 )

MOTION FOR PROTECTIVE ORDER AND TO QUASH SUBPOENAS

TO: J. TERRY DEASON, PREHEARING OFFICER

RECORDS AND REPORTING

AUG 16 PM 3:25

RECEIVED-FPSC

Nocatee Utility Corporation ("NUC") hereby moves for a protective order to temporarily postpone the depositions duces tecum of Roger M. O'Steen and Douglas C. Miller noticed by Intercoastal Utilities, Inc. ("Intercoastal") and to quash any related deposition subpoenas issued by the Commission. As grounds therefor, NUC states:

Background

1. On June 1, 1999, NUC filed its application for original water and wastewater certificates for a multi-county utility in Duval and St. Johns Counties. The proposed certificate area, consisting of approximately 15,000 acres, is owned by DDI, Inc., the parent company of NUC. The proposed certificate area will be developed as a multi-use project known as "Nocatee." Because of its size, Nocatee will require approval under Chapter 380, Florida Statutes, as a development of regional impact ("DRI").

*[Signature]*  
 FPSC BUREAU OF RECORDS

2. Also on June 1, 1999, NUC filed a Petition for Temporary Variance from or Temporary Waiver of a number of Commission rules that require the submission of information needed to set initial rates at the same time an original certificate application is filed (the "Variance Petition").

3. On June 30, 1999, Intercoastal filed an objection to NUC's certificate application and also filed comments opposing the Variance Petition. Intercoastal is a water and wastewater utility certificated by St. Johns County whose current service area is located on the opposite side of the Intercoastal Waterway from NUC's proposed certificated territory.

4. On July 27, 1999, the Commission voted to deny NUC's Variance Petition. A proposed agency action order reflecting that determination is scheduled to be issued on or about August 16, 1999. NUC does not intend to protest this ruling. Instead, NUC intends to prepare and submit the required rate information as expeditiously as possible.

5. On July 30, 1999, the Commission issued a CASR which tentatively establishes the following key dates for this docket:<sup>1</sup>

- a. NUC direct testimony - October 11, 1999
- b. Intervenor testimony - November 10, 1999
- c. Staff testimony - December 10, 1999
- d. Rebuttal testimony - January 10, 2000

---

<sup>1</sup> The Commission has not yet issued a procedural order formalizing these dates.

- e. Prehearing statements - February 9, 2000
- f. Prehearing conference - April 13, 2000
- g. Hearing - May 9-10, 2000

6. On August 4, 1999, the St. Johns County Water and Sewer Authority (the "Authority") -- based on evidence taken at 5-1/2 days of hearing in June -- entered its preliminary order DENYING Intercoastal's application to extend its certificated territory to include the St. Johns County portion of the Nocatee development and other adjacent lands located in St. Johns County.<sup>2</sup> A copy of this preliminary order is attached as Exhibit A.

7. Under local ordinances and rules, the Authority's preliminary order is subject to confirmation or amendment by the Board of County Commissioners of St. Johns County ("Board"). NUC currently expects that the Board will take action on the Authority's preliminary order in late September or early October. If the Board confirms the denial of Intercoastal's application, NUC intends to file a Motion to Dismiss Intercoastal's objection in this docket on the grounds that Intercoastal has no standing to oppose the grant of a certificate to an area which Intercoastal's regulator has denied it the right to serve.

8. On August 12, 1999, Intercoastal served a Notice of Taking Deposition Duces Tecum ("Notice") which calls for NUC's

---

<sup>2</sup> NUC's parent company, DDI, was one of several objectors to Intercoastal's application. DDI actively participated in the proceedings before the Authority.

consultants Roger O'Steen and Douglas Miller to appear for deposition on August 25, 1999 and to bring with them documents falling within ten broad categories listed in the Notice.<sup>3</sup> A copy of the Notice is attached as Exhibit B. NUC has been advised that Intercoastal intends to have Commission subpoenas issued for these depositions, though no such subpoenas have been served as of the date of this Motion for Protective Order. In the event that such subpoenas are issued, NUC requests that the Commission treat this Motion for Protective Order as a motion to quash the related subpoenas.

**Depositions Should Be Temporarily Postponed  
Until After St. Johns County Action on  
Intercoastal's Certificate Extension Application**

9. Discovery in Commission proceedings is governed by Rule 28-106.206, Florida Administrative Code, which permits discovery in accordance with Rules 1.280 through 1.400, Fla.R.Civ.Pro. and authorizes the presiding officer to issue appropriate discovery orders.

10. Pursuant to Rule 1.280(c), Fla.R.Civ.Pro., the presiding officer has broad discretion, upon motion by a party for good cause shown, to enter any order to protect a party from undue burden and expense, including an order:

---

<sup>3</sup> On August 5, 1999, counsel for Intercoastal contacted counsel for NUC to identify early dates on which Mssrs. O'Steen and Miller would be available for deposition. On August 9, 1999, NUC advised Intercoastal that August 25, 1999 was an agreeable date, subject to NUC's decision on whether or not to seek a protective order, and the Prehearing Officer's ruling thereon.

(2) that the discovery may be had only on specified terms and conditions, including a designation of the time or place.

11. Based on the unique facts and circumstances of this case, NUC requests that the Prehearing Officer enter a protective order postponing the depositions of Mssrs. O'Steen and Miller until the later of:

(a) ten days after the Board of County Commissioners of St. Johns County has taken final action to grant or deny Intercoastal's application for a certificate extension to serve the Nocatee development, or

(b) if Intercoastal's application is denied by the Board, and NUC files a Motion to Dismiss Intercoastal's objection in this docket within 10 days following the Board's decision,<sup>4</sup> until after the Commission has ruled on Intercoastal's right to continue as a party to this proceeding.

12. NUC should not be required to incur the time and expense of subjecting its witnesses to depositions by Intercoastal, and to the accompanying broad document production demands, while there is a cloud over Intercoastal's right to continue as a party to this proceeding. Given the strong findings of fact and conclusions of law in the Authority's

---

<sup>4</sup> NUC intends to file a Motion to Dismiss promptly after the Board's decision. NUC has not filed such a motion prior to this time only because such a motion would be premature until after the Board has taken final action on Intercoastal's application.

preliminary order recommending that Intercoastal be denied the right to serve the Nocatee development, there is every likelihood that the Board will confirm the Authority's order. If this occurs, it will raise substantial doubt about Intercoastal's standing to continue as a party to this proceeding which will have to be resolved by a full Commission ruling on a Motion to Dismiss that Nocatee intends to file.

