Re: Docket No. 000907-TP

Dear Ms. Bayo:

Enclosed herewith for filing in the above-referenced docket on behalf of Level 3 Communications, LLC ("Level 3") are the following documents:

1. Original and fifteen copies of the Prefiled Rebuttal Testimony of Gregory L. Rogers; *14157-00*
2. Original and fifteen copies of the Prefiled Rebuttal Testimony of Anthony Sachetti; *14158-00*
3. Original and fifteen copies of the Prefiled Rebuttal Testimony and Exhibits TJG-8 through TJG-9 of Timothy J. Gates; *14159-00*
4. Original and fifteen copies of the Prehearing Statement and in disk in Word Perfect 6.0 containing a copy of the Prehearing Statement; and *14160-00*
5. Original and one copy of the Notice of Service of Attachment 1 to Level 3's First Set of Interrogatories to BellSouth Telecommunications, Inc. *14161-00*

Please acknowledge receipt of these documents by stamping the extra copy of this letter "filed" and returning the copy to me. Copies of the above-referenced testimony have been provided to Staff counsel and counsel for BellSouth Telecommunications, Inc. in accordance with the attached Certificate of Service.

DOCUMENT NUMBER-DATE  
14157 NOV-18  
FPSC-RECORDS/REPORTING

1           **Q:   PLEASE STATE YOUR NAME, TITLE AND ADDRESS FOR THE**  
2           **RECORD.**

3           A:   My name is Gregory L. Rogers. I am an Attorney for Level 3  
4           Communications, LLC (“Level 3”). My address is 1025 Eldorado  
5           Boulevard, Broomfield, Colorado, 80021.

6           **Q:   PLEASE DESCRIBE YOUR RESPONSIBILITIES AT LEVEL 3**  
7           **AND YOUR PROFESSIONAL BACKGROUND.**

8           A:   I am an attorney licensed in the State of Colorado since May, 1994. I have  
9           been employed by Level 3 since June, 1998. I have worked in a number  
10          of capacities at Level 3 including as Network Cost Analyst and Tariff  
11          Specialist. In these capacities I became familiar with Level 3's network,  
12          its product and service offerings, and the various regulatory requirements  
13          of state Public Utility Commissions (“PUCs”) as they affect Level 3. In  
14          September, 1999, I joined the Legal Department at Level 3 where I work  
15          primarily on regulatory matters before federal and state regulatory  
16          agencies. Included in my current duties is serving as liaison to state and  
17          federal regulatory agencies. I analyze orders and regulations of state  
18          PUCs, help to explain Level 3's operations to local governmental bodies  
19          and PUCs, and testify in proceedings before those agencies when  
20          appropriate.

1           **Q:    DID YOU SUBMIT TESTIMONY IN THIS DOCKET ON**  
2                   **OCTOBER 5, 2000?**

3           A:    No, I did not.  However, for purposes of the hearing in this matter, I am  
4                   adopting the Direct Prefiled Testimony of William P. Hunt, III.

5           **Q:    WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?**

6           A:    The purpose of my testimony is to respond to the legal and competitive  
7                   policy arguments Ms. Cox makes in support of BellSouth’s position on  
8                   Interconnection Points (Issue 1).  Although Ms. Cox calls it a Point of  
9                   Interconnection (“POI”) in her testimony, I will continue to use the phrase  
10                  Interconnection Points (“IPs”) because the parties agreed to use IPs in  
11                  defining Issue 1.

12          **Q:    MR. HUNT PREVIOUSLY TESTIFIED CONCERNING ISSUE 8,**  
13                   **HOW THE AGREEMENT SHOULD DEFINE SWITCHED**  
14                   **ACCESS TRAFFIC.  WILL YOU ADDRESS THAT ISSUE ALSO?**

15          A:    No.  Level 3 and BellSouth have reached a compromise on Issue 8 and no  
16                  longer require the Commission’s assistance.

