> Re: Review of the appropriate application of incentives to wholesale power sales by

investor-owned electric utilities; FPSC Docket No. 991779-EI

Dear Ms. Bayo:

In its fuel adjustment order dated December 22, 1999 in Docket No. 990001-EI the Commission deferred for consideration in this proceeding certain issues concerning the appropriateness of incentives to encourage investor-owned electric utilities to maximize their non-separated economy wholesale sales. The CASR in this docket calls for the filing of a preliminary list of issues today. Tampa Electric submits that the two issues stated below adequately encompass the matters identified for further consideration in the Commission's December 22, 1999 fuel adjustment order:

Tampa Electric's Issue 1:

Should the Commission change its current policy of allowing a sharing of gains on economy energy sales to allow an incentive for sharing of gains on other types of non-separated

wholesale sales?

Tampa Electric's Issue 2:

If the Commission approves a shareholder incentive for gains on other than economy non-separated wholesale sales, what would be the appropriate percentage and how should it be applied?

Please acknowledge receipt and filing of the above by stamping the duplicate copy of this letter and returning same to this writer.
