TARIFF FORMAT SHEET

A. Sheet Numbering -- Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers -- Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised sheet 14. Because of various suspension periods, deferrals, etc., the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence -- There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level as shown in the following example :

D. Check Sheets -- When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made to a given filing are designated by an asterisk (*). There will be no other symbols use on this page if these are the only changes made to it (i.e., the format , etc., remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

SECTION 3 -- DESCRIPTION OF SERVICES

3.1 Timing of Calls

3.1.1. When Billing Charges Begin and End for Phone Calls

The Customer's long distance usage charge is based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver (i.e., when 2-way communication, often referred to as "conversation time" is possible). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the called or calling party hangs up.

3.1.2. Billing Increments

Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute for a connected call and calls beyond one minute are billed in one (1) minute increments.

3.1.3. Per Call Billing Charges

Billing will be rounded up to the nearest penny for each call. In no instance shall the rounded rates exceed the OSP rate cap.

3.1.4. Uncompleted Calls

There shall be no charge for uncompleted calls.

3.4 Restoration of Service

A reconnection fee of \$25 per occurrence is charged when service is re-established for Customers who have been disconnected for non-payment.

3.5 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V&H Coordinates Tape and NECA Tariff No. 4.

CERTIFIED PUBLIC ACCOUNTANT

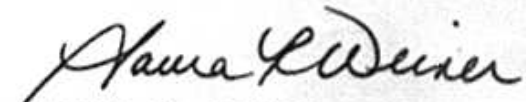

Worldwide Telecommunications & Services, LTD
Lake Worth, Florida

I have compiled the accompanying statement of assets, liabilities and partners' equity - modified cash basis of Worldwide Telecommunications & Services, LTD as of December 31, 1997, and the related statement of revenues collected and expenses paid - modified cash basis for the four months ended December 31, 1997 in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of owners. I have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The Company prepares its financial statements on the modified cash basis but includes depreciation and amortization of capitalized assets. Under this basis, revenues are recognized when collected rather than when earned, and expenses are generally recognized when paid rather than incurred. Consequently, the financial statements do not include accounts receivable or accounts payable as of December 31, 1997.

Management has elected to omit substantially all of the informative disclosures ordinarily included in financial statements. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.