13. There is ample precedent for an order delaying discovery pending resolution of a motion to dismiss, both at the Commission and in the courts. In re: Petition of Lee County Electric Cooperative against Florida Power and Light Company, 85 FPSC 11:91 (1985) (depositions postponed until a reasonable time following a vote on motion to dismiss); Feigin v. Hospital Staffing Services, 569 So.2d 941 (Fla. 4th DCA, 1990) (trial court did not abuse its discretion by staying discovery depositions pending a motion to dismiss hearing); see, Deltona Corporation v. Bailey, 336 So.2d 1163 (Fla. 1976) (should not postpone depositions for a year, although postponing discovery for a short time pending determination of motion to dismiss is within discretion of trial court).

14. Such a postponement is particularly appropriate in this case, given the unusual timing of the deposition requests. Although the discovery rules permit depositions to be taken any time after a case is initiated, the custom in Commission dockets is to delay depositions until after prefiled testimony has been

submitted. NUC's direct testimony in this case is not due until October 10, 1999, a month and a half after the scheduled depositions. The final hearing is not scheduled until May, 2000. A postponement of discovery until after the Commission has had an opportunity to rule on a Motion to Dismiss expected to be filed in October will not prejudice Intercoastal in any way in its preparation for this case.

15. In considering this motion, the Prehearing Officer should be aware that there are other at least two other cases -- the Intercoastal certificate expansion case in St. Johns County and an injunction case before the Circuit Court in St. Johns County -- in which Intercoastal may seek to use any depositions taken in this proceeding. The unusually early timing of the scheduled depositions strongly suggests that Intercoastal's purpose in noticing the depositions in this case is to use this docket as a vehicle to side-step problems that it would encounter in seeking to depose NUC directly in either of these other proceedings.

**In the Alternative, Document Production Should Not  
Be Required on August 25th In Any Event**

16. In the event the motion to postpone the depositions is denied, the Commission should nevertheless enter a protective order that gives NUC a full thirty days to produce (or object to production of) the documents identified in the notice of deposition (and any related subpoena). Under Rule 1.350(b), Fla.R.Civ.Pro., a party is entitled to 30 days to respond and/or

object to a request for production of documents. Under Rule 1.310(b)(5), Fla.R.Civ.Pro., a deposition notice to a party deponent may be accompanied by a request for production of documents at the deposition, as Intercoastal has done in this case. However, *"the procedures of rule 1.350 shall apply to the request."* This means that a party cannot be forced to produce documents earlier than 30 days simply because the adverse party makes the request part of a notice of deposition duces tecum, rather than serving a separate document production request.

17. The document production demand included in Intercoastal's deposition notice identifies ten broad categories of documents, and asks not only for documents in the possession or control of the witness, but also documents in the possession or control of NUC and any of its affiliates. This is clearly a substitute for a request for production of documents to NUC. Under Rules 1.310(b)(5) and 1.350, NUC is entitled to have it treated as such and to the entry of a protective order that affords NUC the full 30 days in which to respond or object.

18. NUC is still considering the extent to which the request seeks privileged documents or is otherwise objectionable. NUC will attempt to work out any such routine discovery issues with Intercoastal. If the parties are unable to agree, NUC will file any necessary objections, or a further request for protective order, at the appropriate time.

## Conclusion

19. Given:

a. The likelihood that by mid-October Intercoastal's regulator will deny Intercoastal the right to serve the territory at issue in this case;

b. The fact that a temporary postponement of discovery will avoid the waste of time and expense in the event Intercoastal is dismissed from this proceeding;

c. The fact that a temporary postponement of discovery will not impair Intercoastal's ability to prepare for the hearing in this case, which is not scheduled until May, 2000; and

d. The likelihood that accelerated discovery in this case has been requested by Intercoastal for use in other non-Commission proceedings;

the Commission should grant NUC's Motion for Protective Order to temporarily postpone the depositions.

20. Alternatively, in the event the depositions are not postponed, the Commission should grant NUC's Motion for Protective Order to give it the full 30 days provided by the Florida Rules of Civil Procedure to produce, or object to the production of, the documents listed in Intercoastal's Notice of Deposition Duces Tecum.

WHEREFORE, NUC requests that the Prehearing Officer enter a protective order as set forth in the body of this motion.

RESPECTFULLY SUBMITTED this 16th day of August, 1999.

**PRELIMINARY ORDER DENYING APPLICATION  
TO AMEND FRANCHISE CERTIFICATES 13 AND 14**

This matter was heard on June 2, 4, 11, 18, 19 and 23, and August 4, 1999 in St. Augustine, Florida, before St. Johns County Water and Sewer Authority Chairman Kenneth Forrester, and Authority members Rita Friedman and William Webster.

APPEARANCES

For Intercoastal Utilities, Inc.:	John L. Wharton, Esq. 2548 Blairstone Pines Drive Tallahassee, Florida 32301
For DDI, Inc. and Estuary Corporation:	Richard D. Melson, Esq. 123 South Calhoun Street Tallahassee, Florida 32314
For St. Johns County Utility Department:	Suzanne Brownless, Esq. 1311 B Paul Russell Rd., Ste. 201 Tallahassee, Florida 32301
For JEA:	Kenneth A. Hoffman, Esq. 215 South Monroe Street, Ste. 420 Tallahassee, Florida 32301

STATEMENT OF THE ISSUE

The issue is whether Intercoastal Utilities, Inc.'s application for extension of Franchise Certificates Nos. 13 and 14 should be granted?

PRELIMINARY STATEMENT

This proceeding involves the application of Intercoastal Utilities, Inc. ("Intercoastal") for an expansion of its current certificated territory, all of which lies east of the Intercoastal Waterway, to include an additional 25,000 acres lying west of the waterway. On March 9,

EXHIBIT A

1999 Intercoastal submitted its application for extension of Certificates Nos. 13 and 14 in order to provide water and sewer service to an area of approximately 25,000 acres located west and southwest of the Intercoastal Waterway. Pursuant to St. Johns County Water and Sewer Authority Rules 1.5(2) and 11.1 (Rules), DDI, Inc. and Estuary Corporation (DDI); JEA; St. Johns County Utility Department (Utility Department), United Water Florida, Inc. and Hines Interests Limited Partnership all filed timely objections to Intercoastal's application and requests for hearing on April 6, March 30, April 8 (United and county) and April 7, 1999, respectively. Each of the Intervenors is a participant in one or more alternative proposals to serve some portion of the proposed territory included in Intercoastal's application. Intercoastal has not challenged the standing of any of the Intervenors to participate as a party to this proceeding.