17          **Q:    BELLSOUTH WITNESS COX STATES THAT “ALL OF THE**  
18                   **DISCUSSION CONCERNING WHO GETS TO ESTABLISH**  
19                   **POINTS OF INTERCONNECTION, HOW MANY POINTS THERE**  
20                   **WILL BE, WHAT COMPENSATION APPLIES TO THE**  
21                   **FACILITIES, ETC. IS SIMPLY A MEANS TO AN END.  AND**  
22                   **THAT END IS WHETHER CUSTOMERS THAT LEVEL 3 DOES**

1                   **NOT SERVE SHOULD BEAR THE ADDITIONAL COSTS THAT**  
2                   **RESULT FROM LEVEL 3'S NETWORK DESIGN..." (COX AT**  
3                   **3:13-17). DO YOU AGREE WITH MS. COX?**

4           A:    No, I do not. Although Ms. Cox later admits that the processes required to  
5                   implement network interconnection are complicated, she ignores not only  
6                   the factual complexity of interconnecting competing networks, but also the  
7                   policy decisions made by both the U.S. Congress and the FCC. Both  
8                   Congress and the FCC recognized that ILECs would have to make  
9                   modifications to their networks to open the local exchange market to  
10                  competition. Both Congress and the FCC also anticipated the introduction  
11                  of new technologies and network architectures and crafted rules so as not  
12                  to penalize competitive carriers that seek to provide innovative networks  
13                  and/or technologies. Imposing the cost of interconnecting different  
14                  network designs solely on ALECs defeats the policy of encouraging  
15                  network innovation and ignores the fact that BellSouth's own customers  
16                  cause BellSouth to incur the cost of delivering traffic to Level 3.

17           **Q:    HOW DID CONGRESS RECOGNIZE THAT ILECS WOULD**  
18           **HAVE TO MODIFY THEIR NETWORKS IN OPENING UP**  
19           **LOCAL EXCHANGE MARKETS TO COMPETITION?**

20           A:    In crafting ILECs' interconnection obligations, Congress chose to require  
21                  ILECs to provide interconnection at any technically "feasible" point. As  
22                  the FCC found:

1 use of the term “feasible” implies that  
2 interconnecting or providing access to a LEC  
3 network element may be feasible at a particular  
4 point even if such interconnection or access requires  
5 a novel use of, or some modification to, incumbent  
6 LEC equipment. This interpretation is consistent  
7 with the fact that incumbent LEC networks were not  
8 designed to accommodate third-party  
9 interconnection or use of network elements at all or  
10 even most points within the network. If incumbent  
11 LECs were not required, at least to some extent, to  
12 adapt their facilities to interconnection or use by  
13 other carriers, the purposes of sections 251(c)(2)  
14 and 251(c)(3) would often be frustrated. For  
15 example, Congress intended to obligate the  
16 incumbent to accommodate the new entrant’s  
17 network architecture by requiring the incumbent to  
18 provide interconnection “for the facilities and  
19 equipment” of the new entrant. Consistent with that  
20 intent, the incumbent must accept the novel use of,  
21 and modification to, its network facilities to  
22 accommodate the interconnector or to provide  
23 access to unbundled elements.<sup>1</sup>

24 By choosing the word “feasible,” Congress indicated that ILECs would  
25 have to consider new uses of, and modifications to, their networks in order  
26 to provide interconnection to ALECs. It should also be noted that the FCC  
27 barred a consideration of cost in determining technical feasibility.

---

<sup>1</sup> *Implementation of the Local Competition Provisions in the Telecommunications Act of 1996*, CC Docket No. 96-98, First Report and Order, 11 FCC Rcd 15499, para. 202 (1996) (“*Local Competition Order*”), *aff’d in part and vacated in part sub nom. Competitive Telecommunications Ass’n v. FCC*, 117 F.3d 1069 (9th Cir. 1997) and *Iowa Utils. Bd. v. FCC*, 120 F.3d 753 (8th Cir. 1997), *aff’d in part and remanded, AT&T Corp. et al. v. Iowa Utils. Bd. et al.*, 119 S.Ct. 721 (1999), *vacated in part on remand, Iowa Utils. Bd. v. FCC*, 219 F.3d 744 (8th Cir. 2000), *motion for partial stay granted, Iowa Utils. Bd. v. FCC*, Case no. 96-3321 et al., Order Granting Motion for Partial Stay of the Mandate (8th Cir. Sept. 22, 2000).

