SECTION 3. RATE SCHEDULE

3.2 Calculation of Usage Rates (cont'd)

3.2.1 Calculation of Distance

Usage charges are based the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involve, as specified in AT&T Tariff F.C.C. No. 10.

Step 1- Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates and the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the square of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 and by ten (10). Round to the next higher whole number if an fraction results from the division.

Step 6 - Obtain square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the cell.

5.1.8 TERA FON SERVICE (Cont'd)

TeraFon encompasses several pricing options with varying Minimum Monthly Revenue Commitments (MMRC) that reflect common spending patterns of the business customer. International, interstate, intrastate and calling card calls contribute to the calculation of gross monthly usage associated with the corresponding MMRC. Directory assistance and operator service charges do not apply to the calculation of gross monthly usage.

The MMRC is applied to a single access type (switched or dedicated). The MMRC may be applicable to a single service type (outbound, inbound or travel) or to a combination of the three service types (outbound, inbound and travel). An account with inbound, outbound and travel service, utilizing the same access type, will only have one MMRC.

Each TeraFon account will benefit from a 90-day ramp-up period in which to accrue sufficient usage to meet the corresponding MMRCs. Once the ramp-up period has expired, customers billing less than the product MMRC will automatically be assessed a fee equivalent to the difference between actual gross usage and the pre-determined MMRC amount.

Several TeraFon service options contain term plan agreements. Customers terminating service prior to the expiration date of their term plan agreement will be assessed the MMRC for the months remaining in the term plan agreement. The termination liability will be billed in one lump sum and payment is required within thirty (30) days of cancellation.