On April 7, 1999, the Authority requested that the Board grant an extension until May 5, 1999, to hold the evidentiary hearing on Intercoastal's application. The Authority subsequently revised this request for an extension until June 2, 1999. This revised request was granted by the board on April 14, 1999. Along with its April 8<sup>th</sup> Objection to and Request for Hearing, United also filed a Motion to Dismiss, or in the alternative, Motion for Stay or Abatement. Intercoastal filed its Response to the Motions to Dismiss and for Abatement or Stay on April 21, 1999.

On May 13, 1999, DDI filed an Emergency Motion for Discovery; Intercoastal filed its response to the Motion on May 20, 1999; and DDI filed its Reply on May 21, 1999. The Motion for Discovery was heard before the Authority on May 24, 1999, and was denied. On May 25, 1999, Intercoastal filed its Motion for Disqualification of the Authority and the Board of County Commissioners of St. Johns County (Board). The Utility Department filed its Response to the Motion for disqualification on May 27, 1999. This matter was heard by the Authority on the first day of the hearing, June 2, 1999, and denied as to the Authority. On June 1, 1999 United withdrew its Objection, Motion to Dismiss and Motion for Stay or Abatement.

At the final hearing, Intercoastal presented the testimony of the following witnesses:

- (1) Sumner Waitz (direct and rebuttal), who was accepted as an expert in water and wastewater engineering and regulatory compliance;
- (2) Michael Burton (direct and rebuttal), who was accepted as an expert in utility rates and ratemaking;
- (3) M. L. Forrester (direct and rebuttal), who was accepted as an expert in utility operations, utility planning, utility management, and rate setting matters;
- (4) Andrew Campbell (direct and rebuttal), who was accepted as an expert in the St. Johns County Comprehensive Plan;
- (5) H.R. James (direct and rebuttal), who was accepted as an expert in utility operations;
- (6) Andrew Hogshead (direct), who was accepted as an expert in banking;
- (7) Hughie James (rebuttal); and
- (8) Marshall Deterding (rebuttal).

DDI presented the testimony of the following witnesses:

- (1) Roger M. O'Steen, who was accepted as an expert in land development, particularly as it relates to utility matters; and
- (2) Douglas C. Miller, who was accepted as an expert in water and sewer utility master planning.

The Utility Department presented the testimony of the following witnesses:

- (1) Donald E. Maurer, who was accepted as an expert in water and sewer utility system design engineering and planning and the water and sewer infrastructure elements of the St. Johns County Comprehensive Plan; and
- (2) William G. Young, who was accepted as an expert in utility operations, utility management, and utility planning for the St. Johns County Utility.

JEA presented the testimony of the following witnesses:

- (1) Scott Kelly, who was accepted as an expert in water and wastewater systems design, construction, operations and engineering.

- (2) Tim Perkins, who was accepted as an expert in water and wastewater environmental permitting and water resource regulation.

The Authority took testimony from the engineering consultant to its staff, Gerald C. Hartman. The Authority also took public testimony from the following persons who were not interveners in the case: Michael Korn, Richard Olson, Edward Cordova and Gail Warnerberg. Mr. Korn's testimony was given on behalf of the Sawgrass Association.

The Authority accepted into evidence the following exhibits:

- (1) Intercoastal Exhibit Nos. 1-16;
- (2) DDI Exhibit Nos. 1-6;
- (3) JEA Exhibit Nos. 1-7;
- (4) Utility Department Exhibit Nos. 1-11;
- (5) Staff Exhibit No. 1; and
- (6) Sawgrass Association Exhibits Nos. 1-3.

During the course of the proceeding, the Authority heard substantial amounts of both expert and non-expert testimony. It also heard substantial amounts of testimony that was based on speculation and hearsay. In making the following findings of fact, the Authority has judged the credibility and expertise of the various witnesses and has given the testimony and other evidence the weight which it deems appropriate. The following findings of fact are based on the greater weight of the credible evidence of record, and the inferences that the Authority has reasonably drawn from that evidence.

By agreement of the parties, the time for filing Proposed Preliminary Orders was extended to July 19, 1999. The same were filed by all parties, and they have been considered in the preparation of this Preliminary Order.

#### FINDINGS OF FACT

Based upon all of the evidence, the following findings of fact are determined:

##### A. The Parties

1. The Applicant, Intercoastal Utilities, Inc., is an investor-owned water and wastewater utility regulated by the St. Johns Water and Sewer Authority whose current

service territory is bounded on the west by the Intercoastal Waterway and encompasses approximately 4,500 acres. Intercoastal's operating agent is Jax Utilities Management, Inc. (JUM), a 25-year old consulting firm, whose "lead owner" is Mr. H. R. James, a shareholder in Intercoastal. Intercoastal purchased the utility facilities of the developer of the Sawgrass development in approximately 1983. Intercoastal currently provides water and wastewater service to approximately 3,400 water customers and 3,000 sewer customers in northeast St. Johns County pursuant to Water Franchise Certificate No. 13 and Wastewater Franchise Certificate No. 14 issued by the county. Intercoastal's existing customer base is primarily single-family and condo/apartment communities, with limited non-residential areas.

2. JEA is a municipal utility regulated by a governing board providing water and sewer utility services in Duval and Clay Counties to approximately 180,000 water and 135,000 sewer accounts. JEA serves these customers through an interconnected grid which unites 34 water plants and 5 wastewater plants in a regionalized-type system.

3. The St. Johns County Utility Department provides water and/or wastewater services to approximately 35,000 residents within St. Johns County which equates to approximately 18,000 ERCs for water and 12,000 ERCs for sewer. St. Johns County has four water plants and five wastewater plants currently operating within the County.

4. DDI is a private corporation controlled by the Davis family which owns and is developing Nocatee. DDI has filed an application with the Florida Public Service Commission (FPSC) to establish the Nocatee Utility Company. The Nocatee Utility Company would provide water and sewer utility services through a wholesale agreement with JEA. The Nocatee subdivision is located in two counties, Duval and St. Johns, and consists of approximately 15,000 acres with all but 2,200 acres located in St. Johns County. Nocatee will have about 14,000 residential units and several million square feet of commercial properties.

B. Requested Territory

5. During the course of this proceeding, three developments were identified in the Territory Expansion Area as potentially needing service within the near future. These developments are: (1) Marsh Harbor; (2) Walden Chase; and (3) Nocatee. Of the three, only Walden Chase and Nocatee appear to be moving forward and both of them have made concrete plans for long-term, environmentally safe service without Intercoastal's involvement.