1 Specifically, the FCC found that “the 1996 Act bars consideration of costs  
2 in determining ‘technically feasible’ points of interconnection or access.  
3 In the 1996 Act, Congress distinguished ‘technical’ considerations from  
4 economic concerns.” The FCC pointed out that the legislative history  
5 showed a conscious decision to remove cost from consideration under  
6 Sections 251(c)(2) and (c)(3), whereas other sections of the Act retained  
7 references to “economically burdensome” or “economically reasonable”  
8 obligations on carriers.<sup>2</sup>

9 **Q: HOW DID THE FCC RECOGNIZE THAT ILECS WOULD HAVE**  
10 **TO MODIFY THEIR NETWORKS IN OPENING UP LOCAL**  
11 **EXCHANGE MARKETS TO COMPETITION?**

12 A: In the FCC’s Local Competition proceeding, the United States Telephone  
13 Association (“USTA”) argued that the Act only requires ILECs to provide  
14 interconnection to their networks as they are “configured presently.”<sup>3</sup> The  
15 FCC rejected USTA’s interpretation of the Act, finding that:

16 the obligations imposed by sections 251(c)(2) and  
17 251(c)(3) include modifications to incumbent LEC  
18 facilities to the extent necessary to accommodate  
19 interconnection or access to network elements.<sup>4</sup>

---

<sup>2</sup> *Local Competition Order* at para. 199.

<sup>3</sup> *Id.* at para. 195.

<sup>4</sup> *Id.* at para. 198.

1 In many instances, the Act and the FCC’s rules show that neither Congress  
2 nor the FCC want to constrain the ability of an ALEC to innovate and  
3 deploy services, technologies, and network architectures that differ from  
4 the historical services, technologies, and network architectures deployed  
5 by ILECs. For example, Congress provided two alternative definitions of  
6 “telephone exchange service:”

7 The term “telephone exchange service” means (A)  
8 service within a telephone exchange, or within a  
9 connected system of telephone exchanges within the  
10 same exchange area operated to furnish to  
11 subscribers intercommunicating service of the  
12 character ordinarily furnished by a single exchange,  
13 and which is covered by the exchange service  
14 charge, or (B) comparable service provided through  
15 a system of switches, transmission equipment, or  
16 other facilities (or combination thereof) by which a  
17 subscriber can originate and terminate a  
18 telecommunications service.<sup>5</sup>

19 The FCC has also recognized differences in incumbent and competitive  
20 technologies in its reciprocal compensation rules, which, for example,  
21 define transport as:

22 the transmission and any necessary tandem  
23 switching of local telecommunications traffic  
24 subject to section 251(b)(5) of the Act from the  
25 interconnection point between the two carriers to  
26 the terminating carrier’s end office switch that  
27 directly serves the called party, or equivalent

---

facility provided by a carrier other than an incumbent LEC.<sup>6</sup>

Examples such as these show that Congress and the FCC anticipated differences between incumbent and competitive networks and crafted rules to ensure that ALECs would not be required to mimic ILECs. If the Commission were to require Level 3 to establish an IP in each local calling area, the Commission would be undermining Congressional and FCC intent to promote competition and innovation in network design.

**Q: BELLSOUTH WITNESS COX CLAIMS THAT BELLSOUTH SHOULD NOT BE RESPONSIBLE FOR “COLLECTING” TRAFFIC ORIGINATED BY BELLSOUTH’S CUSTOMERS IN EACH BELLSOUTH LOCAL CALLING AREA AND DELIVERING THAT TRAFFIC TO LEVEL 3 AT A SINGLE IP PER LATA (COX AT 5:8-18). IS BELLSOUTH’S POSITION SUPPORTED BY THE FCC?**

A: No. In fact, the opposite is true. The FCC has established “rules of the road” that address BellSouth’s obligation to interconnect with Level 3. The first rule is that Level 3 is entitled to select a single IP in a LATA for the exchange of traffic with BellSouth.

