RE : DOCKET NO. 971236-WS; APPLICATION FOR AMENDMENT OF
CERTIFICATES NOS. 7-W and 3-S IN BREVARD COUNTY BY
FLORIDA CITIES WATER COMPANY.

Florida Cities Water Company - Barefoot Bay Division (Barefoot Bay or utility) provides water and wastewater service in Brevard County and serves approximately 4,567 water and 4,567 wastewater customers. The Florida Cities Water Company includes the Barefoot Bay, Golden Gate and Lee County Divisions, which combined serve 24,263 water and 14,408 wastewater customers. The annual report for 1995 shows that the consolidated annual operating revenue for the Barefoot Bay, Golden Gate and Lee County systems is \$14,035,044 and the net operating income is \$1,455,792. The utility is a Class A utility company under Commission jurisdiction.

On September 23, 1997, the utility applied for an amendment of Water Certificate No. 7-W and Wastewater Certificate No. 3-S in Brevard County to include the Crystal Bay residential, single-family) development. The utility anticipates serving 500 equivalent residential connections (ERC's) with water and wastewater service at build out. The application is in compliance with the governing statute, Section 367.045, Florida Statutes, and other pertinent statutes and administrative rules concerning an application for amendment of certificate. The application contains a check in the amount of \$1,000 which is the correct filing fee pursuant to Rule 25-30.020, Florida Administrative Code. The applicant has provided evidence, in the form of a warranty deed, that the utility owns the land upon which the utility's facilities are located as required by Rule 25-30.036(3)(d), Florida Administrative Code.

The utility has submitted an affidavit consistent with Section 367.045(2)(d), Florida Statutes, that it has tariffs and annual reports on file with the Commission. In addition, the application contains proof of compliance with the noticing provisions set forth in Rule 25-30.030, Florida Administrative Code. No objections to the application have been received and the time for such has expired. The local planning agency was provided notice of the application and did not file a protest to the amendment.

The utility states that the provision of service will be consistent with the utility section of the local comprehensive plan. Water service will be provided by the utility's 1.0 million gallons per day (mgd) water treatment plant. Current flows are 45% (.45 mgd) of the water treatment plant capacity, and the peak day flow is .86% (.86 mgd). There is a total of 800,000 gallons of storage to handle the peak demand. The extension will add an average daily demand of .125 mgd and a peak demand of .24 mgd. There appears to be sufficient water treatment capacity to serve the proposed territorial extension. Wastewater service will be provided by the utility's .75 mgd wastewater treatment plant. Current average daily flows for the twelve-month period is .469 mgd, with flows for the peak day at .744 mgd. The plant was designed with a 3.0 hydraulic peaking factor. The peak flow was handled without any degradation in the quality of service. This extension will add an average daily flow of .125 mgd and a peak day flow of .206 mgd. The developer will provide reuse by taking back and reusing at least the same amount of wastewater generated by the parcel, as reclaimed water. The developer will construct all necessary reclaimed water mains and dedicate them to Florida Cities. It appears that the utility has sufficient wastewater treatment plant capacity to serve the development. The utility currently disposed their effluent thru a 40 acre sprayfield owned by the utility, H & S Groves (a sod farm and orange grove) leases this property from the utility, and Barefoot Bay Golf Course. Staff has contacted the Department of Environmental Protection and learned that there are no outstanding notices of violation regarding this utility.

Barefoot Bay has the financial and technical ability to continue to provide service to the customers. Barefoot Bay is a large, multi-county operation in the State of Florida, and has been in the water and wastewater utility business since 1965. Staff believes the utility has demonstrated the financial and technical expertise to provide quality service to these customers. The Commission approved Barefoot Bay's most recent rate increase by Order No. PSC-97-0516-FOF-WU, issued May 5, 1997 in Docket No. 951258-WS. Service availability charges for water and wastewater

became effective on September 29, 1994 by Order No. PSC-94-0961-FOF-WS in Docket No. 940106-WS, issued August 8, 1994. The Commission approved an increase in Barefoot Bay's service availability charges for wastewater by Order No. PSC-96-0935-FOF-SU, issued July 18, 1996 in Docket No. 951311-SU. Staff recommends the rates and charges approved by the Commission be applied to customers in the new service territory.

Based on the above information, staff believes it is in the public interest to grant the application of Florida Cities for amendment of Water Certificate No. 7-W and Wastewater Certificate No. 3-S. The utility has returned the certificates for entry of the additional territory and filed revised tariff sheets which reflect the amended territory description. An administrative order should be issued within 30 days granting the amendment of territory.

If you have any questions, please contact me immediately.