(1) Marsh Harbor.

6. The proposed Marsh Harbor Development includes only 65 single family residences.

7. The developer of Marsh Harbor apparently contacted Intercoastal in 1996 to inquire about the possibility of obtaining service. After Intercoastal provided information to the developer regarding the cost of providing service, Marsh Harbor did not pursue an agreement. There is no evidence that there is a current need for service.

8. St. Johns County has enacted an ordinance, Ordinance Number 99-36, which designates and reserves certain portions of the Territory Expansion Area as part of the County's "exclusive service area." The ordinance designates two types of service areas: Exclusive Service Areas for the Utility Department (areas that are currently served or anticipated to be served by the County and which the County has an obligation to serve) and designated service areas (areas where the county reserves the ability to designate others to serve). Marsh Harbor is included within the County's exclusive service area. Because Marsh Harbor has been identified as an exclusive service area, the County is obligated to provide service to that development.

9. The Utility Department has had some discussions with the developer of Marsh Harbor, but at this time there is no request for service pending.

(2) Walden Chase.

10. The Walden Chase subdivision is located at the northeast portion of the intersection of U.S. 1 and CR 210. It is likely that Walden Chase will be the first development in the requested territory to need service.

11. Walden Chase is part of the Exclusive Service Area designated by the County Ordinance. The developer of this subdivision has entered into an agreement with the County for water and wastewater service.

12. The County intends to meet its obligations to Walden Chase through a wholesale agreement with JEA (the "County/JEA Agreement") pursuant to which JEA will provide both water and wastewater service to certain portions of northern St. Johns County specifically including Walden Chase.

13. Walden Chase includes 585 proposed single family units. Walden Chase includes commercial customers as well. Thus, there will be a need to meet commercial fire flow requirements in order to serve Walden Chase. The County/JEA Agreement will enable the Utility Department to meet these requirements.

14. The developer of Walden Chase has indicated that it may need service as early as October 1999.

(3) Nocatee.

15. DDI is the owner of approximately 25,000 acres of land in St. Johns County and approximately 25,000 acres of land in Duval County. Approximately 90% of the requested territory consists of land owned by DDI or its affiliates.

16. Intercoastal's Application for expansion of its water and wastewater franchise includes substantially all of the 25,000 acres owned by DDI in St. Johns County. DDI has never requested service from Intercoastal for any portion of its property. Indeed, DDI's representative specifically requested Intercoastal to not proceed with the Application.

17. DDI is planning a multi-use development of 15,000 acres consisting of 12,800 acres in St. Johns County and 2,200 acres in Duval County. This development, known as "Nocatee," is planned to be built in five phases with each phase taking an estimated 5 years with total anticipated build-out time of 25 years.

18. DDI has no plans to develop the 12,000 plus acres of property it owns in St. Johns County which is not part of Nocatee. Thus, there is currently no need for service in this vast portion of the requested territory.

19. Due to its size, Nocatee will be reviewed and permitted as a Development of Regional Impact ("DRI"). As a DRI, Nocatee will be required to comply with the applicable provisions of the local comprehensive plans.

20. Nocatee spans the St. Johns/Duval County Line. Approximately 12,800 acres in St. Johns County.

21. Nocatee will be developed in five phases, with each phase lasting about five years, for a total development horizon of about 25 years. Based on current permitting plans, development within Phase I will require water, wastewater and reuse service in 2002.

22. The entire approximately 2,200 acre Duval County portion of Nocatee is included in Phase I of the development.

#### C. Intercoastal's Plan of Service

23. Beginning with its application and throughout the course of the hearing, Intercoastal proposed a plan for service to the entire requested service area, not for a portion thereof.

24. Intercoastal's existing service area is entirely on the east side of the Intercoastal Waterway. The proposed territory to be served is entirely west of the waterway. Intercoastal has two water treatment facilities with an average daily flow

capacity of 2.67 mgd and one wastewater treatment facility with a capacity of 0.80 mgd. The flows at Intercoastal's wastewater treatment plant exceed its current capacity.

25. In preparing its plan of service for the Territory Expansion Area, Intercoastal was not responding to any requests for service and did not obtain any information regarding the needs of the owners of the specific properties or developments in the area.

26. At the hearing, there was confusion as to exactly how Intercoastal intended to serve the new territory. Indeed, as discussed below, Intercoastal's plan has changed several times.

27. On April 22, 1999, Intercoastal submitted prefiled testimony before the FPSC in opposition to the territory expansion request of United Water Florida, Inc. for portions of the proposed new territory. In that testimony, Intercoastal indicated that its initial service to the disputed area would be provided through a wholesale/partnership with JEA. Intercoastal's plan to enter into a wholesale arrangement with JEA was abandoned after JEA signed agreements with the county and with DDI. At this time, Intercoastal is not pursuing any further negotiations with JEA.

28. As part of its application to the Authority, Intercoastal proposed to construct water and wastewater transmission and distribution lines across the Intercoastal Waterway to the eastern edge of the Walden Chase development at a cost of \$1.4 million dollars. This plan was a 10 inch, two-pipe plan and did not include a reuse line. The cost of both the 10-inch water and sewer mains was estimated at \$1.4 million dollars.

29. Intercoastal's Application references its intent to "employ a separate non-potable water transmission and distribution system to supply the irrigation and fire protection needs of future customers in the requested territory." In the Summary Report submitted by Intercoastal's consulting engineer, Mr. Waitz, in support of the Application, the plan of service is described as including a three pipe delivery system. Under a subheading entitled "Type and Location of Facilities," the consultant stated:

A new unique feature of Intercoastal Utilities' Water and Wastewater Plants is the construction of a master stormwater management system to augment reuse particularly during the initial stages when adequate reuse water may not be available from a wastewater treatment plant and also to provide for a source of fire fighting water that will be incorporated into the proposed three (3) pipe delivery system. [emphasis added]

30. At the hearing, however, Intercoastal's expert indicated the "interim" service to the proposed new territory would be provided through a two pipe system that would be run from the terminus of Intercoastal's current 10 inch water and force mains on the east side of the Intercoastal Waterway. Mr. Waitz specifically denied that any reuse lines would be brought across the Intercoastal Waterway and stated that it would be four to five years before any reuse would be available in proposed new territory.

31. For the first few days of the hearing, Intercoastal's position appeared to be that reclaimed water for the proposed new territory would only come from the new areas west of the Intercoastal Waterway. Intercoastal did not anticipate any water, wastewater or reuse demand from Nocatee in the near future, and its engineer speculated that initial demands from Nocatee would begin in three to four years.