Section 251, and our implementing rules, require an incumbent LEC to allow a competitive LEC to interconnect at any technically feasible point. This

---

<sup>6</sup> 47 C.F.R. § 51.701(c) (emphasis added).

1 means that a competitive LEC has the option to  
2 interconnect at only one technically feasible point in  
3 each LATA.<sup>7</sup>  
4

5 Consistent with the FCC's approach, and recognizing that many LATAs in  
6 BellSouth's network are served by more than one access tandem, this  
7 Commission has, where requested by an ALEC (Sprint), found that it is  
8 technically feasible to require a single IP within a LATA.<sup>8</sup>

9 The second FCC rule is that BellSouth bears the burden of  
10 delivering traffic originated by BellSouth customers to Level 3's network  
11 and recovers such costs in the rates charged to its end users.

12 In essence, the originating carrier holds itself out as  
13 being capable of transmitting a telephone call to any  
14 end user, and is responsible for paying the cost of  
15 delivering the call to the network of the co-carrier  
16 who will then terminate the call. Under the  
17 Commission's regulations, the cost of the facilities  
18 used to deliver this traffic is the originating carrier's  
19 responsibility, because these facilities are part of the  
20 originating carrier's network. The originating  
21 carrier recovers the costs of these facilities through  
22 the rates it charges its own customers for making  
23 calls. This regime represents "rules of the road"  
24 under which all carriers operate, and which make it

---

<sup>7</sup> *Application by SBC Communications, Inc., Southwestern Bell Telephone Company, and Southwestern Bell Communications Services, Inc. d/b/a Southwestern Bell Long Distance*, CC Docket No. 00-65, Memorandum Opinion and Order, FCC 00-238, para. 78 (rel. June 30, 2000) ("Texas 271 Order").

<sup>8</sup> *Petition by Sprint Communications Company Limited Partnership d/b/a Sprint for arbitration with BellSouth Telecommunications, Inc. concerning interconnection rates, terms, and conditions, pursuant to the Federal Telecommunications Act of 1996*, Docket No. 961150-TP, Final Order on Arbitration, Order No. PSC-97-0122-FOF-TP, 9 (Feb. 3, 1997).

1 possible for one company's customer to call any  
2 other customer even if that customer is served by  
3 another telephone company.<sup>9</sup>  
4

5 BellSouth's obligation to deliver its originating traffic to Level 3 is not  
6 conditioned on Level 3 accepting such traffic within the local calling area  
7 in which it originated.

8 Although BellSouth attempts to paint a picture of Level 3 as the  
9 sole cost causer, that is not accurate. The "costs" BellSouth incurs to  
10 exchange traffic with Level 3 are the result of BellSouth's historic network  
11 design, BellSouth's continued monopoly share of local service customers  
12 in Florida, the need to interconnect numerous competitive networks to  
13 introduce competition in BellSouth's territory, the demands of its own  
14 customers, and the specific network interconnection architecture mandated  
15 by the FCC or agreed to by BellSouth and Level 3. Although I imagine  
16 BellSouth would prefer to retain its monopoly and not interconnect with  
17 Level 3, it no longer has that luxury. Under the FCC's "rules of the road,"  
18 BellSouth has the obligation to exchange traffic with Level 3 at a single IP  
19 within a LATA and the obligation to deliver its originating traffic to that  
20 IP at no cost to Level 3. As Timothy Gates testifies (Gates Direct at 22:4-  
21 23:2), BellSouth recovers the costs of originating its own customers'

---

<sup>9</sup> *TSR Wireless, LLC et al. v. US West Communications, Inc., et al.*, File Nos. E-98-13, E-98-15, E-98-16, E-98-17, E-98-18, Memorandum Opinion and Order, FCC 00-194, para. 34 (rel. June 21, 2000) ("*TSR Wireless*").

