MODIFICATIONS TO THE CA JOINT PARTIAL SETTLEMENT AGREEMENT (JPSA)**
 Process and Administrative Clarification Changes
 Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
46	31 (BI-6)	All product subtypes	Calculation	Calculation should be changed to allow 60 days (instead of 30 days) in which to post usage.	Billing cycles occur on approximately a 30 day period. The bill at the end of such a cycle will not capture usage toward the end of the 30 day billing period because it is physically impossible to do so. That is, given bill cycle 1 usage occurs from days 1-30. When the bill is produced, usage from days 1-20 may be captured, but usage on days 20-30 is not reflected until the "next bill", which would be up to 40 days after the usage occurred. Permitting 60 days to post usage allows us to put on "the next bill" any usage in a 30 day cycle that was not reflected on the bill at the end of that cycle.	Process	Agreed Withdrawn	Verizon will change the language to reflect a numerator calculation of "Count of usage charges on the bill that were recorded within last 45 30 days."

 Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
47	32,33 (BI-7, BI-8)	All product subtypes	Definition and Calculation	Modify the measure Definition and the Calculation by replacing "correct bill" with "next available bill."	This is the same change requested in BI-6 (PM 31).	Process	Agreed Withdrawn	Verizon will change the language to reflect the effective date of the charge must be within 45 20 days of the bill date for the charge to appear on the next available bill.
48	32, 33 (BI-7, BI-8)	All product subtypes	Business Rules	Change the Business Rule to make clear that charges should appear within 2 months, not the current one month, for the same reasons as explained for BI-6 (PM 31) concerning the change from 30 days to 60 days. Also, in the Business Rule refer to the "next available bill" rather than the "correct bill" for reasons already explained.	Billing cycles occur on approximately a 30 day period. The bill at the end of such a cycle will not capture charges toward the end of the 30 day billing period because it is physically impossible to do so. Permitting 60 days to post charges allows us to put on "the next bill" any charges in a 30 day cycle that was not reflected on the bill at the end of that cycle.	Process	Agreed Withdrawn	Verizon will change the language to reflect the effective date of the charge must be within 45 20 days of the bill date for the charge to appear on the next available bill.

Consensus Items

Item #	PM	SUBMEASURE(S)	MEASURE CATEGORY	PROPOSED CHANGE	RATIONALE	TYPE of CHANGE	Status	Comments
53	41 (NP-2-05)	All product subtypes	Business Rules	Add business rule for delays due to CLEC.	Clarification of metric process.	Administrative Clarification	Agreed	
54	41 (NP-2-05)	All product subtypes	Business Rules	Under the Business Rules, add a Business Rule for Verizon that is essentially the same as the rule applicable to SBC/California regarding mutually negotiated commitments.	Ensure consistency with East business rules and consistency with SBC. The same rule regarding negotiated commitments that applies to SBC/California should also be applicable to Verizon. Verizon follows much the same process as SBC/California regarding such commitments, and there is no reason the Business Rule should not apply to each ILEC.	Process	Agreed	Verizon will remove redundant exclusion.

58	Auditing	NA	NA	Change requirement for a meeting of the Joint Steering Committee for audits from 6 months to 12 months.	The current JPSA calls for a meeting of the Joint Steering Committee for audits every 6 months. This should be changed to an annual meeting in that reviews every 6 months are unnecessary and a burden to all parties.	Administrative Clarification	Agreed.	Verizon will add the following language. "The committee will convene every twelve months to discuss and determine the timing and scope of any Annual Audit. Provided, any party may request that the committee convene before the 12 th month but not earlier than the 6 th month following the last meeting of the committee, to discuss whether an Annual Audit is necessary. In such event, the party seeking the earlier meeting will be responsible for calling the meeting, providing a conference call-in number and/or meeting location, and providing all legal notices applicable thereto."
59	Auditing	NA	NA	Removed reference to Section IIc.	Ensures consistency with new format.	Administrative Clarification	Agreed	
60	Definition of Terms	NA	NA	Changed term - Common Transport to Common Transport Trunk Groups.	Make language consistent with measure description.	Administrative Clarification	Agreed