32. Beginning June 11, Intercoastal claimed that it would be able to address the immediate reuse needs of Nocatee by bringing reuse across the Intercoastal Waterway from its existing facilities. No cost estimate or time frame was provided as to what would be required to run a reuse line from the existing facilities to the connection point.

33. Intercoastal revised its plan of service again regarding the "interim" lines. Since Walden Chase will have commercial customers and, consequently, service to this area must meet commercial fire flow requirements, Intercoastal proposed oversizing to its water pipeline.

#### D JEA/St. Johns County Plan of Service.

34. In contrast to Intercoastal, JEA and the County propose water and sewer

service to the area via a "bulk" wholesale agreement, with JEA selling service in bulk to the County, and the County acting as retail provider.

35. JEA currently has 34 water plants and five major regional wastewater plants. JEA has an extremely reliable system that provides redundancy through two interconnected water grids and a loop system. The capacity of several of JEA's existing water and wastewater treatment plants exceed current usage.

36. JEA's south grid currently consists of 14 interconnected water treatment plants with 54 water supply wells. The firm capacity of JEA's south grid was recently increased by 10.8 mgd in May to bring the total capacity to over 103 mgd. These capacity figures are conservatively stated. Just taking into account the south grid, JEA has sufficient capacity to provide service under the agreements with St. Johns County and DDI.

37. JEA's north grid consists of 9 interconnected water plants with 46 wells. There is currently excess water available in JEA's north grid that can potentially be used to meet water demands in the south grid. Plans are already underway to link the two water grids. When the linkage is completed, JEA will be able to further balance its withdrawals to protect against environmental damage.

38. The County/JEA Agreement sets forth the conditions for JEA to provide wholesale water and sewer services to St. Johns County and also provides for the construction of facilities to interconnect with JEA's system in Duval County in order to permit the County to provide retail service in northern St. Johns County. In this Agreement with the County, JEA has committed to utilize its economies of scale and install large lines that will be capable of handling future developments in the area thereby minimizing the prospects of having to later go back and upgrade the facilities.

39. JEA is already in the process of expanding its existing system in southern Duval County to provide regional service. This expansion is going forward irrespective of the results of Intercoastal's territory expansion request. JEA is installing a system that will provide a backbone for regional service. It will enable the establishment of a

comprehensive, economically sized system to serve throughout the surrounding area including northern St. Johns County.

40. JEA is bringing a 24 inch water line from the existing terminus of its facilities at Bayard south to Racetrack Road. From the county line, the current plan calls for a 20 inch water line extension south along U.S. 1. From Nease High School, JEA will run a 16 inch water main and a 12 inch force main north to Walden Chase. The routes selected were chosen to accommodate the regional needs of the area and to provide the most efficient service to the customers in need of immediate service.

41. From the terminus of JEA's new lines in Duval County, it is only approximately two miles to the corner of Walden Chase. To ensure reliability and provide redundancy, JEA will provide a 500,000 water reservoir located near Nease High School and will install high service pumps, a standby generator and a rechlorination facility. JEA will also provide a master wastewater pumping facility which will facilitate regional service.

42. JEA will bear the cost of the water extensions in Duval County. The County will reimburse JEA through customer connection fees for the pro rata costs of up-sizing the sewer lines in Duval County and the cost of the water and sewer lines in St. Johns County.

43. JEA is in the process of implementing a major reuse plan. JEA's reuse master plan includes a 24 inch reuse main that is extended east from Mandarin. This line is already in the planning stages and will be implemented shortly. The services provided in St. Johns County will be hooked up to this network.

E. DDI Plan of Service.

44. DDI has taken several steps toward the provision of water, wastewater and reuse service for the Nocatee development. These steps, which include the following, demonstrate DDI's desire to provide utility service to its development:

- (1) DDI has formed a wholly-owned subsidiary called Nocatee Utility Corporation.
- (2) Nocatee Utility Corporation has applied to the Florida Public Service Commission for a multi-county water and wastewater certificate to serve the entire Nocatee development, including both the Duval County and St. Johns County portions of the development.
- (3) DDI has entered into a Letter of Intent with JEA under which JEA will provide bulk water, wastewater and reuse service to Nocatee Utility Corporation. JEA has facilities planned or in place that are sufficient to meet the needs of the Nocatee development in a timely fashion. The viability of bulk service by JEA is further evidenced by the fact that a bulk agreement with JEA was Intercoastal's first choice for the means of providing service to the proposed expansion territory.
- (4) DDI intends to provide reuse throughout its development, either via JEA/St. Johns County or through its own reuse facilities.
- (5) DDI has entered into an agreement with Nocatee Utility Corporation under which DDI will provide the financial resources required for Nocatee Utility Corporation to provide retail service to the Nocatee development.
- (6) DDI has caused its consultants to prepare a comprehensive, peer-reviewed Groundwater Resources Development Plan. That plan analyzes the water requirements and water resources on DDI's property, and demonstrates that such needs can be met by DDI or its affiliates with no adverse impact on the aquifer or other water users. Under the DDI/JEA

Letter of Intent, DDI will make well sites available to JEA to the extent necessary to provide service to Nocatee.

- (7) DDI has developed a planning approach known as Nocatee Environmental and Water Resource Area Plan ("NEWRAP"). NEWRAP represents an integrated approach to all water use and environmental issues. According to DDI, it would be difficult or impossible for DDI to implement NEWRAP if retail water, wastewater and reuse service were provided to the development by an unrelated third party such as Intercoastal.

F. Applicant's Ability to Serve.

45. There is significant doubt as to whether the Applicant has the ability to provide service to the requested area.

46. As discussed in more detail below, there are significant unanswered questions as to whether Intercoastal has sufficient operating capacity to serve the requested territory. Intercoastal has a contractual obligation to provide a specified level of reuse to Sawgrass. Taking into account this commitment and the limited size of Intercoastal's wastewater facility, even including the full amount of the current expansion, it does not appear that there will be sufficient capacity to enable Intercoastal to meet the reuse needs of Nocatee

47. As previously noted, the Applicant's plan of service changed throughout this proceeding. Under all those plans, however, Intercoastal's current wastewater treatment plant capacity is inadequate to provide service for any part of the requested territory until after completion of a proposed expansion.

48. Intercoastal will not be able to provide water and sewer service to Walden Chase by October 1, 1999. In fact, Intercoastal may not be able to meet the needs of Walden Chase for approximately two years.