1 traffic through the rates it charges those customers. BellSouth is not  
2 entitled to recover the costs of its originating traffic from Level 3.

3 **Q: WHAT ABOUT MS. COX'S CLAIM (COX AT 13:12-24) THAT IF**  
4 **BELLSOUTH MUST INTERCONNECT WITH LEVEL 3 AT A**  
5 **SINGLE IP, LEVEL 3 MUST PAY FOR THE COSTS OF THIS**  
6 **"NOVEL" FORM OF INTERCONNECTION?**

7 A: Interconnection at a single IP per LATA is not "novel," it is required by  
8 the FCC and Section 251(c)(2). If BellSouth ever hopes to receive Section  
9 271 authority, it will have to show that it meets its Section 251(c)(2)  
10 obligation by offering interconnection at a single IP per LATA.<sup>10</sup> Indeed,  
11 as Level 3 explained through the previous testimony of Kevin Paul (Paul  
12 Direct at 5:24-6:3), the Parties today use one IP per LATA for local traffic  
13 in Florida. Given that we are operating in this manner today and given  
14 that the option to establish the single IP per LATA came from a 1997  
15 contract between MCI and BellSouth that Level 3 adopted, our request  
16 here is not "novel." Furthermore, the cite upon which Ms. Cox relies does  
17 not support BellSouth's position.

18 **Q: PLEASE EXPLAIN.**

19 A: Ms. Cox cites the FCC's Local Competition Order at paragraph 199 as  
20 support for BellSouth's position that ALECs must pay for costs associated

---

<sup>10</sup> See, *Texas 271 Order* at para. 78.

1 with the ALEC’s chosen form of interconnection. Ms. Cox relies upon the  
2 last sentence which reads:

3 Of course, a requesting carrier that wishes a  
4 “technically feasible” but expensive interconnection  
5 would, pursuant to section 252(d)(1), be required to  
6 bear the cost of that interconnection, including a  
7 reasonable profit.<sup>11</sup>

8 Ms. Cox claims that this sentence requires Level 3 to pay for  
9 dedicated facilities to haul both BellSouth-originated and Level 3-  
10 originated traffic from the single IP to each BellSouth local calling area.  
11 However, as Anthony Sachetti explains in his testimony, if BellSouth  
12 requires Level 3 to pay for dedicated facilities to each local calling area, it  
13 is requiring Level 3 to establish multiple IPs in each LATA, a result  
14 prohibited by FCC rules. BellSouth cannot use economic considerations  
15 to undermine the FCC’s and Commission’s determination that  
16 interconnection at a single IP per LATA is technically feasible and avoid  
17 providing Level 3 interconnection at a single IP.

18 If, as BellSouth claims, interconnection at a single IP per LATA  
19 causes BellSouth to incur additional costs, BellSouth must prove what  
20 those costs are under Section 252(d)(1) and must show that it does not  
21 recover such costs from its own customers. BellSouth has provided no  
22 evidence in this proceeding that it has incurred additional costs to

---

<sup>11</sup> *Local Competition Order* at para. 199.

1 accommodate Level 3's current single IP per LATA interconnection  
2 architecture. It has not shown that traffic exchanged today, or traffic it  
3 predicts it will exchange tomorrow, with Level 3 originates from or  
4 terminates to BellSouth customers at some distance from the single IP. It  
5 has not shown that it had to build or will have to build additional facilities  
6 solely to exchange traffic with Level 3. Nor has BellSouth provided any  
7 evidence that if such costs exist, it is not already compensated by the  
8 charges it receives from its end users. In short, BellSouth cannot rely on  
9 paragraph 199 of the Local Competition Order because BellSouth has not  
10 shown, through submission of concrete cost evidence, that interconnection  
11 at a single IP per LATA is expensive.

