

GULF POWER COMPANY
TESTIMONY AND EXHIBITS OF
L. S. NOACK

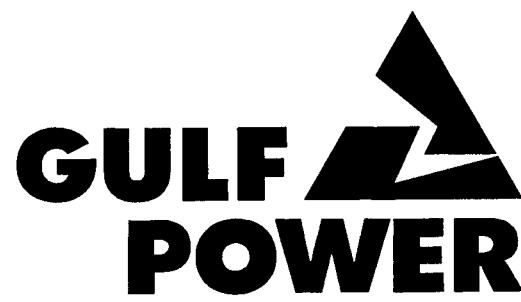

GENERATING PERFORMANCE INCENTIVE FACTOR

TARGETS FOR
JANUARY 2008 - DECEMBER 2008

Before

THE FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 070001-EI

A SOUTHERN COMPANY

DOCUMENT NUMBER-DATE
08005 SEP-48
FLORIDA COMMISSION CLERK

1 **GULF POWER COMPANY**

2 **Before the Florida Public Service Commission**

3 **Direct Testimony of**

4 **L. S. Noack**

5 **Docket No. 070001-EI**

6 **Date of Filing: September 4, 2007**

7

8 Q. Please state your name, address, and occupation.

9 A. My name is Lonzelle S. Noack. My business address is One Energy Place,
10 Pensacola, Florida 32520-0335. My current job position is Power Generation
11 Specialist, Senior for Gulf Power Company.

12

13 Q. Please describe your educational and business background.

14 A. I received my Bachelor of Science degree in Environmental Engineering from the
15 University of Florida in 1995 and received my Master of Business Administration
16 degree from the University of West Florida in 2000. I joined Gulf Power in 1995
17 as an Environmental Engineer and served in that role with increasing levels of
18 responsibility for over six years. Major responsibilities included coordination of
19 federal and state air-related compliance testing for all Gulf Power generating units,
20 management of the Continuous Emission Monitoring (CEM) System program at
21 each of the Company's generating facilities, and coordination of the Company's air
22 compliance reporting to state and federal regulatory agencies. I was also
23 responsible for serving as Gulf's Environmental Subject Matter Expert on
24 Company and system-wide compliance teams. As previously mentioned in my
25 testimony, my current job position is Power Generation Specialist, Senior at Gulf

1 Power Company. In this position, I am responsible for preparing all GPIF filings
2 as well as other generating plant reliability and heat rate performance reporting.

3

4 Q. What is the purpose of your testimony in this proceeding?

5 A. The purpose of my testimony is to present GPIF targets for Gulf Power Company for the
6 period of January 1, 2008 through December 31, 2008.

7

8 Q. Have you prepared an exhibit that contains information to which you will refer in
9 your testimony?

10 A. Yes. I have prepared one exhibit consisting of three schedules.

11

12 Q. Was this exhibit prepared by you or under your direction and supervision?

13 A. Yes, it was.

14

15 Counsel: We ask that Ms. Noack's exhibit consisting of three schedules be
16 marked for identification as Exhibit_(LSN-2).

17

18 Q. Which units does Gulf propose to include under the GPIF for the subject period?

19 A. We propose that Crist Units 4, 5, 6, and 7, Smith Units 1 and 2, and Daniel Units 1
20 and 2, continue to be the Company's GPIF units. The projected net generation
21 from these units, which represent all of Gulf's qualifying base and intermediate
22 load units for GPIF, is approximately 80% of Gulf's projected net generation for
23 2008.

24

25 Q. What are the target heat rates Gulf proposes to use in the GPIF for these units for

1 the performance period January 1, 2008 through December 31, 2008?
2 A. I would like to refer you to page 47 of Schedule 1 of my exhibit where these targets
3 are listed.

4

5 Q. How were these proposed target heat rates determined?
6 A. They were determined according to the GPIF Implementation Manual procedures
7 for Gulf. For Daniel Units 1 and 2, the use of the Btu/lb independent variable that
8 was stipulated and approved in Commission Order PSC-99-2512-FOF-EI and used
9 in the 2006 GPIF Target Filing, Docket No. 060001-EI, was evaluated. However,
10 the results of the regression analyses indicated that the Btu/lb variable was not
11 statistically significant for this performance period and was, therefore, not included
12 in the target heat rate equations for Daniel Units 1 and 2.

13

14 Q. Describe how the targets were determined for Gulf's proposed GPIF units.
15 A. Page 2 of Schedule 1 of my exhibit shows the target average net operating heat rate
16 equations for the proposed GPIF units, and pages 4 through 43 of Schedule 1
17 contain the weekly historical data used for the statistical development of these
18 equations. Pages 44 through 46 of Schedule 1 present the calculations that provide
19 the unit target heat rates from the target equations.

20

21 Q. Were the maximum and minimum attainable heat rates for each proposed GPIF
22 unit, indicated on page 47 of Schedule 1 of your exhibit, calculated according to
23 the appropriate GPIF Implementation Manual procedures?

24 A. Yes.

25

1 Q. What are the proposed target, maximum, and minimum equivalent availabilities for
2 Gulf's units?

3 A. The target, maximum, and minimum equivalent availabilities are listed on page 4
4 of Schedule 2 of my exhibit.

5

6 Q. How were the target equivalent availabilities determined?

7 A. The target equivalent availabilities were determined according to the standard
8 GPIF Implementation Manual procedures for Gulf and are presented on page 2 of
9 Schedule 2 of my exhibit.