49. Delays in the provision of service to the developer of Walden Chase could result in significant additional development costs and might jeopardize the project.

50. Intercoastal has had no discussions with the developer of Walden Chase and has not been requested to serve that area. As discussed below, Intercoastal's plan of service would necessarily result in huge costs to the developer of Walden Chase. It is unclear whether the developer will be willing to pay the massive costs that Intercoastal seeks to impose. Costs placed on a developer by a utility can affect the feasibility of a development. While the developer of Walden Chase has apparently indicated an intent to proceed based upon his agreement with the County, it cannot be presumed that the development will go forward under Intercoastal's plan of service. Indeed, Mr. James admitted that a similar delay in development has occurred with respect to Marsh Harbor after the land owner was informed of Intercoastal's projected costs.

51. Furthermore, Intercoastal's initial plan of service failed to address the commercial fire flow needs of Walden Chase as part of its interim plan.

52. Intercoastal's consultant has never been involved in a stormwater reuse project. Mixing stormwater with reclaimed water causes a number of environmental concerns. If the stormwater is to be mixed with reclaimed water and utilized in a residential system, a treatment system should be implemented to treat the stormwater to the level of the reclaimed water. The Florida Department of Environmental Protection is in the process of finalizing rules that will require such treatment. It is also important to note that the proper implementation of a system that mixes stormwater with reclaimed water can require extensive pumping distribution facilities. Intercoastal has totally ignored these costs.

53. Intercoastal's plan for service to Nocatee was predicated upon projected water demand that is approximately 1.7 million gallons per day short of what the developer is projecting. The total long-term demand anticipated from Nocatee is 5 to 6 mgd. Intercoastal has still not provided a coherent explanation as to how it will meet this demand. The cost of adding just .5 mgd of additional water and wastewater capacity could be as much as \$2.75 million.

54. Intercoastal's contention that its plan of service is somehow superior to other alternatives because of Intercoastal's special commitment to reuse is simply erroneous. Intercoastal's witnesses are under a mistaken impression that reuse can be imposed upon a developer. Intercoastal has completely overlooked the existing legal precedent governing reuse. Contrary to Intercoastal's's contention, Walden Chase cannot be forced to implement a residential reuse system. There is no current ordinance in place in St. Johns County that would require the Developer of Walden Chase or any other subdivision to implement a residential reuse system.

55. While we believe that Intercoastal possesses the managerial, operational and technical ability to provide service to the requested territory, and can probably initially finance a project, we have questions concerning its financial operations. However, Intercoastal admitted that they are getting a fair rate of return on their investment.

G. Existence of Service from Others.

56. As previously discussed, service does exist from other providers to the requested territory. JEA currently has excess water and sewer capacity in geographic proximity to the requested territory. Furthermore, the Utility Department and DDI have entered into written, binding agreements to obtain "bulk" service from JEA. The Utility Department has likewise executed an agreement with the developer of Walden Chase.

H. Comprehensive Plan.

57. We find that Intercoastal's plan of service is not inconsistent with the St. John's County Comprehensive Plan, but neither are the plans of service of JEA, the Utilities Department, and DDI. Consistency with the St. Johns County Comprehensive Plan is but one factor that the Authority may consider in this proceeding, and does not automatically bind the Authority to approve the application.

I. Landowner/Customer Preference.

58. Two of the landowners in this proceeding have expressed a preference for receiving service from a provider other than Intercoastal.

59. First, the owner of the Walden Chase development has expressed an interest in receiving retail service from the Utility Department. This preference has been manifested in writing via letter and contract.

60. DDI, the owner of Nocatee, has expressed a preference for service from JEA via contract. DDI has not requested service from Intercoastal.

61. DDI does not desire utility service from Intercoastal. DDI's reasons for not desiring such utility service include the following:

- (1) Intercoastal could not provide service to the Duval County portion of Nocatee under its proposed certificate expansion. This would result in the untenable situation where service to Phase I of the development would be provided by two different utilities.
- (2) Intercoastal does not have the ability to provide sufficient reuse service to Phase I of Nocatee at the outset of development.
- (3) DDI desires to retain control over the provision of water, wastewater and utility service to Nocatee to ensure that such service is available as and when required to meet the needs of the development. DDI does not want water, wastewater and reuse service to Nocatee to be subject to potential changes in the financial situation and business plans of a third party.
- (4) The provision of retail service to Nocatee by any third party utility would adversely impact DDI's ability to implement its water resource plans and to develop its property in the most environmentally sensitive manner. Intercoastal's conceptual plan for providing reuse service west of the Intercoastal Waterway would require DDI to plan and operate its stormwater system in coordination with Intercoastal. This involvement by a third party utility – whose utility-related goals would conflict with some of the developers' environmental goals – would interfere with the implementation of DDI's integrated water resource plan.

- (5) DDI believes that Intercoastal does not have the necessary facilities in place today to provide service to Nocatee and does not have anything more than conceptual plans as to how such service will be provided.
- (6) Intercoastal has underestimated the utility needs of Nocatee. Intercoastal's projections for utility needs on the west side of the Intercoastal Waterway are based on simplistic growth rate projections. At the time Intercoastal's certificate expansion application was filed, the Nocatee project had not been announced and Intercoastal had no knowledge of the location or scope of that development. Intercoastal has made no subsequent attempt to take the actual development plans for Nocatee into account in any of its engineering or financial analysis.
- (7) Intercoastal has not shown that it would be the lowest cost, most efficient provider of service, nor has it provided anything more than speculation as to what the impact of the certificate expansion would be on the rates to its current customers.
- (8) If service were provided by Intercoastal, DDI would be required to contribute substantial assets to Intercoastal which would create value for Intercoastal's stockholders when Intercoastal's system is eventually sold. If service is provided by DDI or its affiliate, the value of those assets would be retained directly or indirectly by DDI.

62. Finally, Intercoastal's existing customers have vocally opposed the application for the proposed territory. The Sawgrass Association which represents approximately 1,600 residential customers currently served by Intercoastal, has expressed concern over Intercoastal's apparent plan to provide service, at least temporarily, to the new territory via Intercoastal's existing facilities.

### **CONCLUSIONS OF LAW**

1. Pursuant to Sections 17<sup>3</sup>/<sub>4</sub>-203(a)(1) and 17<sup>3</sup>/<sub>4</sub>-206 of the St. Johns County Utility Ordinance ("Ordinance"), the Authority has jurisdiction to issue a Preliminary Order regarding Intercoastal's certificate extension application.