12 **Q: HAS LEVEL 3 MADE ANY PROPOSALS THAT ADDRESS**  
13 **BELLSOUTH'S CONCERN THAT A SINGLE IP PER LATA**  
14 **COULD BECOME UNREASONABLY EXPENSIVE FOR**  
15 **BELLSOUTH?**

16 A: Yes. As explained in more detail in Anthony Sachetti's testimony  
17 (including the Direct Testimony of Kevin Paul which Mr. Sachetti  
18 adopted), Level 3 has proposed language that would require the parties to  
19 establish additional IPs when a certain traffic threshold is reached.

20 **Q: MS. COX CLAIMS THAT BELLSOUTH'S RECIPROCAL**  
21 **COMPENSATION RATES DO NOT COVER THE COST OF**  
22 **DELIVERING LEVEL 3 ORIGINATED TRAFFIC FROM A**

1                   **SINGLE IP IN THE LATA TO THE BELLSOUTH END USER**  
2                   **(COX AT 24-25). DO YOU AGREE?**

3           A:     No. The BellSouth reciprocal compensation rate structure and agreed-to  
4                terms in the proposed contract flatly contradict her claim. These terms  
5                also show that BellSouth does recover any cost incurred in picking up  
6                Level 3-originated traffic at a single IP in the LATA and delivering it to  
7                one of BellSouth’s “specialized local networks.” BellSouth proposed, and  
8                this Commission accepted, elemental reciprocal compensation rates. That  
9                is, BellSouth is compensated for tandem switching, transmission, and end  
10              office termination. Furthermore, in instances where BellSouth must switch  
11              Level 3-originated traffic through more than one tandem, BellSouth has  
12              proposed, and Level 3 has agreed to, additional rates to reflect such  
13              additional tandem switching and transmission (BellSouth calls this  
14              “Multiple Tandem Access”). Together, the elemental rate structure and  
15              the agreement to charge additional tandem switching and transmission  
16              charges when BellSouth switches Level 3-originated traffic through  
17              multiple tandems permit BellSouth to charge Level 3 for each element of  
18              the BellSouth network used to deliver the call from the IP to the called  
19              party. In Ms. Cox’s example, therefore, BellSouth has established a  
20              mechanism to recover its costs of hauling Level 3-originated traffic from  
21              Jacksonville to Lake City.

1           **Q: DO YOU AGREE WITH MS. COX THAT THE ACT AND FCC**  
2           **ORDERS SUPPORT BELLSOUTH’S ABILITY TO DESIGNATE**  
3           **THE IP FOR ITS ORIGINATED TRAFFIC (COX AT 15:16-20,**  
4           **16:20-21)?**

5           A: No. Ms. Cox is incorrect when she claims that “nothing in the Act limits  
6           BellSouth’s ability to designate a POI for traffic it originates to Level 3.”  
7           (Cox at 15:19-20) BellSouth is wrong to suggest that because the Act may  
8           not explicitly address this issue, BellSouth somehow has the ability and  
9           right to designate IPs. By placing the obligation to provide  
10          interconnection at any technically feasible point in Section 251(c)(2),  
11          which applies only to incumbent LECs, Congress did address this issue. If  
12          Congress had wanted ALECs to bear the same obligation to provide  
13          interconnection at any technically feasible point, it would have specifically  
14          stated that outcome by placing this duty under Section 251(b), which  
15          applies to all LECs.

16          **Q: MS. COX CLAIMS THE FCC’S CONSIDERATION OF MCI’S IP**  
17          **PROPOSAL SUPPORTS BELLSOUTH’S POSITION (COX AT**  
18          **16:1-16:21). DO YOU AGREE WITH HER ANALYSIS?**

19          A: No. Ms. Cox quotes selectively from the FCC’s order and ignores the  
20          FCC’s consideration of Bell Atlantic’s IP proposal. Although Ms. Cox  
21          relies on a quote from paragraph 220 of the FCC’s order, she omits the

1 footnote from that quote and the context created by contrasting the MCI  
2 and Bell Atlantic proposals.

