RE: Y2K Survey & Workshop

Dear Sirs:

Elias Ventures, Inc. d/b/a American Freeway100 is a new company and all its computer systems are new enough that there is no Y2K problem with them for internal operations and billing. The Company does not yet offer telecommunications services in Florida because it is not yet certified to offer services in all 50 states as it desires to do.

As a potential non-facilities based re-seller only of telecommunications services, the Company does not expect to directly have any Y2K problem that might interrupt customer service. As a re-seller only, our underlying carriers, who will be major telecommunication companies and are dealing with their potential Y2K problems, are responding to the multitude of queries such as yours directly to you.

I trust the foregoing is a satisfactory response. However, if you have any further questions, please let me know.

Sincerely,

Charles R. Cleveland  
General Counsel