2. Pursuant to Section 17<sup>3</sup>/<sub>4</sub>-202(n) of the Ordinance, any person having an identifiable interest in the proceeding can participate as a party in a proceeding before the Authority. Each of the Intervenors has an identifiable interest in the proceeding as a proposed alternative provider of service to a portion of the proposed expansion territory. In addition, DDI has an identifiable interest in the proceeding as the owner of the vast majority of the land covered by the expansion application. Each of the Intervenors therefore has standing to participate as a party in this proceeding.

3. As the applicant in this proceeding, Intercoastal bears the burden of demonstrating its entitlement to the territory extension it seeks. See, Department of Transportation v. JWC Corporation, Inc., 396 So.2d 778 (Fla. 1<sup>st</sup> DCA 1981).

4. Section 17-3/4-206 of the St. Johns County Utility ordinance provides that the proposed extension of service by a utility cannot be commenced until the utility obtains an amended franchise certificate for the proposed extension. Section 17-3/4-204(B) of the Ordinance provides the Authority with the power to issue a Preliminary Order on the territory extension request. These criteria expressly apply to certificate extension applications governed by 17 3/4 - 206, such as the one before the Authority in this case. See Section 17 3/4 - 204 (C)(h). The Authority will exercise its discretion to apply the original certificate criteria to this certificate extension case; however, it will also consider other factors that the Authority has determined bear on the public interest.

5. Subsection (e) of Section 17<sup>3</sup>/<sub>4</sub>-204.C of the Ordinance contemplates an inquiry into the need for service in the territory involved in the application. Intercoastal has failed to demonstrate a need for service to the portion of the proposed expansion area owned by DDI which is outside the boundaries of the planned Nocatee development. The Authority concludes that it is not in the public interest to grant a certificate expansion for a large area which has no foreseeable need for utility service. Intercoastal's certificate expansion application for this portion of the requested territory should therefore be denied. For purposes of further analysis, we assume, but do not decide, that Intercoastal has adequately demonstrated a need for service to the balance of the requested territory.

6. Subsection (e) of Section 17<sup>3</sup>/<sub>4</sub>-204.C of the Ordinance permits an inquiry into the ability of the applicant to provide service to the territory applied for. Intercoastal has failed to demonstrate that it can commence service to the Walden Chase development in a time frame that meets the needs of the developer. Intercoastal has also failed to demonstrate that it can commence reuse service to Nocatee in a time frame and quantity that meets the needs of the developer. Due to the multi-county nature of Phase I of Nocatee, Intercoastal cannot provide service under its application to the entire area that has one of the most immediate needs for service.

7. In the exercise of its discretion, the Authority concludes that Intercoastal's informational submissions to the St. Johns River Water Management District (SJRWMD) as part of the 2020 Water Planning process do not confer any particular rights on Intercoastal in this certificate extension proceeding. The 2020 Water Plan currently exists only in draft form and final action on the plan is not anticipated before

late 1999. Further, correspondence from the SJRWMD makes it clear that Intercoastal's information submission does not grant Intercoastal any preferred status with respect to future required permitting activities. In fact, the issuance of a certificate to serve the territory is a prerequisite to the SJRWMD's review of any consumptive use permit application.

8. We have found no controlling authority on the weight that this Authority should give to landowner preference in cases involving certification of water and wastewater utilities.

- (1) In an early case involving the Commission's approval of a territorial service agreement between two electric utilities, the Florida Supreme Court stated that "[a]n individual has no organic, economic or political right to service by a particular utility merely because he deems it advantageous to himself." Storey v. Mayo, 217 So.2d 304 (Fla. 1968). In that case, the two utilities had *agreed* on a territorial boundary, and the Commission had approved that agreement as being in the public interest.
- (2) In a more recent case involving a *dispute* between two electric utilities, the Court held that it was reversible error for the Commission to disregard customer preference in a situation where each utility was capable of serving the territory in dispute. Gulf Coast Electric Co-op, Inc. v. Clark, 674 So.2d 120 (Fla. 1996). the Supreme court has likewise recognized this preference as a factor in FPSC certificate cases. See Davie Utilities, Inc. v. Yarborough, 263 So.2d 215 (Fla. 1972).
- (3) In a case involving a contested water and sewer certificate application, the District Court of Appeal upheld a Florida Public Service Commission order which gave weight to the importance of having an overall plan for orderly development of a large scale land development project and the unique

ability of a developer-related utility to perform such planning. St. Johns North Utility Corp. v. Florida Public Service Commission, 549 So.2d 1066 (Fla. 1st DCA 1989).

9. Based on these precedents, the Authority concludes that in a *disputed* certificate extension case, it is entitled to consider both landowner preference and the unique ability of a developer-related utility to integrate utility planning with overall planning for the development in making its public interest determination. We have further concluded that, in the particular circumstances of this case, we should give great weight to these factors. These circumstances include the following:

- (1) The vast majority of the portion of the proposed expansion area planned for development (i.e. Nocatee) is owned by a single party (i.e. DDI). The first phase of Nocatee crosses a county line and could not be served in an integrated fashion by Intercoastal under the certificate extension applied for in this case.
- (2) As part of its overall development plans for Nocatee, DDI is proposing to provide retail water, wastewater and reuse service to Nocatee through an affiliated, multi-county utility company that plans to obtain bulk utility service from JEA. DDI has taken substantial steps with regard to water resource planning generally and with respect to utility planning in particular, including the conduct of a detailed Groundwater Resource Development Plan of a type that Intercoastal has testified it will not undertake unless and until it is granted a certificate extension. DDI appears to have the capability of carrying out its development plan. While this Authority does not have the jurisdiction to grant or deny an application for multi-county service such as that filed by Nocatee Utility Corporation with the Florida Public Service Commission, we do have the discretion to consider the pendency of such an application in making our determination on the single-county application before us.

- (3) The remainder of the proposed expansion area is owned by a small number of parties, including the developers of the proposed Walden Chase and Marsh Harbor developments.
- (4) The record shows that neither the developer of Nocatee nor the developer of Walden Chase desire service from Intercoastal. The record shows that Marsh Harbor requested an estimate of the cost of providing service from Intercoastal in 1996, but did not pursue the matter further following receipt of that estimate. In any event, we conclude that service to Marsh Harbor would be feasible only if we also granted a certificate to serve substantial additional territory on the West side of the Intercoastal Waterway.