3 **Q: COULD YOU PLEASE RESTATE THE QUOTE FROM MS.**  
4 **COX'S TESTIMONY?**

5 A: Yes. Ms. Cox relies on the following quote for the proposition that the  
6 FCC's order permits BellSouth to designate IPs for its originated traffic:

7 We also conclude that MCI's POI proposal,  
8 permitting interconnecting carriers, both  
9 competitors and incumbent LECs, to designate  
10 points of interconnection on each other's networks,  
11 is at this time best addressed in negotiations and  
12 arbitrations between parties.<sup>12</sup>

13 The footnote that Ms. Cox failed to quote provides that:

14 Of course, requesting carriers have the right to  
15 select points of interconnection at which to  
16 exchange traffic with an incumbent LEC under  
17 section 251(c)(2).

18  
19 The footnote reaffirms the ALEC's right to select IPs for the exchange of  
20 traffic with BellSouth, including receipt of BellSouth-originated traffic. In  
21 the Intermedia arbitration, this Commission rejected BellSouth's one-sided  
22 definition of the IP, recognizing that at the IP "traffic is mutually  
23 exchanged between carriers."<sup>13</sup>

---

<sup>12</sup> *Local Competition Order* at para. 220.

<sup>13</sup> *Petition of BellSouth Telecommunications, Inc. for Section 252(b) arbitration of interconnection agreement with Intermedia Communications, Inc.*, Docket No. 991854-TP, Final Order on Arbitration, Order No. PSC-00-1519-FOF-TP, 48 (Aug. 22, 2000).

1 Ms. Cox also ignores the beginning of paragraph 220, and rejection  
2 of Bell Atlantic's IP proposal, which supports Level 3's position that  
3 Congress has addressed this issue:

4 Finally, as discussed below, we reject Bell  
5 Atlantic's suggestion that we impose reciprocal  
6 terms and conditions on incumbent LECs and  
7 requesting carriers pursuant to section 251(c)(2).  
8 Section 251(c)(2) does not impose on non-  
9 incumbent LECs the duty to provide  
10 interconnection. The obligations of LECs that are  
11 not incumbent LECs are generally governed by  
12 sections 251(a) and (b), not section 251(c). Also,  
13 the statute itself imposes different obligations on  
14 incumbent LECs and other LECs (*i.e.*, section  
15 251(b) imposes obligations on all LECs while  
16 section 251(c) obligations are imposed only on  
17 incumbent LECs). We do note however, that  
18 251(c)(1) imposes upon a requesting  
19 telecommunications carrier a duty to negotiate the  
20 terms and conditions of interconnection agreements  
21 in good faith.<sup>14</sup>

22 Taken in context, the FCC's rejection of MCI's IP proposal  
23 establishes that while the default rule permits ALECs to designate the IP  
24 for the exchange of both parties' originated traffic, ALECs nevertheless  
25 have a duty to negotiate in good faith when ILECs request additional IPs.  
26 As addressed in more detail in Anthony Sachetti's testimony, Level 3 has  
27 met that duty and has offered at least two compromise proposals to govern  
28 the establishment of additional IPs.

---

<sup>14</sup> *Local Competition Order* at para. 220 (footnotes omitted).

1           **Q:    WHAT ACTION DO YOU RECOMMEND THE COMMISSION**  
2                   **TAKE?**

3           A:    The Commission should find that Level 3 has the right to interconnect  
4                   with BellSouth at a single IP in each LATA. Since BellSouth has  
5                   presented no evidence supporting its claim that it incurs costs to deliver  
6                   BellSouth-originated traffic to the single IP, and has presented no evidence  
7                   that any alleged costs are not recovered from its end users, the  
8                   Commission should adopt one of Level 3's proposed alternatives as a  
9                   proxy for measuring when interconnection at a single IP per LATA  
10                  becomes "expensive" for BellSouth such that additional IPs are warranted.

11          **Q:    DOES THIS CONCLUDE YOUR TESTIMONY?**

12          A:    Yes, it does.
