Docket No. 090130-EI

Filed: August 7, 2009

PREHEARING STATEMENT OF ASSOCIATED INDUSTRIES OF FLORIDA

COMES NOW, Intervenor Associated Industries of Florida (“AIF”), pursuant to Order No. PSC-09-0159-PCO-EI, and respectfully files its prehearing statement with the Public Service Commission as follows:

I. AIF WITNESSES

At this time, AIF does not anticipate calling any witnesses in this matter.

II. AIF EXHIBITS

At this time, AIF does not anticipate filing any exhibits in this matter.

III. STATEMENT OF BASIC POSITION

AIF asserts that the Commission should approve FPL’s forward-thinking efforts to invest in electric infrastructure. FPL’s proposal will make Florida’s infrastructure stronger, more storm resistant, smarter, better controlled, more reliable, more fuel efficient and more environmentally friendly. Moreover, AIF also views FPL’s investments as a much-needed Florida economic stimulus package providing direct employment for many Florida residents as well as numerous business opportunities for many Florida businesses, including AIF members.

AIF supports a rate increase for FPL and the investments in Florida it will make possible for several reasons. In addition to the shorter term beneficial economic effects of building new and improved electric infrastructure, these investments will have much longer-term beneficial effects for all of AIF’s members and all Floridians. FPL is proposing through its requested base

rate increase to make nearly \$16 billion in new capital investments in Florida in order to continue providing such service. Construction and operation of the improved facilities proposed by FPL, as well as FPL's continued provision of reliable, affordable electric service, will provide essential support AIF's members need in order to maintain and expand their own businesses that in turn employ many thousands of Florida residents. AIF notes that FPL's electric rates are lower than those of utilities in most major metropolitan areas in the United States -- a key factor considered by businesses when deciding where to invest and where to employ people -- which will also help economic growth and economic recovery.

Fundamentally, AIF's members require adequate, reasonably priced electricity in order to conduct their business consistently with the needs of their customers and ownership. AIF endorses environmental and economic regulatory policies that create a stable investment climate so that electric utilities such as FPL can build and operate energy generation, transmission and distribution systems to meet Florida's energy needs. To this end, AIF encourages the Florida Public Service Commission to ensure that through the rates granted in this proceeding FPL remains competitive in the current uncertain capital markets and is able to attract the investor dollars needed to support the beneficial investments in Florida described herein.