10. Intercoastal contends that unless its certificate expansion application is approved, it will not have the opportunity to continue to expand and to take advantages of the economies of scale typically associated with a larger utility system. We give little weight to this factor in making our public interest determination, given the absence of any credible projections of the cost of providing service to the expansion territory or the impact that such service would have on the rates paid by existing customers of Intercoastal. We also note that none of the public witnesses representing customers of Intercoastal favored the proposed certificate expansion. We do not believe Intercoastal's financial position will be imperilled by a denial of the requested territory.

11. Intercoastal contends that unless its certificate expansion application is granted, the rates for service to the proposed territory will not be subject to control by this Authority and by the Board of County Commissioners. While this may be true, it is not a factor that we believe warrants consideration in our public interest determination. The Legislature has granted the Board of County Commissioners rate making authority over private utilities, such as Intercoastal, who provide service wholly within St. Johns County. The Legislature has granted the Florida Public Service Commission such authority over private multi-county systems, such as that proposed by DDI and Nocatee Utility Corporation. It is not our role to second-guess the wisdom of this regulatory

scheme, but only to determine whether granting Intercoastal a certificate expansion is in the public interest.

12. After the date this application was filed, but prior to this hearing, the St. Johns County Board of County Commissioners adopted Ordinance No. 99-36, the St. Johns County Water and Wastewater Service Area Ordinance. This Ordinance claims the Walden Chase and Marsh Harbor territory as the "Exclusive Service Area" of the County. We note in passing that Section 12 of that Ordinance provides that nothing in the Ordinance affects the powers of the Authority to process and conduct certification proceedings for new utilities or for extensions of territories outside the County's Exclusive Service Area. Regardless of the Ordinance's intent, which is ultimately a question for the Board of County Commissioners or the courts, we find that we can reach a decision without application of the Ordinance.

13. Based on all the factors discussed above, we determine that it is not in the public interest to grant any portion of Intercoastal's requested certificate extension.

Based on the foregoing, it is ORDERED as follows:

1. Intercoastal's application to amend Franchise Certificates Nos. 13 and 14 is and should be DENIED in its entirety.
2. This Order shall not take effect unless and until it is confirmed by the Board of Commissioners.

ORDERED at St. Johns County, Florida, this 4<sup>th</sup> day of August, 1999

ST. JOHNS COUNTY WATER AND SEWER  
AUTHORITY

BY:   
Its Chairman

I HEREBY CERTIFY that conformed copies here of have been furnished by mail to the following on the 6<sup>th</sup> day of August, 1999.

NOTICE OF TAKING DEPOSITION DUCES TECUM

PLEASE TAKE NOTICE that Petitioner, Intercoastal Utilities, will take the depositions of the following witnesses at the location and times described below:

August 25, 1999

9:00 a.m. Roger M. Osteen  
 1:00 p.m. Douglas C. Miller \*  
 Location: Accurate Court Reporters  
 501 West Bay Street  
 Suite 150  
 Jacksonville, Florida 32202

\*Or upon completion of the prior deposition.

Please produce at the time and place of these depositions, the documents set forth as Attachment "A" hereto.

These depositions will be taken by oral examination before an official court reporter duly authorized by law to take depositions and is being taken for the purpose

EXHIBIT B

of discovery, for use at trial, or both, or for such other purposes as are permitted under the applicable and governing rules.

Respectfully submitted this 12<sup>th</sup> day of August, 1999.

## ATTACHMENT "A"

For the purpose of this Attachment, the words "you" or "your" refer to Nocatee Utility Corporation, its affiliated parties, its employees, agents, engineers, accountants, or attorneys. These documents are requested to be produced, whether in the possession or control of the individuals being deposed or whether in the possession or control of Nocatee Utility Corporation or any party which owns, controls, or is affiliated with Nocatee Utility Corporation.

1. Any and all correspondence, analyses, memorandums, or similar or analogous documents either transmitted to JEA or received from JEA regarding the possible or potential service by JEA (whether as a bulk, wholesale, or retail provider) to any of that area for which you have filed an application at the Public Service Commission. Your response should include, but should not be limited to, documents to or from JEA whether JEA intends to provide bulk service to a separate utility which will provide service to any of these areas or whether JEA will provide such service directly itself.
2. Any and all reports, analyses, memorandums, or similar or analogous documents referencing, discussing, analyzing, setting forth, establishing, or projecting the need or demand for reuse water in any of that area for which you have filed an application at the Public Service Commission. Your response should include, but not be limited to, documents discussing the timing or time frames regarding the demand for such reuse water.
3. Any and all documents describing, analyzing, setting forth, establishing, projecting; or discussing the demand for water and/or wastewater service in those areas for which you have filed an application at the Public Service Commission. Your response should include, but not be limited to, documents discussing the number of units projected to be built or potentially to be built; the timing of any units projected to be built or potentially to be built; the type (commercial, residential, etc.) of units projected to be built or potentially to be built; and the location or layout of any such units projected to be built or potentially to be built;
4. Please provide any documents which set forth, project, analyze, reference, discuss, or establish the location of any facilities for the provision of water service, wastewater service, or reuse service, by any utility within any portion of those areas for which you have filed

an application at the Public Service Commission.

5. Please provide any documents which support, reference, discuss, or analyze any of the information, statements, or contentions contained in either your application to the Florida Public Service Commission or your Petition for Temporary Variance filed before the Public Service Commission.
6. Please provide any documents you reference, consulted or relied upon in filing either your application at the Public Service commission or your Petition for Temporary Variance before the Public Service commission;
7. Please provide any documents which set forth, reveal, analyze, reference or contain timetables for the construction of units or facilities which will require water, wastewater, or reuse service or which set forth the anticipated time frames for the construction of any such units in the area which is the subject of your application with the Public Service Commission;
8. Please provide any correspondence, writings, memorandums, or similar or analogous documents exchanged between yourself and St. Johns County discussing, referencing, analyzing, or concerning the provision of water service, wastewater service, or reuse service for the area which is the subject of your application before the Public Service Commission;
9. Please provide any documents analyzing, concerning, referencing, or discussing available or potentially available alternatives for the provision of water service, wastewater service, or reuse service (by any water or wastewater utility) to those areas which are the subject of your application before the Florida Public Service Commission.
10. Please provide any and all documents, writings, memorandums, applications, or similar analogous documents provided to, or received from, any governmental entity or agency regarding the permitting, licensure, approval, or certification of either the Nocatee development itself or the Nocatee Utility Corporation. Your response should include, but not be limited to, any documents filed to obtain approvals necessary from governmental entities having jurisdiction over the development of property referred to as Nocatee (such as documents related to the proposed Development of Regional Impact).