10

11 Q. How were the maximum and minimum attainable equivalent availabilities
12 determined for each unit?

13 A. The maximum and minimum attainable equivalent availabilities, which are
14 presented along with their respective target availabilities on page 4 of Schedule 2
15 of my exhibit, were determined per GPIF Implementation Manual procedures for
16 Gulf.

17

18 Q. Ms. Noack, has Gulf completed the GPIF minimum filing requirements data
19 package?

20 A. Yes, we have completed the minimum filing requirements data package. Schedule
21 3 of my exhibit contains this information.

22

23 Q. Ms. Noack, would you please summarize your testimony?

24 A. Yes. Gulf asks that the Commission accept:

25

- 1 1. Crist Units 4, 5, 6 and 7, Smith Units 1 and 2, and Daniel Units 1 and 2 for
2 inclusion under the GPIF for the period of January 1, 2008 through
3 December 31, 2008.
- 4
- 5 2. The target, maximum attainable, and minimum attainable average net
6 operating heat rates, as proposed by the Company and as shown on page
7 47 of Schedule 1 and also on page 5 of Schedule 3 of my exhibit.
- 8
- 9 3. The target, maximum attainable, and minimum attainable equivalent
10 availabilities, as proposed by the Company and as shown on page 4 of
11 Schedule 2 and also on page 5 of Schedule 3 of my exhibit.
- 12
- 13 4. The weekly average net operating heat rate least squares regression
14 equations, shown on page 2 of Schedule 1 and also on pages 20 through 35
15 of Schedule 3 of my exhibit, for use in adjusting the annual actual unit
16 heat rates to target conditions.

Data Base for CRIST 4 Target Heat Rate Equation

HR Average net operating heat rate based on unadjusted measured fuel consumption, before adjustment for unit start ups after shutdown for 24 hours or more, in BTU/KWH.

HOUR Number of hours the unit was synchronized during the week.

AMW Average load on the unit, in MW.

LSRF Load square range factor, in MW².

JAN to NOV The number 1 indicates the month of the observation. All 0's indicate December.

NS Number of unit start ups during the week after being shut down for 24 hours or more.

YEAR The year of the observation.

• Indicates data points removed from the analysis of the target heat rate equation because they were out of the 90% confidence interval.

Data Base for CRIST 5 Target Heat Rate Equation

HR	Average net operating heat rate based on unadjusted measured fuel consumption, before adjustment for unit start ups after shutdown for 24 hours or more, in BTU/KWH.
HOUR	Number of hours the unit was synchronized during the week.
AMW	Average load on the unit, in MW.
LSRF	Load square range factor, in MW^2.
JAN to NOV	The number 1 indicates the month of the observation. All 0's indicate December.
NS	Number of unit start ups during the week after being shut down for 24 hours or more.
YEAR	The year of the observation.
*	Indicates data points removed from the analysis of the target heat rate equation because they were out of the 90% confidence interval.

Data Base for CRIST 6 Target Heat Rate Equation

HR Average net operating heat rate based on unadjusted measured fuel consumption, before adjustment for unit start ups after shutdown for 24 hours or more, in BTU/KWH.

HOUR Number of hours the unit was synchronized during the week.

AMW Average load on the unit, in MW.

LSRF Load square range factor, in MW^2.

JAN to NOV The number 1 indicates the month of the observation. All 0's indicate December.

NS Number of unit start ups during the week after being shut down for 24 hours or more.

YEAR The year of the observation.

* Indicates data points removed from the analysis of the target heat rate equation because they were out of the 90% confidence interval.

Data Base for CRIST 7 Target Heat Rate Equation

HR Average net operating heat rate based on unadjusted measured fuel consumption, before adjustment for unit start ups after shutdown for 24 hours or more, in BTU/KWH.

HOUR Number of hours the unit was synchronized during the week.

AMW Average load on the unit, in MW.

LSRF Load square range factor, in MW².

JAN to NOV The number 1 indicates the month of the observation. All 0's indicate December.

NS Number of unit start ups during the week after being shut down for 24 hours or more.

YEAR The year of the observation.

• Indicates data points removed from the analysis of the target heat rate equation because they were out of the 90% confidence interval.

Notes Regarding Estimated Planned Outage Schedules

Gulf Power Company

Period of: January 2008 - December 2008

It is important to understand that estimated dates for planned outages and their bar chart schedules are frequently changed in timing and work scope due to system conditions, findings of inspections, subcontractor requirements, material availability and so on.

Please note that in addition to the outages scheduled for the target period of January 2008 - December 2008, the outages shown below are currently planned and could be rescheduled for the target period.

Plant & Unit	Planned Outage Dates	Reason for Outage
	None	

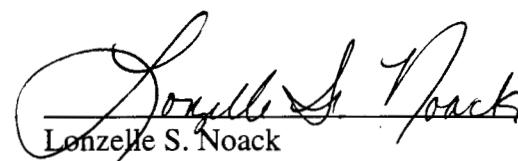

Filed: September 4, 2007

)
COUNTY OF ESCAMBIA)

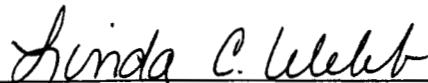

Docket No. 070001-EI

Before me, the undersigned authority, personally appeared Lonzelle S. Noack, who being first duly sworn, deposes, and says that she is the Power Generation Specialist, Senior for Gulf Power Company, a Florida corporation, and that the foregoing is true and correct to the best of her knowledge, information, and belief. She is personally known to me.

Lonzelle S. Noack
Power Generation Specialist, Senior

Sworn to and subscribed before me this 29th day of August, 2007.

Linda C. Webb
Notary Public, State of Florida at Large
