RE: Rainbow Springs Utilities L.C. application for extension of service area

Dear Sir or Madam:

I object to the application for extension of service area and strongly request that the application be rejected. The extension of services is NOT necessary to protect the environment and the health, safety, and welfare of the general public. To my knowledge, there are no environmental, health, safety or welfare problems in the proposed service area.

Our current water well sources the same water that the proposed new service will use. Why should we pay more money to obtain the same water we are now using? The septic systems in the proposed service area meet the current requirements of the State of Florida. Why do we need expensive new systems that may create environment problems?

The only answer to the above questions is financial gain for the developer financed by the current property owners. I have no objection to financial gain for the developer and support his motivation to generate more income or increase the value of his business. I do object to financing his plan to increase the income/value of his business.

Please reject the application for extension of service area.

Sincerely,

*TCJ*  
Thomas C. Jednacz
