**PRICE LIST FORMAT SHEETS**

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheet occasionally added to decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3<sup>rd</sup> revised sheet 14. Because of various suspension periods, deferral, etc, the on file with the commission is not always the price list page in effect. Consult
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1. (a).
- 2.1.1.A.1. (a). I.
- 2.1.1.A.1. (a). I. (i).
- 2.1.1.A.1. (a). I. (I). (1).

D - Check Sheets - When a price list filing is made with the FPSC, an updated check sheet accompanies the price list filing. The check sheet lists the sheets contained in the price list, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The price list user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.
